Our handled axes have the heads securely boxed, with the handles projecting, and fully burlapped. Handled axes weigh about 16 lbs. per dozen more than the corresponding axes unhandled. In ordering handled axes, always specify the brand and weight of the axe, and prefix to the axe number the letter designating the handle, thus:—"1 dozen No. B2 U. S. A. Axes, 3½ to 4½ lbs.," which shows that No. 2 U. S. A. Yankee Pattern Axes are desired, fitted with No. B "O. V. B." octagon handles.

O.V.B. CHERRY BEVELED UNHANDLED AXES.

No. 01.

Forged Steel Body, Extra Quality Crucible Tool Steel Bits, Full Polished, with Cherry-Lacquered Pressed Bevels, and Deep Etched Cherry Enameled O. V. B. Branding. The Handsomest Finish on the Market. Every Axe Carefully Hand-Tempered Over Natural Gas.

No. 010.

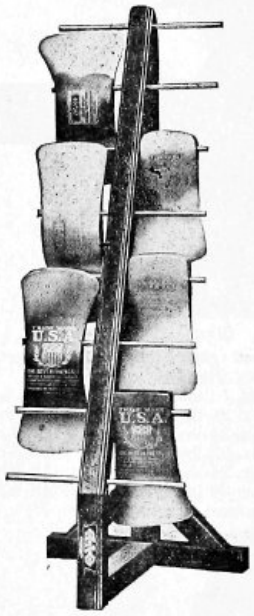
BROAD AXES, ADZES AND AXE RACKS.

AXE RACKS.

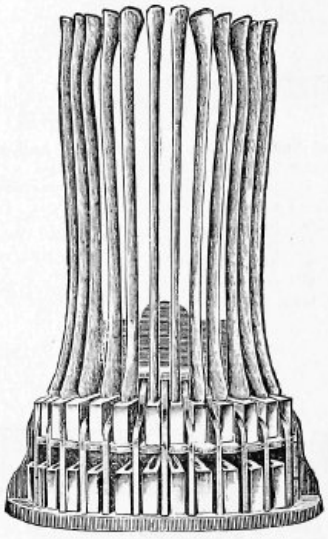


"OUR VERY BEST."

No. 15 ⊕V⊕—Oak frame with handsome "furniture finish," varnished, nickel plated steel pins, will hold up to 16 unhandled axes, height 32 in., base 11¾×12½ in., pins project 4 in., w't about 10 lbs.
each.....$1.80

Axes can be placed as desired on the rack without over-balancing. A handsome display stand for the counter or show window.

ONE IN A CRATE.



No. 10—SENSIBLE, hardwood, painted red, width 28 in., depth 14 in., holds 16 handled and 16 unhandled axes, w't 21 lbs.....each $4.50

Can be used on the counter or on the wall by supporting with brackets. For counter use a fine display can be made by placing two racks back to back. The rack is ornamental and attractive, and will save its cost by keeping axes off the floor, away from the dirt and sprinkler.

HALF DOZEN IN A BOX.

OVB HAMMERS.

The heads are forged from one piece of the best crucible steel and receive more blows in forging than practically any competitive brand, making the steel tougher. They are tempered in brine, making the face very hard. The hammers are then tested by striking the face and claws several sharp blows, which they must stand without showing a mark. The handles are of finest white hickory, smoothly finished and waxed, and are extra full size, giving a firm grip.

OVB ADZE EYE NAIL.

HALF DOZEN IN A BOX

No. 8—10½ in. beechwood handle, 2½ in. cast steel cutter, brass set screws, w't per doz. 3¾ lbs.....per dozen $14.50

HALF DOZEN IN A BOX.

RAZOR EDGE.

No. 72—Japanned, 11 in., 2 in. cutter, w't per doz. 9½ lbs.....per dozen $12.00

No. 73—Japanned, 11 in., 2½ in. cutter, w't per doz. 10½ lbs.....per dozen 13.20

ONE QUARTER DOZEN IN A BOX.

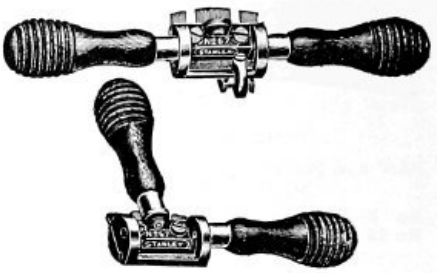
No. 84—Boxwood, 11 in., 2 in. cutter, w't per doz. 3½ lbs.....per dozen $16.80

No. 85—Boxwood, 12 in., 2½ in. cutter, w't per doz. 4¼ lbs.....per dozen 18.00

So called from the shape of the cutter, which is hollow ground, giving a keen cutting edge. The adjustable front can be moved up or down, opening or closing the mouth, and with the cutter properly adjusted, a coarse or very fine shaving can be cut.

ONE IN A BOX.

UNIVERSAL.



No. 67—STANLEY'S IMPROVED, nickel plated, rosewood handle, for curved or straight work, length 9½ in., w't per doz. 10 lbs.....per dozen $18.00

This spoke shave has two detachable bottoms; adapting it equally well to circular work or straight; and, by means of a movable width-gauge, the tool can be used in rabbeting. Both handles are detachable, and either of them can be screwed into a socket on top of the stock, thus making it possible to work into corners or panels as no other spoke shave can do.

ONE IN A BOX.

GOODELL'S.

No. 20—Nickel plated, removable rosewood handles, 2 in. cast steel cutter, length 10 in., w't per doz. 5½ lbs., per dozen..... $9.00

The circular shape of this tool enables it to work in smaller circles than other shaves. The angle of the knife is such that it cuts instead of scraping the grain of the wood. Either handle can be removed to work in cramped places.

HALF DOZEN IN A BOX.

CHAMFER.

No. 65—STANLEY'S, 9½ in. japanned handle, 1½ in. cast steel straight edge cutter, 2 adjustable and detachable chamfer guides, tinned set screws, w't per doz. 9 lbs.....per dozen $6.00

This tool will chamfer an edge of any desired width up to 1½ inches. The chamfer guides can be easily removed, making an ordinary spoke shave.

HALF DOZEN IN A BOX.

CHISELS, GOUGES AND SLICKS.

SOCKET FIRMER CHISELS.

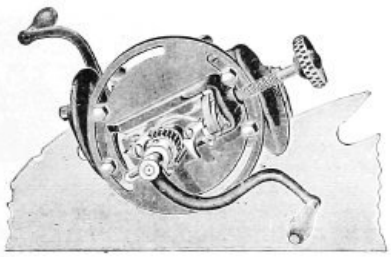
Each	$19.50	23.50	28.00		

When ordering saw mandrels, send sketch and give distance from saw to end of mandrel, if the pulley is between the bearings. If the pulley is on the end of mandrel, give distance from saw to inside edge of pulley. Also, whether the pulley is on the right or left hand side of mandrel when saw is running toward you. Mandrels are made with pulley on right hand side, with left hand thread, unless otherwise ordered.

GUMMERS, CUTTERS, SWAGES AND HANDLES.

VICTOR SAW GUMMERS.



Self-Feeding, Complete, with One Cutter Shaft, Cutter Grinder and Three Cutters.

No. 1—Large shaft for 1, 1⅛, 1¼, 1⅜ and 1½ in. cutters.....each $18.00
No. 2—Medium shaft for ½, ⅝, ¾ and ⅞ in. cutters.....each 18.00
No. 3—Small shaft for ⅜ in. cutter each..... 18.00

Extra shafts can be furnished with gummers, so that all above sizes can be used in one machine, if so desired. In ordering, specify size of cutter wanted.

The Victor is made of the very best material, the lighter parts being of malleable iron and the shaft of steel, making it light and at the same time strong. It will gum all saws, from a small circular saw (with ⅜ in. gullet), to the largest made (with 1½ in. gullet); also all mill, mulay and cross-cut saws. When properly adjusted, all the gullets will be of the same depth; the gummers can be set to gum at any angle, from horizontal to perpendicular, by simply turning the circular plate.

ONE IN A BOX. WEIGHT 25 LBS.

GUMMER CUTTERS.

Inches	½	⅝	¾	⅞	
Each	$0.30	.35	.40	.45	
Inches	1	1⅛	1¼	1⅜	1½
Each	$0.50	.60	.70	.80	.90

Cutters for No. 2 gummer have ⅝ in. hole. Cutters for No. 1 gummer have ⅜ in. hole.

The 1 in. to 1½ in. cutters are for the No. 1 gummer; the ½ in. to ⅞ in. for the No. 2 gummer.

SAW SWAGES.

Swage; Jumper or Upset.

No. 1—CONQUEROR, for large circular saws, polished steel, carefully hardened and tempered, with b ued polished extra steel band, length 4¾ in., w't 8 oz....each $3.00

PLUMBERS'.

"OUR VERY BEST".

CVB—20 in., special steel blade tempered to suit purpose of sawing nails and metal without injury to teeth, can be resharpened, adjustable carved handle, nickeled trimmings, w't per doz. 11 lbs.....per dozen $16.00

This saw will prove most successful where nails are numerous and ruinous to all tools not adapted to cut them. In wood it makes a smooth cut. The handle can be adjusted to suit any pitch of blade required for the work and can be instantly fastened.

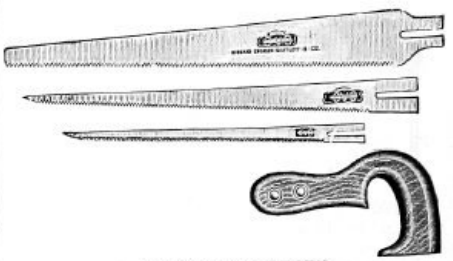
No. 6—Polished beechwood handle, with 2 polished iron saw screws, 3 detachable blades, making 10 in. key hole saw, 14 in. compass saw, and 18 in. pruning saw, w't per doz. 12 lbs.....per dozen $9.00

ONE-QUARTER DOZEN IN A BOX

NESTS OF SAWS.



"OUR VERY BEST".

D-VB—Beech handle, 2 nickel plated screws, 3 detachable steel blades, making 10 in. key hole saw, 14 in. compass saw and 18 in. pruning saw, w't per doz. 10 lbs.....per dozen $11.00

ONE-QUARTER DOZEN IN A BOX.

PLUMBERS' NESTS OF SAWS.

No. 600—DISSTON'S, consists of handle, tightener, and three blades—one 18 in. specially tempered, for wood and metal, one 14 in. compass blade and one 12 in. keyhole blade, w't per doz. 14½ lbs.....per dozen $12.00

The blades are fastened in the handle by means of the special lever device, which is so arranged as to take in the different thicknesses of the various blades, the pin in bolt-head being moved forward or backward as may be required; and this at the same time, permits the keeping of the lever on a line with the handle so it will not interfere with the working of the saw. No screw driver required.

ONE-QUARTER DOZEN NESTS IN A BOX.

KEYHOLE SAWS.

No. 95—DISSTON'S, round hardwood handle, polished, nickel plated ferrule, 10 in. ground thin-back blade, w't per doz. 3 lbs.....per dozen $4.00

The handle is slotted clear through, permitting the adjustment of blade for length of cutting edge required. The blade is firmly held in place by means of a steel grip inside of handle, tightened by nickel plated thumb screw.

HALF DOZEN IN A BOX.

KEYHOLE SAWS AND PADS.

No. 10—DISSTON'S, japanned iron handle, 7 in. cast steel blade, w't per doz. 2½ lbs. per dozen $2.00

ONE DOZEN IN A BOX.

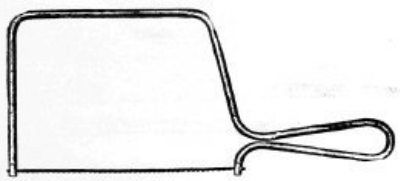
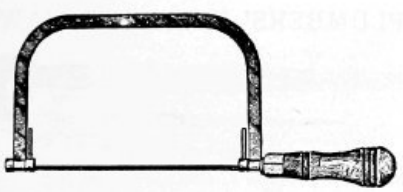
SAWS, FRAMES AND BLADES.

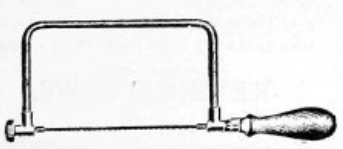
COPING SAWS.



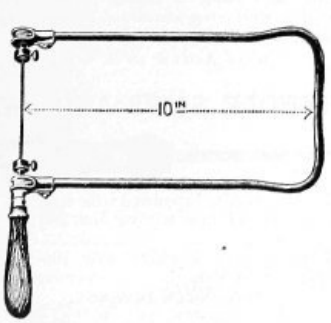
No. 100—¼ in. nickel plated steel frame, 6 in. blade with turned ends, 2 slots, for sawing at right angles, 1 dozen extra blades with each saw, w't per doz. 4¼ lbs .....per dozen $4.50
No. 101—Extra blades for above, per dozen..... .20
SAWS, HALF DOZEN IN A BOX. BLADES, ONE DOZEN IN A BUNDLE.



No. FPM.—$\frac{1}{16}$×6½ in. blade, solid steel frame, oak handle, adjustable to any position, w't per doz. 5¾ lbs., per dozen..... $11.00
Extra Llades for No. FPM.....per dozen .75
These blades are so evenly tempered they will cut light metals as well as wood, and can be filed.
FOUR SAWS IN A BOX. ONE EXTRA BLADE.



No. 110—¼ in. nickel plated steel frame, 4 in. deep, varnished wood handle, blade adjustable to any position, six extra 6 in. blades, w't per doz. 7 lbs.....per dozen $12.00
ONE IN A BOX.

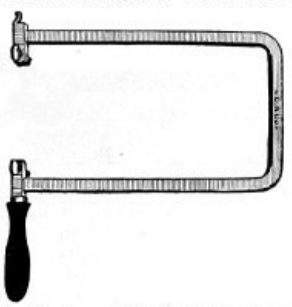


No. 7—10 in. deep, ⅜ in. nickel plated tubular frame, birch handle, 5 in. blade, adjustable to any position, w't per doz. 12 lbs.....per dozen $24.00
The back is tubular, through which runs a cable, connecting the pulleys on both ends of the frame, by which means the saw frame can be turned to any angle desired by the handle without turning the blade or removing it from the work.
ONE IN A BOX.

COPING SAWS.

No. 1—JONES', cable, nickel plated frame, hardwood handle, 6 in. blade, depth from blade to back 4 in., complete with one-half dozen blades, w't per doz. 7 lbs. .....per dozen $15.00
This saw is constructed with a tubular back, through which runs a cable connecting both ends of frame, allowing the blade to turn to any angle by simply turning the handle without removing it from work.

BRACKET SAW FRAMES.



No. 61½—12 in. polished steel frame, ebonized wood handle, for 5 in. blades, w't per doz. 7 lbs.....per dozen $5.00
ONE DOZEN IN A PACKAGE.

JEWELERS' SAW FRAMES

Per dozen	$2.30	2.50	2.70	3.25	4.00	4.50

ONE DOZEN IN A BOX.

"O. V. B." regular blades are recommended for cutting soft steel and cast iron. Medium blades are good all-round saws, desirable for cutting tool steel and hard metals. Fine blades are adapted for cutting tool steel, drill rod, iron pipe, sheet metal, brass, etc. Hard blades are preferable to flexible for the average user.

When inserting hand blades strain well in frame. Run slowly (not over 60 strokes a minute.) Bear hard on forward stroke to avoid slipping and lift slightly on backward stroke. Avoid bending sideways, adding pressure as edge of teeth wear and tighten blade in frame after first few cuts.

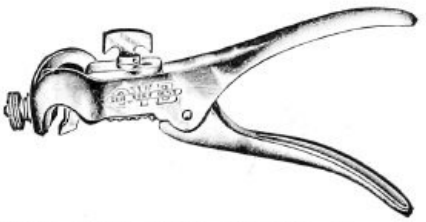
NO. 21, HALF DOZEN; NO. 23, ONE IN A BOX.

No. 17—TAINTOR POSITIVE, entirely of steel, parts interchangeable, length 6¼ in., w't per doz. 6¼ lbs., per dozen..... $14.00

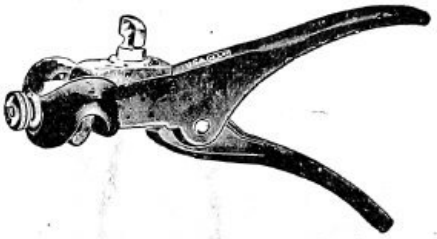
Consists of frame to which are attached two movable handles, an anvil and punch. Twenty adjustments are obtainable. The punch moves in nearly the same circle as the tooth which it sets, consequently the tooth is not distorted nor its point curled as in the case where the punch approaches the tooth in a straight line. It also leaves the inside face of the tooth of a much better shape. Faces of anvil are numbered and will produce any setting ordinarily required.

HALF DOZEN IN A BOX. ONE GROSS IN A CASE.



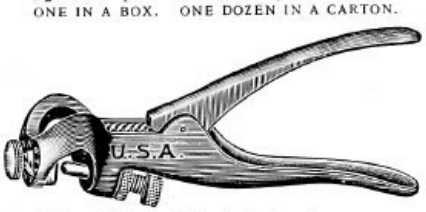
GVB—Nickel plated saw sets, adjustable, tempered steel spring, hardened anvil and plunger, length 6½ in., w't per doz. 9½ lbs..... per dozen $13.50

ONE IN A BOX. ONE DOZEN IN A CARTON.



No. 101—"U. S. A.," blued, for hand saws, adjustable, tempered steel spring, hardened anvil and plunger, length 6½ in., w't per doz. 9½ lbs... per dozen $10.00

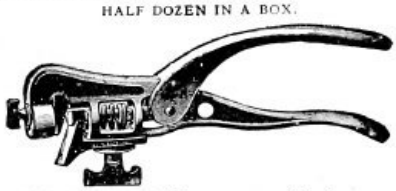
ONE IN A BOX. ONE DOZEN IN A CARTON.



No. 295—"U. S. A.," blued, for hand saws, adjustable from 4 to 16 points, length 6¾ in., w't per doz. 9 lbs., per dozen..... $14.00

Made with a revolving eccentric anvil, has the required level and length of all saw teeth ranging from 4 to 16 points, figures on the dial indicate the number of teeth to the inch.

HALF DOZEN IN A BOX.



No. 105—MORRILL'S PATTERN, polished, for timber and board saws, from 6 to 14 gauge (circumference of saw makes no difference), length 15 in., w't per doz. 42 lbs. ..... per dozen $18.00

No. 103—MORRILL'S PATTERN, polished, for single tooth cross-cut and small circular saws, length 10 in., w't per doz. 14½ lbs..... per dozen 14.50

No. 104—MORRILL'S PATTERN, polished, for Champion or M tooth cross-cut saws, length 10 in., w't per doz. 12 lbs., per dozen 14.50

HALF DOZEN IN A BOX.

No. 1—MORRILL'S, polished, for hand saws, length 6½ in., w't per doz. 8 lbs., per dozen..... $12.00

Extra Plungers for No. 1..... each .20

Extra Anvils and Screws for No. 1, per set .40

HALF DOZEN IN A BOX.

No. 11—MORRILL'S, polished, for hand, scroll and band saws, length 6¾ in., w't per doz. 8 lbs..... per dozen $13.50

HALF DOZEN IN A BOX.

No. 95—MORRILL'S, polished, for hand saws, adjustable for 4 to 12 points, length 7 in., w't per doz. 7 lbs., per dozen..... $13.50

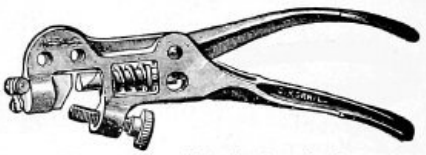
The adjustable feature whereby the correct set for every saw (according to the number of teeth to the inch) is instantly found, is an important improvement over anything yet produced by this maker. The wheel bearing numbers can be instantly adjusted.

HALF DOZEN IN A BOX.

No. 50—MORRILL'S SPECIAL, nickel plated, for hand saws, adjustable for 4 to 16 points, length 6 in., w't per doz. 8 lbs..... per dozen $16.00

This saw set is made with an improved revolving anvil and will give the correct set to hand saws having from 4 to 16 teeth to the inch.

HALF DOZEN IN A WOOD BOX.



No. 3—MORRILL'S, polished, for single tooth cross-cut and small circular saws, length 9 in., w't per doz. 15 lbs., per dozen..... $18.00

No. 4—MORRILL'S, polished, for Champion or M tooth cross-cut saws, length 9 in., w't per doz. 15 lbs. ..... per dozen 18.00

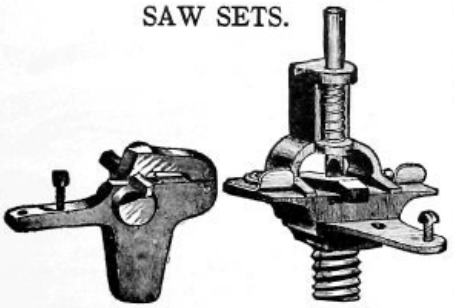
HALF DOZEN IN A BOX.

No. 5—MORRILL'S, polished, for timber and board saws, from 6 to 14 gauge (circumference of saw makes no difference), length 14 in., w't per doz. 40 lbs., per dozen..... $22.00

HALF DOZEN IN A WOOD BOX.

SAW SETS AND SAW TOOLS.

SAW SETS.



Nos. 25 and 30. No. 35.

No. 25—AIKEN'S, polished cast steel, w't per doz. 6½ lbs.....per dozen $ 6.50

No. 30—AIKEN'S, polished cast steel, extra quality, w't per doz. 7¼ lbs., per dozen..... 9.00

No. 35—HOTCHKISS' japanned iron body, steel mandrel and anvil, brass guides, w't per doz. 11 lbs.....per dozen 10.00

ONE DOZEN IN A BOX.

SAW GAUGES.

No. 51. No. 52.

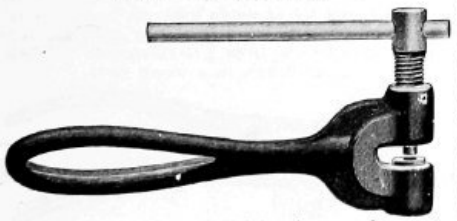
No. 51—ATKINS', single, w't per doz. 2¼ lbs.....per dozen $1.20

No. 52—ATKINS', double, w't per doz. 3 lbs.....per dozen 2.00

The single gauge is for regulating the length of clearer teeth and width of set in cross-cut saws. The double gauge does the same for both hard and soft wood.

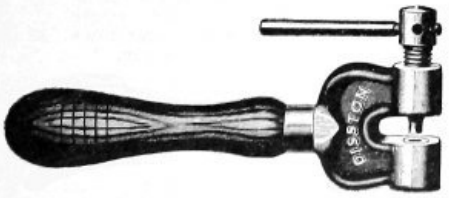
ONE DOZEN IN A BOX.

SAW PUNCHES.



No. 2—MIDGET, length 5½ in., japanned iron, for punching holes in butcher and hack saw blades, w't per doz. 6 lbs., per dozen $8.00

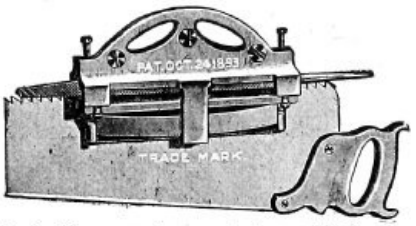
ONE IN A BOX.



No. 1—MIDGET, length 6¾ in., japanned, wood handle, brass ferrule, steel punch, for punching holes in butcher and hack saw blades, w't per doz. 10 lbs., per dozen.....$16.80

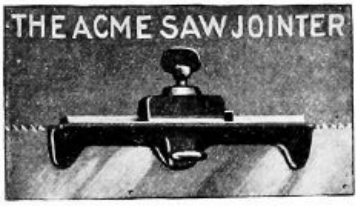
ONE IN A BOX.

SAW JOINTERS.



No. 1—PERFECT, japanned iron, adjustable, length 4½ in., w't per doz. 8 lbs., per dozen..... $5.00

It can be adjusted in a moment to the largest cross-cut or finest handsaw, and will joint or square any straight edge. Flat, triangular or half-round file can be used. Saves time, labor, wear and tear on the hands, and insures accuracy.

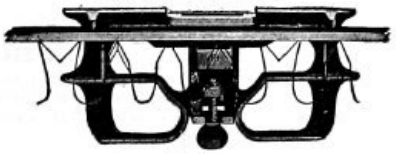


No. 2—ACME, japanned iron, length 4½ in., with 4 in. flat file, w't per doz. 6 lbs.....per dozen $6.00

Adjustable to any thickness of blade, joints the teeth absolutely true, will joint any straight or square edge. A tool that no carpenter should be without, saves time and wear and tear on the hands.

HALF DOZEN IN A BOX.

SAW TOOLS.



Jointer.

No. 53—ATKINS' DEXTER, combining jointer, raker tooth gauge, side file, w't per doz. sets 6 lbs.....per dozen sets $8.00

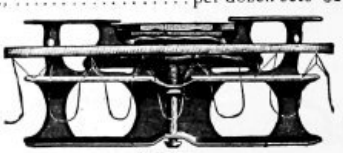
Set and Swaging Hammer.

No. 8—SIMOND'S CRESCENT, including jointing, raker and cleaner tooth gauge, setting stake, set gauge and set and swaging hammer, w't per doz. sets 22 lbs.,.....per dozen sets $12.00



Jointer.

Tooth Gauge.

Setting Block. Set Gauge.

No. 54—ATKINS' EXCELSIOR, combining jointer, tooth gauge, setting block and set gauge, w't per doz. sets 18 lbs., per dozen sets..... $12.00

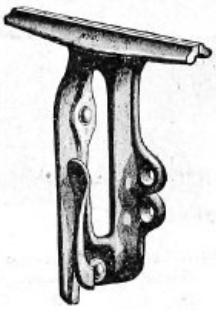
ONE SET IN A BOX.

IMPROVED SIDE FILES.

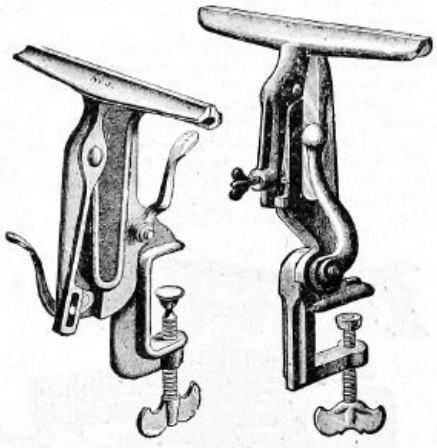
The side file is used for the purpose of regulating saw teeth after they have been set. It is impossible to set a saw so that some of the teeth will not extend or be bent over a little more than others, and thus make rough lumber. By the use of this tool all the teeth are made even, and a saw thus regulated will run twice as long without sharpening. The file must be so adjusted by means of the set screw, as to conform to any width of set desired. The jam nuts are for the purpose of securing the set screws in the desired position. The No. 2 medium is suitable for saws 24 to 38 in. in diameter. W't complete 4½ lbs.

	FILE ONLY	FRAME	COMPLETE
No. 2—Medium, each	$0.40	.75	1.15

SAW CLAMPS OR VISES.



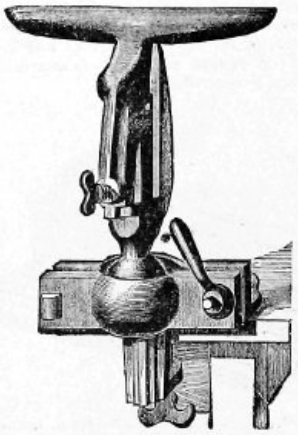
No. 0—STEARNS', japanned, 9½ in. jaws, light pattern, w't per doz. 36 lbs., per dozen..... $ 8.50



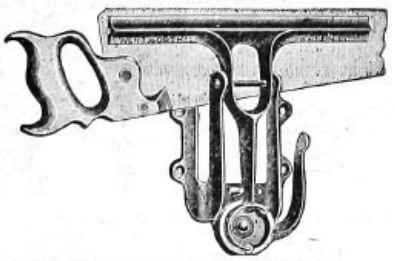
No. 3S. No. 10.

No. 3S—STEARNS', adjustable, japanned, 9½ in. jaws, malleable screw clamp, w't per doz. 51 lbs.....per dozen $11.00

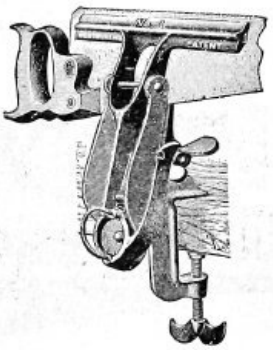
No. 10—Adjustable, japanned, 9½ in. jaws, malleable screw clamp, w't per doz. 54 lbs.....per dozen 12.00



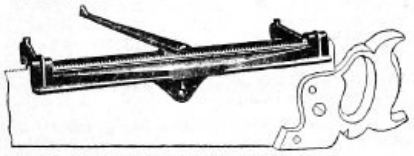
No. 12—Ball and socket, japanned, 9½ in. jaws, adjustable to any position, malleable screw clamp, w't per doz. 78 lbs.....per dozen $15.00



No. 1W—WENTWORTH'S, japanned, 11 in. rubber cushioned jaws, w't per doz. 57 lbs.....per dozen $13.00



No. 3W—WENTWORTH'S, adjustable, japanned, 11 in. rubber cushioned jaws, malleable screw clamp, w't per doz. 66 lbs.....per dozen $18.00

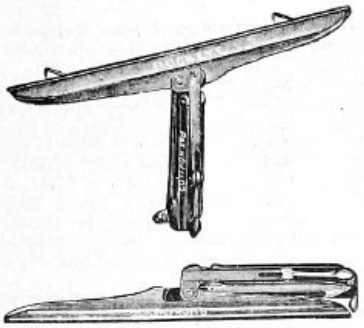


No. 116—PERFECTION, malleable iron, japanned, with drive hooks to attach to bench or board, w't per doz. 31 lbs., per dozen..... $15.00

Can be instantly and securely fastened to a work bench, saw horse, tool box, window sill, to the edge of a board, plank, joist, stick of timber, pile of lumber, rail of a fence, or any other suitable place, without the aid of screws or nails or any other means of fastening.

It self-adjusts the saw, saving time, and clamps or releases the same instantly. Will hold saw for jointing by passing blade through and resting the heel on the arch of the clamp.

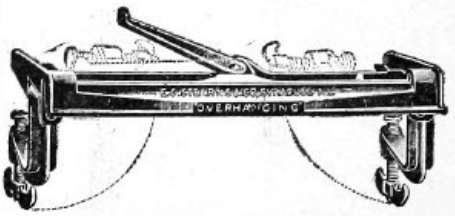
ONE-QUARTER DOZEN IN A BOX.



No. 150—BUCKEYE, folding, japanned malleable iron, 14 in. rubber cushioned jaws, with drive hooks to attach to board, or can be attached by screw or nail, w't per doz. 46 lbs....per dozen $18.00

The entire vise is of malleable iron and folds in a very compact form.

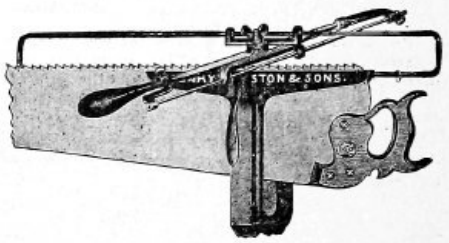
ONE IN A BOX.



No. 200—STEARNS', overhanging, folding, japanned, noiseless rubber cushioned jaw, w't per doz. 48 lbs., per dozen..... $18.00

Can be fastened to a bench or board by either the clamp or screws. Clamps fold out of way when not in use.

ONE IN A BOX.

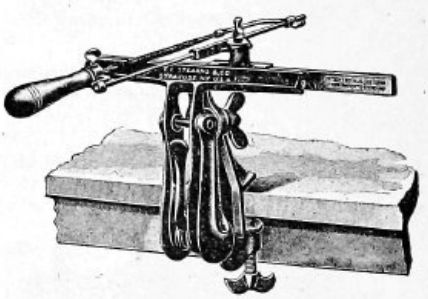


No. 30—DISSTON'S, japanned, extra heavy, adjustable, 12½ in. jaws, screw clamp for attaching to bench, complete with file, w't per dozen 234 lb. per dozen.....$30.00

This is especially designed for those not skilled in saw filing, and is a help to an expert. It is adjustable to any and all positions, and when once set it is impossible to change the angle by mistake.

The clamp, guide, file and handle are included and not sold separately.

ONE IN A BOX.

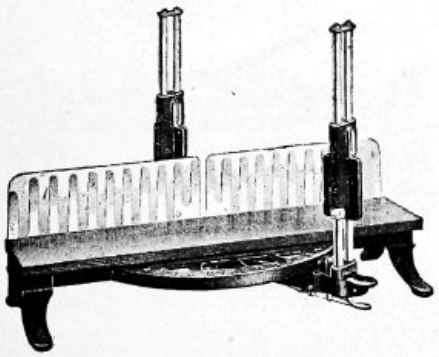


No. 25—STEARNS', japanned, nickel plated guide, adjustable to three rigid positions, 16 in. flat steel guide bar, 10½ in. planed jaws, rubber cushioned, screw clamp, complete with file, w't per doz. 105 lbs.....per dozen $30.00

The guide has three rigid positions in which it holds the file; one position for filing the saw on first side, another for filing it on the opposite side, a third for use in filing rip saws only. By means of the ball and socket joint the guide may be set at either of these positions; when thus set the file is rigidly held at the proper angle and incline for filing, it is then impossible to file the teeth inaccurately.

ONE IN A BOX.

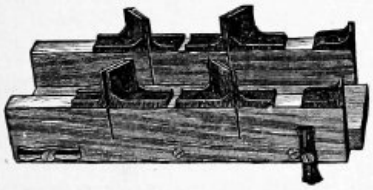
MITRE BOXES.



No. 50½—STANLEY'S, single-piece frame, base and back accurately machined, all parts interchangeable, adjustable saw guides, either back or panel saws may be used.....each $6.50

The swivel is provided with an index pin which engages holes in the frame at the commonly used angles, but can be made stationary at any other angle desired by tightening the machine screw in front of the swivel against the frame.

The location of the holes of the commonly used angles is clearly designated by raised figures on the frame.



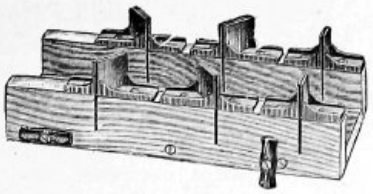
OLMSTED'S, Hardwood, Oiled, Iron Guides.

No. 1—For 1½×3 in. wood, w't 5¾ lbs., each..... $1.00

No. 2—For 2½×4 in. wood, w't 10¼ lbs., each..... 1.50

The guides can be adjusted to any thickness or pattern of saw; the frame cannot be cut away.

TWO IN A BOX.



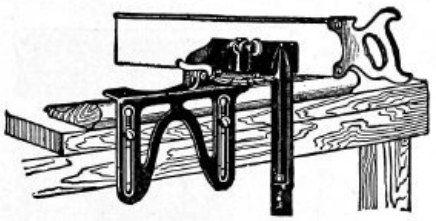
OLMSTED'S, Hardwood, Oiled, Iron Guides.

No. 3—For 1½×3 in. wood, w't 6¼ lbs.....each $1.25

No. 4—For 2½×4 in. wood, w't 11 lbs., each..... 1.75

These guides can be adjusted to any thickness or pattern of saw; the frame cannot be cut away.

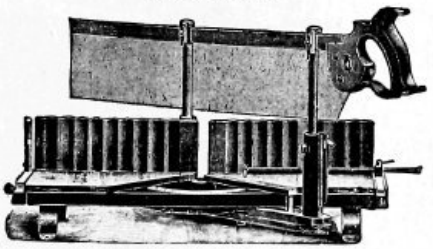
TWO IN A BOX.



No. 10—SEAVEY'S, improved pattern, japanned, nickel plated bright parts, adjustable to any angle, degrees marked on bar, with set screw, w't 2¾ lbs.....each $2.00

This is a very convenient tool and is adapted to many uses. With it any kind of moulding and stock of any width and thickness can be cut. Takes the place of a heavy mitre box and can be used with any hand saw.

ONE IN A BOX.



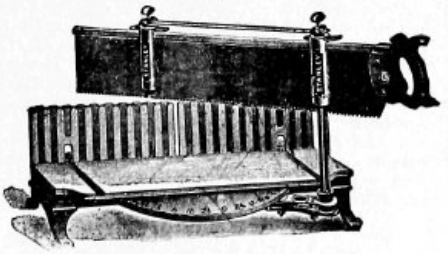
GOODELL'S, Bessemer Steel Box, Corrugated Cold Rolled Steel Back, Complete with Disston's Saw and Attachments.

Nos.....	330	340	350	360
Saw.....	26×4	28×5	30×5	30×6 in.
W't.....	30	35	40	45 lbs.
Each....	$12.00	13.25	13.50	15.25

These bases have automatic stops to hold up the saw, allowing the operator to use both hands in placing the wood.

The backs are corrugated to ¼ in. in depth and ½ in. in width, allowing perfect clearance for sawdust. These boxes give 10½ in. at right angles and 7¼ in. at mitre.

ONE IN A CASE.



STANLEY'S, Single Piece Frame, Malleable Iron Legs, Steel Saw Guide Rods, Complete with Disston's Saw.

Nos.....	242	244	246

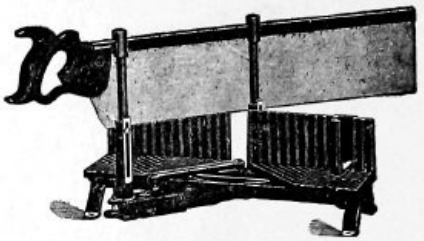
Each....	$12.25	13.00	16.00

Nos. 242, 244 and 246 have a right angle capacity of 8¼ in., 5½ in. at 45° and 3½ in. at 30°.

Nos. 346 and 358 have a right angle capacity of 9½ in., 6½ in. at 45° and 4⅛ in. at 30°.

In these boxes the saw is supported above the work; the swivel is clamped automatically. They are supplied with a spring catch, which allows the swivel to swing free. There is a second socket in swivel, allowing use of short saw. All parts are interchangeable.

ONE IN A CASE.



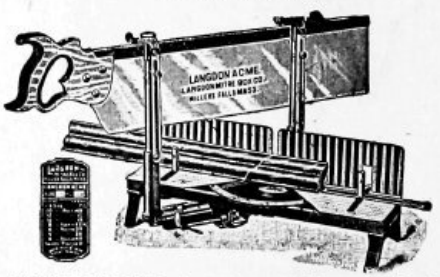
NEW MARSH LANGDON, Ground Surface Metal Face, or Bed Plates.

Nos.....	32	33	34
Saw.....	22×4	24×4	26×4 in.
W't.....	35	36	39 lbs.
Each....	$11.25	11.50	11.75
Nos.....	**39**		**40**
Saw.....	28×5		30×5 in.
W't.....	40		42 lbs.
Each.....	$13.50		13.75

Capacity at mitre is 6¾ in.; at right angle 9½ in.

The manufacturer of these mitre boxes has had many years' experience with mitering tools, and no pains or expense is spared to make them the very best. Each box has metal face, or bed plates. These plates have ground surfaces, the tops and bottoms absolutely true and parallel—no warping, no splitting off, always a true and level bed plate to work from; a mechanic will appreciate this.

ONE IN A CASE.



LANGDON ACME, Complete with Disston's No. 6 Saw.

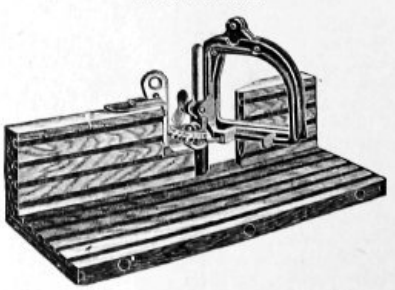
Nos..	68	69	73	74	75
Saw..	22×4	24×4	26×4	28×5	30×5 in.
W't..	35	35½	35	35½	42 lbs.
Each.	$10.00	10.50	12.00	14.00	14.50

Capacity at mitre for Nos. 68 and 69 is 5 in., for Nos. 73, 74 and 75 is 7 in.

Capacity at right angles for Nos. 68 and 69 is 7½ in., for Nos. 73, 74 and 75 is 10¼ in.

In addition to notches for the positive angles commonly in use, the box has a graduated arc in front with the various degrees marked on it. A metal index plate with degrees marked thereon is attached to machine.

ONE IN A CASE.



No. 15—PERFECTION, bed and back made from selected wood with inlaid strips to prevent warping, can be used with a back, hand or panel saw, capacity 45°, 30°, 30°, 22½° and 9° w't 7 lbs...each $4.00

All saws furnished with mitre boxes shown on this page are eleven points to the inch.

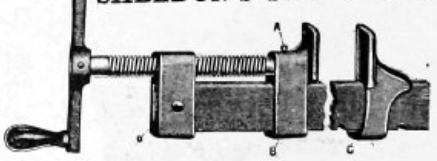
W't per doz.	70	85	95	110	lbs.
Per dozen	$15.00	17.00	19.00	21.00	

ONE HALF DOZEN IN A CRATE.

No. 11—Without wood bars, malleable iron, ⅝×7 in. steel screws with square threads cut from cold rolled steel, face of jaws 1¾ in. sq., w't per doz. 50 lbs. . . . . per dozen $12.00

SHELDON'S STEEL BAR.



Made from 9-16×1⅜ Inch Tempered Spring Steel Bars, ⅝×7 Inch Screw Cut from Cold Rolled Steel, Face of Jaws 1¾×2 in.

Nos.	20½	30	40	
Length	2½	3	4	ft.
W't per doz.	75	90	110	lbs.
Per dozen	$16.50	18.75	21.00	
Nos.	50	60	70	
Length	5	6	7	ft.
W't per doz.	130	150	165	lbs.
Per dozen	$23.25	25.50	27.75	

Saddle is held in bar notches by indestructible spring bars. The double end malleable cranks are quick and permit the use of two hands for excessive pressure.

CARPENTERS' DOOR.

3-16×1½-Inch Wrought Steel T Bar, Malleable Iron Frame and Sliding Stop, Spring Catch, ⅝-Inch Wrought Iron Screw, Ebonized Handle.

Nos.	103	104	105	
Length between jaws.	3	4	5	ft.
W't per single doz.	98	110	122	lbs.
Per single dozen	$24.00	27.00	30.00	

The bar is special quality rolled stiff steel; the "T" shape has much more strength for a given weight than is possessed by flat stock. The notches are cut on the lower edge of the bar, affording greater holding power to the sliding jaw than if cut on the upper edge. The wrought iron screw is provided with a deep thread.

ONE DOZEN IN A CASE.

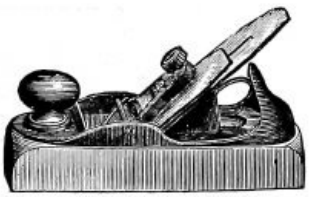
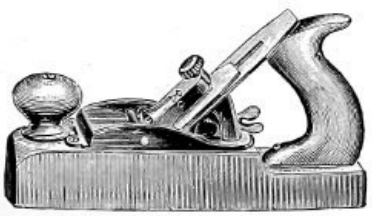
STANLEY'S ADJUSTABLE BENCH PLANES.

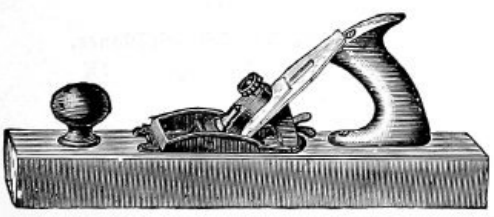
WOOD.



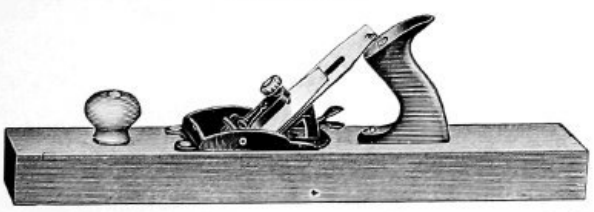
No. 122—8 in., smooth, 1¾ in. cutter, w't 2 lbs., - each $1.00
ONE IN A BOX.



No. 135—10 in., handled smooth, 2⅜ in. cutter, w't 3 lbs., each, - - - - - - - - - $1.35
ONE IN A BOX.



No. 127—15 in., jack, 2⅜ in. cutter, w't 3½ lbs., - each $1.35
Adjusted by a lever; especially adapted for working on soft woods.
ONE IN A BOX.

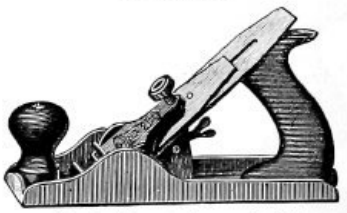


No. 129—20 in., fore, 2⅜ in. cutter, w't 5 lbs., - each $1.50
No. 132—26 in., jointer, 2⅝ in. cutter, w't 6½ lbs., - " 1.70
Adjusted by a lever; especially adapted for working on soft woods.
ONE IN A BOX.

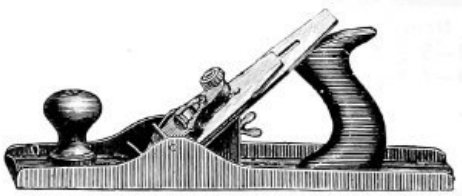
LOW ANGLE BLOCK.

No. 62B—14 in., low angle, 2 in. cutter, w't 4 lbs., - each $2.50
The construction of this plane is such that it is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by use of the ordinary block plane. The plane is fitted with an adjustable throat, which enables the user to work equally well on hard or soft wood.
ONE IN A BOX.

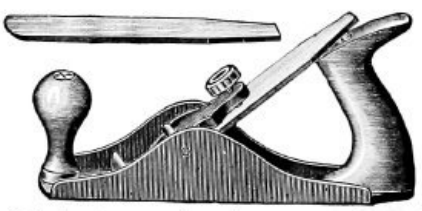
STEEL.



No. 104—9 in., smooth, 2⅛ in. cutter, w't 3 lbs., - each $1.85
ONE IN A BOX.

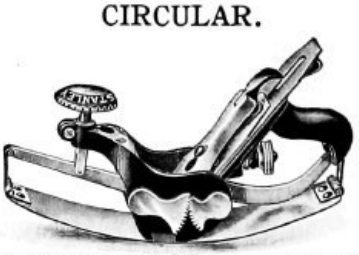


No. 105—14 in., jack, 2⅛ in. cutter, w't 3½ lbs., - each $2.35
ONE IN A BOX.

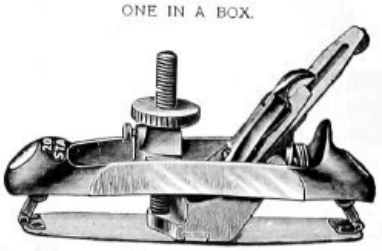


No. 40 — 9½ in., improved scrub, iron stock, 1¼ in. cutter, w't 2 lbs., - - - - - each $1.00
No. 40½—10½ in., improved scrub, iron stock, 1½ in. cutter, w't 2½ lbs., - - - - - each 1.35
This tool has a single iron with cutting edge rounded and is particularly adapted for roughing down work before using jack or other planes.
ONE IN A BOX.

CIRCULAR.



No. 113—10 in., adjustable, 1¾ in. cutter, w't 3½ lbs., each $2.75
Flexible steel face, easily shaped to any required arc, either concave or convex, by turning the knob on the front of the plane.
ONE IN A BOX.



No. 20½—10 in., VICTOR, adjustable, 1¾ in. cutter, w't 4 lbs., each, - - - - - - - - - $3.15
No. 20 —Nickel plated, otherwise same as No. 20½, each 3.75
All parts specially designed with the object of eliminating any lost motion due to wear. The ends of the flexible face being fixed and the force applied at the center, great accuracy of adjustment is possible and the face is most firmly held in position.
ONE IN A BOX.

Orders for plane irons should designate the numbers of the planes for which they are wanted.

STANLEY'S BED ROCK IRON PLANES.

No. 608	—24 in., jointer, 2⅝ in. cutter, w't 9½ lbs., -	"	5.00

ONE IN A BOX.

These planes are called "one-piece" from their great solidity of construction and for the reason that the entire surfaces of the frog are in contact with the plane iron on one hand, and the plane bottom on the other, and are so perfectly fitted that from the plane iron to the bottom of the plane is as one solid piece of metal. The frog is machined, not ground. It is a well-known fact that more nearly perfect results are obtained by machining when held in a perfect jig than when held by hand against a grinding wheel. In adjusting, the tongue and groove move on a perfectly straight line, preventing any shifting or wobbling of the frog and consequently any possible looseness in any part. By the simple turn of an adjusting screw, the change from hardwood to pine can be made with scarcely a moment's delay.

Although practically solid, this plane is easily adjustable at the mouth. The combination of one-piece solidity and quick adjustability is unique in planes and will at once be appreciated by every intelligent workman.

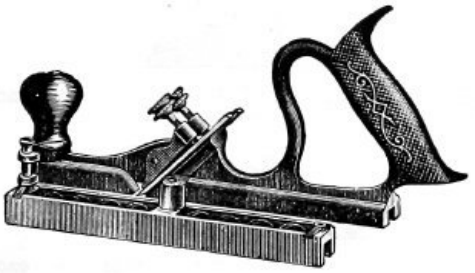
Orders for plane irons should designate the numbers of the planes for which they are wanted.

PATENT ADJUSTABLE PLANES.

STANLEY'S ADJUSTABLE TONGUING AND GROOVING.



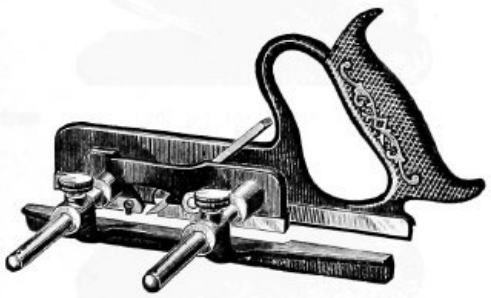
No. 48—8¾ in. nickel plated iron stock and fence, for ¾ to 1¼ in. boards, including tonguing and grooving tools, weight 3 lbs., - - - - - - each $2.50

No. 49—8 in. nickel plated iron stock and fence, for ⅜ to ¾ in. boards, including tonguing and grooving tools, weight 2½ lbs., - - - - - each 2.50

With two separate cutters, a suitable distance apart, so that when the guide, or fence, is set as shown above, both cutters work and a tongue can be made. The fence is hung on a pivot, and can be swung around, end for end. This movement covers one of the cutters, and also furnishes a guide for grooving an exact match for the tongue.

ONE IN A BOX.

STANLEY'S ADJUSTABLE BEADING.

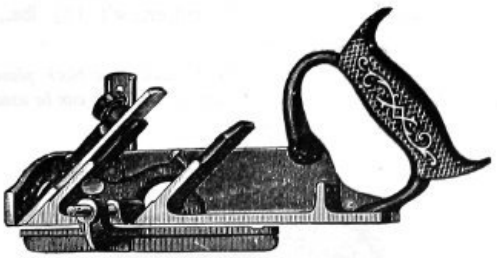


No. 50—7¾ in. nickel plated iron stock and fence, with ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in. beading tools and 1 pair ¼ in. matching tools, weight 3¼ lbs., - each $4.00

By adjustment of the fence, center beading can be done up to 5 in. from the edge of the board. Except for working across the grain, the spurs need not be used.

ONE IN A BOX.

STANLEY'S DUPLEX RABBET AND FILLETSTER.

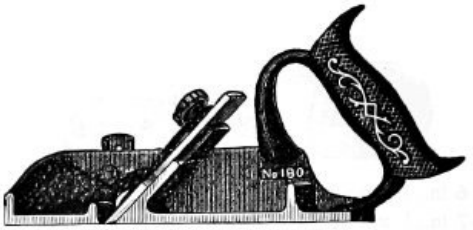


No. 78—8½ in. iron stock and fence, 1½ in. cutter, weight 3 lbs., - - - - - - - - - each $1.50

The arm to which the fence is secured can be screwed into either side of the stock, thus making a superior right or left hand filletster with adjustable spur and depth gauge. By removing the arm to which the fence is secured for rabbet plane, with two seats for the cutter, the tool can be used as a bull-nose rabbet.

ONE IN A BOX.

STANLEY'S IMPROVED RABBET.



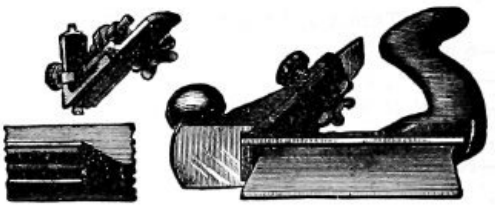
Iron Stock, Length 8 Inches, with Depth Gauge.

No. 180—1½ in. wide, without spur, weight 2½ lbs., each $1.00
No. 181—1¼ in. wide, without spur, weight 2¼ lbs., " 1.00
No. 182—1 in. wide, without spur, weight 2 lbs., " 1.00
No. 190—1½ in. wide, with spur, weight 2½ lbs., " 1.15
No. 191—1¼ in. wide, with spur, weight 2¼ lbs., " 1.15
No. 192—1 in. wide, with spur, weight 2 lbs., " 1.15

This plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

ONE IN A BOX.

STANLEY'S ADJUSTABLE CHAMFER.

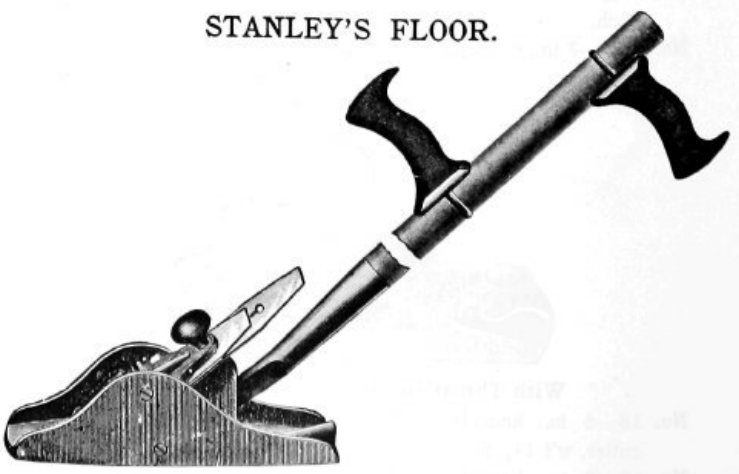


No. 72 —9 in. iron stock, 1⅝ in. cutter, weight 3 lbs., each $2.00
No. 72½—With beading and moulding attachment, including 6 cutters, sharpened at both ends, otherwise same as No. 72, weight 4 lbs., - - - - each 3.00

The front section of these planes is movable up and down. It can be firmly secured to the rear section at any desired point by means of a thumb screw. Without the use of any other tool, these planes will do perfect chamfer or stop-chamfer work of all ordinary widths.

ONE IN A BOX.

STANLEY'S FLOOR.



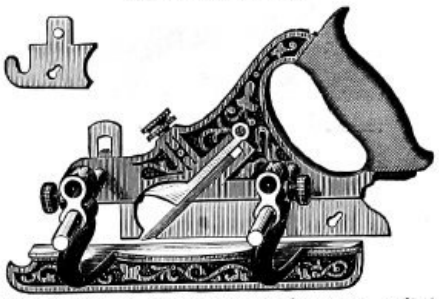
No. 74—10½ in., 2⅝ in. cutter, with 45 in. handle, weight 21 lbs., - - - - - - - - each $4.50

This tool will be found useful for planing floors, bowling alleys, skating rinks, decks of vessels, etc.

ONE IN A WOOD BOX.

PATENT ADJUSTABLE PLANES.

STANLEY'S BULL-NOSE PLOW AND MATCHING.



No. 143—Nickel plated, with 10 tools, bits, etc., w't 4 lbs., each, - - - - - - - - - $5.00

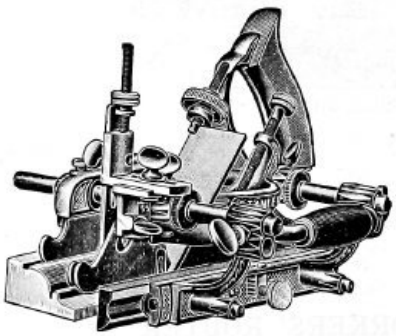
No. 141—Nickel plated, with 10 tools and a filletster, w't 5 lbs., - - - - - - - - each 7.00

Two interchangeable front parts go with this tool. The form shown above is that of a bull-nose plow; and the cutter will easily work up to and into a ½ in. hole, or any larger size—as in sash-fitting, stair-work, etc. With the other front on, it takes the ordinary form of a plow, and is adapted to all regular uses.

With each tool eight plow bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½ and ⅝ in.), a filletster cutter and a slitting blade, are furnished; also a tonguing tool (¼ in.).

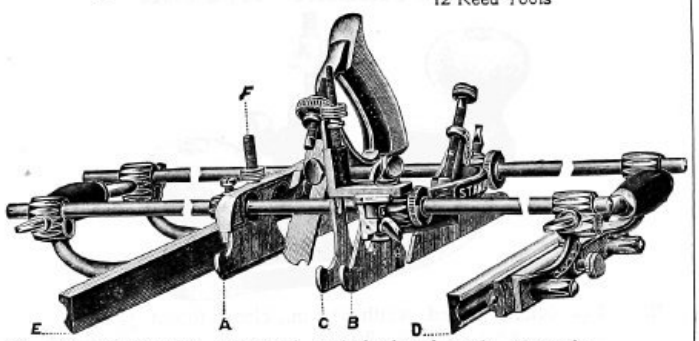
ONE IN A BOX.

STANLEY'S UNIVERSAL.



Tools and Bits.

2 Sash Tools
2 Match Tools
1 Slitting Tool
1 Filletster Tool
10 Plow and Dado Bits
9 Beading Tools
8 Fluting Tools
6 pairs Hollows and Rounds
6 pairs Quarter Hollows and Rounds
6 Reverse Ogee Bits
6 Roman Ogee Bits
6 Grecian Ogee Bits
6 Quarter Rounds with Bead
12 Reed Tools



No. 55—STANLEY'S, universal, nickel plated, with 52 tools, bits, etc., adapted to 93 different uses, arranged in 4 separate cases, w't 16 lbs., - - - each $16.00

Extra Cutters, 52 tools, bits, etc., adapted to 93 different uses, for No. 55 planes, - - - - per set 6.00

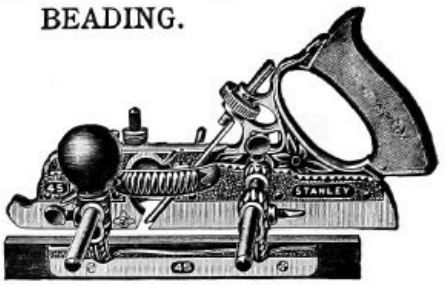
This tool in the hands of an ordinary carpenter can be used for all lines of work covered by a full assortment of so-called fancy planes.

This plane consists of: A main stock (A) with two sets of transverse sliding arms, a depth gauge (F) adjusted by a screw, and a slitting cutter with stop. A sliding section (B) with a vertically adjustable bottom. The auxiliary center bottom (C) is to be placed in front of the cutter, as an extra support, or stop, when needed. This bottom is adjustable both vertically and laterally. Fences (D) and (E). Fence D has a lateral adjustment by means of a screw, for extra fine work. The fences can be used on either side of the plane, and the rosewood guides can be tilted to any desired angle, up to 45°, by loosening the screws on the face. Fence E can be reversed for center beading wide boards. An adjustable stop to be used in beading the edges of matched boards is inserted on left side of sliding section (B).

ONE IN A NEAT WOOD BOX.

STANLEY'S PATENT ADJUSTABLE BEADING.

7 Beading Tools
10 Plow and Dado Bits
1 Slitting Blade
1 Tonguing Tool
1 Sash Tool.



No. 45—Nickel plated stock, with 20 tools, bits, etc., embracing beading and center beading plane, rabbet and filletster, dado, plow, matching plane, sash plane, and a superior slitting plane, w't 9 lbs., - - - each $8.00

Extra Cutters, 20 tools, bits, etc., for No. 45 planes, per set 3.50

Each plane has seven beading tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½ and ½ in.), ten plow and dado bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾ and ⅞ in.), a slitting blade, a tonguing tool and a sash tool; removable rosewood fence.

ONE IN A WOOD BOX.

STANLEY'S HOLLOWS AND ROUNDS.

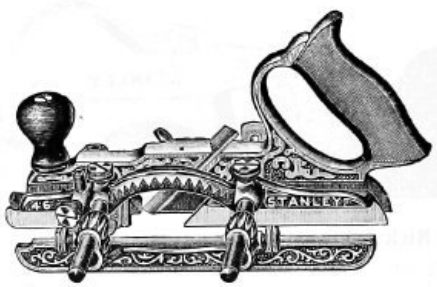
		PER PAIR.
No. 6—	½ in. cutter, works ¾ in. circle, w't 1¼ lbs., -	$1.40
No. 8—	⅝ in. cutter, works 1 in. circle, w't 2 lbs., -	1.40
No. 10—	¾ in. cutter, works 1¼ in. circle, w't 2 lbs., -	1.40
No. 12—	1 in. cutter, works 1½ in. circle, w't 2¼ lbs., -	1.40

ONE PAIR IN A BOX.

TRAUTS' ADJUSTABLE DADO, PLOW, ETC.



No. 46—Nickel plated, with 11 tools, including plow bits, slitting and tonguing tools, w't 5¼ lbs., - - each $7.00

The No. 46 is accompanied by eight plow and dado bits (3/16, ¼, 5/16, ⅜, ½, ⅝, ⅞ and 1¼ in.), a filletster cutter, a slitting tool, and a tonguing tool. All, except the slitting blade, are secured in the main stock on a skew

ONE IN A BOX.

STANLEY'S PATENT ADJUSTABLE PLANES.

IMPROVED DADO.

8 Inch, Iron Stock, with Depth Gauge and Two Adjustable Spurs.

No. 39—Cutter,	¼	⅜	½	⅝	¾	⅞ in.
Each, - -	$1.50	1.50	1.50	1.50	1.50	1.50

The cutter is set on a skew; depth gauge is adjustable by means of a thumb screw. The spurs can be adjusted to take up the wear as well as for depth of cut.

ONE IN A BOX.

SIDE RABBET.

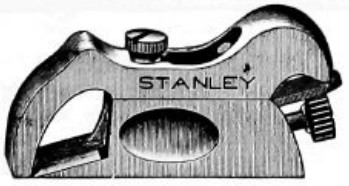
No. 98. No. 99.

No. 98—4 in., nickel plated, *right* hand, w't 8 oz., - each $0.90
No. 99—4 in., nickel plated, *left* hand, w't 8 oz., - " .90

Convenient tools for side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give each tool a form by which it will work close up into corners when desired.

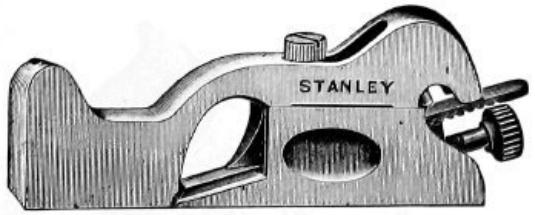
ONE IN A BOX.

CABINET MAKERS' RABBET.



No. 90—4 in., bull-nose, 1 in. cutter, w't 1⅛ lbs., - each $2.00

ONE IN A BOX.



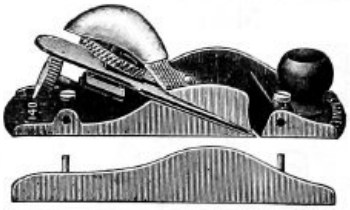
Nickel Plated, with Adjustable Throat.

No. 92—5½ in., ¾ in. cutter, - - - each $2.00
No. 93—6½ in., 1 in. cutter, - - - " 2.35
No. 94—7½ in., 1¼ in. cutter, - - - " 2.75

Designed for fine cabinet work where extreme accuracy is required. The sides and bottom being square with each other, the plane will lie perfectly flat on either side, and can be used right or left. Both cutter and width of throat opening are adjustable.

ONE IN A BOX.

RABBET AND BLOCK.

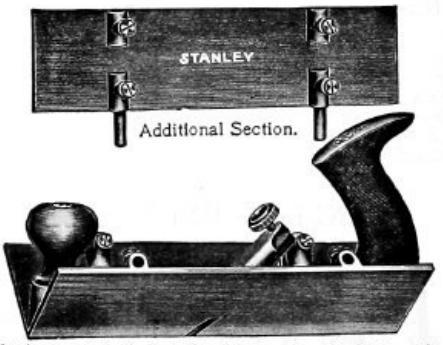


No. 140—7 in., with detachable side, 1¾ in. cutter, w't 1¾ lbs., - - - - - - - - each $1.25

The detachable side will easily change this tool from a block plane to a rabbet plane, and vice versa. The cutter is set on a skew.

ONE IN A BOX.

CORE-BOX.



No. 57—10½ in., nickel plated, with 1 pair of additional sections, for semicircles, up to 5 in. in diameter, w't 5½ lbs., - - - - - - - - each $4.00
Additional Sections, 2½ in. wide, for working larger diameters, - - - - - - - - per pair 1.00

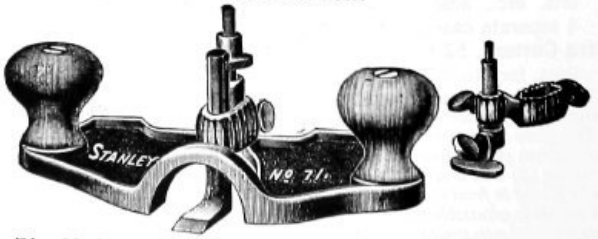
A tool much used by pattern-makers, wheelwrights and others, for planing out semicircles. So constructed that the sides can be extended by additional sections, 2½ in. wide, until a diameter of 10 in. can be worked.

ONE IN A BOX.

WOODWORKERS' ROUTER.

No. 71½—Nickel plated, width 8¼ in., closed throat, ¼ and ½ in. steel bits, w't 2¼ lbs., - - - each $1.50

ONE IN A BOX.



No. 71—Nickel plated, width 8¼ in., open throat, ¼ and ½ in. steel bits, with throat attachment, w't 2¼ lbs., each, - - - - - - - - $1.85

ONE IN A BOX.

CABINET SCRAPERS.

STANLEY'S.

No. 85. No. 87.

No. 85—8 in., adjustable, 2 in. cutter, rabbet, tilting rosewood handle and knob, weight 2½ lbs., - - - each $3.00

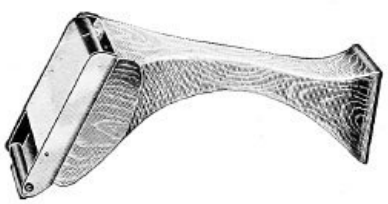
No. 87—8 in., adjustable, 2 in. cutter, stationary rosewood handle and knob, weight 2½ lbs., - - - each 2.00

Cutters, for Nos. 85 and 87, - - - - " .20

Woodworkers will find these tools to be particularly handy and reliable where a scraper can be used. The cutter rests under a slight pressure against the front edge of the mouth. In working, the cutter springs backward, thereby opening the mouth and allowing the shaving to pass through, but as soon as working pressure is released the cutter resumes its normal position. This closes the mouth and prevents any dust or shaving falling through on the finished work. The frog is adjustable which permits of the mouth of the scraper being narrowed or widened, thus enabling the user to work equally well on hard or soft wood. If it is desired to change the angle of the iron, the frog can be tilted by means of an adjusting screw. The handle and knob on No. 85 scraper can be tilted to right or left to clear the hands of the workman when scraping in corners.

ONE IN A BOX.

ELLSWORTH'S



No. 21—8 in., adjustable, 3 in. steel cutter, polished hickory handle, weight 1⅜ lbs, - - - per dozen $16.00

Extra blades, - - - - - - " 1.50

This tool was designed by a thorough workman in hard wood. It may be held in several positions, thus making the work easy, and it will not cramp the hand. It is easy to adjust and sharpen. This tool positively will not jump, because the bit is clamped close to cutting edge so it can be held firm. This tool is used on bench and floor work, also butcher's blocks. To adjust blade raise clamp to right angle, loosen set screws at end of roller, turn roller until tight on bit, tighten set screws and close clamp.

ONE IN A BOX.

MARKING GAUGES.

STANLEY'S.

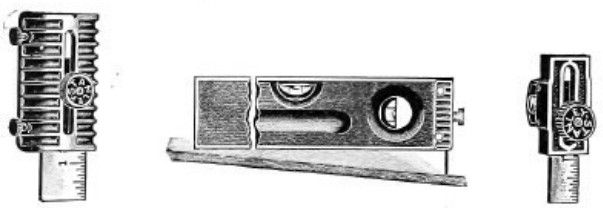
No. 97—Nickel plated and polished, reversible bar, marked, weight per dozen 4½ lbs., - - - per dozen $6.60

To one end of the bar is attached a steel point for use as an ordinary Marking Gauge. On the other end is a steel roller which can be used in many instances to better advantage than the point—such as marking across the grain or knotty places. Both the point and the roller are set very near the end of the bar to admit of being used close into a rabbet or corner. The head of the gauge can be turned over for a broad or narrow bearing, as desired.

ONE IN A BOX.

PITCH ADJUSTERS.

STANLEY'S.



No. 5. No. 7.

No. 5—For wood levels, nickel plated and polished, adjustable slide, graduated to 2 in., weight per dozen 6 lbs., per dozen, - - - - - - - - - $12.00

No. 7—For iron levels, nickel plated and polished, adjustable slide, graduated to 1½ in., weight per dozen 4½ lbs. per dozen, - - - - - - - - - 12.00

This device can be readily attached to any iron or wood level, and securely fastened in place by means of a thumb screw. The bottom of its frame should set flush with the bottom of the level. The slide is adjusted by a screw and can be locked in place by a set screw. One edge of slide is graduated and a reading to determine pitch is taken from bottom of slide to bottom of frame.

ONE IN A BOX.

PLANES, BEADERS AND SCRAPERS.

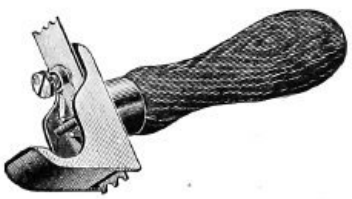
STANLEY'S BELT MAKERS' PLANES.

No. 11—5¾ in., 2⅜ in. cutter, w't 3½ lbs., - each $2.00

For chamfering down the laps of a belt before fastening them together. Equally well adapted for the same use in repairing belts in all large manufacturing establishments.

ONE IN A BOX.

STANLEY'S SINGLE HANDED BEADERS.

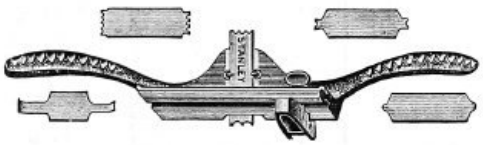


No. 69—Nickel plated, beech handle, ground edges, six ⅝ in. cast steel double ender cutters and one blank, w't 8 oz., - - - - - - - - each $0.75

This tool is useful for beading, reeding, or fluting diagonal lines, etc. The twelve cutting edges comprise six sizes of single beads, one 2 bead, two 3 bead and one 4 bead cutters; there are also two single groove cutters. The blank cutter will be found useful for special work.

ONE IN A BOX.

STANLEY'S UNIVERSAL HAND BEADERS.



No. 66—Width 11¼ in., nickel plated stock, 7 steel cutters and 1 blank with 2 gauges for straight or curved work, w't 1¼ lbs., - - - - - - - each $1.00

For beading, reeding, or fluting straight or irregular surfaces, and for all kinds of light routering. Furnished with a square gauge for straight work and an oval gauge for curved work. Both ends of the cutter are sharpened, thus embracing six ordinary sizes of beads, four sets of reeds, two fluters and a double router iron (⅛ and ¼ in.)

ONE IN A BOX.

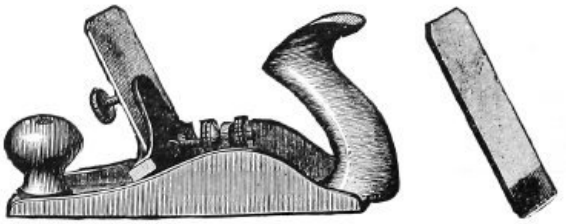
STANLEY'S WOOD SCRAPERS.

No. 83—3 in. cast steel polished blade, nickel plated frame, adjustable wood roller, 9¼ in. beechwood double handle, w't 1 lb., - - - - - - - - each $1.00

The scraper can be adjusted to any desired pitch, and may be worked toward or from the person using it. The roller acts as a support to relieve the strain on the wrist and hands of the workman. The handle can be detached for working into corners.

ONE IN A BOX.

STANLEY'S SCRAPER PLANES.



No. 112—9 in. adjustable, 3 in. cutter, w't 4 lbs., - each $2.00
Cutters, for veneer scraping, - - - - - " .20
Cutters, for toothing, Nos. 22, 28, 32 (22, 28 or 32 teeth per in.), - - - - - - - - - each .30

For scraping and finishing veneers and cabinet work. Can also be used as a tooth plane, and will do excellent work in scraping off old paint and glue. One scraper blade furnished with each plane.

ONE IN A BOX.

BAILEY'S VENEER SCRAPERS.

No. 12—8 in., adjustable, 3 in. cutter, rosewood handle, w't 3½ lbs., - each $2.25

Takes the same cutter as No. 112 and adapted to the same uses.

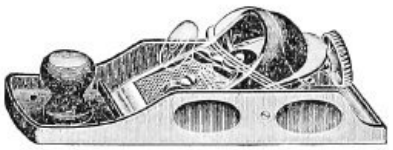
STANLEY'S SPECIAL PLANES.

BLOCK PLANES.



No. 131—8 in., adjustable, double-ender, 1¾ in. cutter, w't 3¾ lbs., - - - - - - - - each $1.40

This plane has two slots and a removable cutter seat. When it is desirable to use it as a bull nose plane, the cap and cutter can be removed and the adjustable cutter seat reversed, as indicated in cut.

ONE IN A BOX.

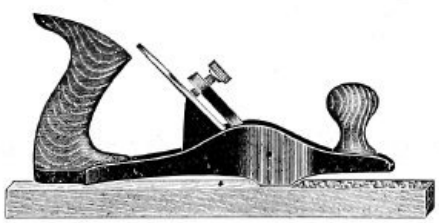
LOW ANGLE BLOCK PLANES.

No. 62B—14 in., low angle, 2 in. cutter, weight 4 lbs., each $2.50

The construction of this plane is such that it is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by use of the ordinary block plane. The plane is fitted with an adjustable throat, which enables the user to work equally well on hard or soft wood.

ONE IN A BOX.

FURRING PLANES.



No. 340—10 in., 2 in. cutter, w't 2¾ lbs., - - each $1.50

A new tool for preparing lumber as it comes roughly sawed from the mill, to remove the fur and grit before using a smooth plane. The construction of the bottom is such as to accomplish this very rapidly.

ONE IN A BOX.

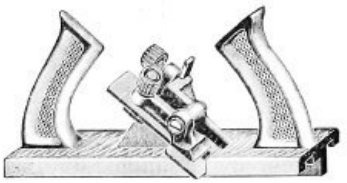
RABBET PLANES.

No. 97—10 in., 2¼ in. cutter, w't 2½ lbs., - each $2.00

A useful tool for piano makers and all cabinet workers, for trimming inside work where space prevents use of any other plane.

ONE IN A BOX.

MATCH PLANES.



No. 146—Double-end, nickel plated, matches ⅜ in. boards, cuts groove ⅛ in., w't 1¾ lbs., - - - each $2.00

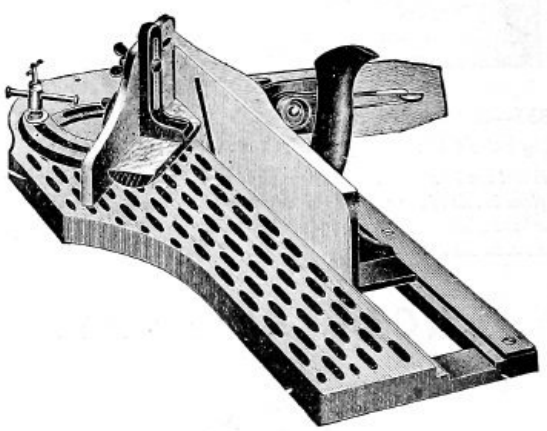
No. 147—Double end, nickel plated, matches ⅝ in. boards, cuts groove 3/16 in., w't 2 lbs., - - - each 2.00

No. 148—Double-end, nickel plated, matches ⅞ in. boards, cuts groove ¼ in., w't 2¾ lbs., - - - each 2.00

As shown in cut, this tool is provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends, the plane will cut a groove to fit. The tonguing tools are made wider on one side for use on thicker stuff than the plane will tongue and groove in the center.

ONE IN A BOX.

CHUTE BOARDS.

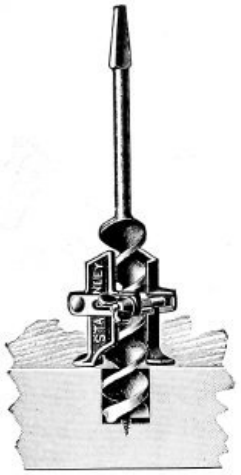


No. 52—Japanned, 22×9 in., 2⅜ in. cutter, w't 36 lbs., each $17.00

This tool, sometimes called a Jack Board, is a very important one for all wood workers, especially pattern makers and cabinet makers. It is also useful for amateurs. The board is made of cast-iron, of ribbed construction, and has an adjustable runway for the plane. The swivel is indexed for cutting a square and a mitre, but can be fastened with a clamping screw at any desired angle between zero and 90 degrees. The plane iron being fitted with a lateral adjustment, a cut giving any ordinary draft to a pattern can be made. The sliding back will support the work close to the plane, preventing it from splintering. The sliding back clamp will hold any shaped work in position to be planed. The plane is specially constructed to fit the board, and the iron is set on a skew, making a smooth, keen cut.

ONE IN A BOX.

BIT GAUGES.

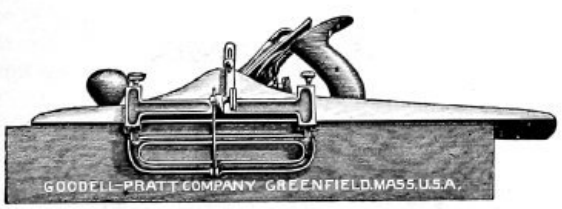


No. 49—Nickel plated steel, adjustable, w't per doz. 3¾ lbs., per dozen, - - - - - - - - - - $7.20

This gauge being adjustable will fit any bit and will always remain secure and accurate. To operate, loosen the thumb screws, insert the shank of the bit, turn the twist of the bit in the gauge to the required depth and tighten the thumb screws.

ONE IN A BOX.

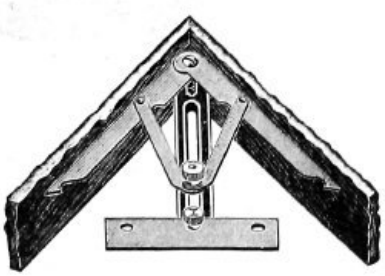
IRON PLANE GAUGES.



No. 333—SHEPARDSON'S, nickel plated, adjustable, for planing bevels of any angle, length 8 in., w't 1½ lbs., each $2.00

This tool can be attached to any iron plane, and will enable the operator to accurately plane bevels of any angle or make an even joint, and will do away with the continued use of a bevel or try square. The flat surface of the guide is ground to insure its accurate working.

ANGLE FINDERS.



No. 30—Nickel plated, w't 10½ oz., - - per dozen $18.00

With this tool any angle can be found and bisected. Fitting moulding or other woodwork to odd angles can be done with ease and certainty. It is also graduated for parts of circle commonly used. A handy tool for laying out work. The angle divider is accurately made and can be used as a try or T square.

ONE IN A BOX.

BAILEY VENEER SCRAPERS.

No. 12½—Adjustable, wood face, 3 in. cutter, w't 3¾ lbs., each, - - - - - - - - - $3.00

ONE IN A BOX.

RAZOR EDGE SPOKE SHAVES.

No. 72—Japanned, 11 in., 2 in. cutter, w't 14 oz., per dozen $12.00
No. 73—Japanned, 11 in., 2⅛ in. cutter, w't 2½ lbs., " 13.20

No. 84—Boxwood, 11 in., 2 in. cutter, w't 14 oz., per dozen $16.80
No. 85—Boxwood, 12 in., 2½ in. cutter, w't 17 oz., " 18.00

So called from the shape of the cutter, which is hollow ground, giving a keen cutting edge. The adjustable front can be moved up or down, opening or closing the mouth, and with the cutter properly adjusted, a coarse or very fine shaving can be cut.

ONE IN A BOX.

Cabinet Scraper Burnishers.

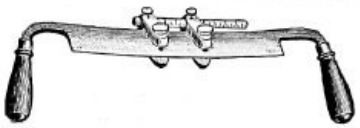
No. 1—Polished oval cast steel blade, wood handle with ferrule, entire length 8½ in., w't per dozen 1¼ lbs., per dozen, - - - - - - - - $4.00

This tool is used to put a smooth finishing edge to a cabinet scraper.

HALF DOZEN IN A BOX.

MISCELLANEOUS TOOLS.

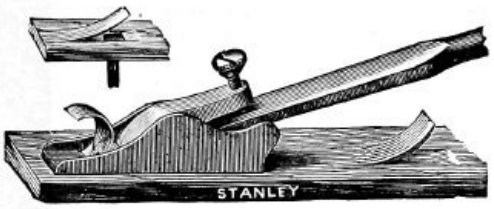
CHAMFERER GAUGES.



No. 1½—Nickel plated, 2 in. graduated bar, will fit 1⅜ in. to 1½ in. blade, - - - - - - per dozen $8.00

ONE IN A BOX. WEIGHT 6 LBS. PER DOZEN.

CHISEL GAUGES.



No. 96—STANLEY'S, adjustable, steel stock, 2¼ in., per dozen, - - - - - - - - - - $2.40

Can be attached to a ¼ in. chisel (with bevel edge up), and a shaving of any desired thickness can be raised, for blind nailing, or for inlaying wood strips in ornamental surface work.

HALF DOZEN IN A BOX. WEIGHT 6 LBS. PER DOZEN.

CORNERING TOOLS.

No. 28—STANLEY'S, 5¾×⅝ in., flat steel, 1/16 and ⅛ in. cutters, - - - - - - - per dozen $4.80

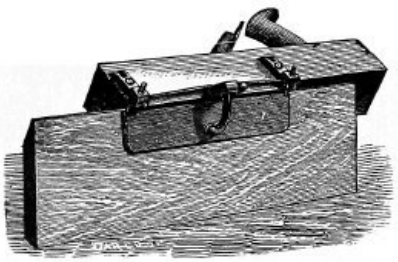
No. 29—STANLEY'S, 5¾×⅞ in., flat steel, ¼ and ⅜ in. cutters, - - - - - - - per dozen 4.80

This tool can be used by all wood-workers in rounding sharp edges. The tool is made in two numbers, with a different size cutter at each end, so sharpened that owner can always cut with the grain without changing position of the work.

It requires no depth gauge, as the form of the tool allows it to cut only to a certain depth.

HALF DOZEN IN A BOX.

JOINTER GAUGES.



No. 9—ALEXANDER'S, adjustable, for squaring to any bevel, can be attached to any wood jack or jointer plane, per dozen, - - - - - - - - - $18.00

ONE-QUARTER DOZEN IN A BOX.

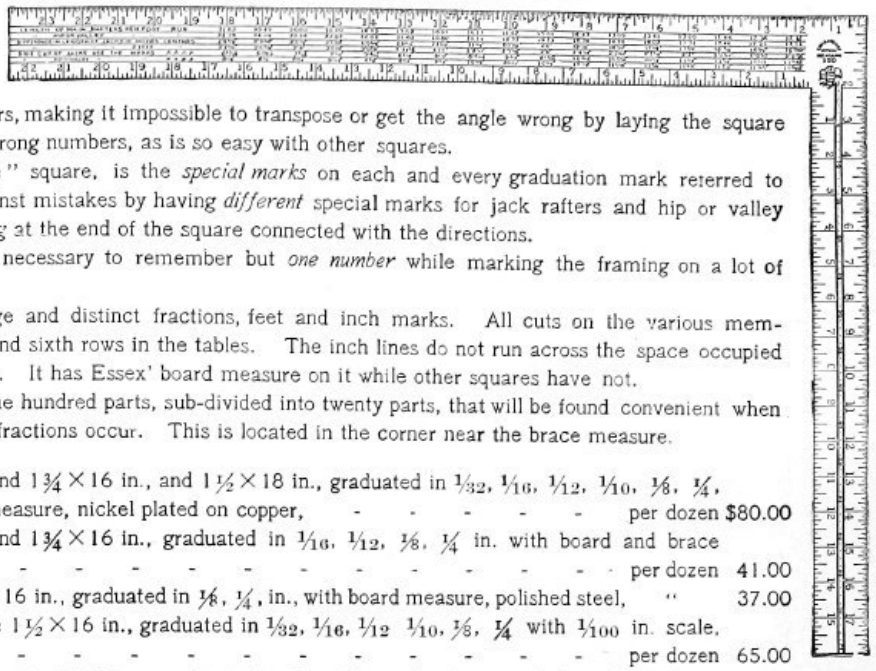
Squares with 16 in. tongue are always sent unless otherwise specified.

THE USE OF THE STEEL SQUARE.—Upon one side of the blade, running parallel with the length, will be found nine lines divided at intervals of 1 in. into sections or spaces by cross lines. This is the plank board and scantling measure. On each side of the cross lines referred to are figures, sometimes on one side of the cross line and often spread over the line, thus, 1 4-9. We will suppose we have a board 12 ft. long and 6 in. wide. Looking on the outer edge of the blade, we find 12; between the fifth and sixth lines, under 12, will be found 12 again; this is the length of the board. Now follow the space along toward the tongue till we come to the cross line under 6 (on the edge of the blade), this being the width of the board; in this space will be found the figure 6 again, which is the answer in board measure, viz., 6 ft. On some squares will be found on one side of the blade nine lines; crossing these lines diagonally to the right, are rows of figures, as seven 18, seven 28, seven 38, etc. This is another style of board measure and gives the feet in a board according to its length and width. In the center of the tongue will generally be found two parallel lines, half an inch apart, with figures between them; this is termed the brace rule. Near the extreme end of the tongue will be found 24-24 and to the right of these 33-95. The 24-24 indicate the two sides of a right-angle triangle, while the length of the brace is indicated by 33-95. This will explain the use of any of the figures in the brace rule. On the opposite side of the tongue from the brace rule will generally be found the octagon scale, situated between two central parallel lines. This space is divided into intervals and numbered thus: 10, 20, 30, 40, 50, 60.

EAGLE RAFTER AND FRAMING SQUARES.

The "Eagle" Framing Square excels in the accuracy of its reference tables for side cuts. Where other squares have only inch line marks, making *close* approximates to the exact *angles* impossible, the "Eagle" has a $\frac{1}{16}$ in. line of graduation on the body and a constant or turning point on the tongue, the 12 inch mark. It will readily be seen that the distance between the $\frac{1}{16}$ in. lines is so small that when the exact angle falls between these marks the distance to the nearest one can not exceed $\frac{1}{32}$ of an inch, which is less than the size of a pencil mark in an angular opening of 12 inches.



This square also has a *single* set of reference numbers, making it impossible to transpose or get the angle wrong by laying the square on the timber with the the body and tongue on the wrong numbers, as is so easy with other squares.

Another feature to be found on the "Eagle" square, is the *special marks* on each and every graduation mark referred to in the tables. There is still another safe guard against mistakes by having *different* special marks for jack rafters and hip or valley rafters. These marks are also shown in the lettering at the end of the square connected with the directions.

Another valuable point is the fact that it is necessary to remember but *one number* while marking the framing on a lot of timbers, while with other squares there are two.

This square has six rows of figures with large and distinct fractions, feet and inch marks. All cuts on the various members of a roof are marked by the figures in the fifth and sixth rows in the tables. The inch lines do not run across the space occupied by the tables, the decimal point is in its proper place. It has Essex' board measure on it while other squares have not.

Hundredth scale is one inch graduated into one hundred parts, sub-divided into twenty parts, that will be found convenient when using the brace and rafter measures, where decimal fractions occur. This is located in the corner near the brace measure.

No. 100 Framing—Body 2×24 in., tongue 1½ and 1¾×16 in., and 1½×18 in., graduated in $\frac{1}{32}$, $\frac{1}{16}$, $\frac{1}{12}$, $\frac{1}{10}$, $\frac{1}{8}$, $\frac{1}{4}$, with $\frac{1}{100}$ in. scale, brace, octagon and board measure, nickel plated on copper, - - - - - - per dozen $80.00

No. 3 Framing—Body 2×24 in., tongue 1½ and 1¾×16 in., graduated in $\frac{1}{16}$, $\frac{1}{12}$, $\frac{1}{8}$, $\frac{1}{4}$ in. with board and brace measure, polished steel, - - - - - - - - - - - - - - - - - per dozen 41.00

No. 14 Framing—Body 2×24 in., tongue 1½×16 in., graduated in $\frac{1}{8}$, $\frac{1}{4}$, in., with board measure, polished steel, " 37.00

No. 100B Blued Framing—Body 2×24 in., tongue 1½×16 in., graduated in $\frac{1}{32}$, $\frac{1}{16}$, $\frac{1}{12}$ $\frac{1}{10}$, $\frac{1}{8}$, $\frac{1}{4}$ with $\frac{1}{100}$ in. scale, brace, octagon and board measure, - - - - - - - - - - - - - - - per dozen 65.00

No. 3B Blued Framing—Body 2×24 in., tongue 1½×16 in., graduated in $\frac{1}{16}$, $\frac{1}{12}$, $\frac{1}{8}$, $\frac{1}{4}$ in., with board and brace measure, polished steel, - - - - - - - - - - - - - - - - - - - per dozen 53.00

No. 14B Blued Framing—Body 2×24 in., tongue 1½×16 in., graduated in $\frac{1}{8}$, $\frac{1}{4}$ in., with board measure, - - " 49.00

The Bluing is etched into the steel and will wear much better than any other line of Blued or OXYDIZED SQUARES.

IN ORDERING ANY OF THE ABOVE SQUARES, BE PARTICULAR TO SPECIFY FRAMING, BLUED OR POLISHISED FINISH WANTED.

HALF DOZEN IN A BOX.

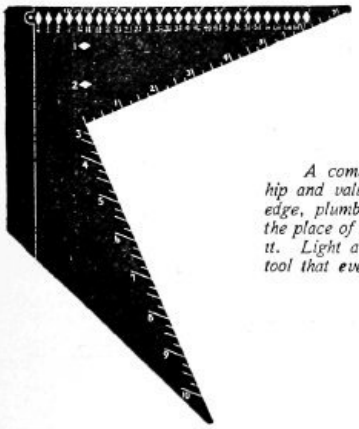
UNIVERSAL SQUARES.



A combination square for the use of carpenters and other mechanics. It is used as a try square, bevel square, pitch cut square, hip and valley-cut square, and mitre square. Drawing circles, gauging lumber, octagonal cuts; laying out mortise and tenons, straight edge, plumb and level. To operate; you simply reverse it from side to side. It marks ⅛ in. on one side and ¼ in. on the other. It takes the place of many tools, and is needed by every carpenter. It is always ready for any use, there being nothing to adjust or change about it. Light and practically indestructible, being made of the best steel, coppered, then oxidized or nickel finish. This square is a universal tool that every mechanic and household needs.

GAUGES.

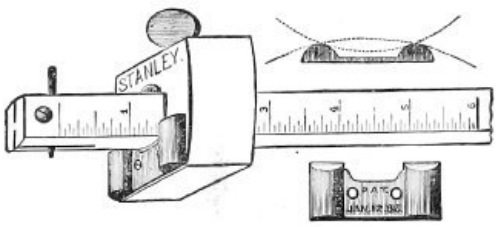
STANLEY'S IMPROVED MARKING.



Brass Face, Adjustable, for Straight or Curved Work.

No. 162—Beechwood, polished, boxwood thumb screw, oval bar, marked, adjustable steel point, - per dozen $3.00

No. 165—Boxwood, polished, plated head, brass thumb screw and shoe, oval bar, marked, adjustable steel point, per dozen, - - - - - - - - - 7.00

The brass face, with two ribs attached to one side of the gauge head will enable the owner to run a gauge line with perfect steadiness and accuracy around curves of any degree, and either concave or convex. The gauge-head is reversible, and the flat side can be used for all ordinary work.

HALF DOZEN IN A BOX. WEIGHT 4 LBS. PER DOZEN.

No. 90.

No. 97.

No. 90—STANLEY'S, nickel plated and polished, reversible steel bar marked, w't per doz. 3 lbs., - per dozen $4.20

No. 97—STANLEY'S, nickel plated and polished, reversible bar, marked, w't per doz. 4½ lbs., - per dozen 6.60

To one end of the bar is attached a steel point for use as an ordinary Marking Gauge. On the other end is a steel roller which can be used in many instances to better advantage than the point—such as marking across the grain of knotty places. Both the point and the roller are set very near the end of the bar to admit of being used close into a rabbet or corner. The head of the gauge can be turned over for a broad or narrow bearing, as desired.

ONE IN A BOX.

MARKING AND MORTISE.

No. 91—STANLEY'S, improved, nickel plated and polished, w't per doz. 6 lbs., - - - - - per dozen $7.80

This gauge is made of metal, and has two graduated bars. The steel points are attached very near the ends of bars, to admit of being used close up into a rabbet, or corner.

No. 286—BARRETT'S, improved roller, all metal, nickel plated and polished, with 1 steel set screw, 2 extra fine steel bars, 1 marked, beveled steel rollers, w't per doz. 9 lbs., - - - - - - - - per dozen $20.00

In place of a spur, the bars are provided with a steel roller, beveled to a fine edge, hardened and revolving on the shank of hardened steel screws, enabling them to run over cross-grain knots and roughness with perfect ease and accuracy.

ONE IN A BOX.

BUTT GAUGES.

No. 95—STANLEY'S, metallic, improved, nickel plated, w't per doz. 6 lbs., - - - - - per dozen $9.00

When the cutter at the outer end of the bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The outer bar has a steel cutter to accurately gauge for the thickness of the butt.

ONE IN A BOX.

No. 18—Square, brass top plate, polished side views, selected cherry, brass tipped, proved glasses, 26, 28 or 30 in., - - - - - - - per dozen $21.00

ONE IN A BOX. AVERAGE WEIGHT 44 LBS. PER DOZEN.

No. 90—Square, brass top plate, 2 brass lipped side views, mahogany, brass tipped, ground glasses, 26, 28 or 30 in., per dozen, - - - - - - - - - $39.00

ONE IN A BOX. AVERAGE WEIGHT 38 LBS. PER DOZEN.

No. 95—Square, brass top plate, 2 brass lipped side views, mahogany, brass bound, ground glasses, 26, 28 or 30 in., w't per doz. 48 lbs., - - - - per dozen $72.00

No. 96—Square, brass top plate, 2 brass lipped side views, rosewood, brass bound, ground glasses, 26, 28 or 30 in., w't per doz. 64 lbs., - - - - per dozen 80.00

The ground level glass is accurately fitted in a brass case and the only plaster used is that necessary to plug the ends of this case. This brass case is fastened by a screw at each end, directly to the stock of the level, and is entirely independent of the top plate. When a change of adjustment is necessary, the same can be readily changed by means of the screw mentioned above. When new glasses are required they are generally set in the brass case at the factory, and it is a very simple matter for the owner to replace the brass case in the stock of the level.

HALF DOZEN IN A CASE.

No. 35—STANLEY'S, adjustable, brass arch top plate, 2 side views, adapted for plumb bob and line, polished, 42 in., weight per dozen 56 lbs., - per dozen $19.75

HALF DOZEN IN A CASE.

With Plumb Rule.

No. 45—STANLEY'S, adjustable, square top plate, 2 brass lipped side views, 2 plumbs, with proved glasses, adapted also for plumb bob and line, 48 in., weight per dozen 60 lbs., - per dozen $36.00

The two plumb glasses are set in separate holes, but each on the right hand side. This will enable the workman to plumb work below where he stands, or above him, without turning the level stock end for end. There are also two plumb bob holes, so that the plumb bob can be used from either end of the level. These improvements will be found a great convenience by the workingman.

No. 2—Polished, brass ferrule, *all large*, per dozen..... 1.00

ONE DOZEN IN A BOX. AVERAGE WEIGHT 2 LBS. PER DOZEN.

AUGER HANDLES.

No. 1 —Common, hickory, *assorted*, length 13 to 15½ in., w't per doz. 6½ lbs., per dozen..... $0.70
No. 10—Common, hickory, *all large*, length 16 in., w't per doz. 9¼ lbs...per dozen .80

ONE DOZEN IN A BUNDLE.

No. 20—PECK'S, adjustable, hardwood, polished, length 18 in., w't per doz. 12 lbs.....per dozen $4.00

HALF DOZEN IN A PACKAGE.

No. 3—ROGERS', adjustable, *malleable iron*, japanned, hickory handles, riveted, length 16 in., w't per doz. 17 lbs., per dozen..... $8.00

QUARTER DOZEN IN A BOX.

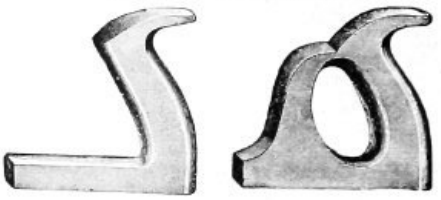
Ratchet.

No. 4—PRATT'S, white hickory handles, nickel plated nut, chuck and ratchet, japanned head, length 16 in., w't per doz. 36 lbs.....per dozen $24.00

The chuck of this handle will open wide enough to take in almost any size of auger and bit shank in the market. It opens wide enough to take in auger shanks with nuts. It can be used as a common auger handle, or by putting on the rachet it can be used with both handles, but without shifting the hands. In cramped places, one handle is taken off and placed at a right angle with the other. As seen in the cut, the wood on the detachable handle revolves.

ONE IN A BOX.

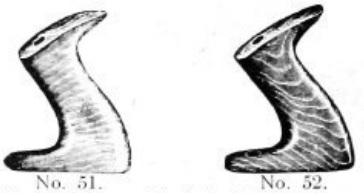
PLANE HANDLES.



No. 48. No. 49.

No. 48—Beech, plain, *for jack planes*, w't per doz. 3 lbs.....per dozen $0.85
No. 49—Beech, plain, *for fore or jointer planes*, w't per doz. 4 lbs....per dozen 1.20

ONE DOZEN IN A PACKAGE.



No. 51. No. 52.

No. 51—Beech, varnished, for Nos. 26, 27, 28, 29, 30, 31, 32, 33 and 34 Bailey's wood planes, w't per doz. 1½ lbs., per dozen..... $2.00

ONE DOZEN IN A BOX.

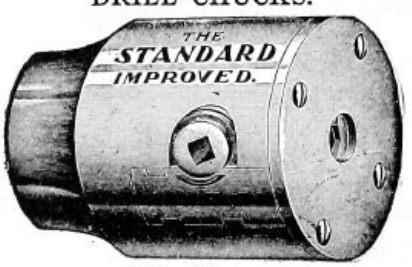
DRILL CHUCKS.



Polished Steel.

Nos.	**0**	**1**	**2**
Diam.	1 1/16	2 3/16	2 7/8 in.
Length	2 3/32	2 1/16	2 3/8 in.
Capacity	0 to 3/8	0 to 1/2	0 to 3/4 in.
Weight	1	2 3/4	6 lbs.
Each	$6.50	7.00	8.00

This Chuck has no projecting jaws, and the plate prevents larger work than the chuck is designed for being used. It is very powerful and guaranteed to hold true and not injure the shank of the drills. It holds round and square work. The jaws are guided by three strong gibs, and the screws are larger than in any chuck of this description heretofore made. The jaws and screws are made from cast steel carefully tempered. The hole in the hub is made to fit taper arbor.

ONE IN A BOX.

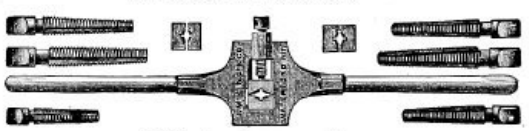
No. 39 —3 sets of dies, 4 taps, one each $\frac{5}{16}\times22$, $\frac{7}{16}\times18$, $\frac{1}{2}\times14$, $\frac{5}{8}\times14$ right hand, w't 2 lbs.....per set 4.00
No. 41 —3 sets of dies, 6 taps, one each $\frac{3}{16}\times26$, $\frac{1}{4}\times26$, $\frac{1}{4}\times20$, $\frac{5}{16}\times20$, $\frac{7}{16}\times16$, $\frac{1}{2}\times16$ right hand, w't 2 lbs.....per set 3.25
No. 42 —3 sets of dies, 6 taps, one each $\frac{1}{4}\times20$, $\frac{5}{16}\times20$, $\frac{7}{16}\times14$, $\frac{1}{2}\times14$ right hand, $\frac{7}{16}\times14$, $\frac{1}{2}\times14$ left hand, w't $2\frac{1}{2}$ lbs..per set 3.50
No. 43 —3 sets of dies, 4 taps, one each $\frac{1}{4}\times26$, $\frac{5}{16}\times20$, $\frac{7}{16}\times16$, $\frac{1}{2}\times16$ right hand, w't 2 lbs.....per set 3.00
No. 44 —3 sets of dies, 4 taps, one each $\frac{1}{4}\times20$, $\frac{5}{16}\times20$, $\frac{1}{2}\times14$ right hand, $\frac{1}{2}\times14$ left hand, w't 2 lbs.....per set 3.00
No. 53 —4 sets of dies, 4 taps, one each $\frac{1}{8}\times32$, $\frac{5}{16}\times24$, $\frac{1}{4}\times20$, $\frac{5}{16}\times16$ right hand, w't 1 lb.....per set 2.75

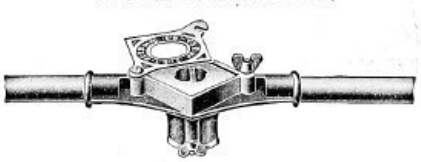
ONE SET IN A WOOD BOX.



With Set Screw at Side.

No. 17—3 pairs of dies, 6 taps, one each $\frac{5}{8}\times12$, $\frac{3}{4}\times12$, $\frac{7}{8}\times9$, 1×9 right hand, $\frac{7}{8}\times9$, 1×9 left hand, w't $10\frac{1}{2}$ lbs.....per set $9.00
No. 19—3 pairs of dies, 6 taps, one each $\frac{1}{2}\times14$, $\frac{5}{8}\times12$, $\frac{5}{8}\times14$, $\frac{3}{4}\times12$, $\frac{7}{8}\times9$, 1×9 right hand, w't 9 lbs.....per set 9.00
No. 27—3 pairs of dies, 6 taps, one each $\frac{7}{16}\times16$, $\frac{1}{2}\times16$, $\frac{9}{16}\times12$, $\frac{11}{16}\times10$, $\frac{5}{8}\times12$, $\frac{3}{4}\times10$ right hand, w't 5 lbs.....per set 6.50
No. 27D—7 sets of dies, 7 taps, one each $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$ in. right hand, w't $6\frac{1}{8}$ lbs., per set..... 9.50
No. 29—3 pairs of dies, 4 taps, one each $\frac{7}{16}\times12$, $\frac{1}{2}\times12$, $\frac{3}{4}\times10$ right hand, $\frac{3}{4}\times10$ left hand, w't 6 lbs.....per set 6.00
No. 51—3 pairs of dies, 6 taps, one each $\frac{1}{4}\times22$, $\frac{5}{16}\times22$, $\frac{7}{16}\times18$, $\frac{3}{8}\times18$, $\frac{7}{16}\times14$, $\frac{1}{2}\times14$ right hand, w't 3 lbs.....per set 4.50

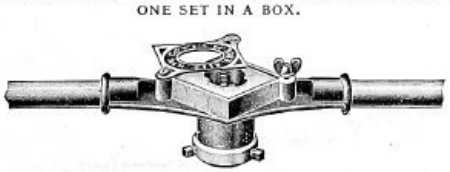
ONE SET IN A WOOD BOX.



No. 0 —Complete with right hand dies, for pipe $\frac{1}{8}$, $\frac{1}{4}$, $\frac{3}{8}$ and $\frac{1}{2}$ in., w't $5\frac{1}{2}$ lbs.....$ 9.50
No. 1 —Reed, complete with right hand dies, for pipe $\frac{1}{4}$, $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$ and 1 in., w't $13\frac{3}{4}$ lbs.....per set 15.00
No. 1½—For pipe $\frac{3}{4}$, 1 and $1\frac{1}{4}$ in., otherwise same as No. 1, w't 20 lbs.....per set 13.50

All Reed stocks are made of malleable iron, all parts interchangeable, bushings are all machined, handles polished, and the ends carefully rounded.

ONE SET IN A BOX.

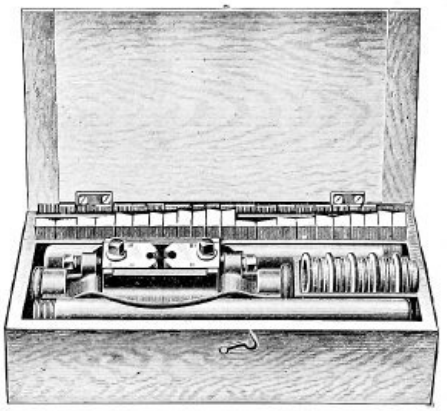


No. 2—Reed, complete with right hand dies for pipe $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 in., w't 27 lbs.....per set $20.00

This style furnished with lead screw, which can be used in threading pipe from one inch to two inches, inclusive. Pipe $\frac{3}{4}$ inch or less does not require a lead screw as the threads differ in pitch.

ONE SET IN A BOX.

STOCKS AND DIES.



No. 2A—Reed, adjustable, with right hand dies for pipe, $\frac{1}{4}$, $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$ and 1 in., w't 18 lbs.....per set $12.00

ONE SET IN FINISHED HARDWOOD CASE.

No. 3A—Reed, complete with right hand dies for pipe $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 in., w't 39 lbs.....per set $20.00

ONE SET IN SHIPPING CASE.

No. 12 —Diam. $3\frac{7}{8}$ in., for No. 2 pipe stock and dies $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 in., w't $2\frac{1}{2}$ lbs.....each 3.50

SCREW PLATES.

WILEY & RUSSELL'S.

Fig. 150.

Fig. 152.

LIGHTNING, Oiled Hardwood Case.

No. 150—With stock, tap wrench (fitting in stock) and 5 sizes taps, dies and guides, sizes $\frac{1}{8}\times40$, $\frac{5}{32}\times36$, $\frac{3}{16}\times32$, $\frac{7}{32}\times28$ and $\frac{1}{4}\times24$, stock 6 in. long, diameter of dies $\frac{7}{8}$ in., w't per set $1\frac{1}{2}$ lbs. ..... per set $5.50

No. 152—With stock, tap wrench (fitting in stock) and 7 sizes taps, dies and guides, sizes $\frac{7}{64}\times44$, $\frac{1}{8}\times40$, $\frac{9}{64}\times40$, $\frac{5}{32}\times36$, $\frac{3}{16}\times32$, $\frac{7}{32}\times28$ and $\frac{1}{4}\times24$, stock 6 in. long, diameter of dies $\frac{7}{8}$ in., w't per set $1\frac{3}{4}$ lbs ..... per set 7.00

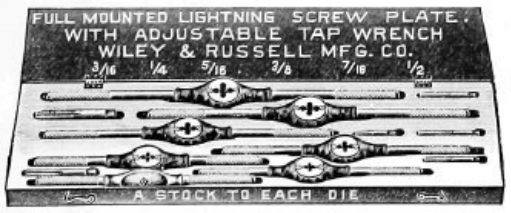
GREEN RIVER, Oiled, Hardwood Case.

No. 1124—With stock, adjustable tap wrench and 5 sizes taps, dies and guides, sizes $\frac{1}{4}\times20$, $\frac{3}{8}\times16$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, stock 22 in. long, diameter of dies $2\frac{3}{16}$ in., w't per set 14 lbs. ..... per set $11.25

No. 1104—With stock, adjustable tap wrench and 7 sizes taps, dies and guides, sizes $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$ and $\frac{3}{4}\times10$, stock 22 in. long, diameter of dies $2\frac{3}{16}$ in., w't per set 16 lbs. ..... per set 14.00

No. 1112—With stock, adjustable tap wrench and 9 sizes taps, dies and guides, sizes $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, $\frac{7}{8}\times9$, 1×8, stock 29 in., long, diameter of dies $2\frac{3}{4}$ in., w't per set 29 lbs. ..... per set 24.00

The simplicity and durability of these screw plates make them particularly attractive. They do the work in a single cut. The die is adjustable for wear and to make bolts or nuts fit tightly or loosely as may be desired.



LIGHTNING, Full Mounted, a Stock to each Die, Oiled Hardwood Case, Stocks Case-Hardened and Gunlock Finished.

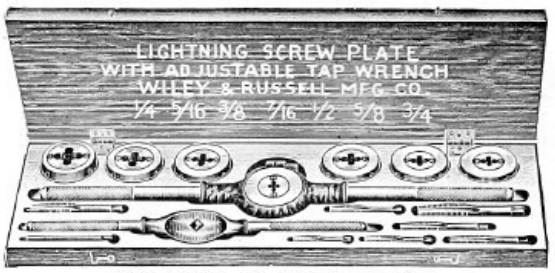
No. 1217—With stock to each die, adjustable tap wrench and 6 sizes taps, dies, and stocks, sizes $\frac{1}{16}\times24$, $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$ and $\frac{1}{2}\times12$, w't per set 16 lbs. ..... per set $12.75

No. 1223—With stock to each die, adjustable tap wrench and 7 sizes taps, dies and stocks, sizes $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$ and $\frac{3}{4}\times10$, w't per set 24 lbs. ..... per set 17.00

No. 1227—With stock to each die, adjustable tap wrench and 7 sizes taps, dies and stocks, sizes $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, $\frac{7}{8}\times9$ and 1×8, w't per set 37 lbs. ..... per set 23.00

No. 1229—With stock to each die, adjustable tap wrench and 9 sizes taps, dies and stocks, sizes $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, $\frac{7}{8}\times9$ and 1×8, w't per set 43 lbs. ..... per set 27.50

Instead of having but a single stock to a set of several dies, each die is furnished complete with its own stock of suitable size and weight. The time and trouble in fitting and changing dies for each occasion are saved. All the dies in a set can be used at the same time. These stocks are case-hardened and gunlock finished in the most beautiful manner; the handles are of best drawn bicycle tubing, capped and knurled.

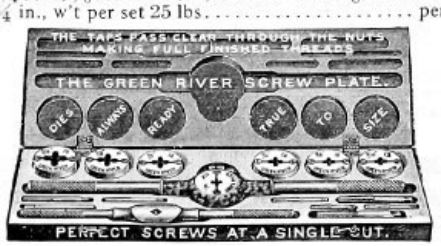


LIGHTNING, Oiled Hardwood Case.

No. 1193—With stock, adjustable tap wrench and 7 sizes taps, dies and collets, sizes $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$ and $\frac{3}{4}\times10$, stock 23 in. long, diameter of collets $2\frac{3}{4}$ in., w't per set 18 lbs. ..... per set $15.25

No. 1197—With stock, adjustable tap wrench and 7 sizes taps, dies and collets, sizes $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, $\frac{7}{8}\times9$ and 1×8, stock 23 in. long, diameter of collets $2\frac{3}{4}$ in., w't per set 23 lbs. ..... per set 21.00

No. 1199—With stock, adjustable tap wrench and 9 sizes taps, dies and collets, sizes $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, $\frac{7}{8}\times9$ and 1×8, stock 29 in. long, diameter of collet $2\frac{3}{4}$ in., w't per set 25 lbs. ..... per set 24.25



GREEN RIVER, for Automobile Use, Oiled Hardwood Case.

No. 1460—With stock, adjustable tap wrench and 5 sizes taps, dies and guides, sizes $\frac{1}{4}\times28$, $\frac{5}{16}\times24$, $\frac{3}{8}\times24$, $\frac{7}{16}\times20$, $\frac{1}{2}\times20$, stock 18 in. long, w't per set 11 lbs. ..... per set $10.75

No. 1462—With stock, adjustable tap wrench and 11 sizes taps, dies and guides, sizes $\frac{1}{4}\times28$, $\frac{5}{16}\times24$, $\frac{3}{8}\times24$, $\frac{7}{16}\times20$, $\frac{1}{2}\times20$, $\frac{9}{16}\times18$, $\frac{5}{8}\times18$, $\frac{11}{16}\times16$, $\frac{3}{4}\times16$, $\frac{7}{8}\times14$ and 1×14, stock 22 in. long, w't per set 22 lbs. ..... per set 27.00

HOLROYD'S.

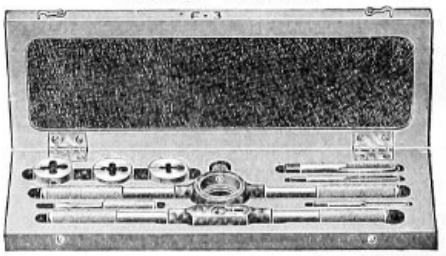
No. 2½ —$11\frac{1}{2}$ in. long, 3 pairs of dies, 3 taps, cutting $\frac{1}{4}\times20$, $\frac{3}{8}\times16$, $\frac{1}{2}\times12$, w't $2\frac{1}{2}$ lbs. ..... per set $ 5.00

No. 2½C—$11\frac{1}{2}$ in. long, 5 pairs of dies, 5 taps, cutting $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, w't $2\frac{5}{8}$ lbs. ..... per set 7.50

No. 3 D—14 in. long, 6 pairs of dies, 6 taps, cutting $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, w't 7 lbs. ..... per set 9.60

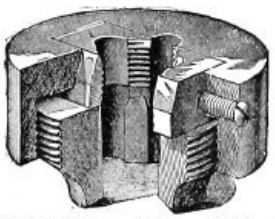
No. 4 B—19 in. long, 7 pairs dies, 7 taps, cutting $\frac{1}{4}\times20$, $\frac{5}{16}\times18$, $\frac{3}{8}\times16$, $\frac{7}{16}\times14$, $\frac{1}{2}\times12$, $\frac{5}{8}\times11$, $\frac{3}{4}\times10$, w't $7\frac{3}{4}$ lbs. ..... per set 13.50

LITTLE GIANT.



No. F3—*For stove bolts*, with 9 in. stock, $8\frac{1}{2}$ in. tap wrench, 3 taper taps, 3 dies, cutting $\frac{3}{16}\times24$, $\frac{1}{4}\times18$, $\frac{5}{16}\times18$, for stock bolts, w't per set $1\frac{3}{4}$ lbs ..... per set $6.25

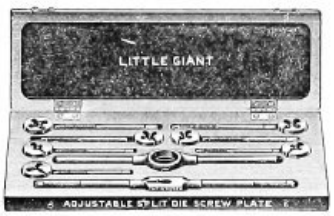
SCREW PLATES.



Sectional View of Die and Collet.

These taps and dies make perfect threads at one cut. The claim for the adjustable die is its solidity; the impossibility of stripping of threads; its perfect adjustment; its simplicity, durability and strength; doing away with all taper-pointed and cup-headed screws, common in many makes of dies. V threads 1-32 in. over size always furnished unless otherwise specified. V threads exact sizes, U. S. S. and Whitworth threads furnished at same price from factory.

Split Die.



"Little Giant," Round Adjustable Dies, $\frac{13}{16}$ Inch in Diameter, with Stock, Adjustable Tap Wrench and Screw Driver.

No. D5—5 taps, 5 dies, cutting 4, 32; 6, 32; 8, 32; 10, 24; 12, 24; w't per set 1½ lbs.....per set $5.00

No. DD5—5 taps, 5 dies, cutting ⅛, 40; $\frac{5}{32}$, 32; $\frac{3}{16}$, 24; $\frac{7}{32}$, 24; ¼, 20; w't per set 1½ lbs.....per set 5.00

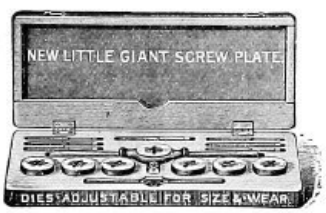
No. D6—6 taps, 6 dies, cutting 4, 36; 6, 32; 8, 32; 10, 24; 12, 24; 14, 20; w't per set 1½ lbs.....per set 5.75

No. DD6—6 taps, 6 dies, cutting ⅛, 40; $\frac{5}{32}$, 32; $\frac{3}{16}$, 24; $\frac{7}{32}$, 24; ¼, 20; $\frac{9}{32}$, 20; w't per set 1½ lbs.....per set 5.75

No. D7—7 taps, 7 dies, cutting 4, 36; 6, 32; 8, 32; 10, 24; 12, 24; 14, 20; 16, 18; w't per set 1½ lbs.....per set 6.50

No. DD7—7 taps, 7 dies, cutting $\frac{7}{64}$, 56; ⅛, 40; $\frac{9}{64}$, 40; $\frac{5}{32}$, 32; $\frac{3}{16}$, 24; $\frac{7}{32}$, 24; ¼, 20; w't per set 1½ lbs.....per set 6.50

The dies in Nos. D5, D6 and D7 are machine screw thread.



"Little Giant," 7½ Inch Stock, Plug Taps, Dies, 7 Inch Adjustable Tap Wrench, 1¼ Inch Collets.

No. A1—5 taps, 5 dies, cutting ⅛, 40; $\frac{5}{32}$, 32; $\frac{3}{16}$, 24; $\frac{7}{32}$, 24; ¼, 20; w't per set 2½ lbs.....per set $ 6.50

Per dozen,	$6.30	7.95	8.70	9.45	11.10	12.75

HALF DOZEN IN A BOX.

YANKEE SPIRAL RATCHET.

Right or Left Hand and Rigid at Variable Lengths.

No. 35 —Nickel plated, stained cherry handle, length with bit when extended 9⅛ in., 3 forged steel bits, weight per doz. 5¼ lbs., per dozen $25.00
No. 301—Chucks and drills, - - - - - - - - - - - - - - - - per dozen sets 6.00
No. 302—Extra long bits, in sets of 3, - - - - - - - - - - - - - - - " " 7.00

The tool is for driving small screws only and is intended for electrical workers, cabinet makers and mechanics having a large number of small screws to drive. It is a very light and convenient tool that can be easily carried in the pocket.

Right or Left Hand Ratchet, and Rigid at Variable Lengths.

No. 30—Nickel plated, stained cherry handle, length with bit 11 in., extended 19¼ in., 3 forged steel bits, weight per doz. 15 lbs., per dozen $30.00
No. 31—Length with bit 17½ in., extended 26¼ in., for extra heavy work, weight per doz. 20 lbs., otherwise same as No. 30, per dozen sets 42.00

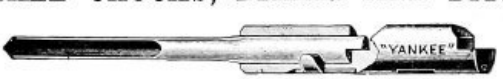
The change from right to left hand for either push or ratchet is made by simply moving the slide to either end of the slot. The ratchet movement can be used in any part of the length of tool for either right or left hand. When slide is placed in center of slot the rod is held rigidly and tool can be used as an ordinary screw driver, and this at any point in length of rod. The friction in ratchet mechanism is so slight as to be hardly felt, the backward movement is easy and noiseless.

ONE IN A BOX.

YANKEE CHUCKS, DRILLS AND BITS.

1/16 inch Drill.

¼ inch Drill.



No. 300, with ⅛ inch Drill.

No. 56E—Hermaphrodite Calipers, "	.40	.50	.55	.65	.80	.90	1.00					

The joint can be adjusted to any desired friction without roughing up. They resemble more in lightness and shape, hand-made tool-makers' calipers. Sizes 10 in. and over have new vise clamp.

LOCK JOINT CALIPERS AND DIVIDERS.

No. 55A.

No. 55B.

No. 55C.

No. 55F.

Crucible Sheet Steel, Finely Tempered and Polished, Easily Adjusted.

Length,	**3**	**4**	**5**	**6 in.**
Average weight,	½	1	1½	2 oz.
No. 55A—Outside Calipers, each	$0.90	.90	1.00	1.00
No. 55B—Inside Calipers, "	.90	.90	1.00	1.00

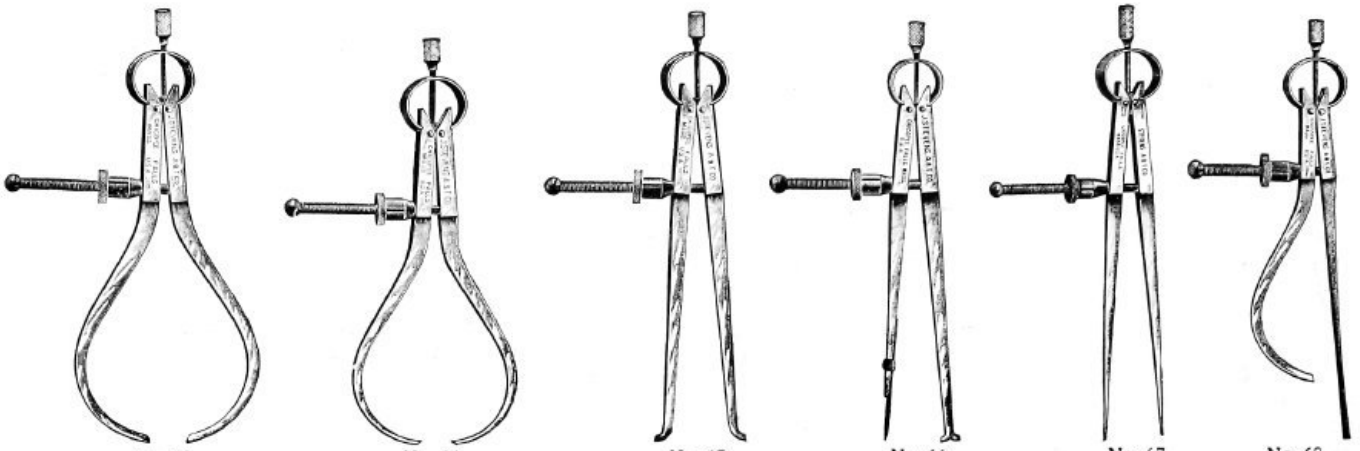
Crucible Sheet Steel, Finely Tempered and Polished, Easily Adjusted.

Length,	**3**	**4**	**5**	**6 in.**
Average weight,	½	1	1½	2 oz.
No. 55C—Hermaphrodite Calipers, each	$0.90	.90	1.00	1.00
No. 55F—Dividers, "				1.00

Made from the best crucible sheet steel, hardened and tempered so nicely that the legs may be sprung sideways to an angle of 30 degrees, when they will snap back into line again as before. All sizes made on correct lines with finished oval edges. The legs are made wider at the joint than commonly, more like the old-fashioned hand-made caliper; and they taper to a slender calipering point, giving them a neat appearance. The locking device for the joint is so powerful that the locking disc is made no larger than the joint on any of the sizes.

STEVENS' MACHINISTS' TOOLS.

IDEAL CALIPERS AND DIVIDERS.



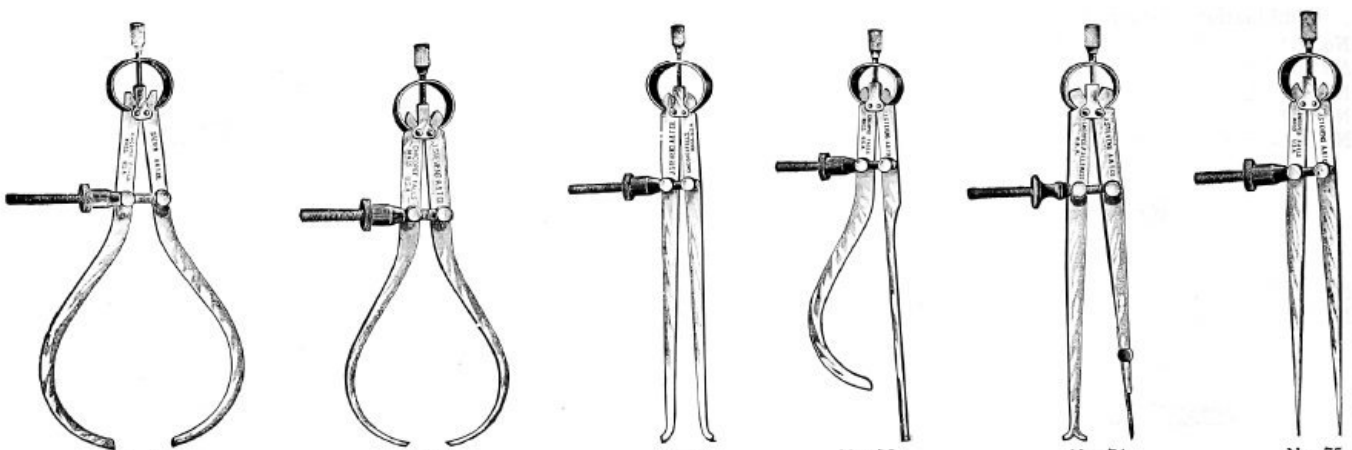
No. 63. No. 64. No. 65. No. 66. No. 67. No. 68.

Crucible Steel, Forged, Tempered and Polished, Fine Even Tension, Spring Split Nut, with Thumb Attachment.

Length,	2½	3	4	5	6 in.
Average weight,	1	1½	3	3½	4 oz.
No. 63—Outside Calipers,	each $1.15	1.15	1.25	1.25	1.50
No. 64—Thread Calipers,	"	1.15	1.25	1.25	
No. 65—Inside Calipers,	"	1.15	1.25	1.25	1.50
No. 66—Hermaphrodite Calipers,	"			1.50	
No. 67—Spring Dividers,	" 1.15	1.15	1.40	1.40	1.75
No. 68—Keyhole Calipers,	"	1.15	1.25		

The joint has two small fulcrum studs instead of one large one, thereby reducing the friction to a minimum and securing the full benefit of the spring. The new split nut is dust proof, and automatic in its action, sliding freely on the screw either way, when held in a vertical position, and when moved by hand, requires no pinching to release it. All the above can be had with solid nut at 15 cents less.

LEADER CALIPERS AND DIVIDERS.



No. 70. No. 71. No. 72. No. 73. No. 74. No. 75.

Crucible Steel, Forged, Tempered and Polished, Even Tension, Solid Nut, with Thumb Attachment.

Length,	2½	3	4	5	6	8 in.
Average weight,	½	1	2	3	4	5 oz.
No. 70—Outside Calipers,	each $0.65	.70	.75	.80	.85	1.00
No. 71—Thread Calipers,	"	.75	.90	1.00

Extra Jaws, for No. 12 ..... per pair 2.35

A steel schem and wrench is furnished with each clipper for adjusting.

HALF DOZEN IN A CASE.

NUT SPLITTERS AND BOLT CLIPPERS.

Is so constructed that it is practically impossible to break or injure the tool in any ordinary class of work. Has three distinct cutting surfaces, parallel, horizontal and nut-splitting. It readily removes nuts which have rusted on bolts. It cuts bolts at different angles, making a clean cut, leaving the bolt in a condition that the nut can be easily removed or replaced. It enables one to clip nuts from stoves in making repairs where you are unable to remove by former methods, and avoids breaking of castings which is almost impossible to prevent without this tool.

Especially adapted for use around stoves and furnaces.

Blades of Jessups' Tool Steel, Polished and Milled to a Fine Cutting Edge. All Plates of Drop Forged, Forty Carbon, Spring Steel, Nicely Polished.

No. 21—CAROLUS, cuts to 3/8 in. bolt, splits nuts from ¼ to 3/8 in., length 22 in., w't 6 lbs each ..... $ 7.00
No. 22—CAROLUS, cuts to ½ in. bolt, splits nuts from 5/16 to ½ in., length 31 in., w't 12 lbs. each 13.00

PINCERS AND FARRIERS' NIPPERS.

ELGIN WRENCHES.

Jaw. ¼ and ½ in. Inserts

Rethreading Attachment.

No. 202—Wrenches, wrought steel, hardened jaws, nickel plated and polished, length 7 in., for ⅛ to ⅜ in. pipe and ¼ to ¾ in. round iron, w't per doz. 7½ lbs.....per dozen $12.00
Extra Toothed Jaws..... " 3.60
Dies or Inserts..... " 6.00
Rethreading Attachments, with one die or insert.....per dozen 12.00
The upper part of wrench is adjustable and is held open by a spring. It can be closed by the thumb nut until both jaws meet, giving the tool a wide range of work. The extra jaws are very easily adjusted and they renew the wrench indefinitely. The rethreading attachment which fits into the handle makes a ratcheting die stock. The dies can be had in ¼, 5/16, ⅜, 7/16 and ½ inch. Also pump rod dies ⅜, 7/16 and ½ inch.
WRENCHES, ONE DOZEN IN A BOX. RETHREADING ATTACHMENTS WITH DIE OR INSERT, ONE IN CARTON.

ELGIN WRENCH SETS.

Elgin, in sets consisting of 1 Elgin wrench, 1 rethreading attachment having a ¼ in. square insert for taps, 5 rethreading dies in strong black walnut case, w't per set 1⅝ lbs.....per set $5.50

Each	$2.00	2.00	2.25
No. 30—Inches	**14**	**18**	**24**
For pipe	¼ to 1½	¼ to 2¼	¼ to 2½ in.
W't per ½ doz.	20	31¼	52 lbs.
Each	$3.00	4.00	6.00

HALF DOZEN IN A BOX.

VULCAN PIPE WRENCHES.

Drop Forged Steel, Saw Tempered Jaws, Flat Link Chain.

Nos	11	12	13
For pipe	⅛ to 1½	¼ to 2½	¾ to 4 in.
Length	20	27	37 in.
Weight	4¾	8¾	16 lbs.
Each	$3.50	5.00	7.00
Nos	**13½**	**14**	**15**
For pipe	1 to 6	1½ to 8	2 to 12 in.
Length	44	50	64 in.
Weight	21	29	49 lbs.
Each	$9.00	11.00	18.00

These wrenches are strong and durable, being made from wrought steel. The jaws are of saw temper; the teeth can be sharpened by filing only. The flat-link chains are hand made from steel prepared expressly for them. The chain swings from the center and can be used on either side the jaws.

BROWN'S ADJUSTABLE PIPE TONGS.

Solid Steel, Drop Forged.

Nos	1½	2	3	4
Length	16	20	24	36 in.
For pipe	⅜ to 1	½ to 1¼	1 to 2	1½ to 3 in.
Weight	4	6	10½	24½ lbs.
Each	$1.65	2.00	3.00	6.00

ONE DOZEN IN A CASE.

STANWOOD'S PIPE CUTTERS.

Case Hardened, Tempered Steel Roller.

No. 45—Sizes	1	2	3
Length	17	21	24 in.
For pipe	⅛ to 1	¾ to 2	2 to 3 in.
Weight	3	8	12 lbs.
Each	$1.50	2.25	7.00

ONE DOZEN IN A CASE.

TRIMO PIPE CUTTERS.

With Cutter and Two Rollers.

No. 55—Sizes	1	2	3
Length	15	18	19 in.
For pipe	⅛ to 1¼	½ to 2	1¼ to 3 in.
Weight	5	5½	7 lbs.
Each	$4.50	6.00	10.00
Extra Cutters, each	.30	.30	.40

Cuts a square end every time, and the pipe is left ready for the threading die without the use of a file. Extra cutter wheels can be furnished to replace rollers, making a three-wheel cutter.

No. 10 Assortment—Consisting of display stand and 18 Jersey Vises, w't 60 lbs.....per assortment $26.26
Consisting of the following:

3 No. 40½	**3 No. 44**	**1 No. 47**
2 No. 48	**1 No. 52**	**1 No. 58**
3 No. 42	**2 No. 46**	
1 No. 49	**1 No. 56**	

These are high grade amateur vises at moderate prices.

They are fitted with loose malleable iron nut and solid steel screw. Face of jaw is ground so that the jaws come up square. The screw works easy and smooth.

The body is finished with a brown baking japan, working parts are highly polished.

Good and substantial small vises, will work when wanted and give satisfaction while in use.

VISES.

PARKER'S OVAL SLIDE.

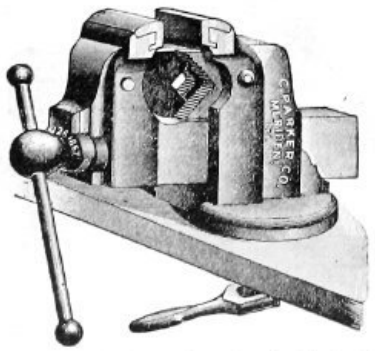
PARKER'S COMBINATION.



Swivel Base, Polished Steel Faces, Round and Piper's Jaws, Milled and Fitted.

No. 87—3⅝ in. jaws, adjustable for 2 in. pipe and under, opens 4¾ in., w't 41 lbs. ..... each $16.00

No. 88—4⅛ in. jaws, adjustable for 3 in. pipe and under, opens 6¼ in., w't 59 lbs. ..... each 20.00

COMBINATION.

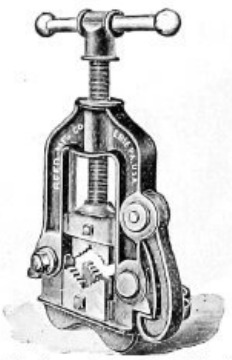
Swivel Base, Round and Piper's Jaws, Milled and Fitted.

No. 7—3⅝ in. jaws, opens 5 in., adjustable for 2 in. pipe and under, w't 39 lbs. ..... each $16.00

No. 8—4⅛ in. jaws, opens 6 in., adjustable for 2 in. pipe and under, w't 57 lbs. ..... each 20.00

The castings entering into the construction of these vises are of a high character and neat design, insuring strength where strength is most required.

PIPE.



No. 211—REED'S malleable iron frame, polished solid tool steel milled jaws, oil hardened, self locking, all parts interchangeable, for pipe ⅛ to 2½ in., w't 12 lbs. ..... each $3.00

The quality of material and finish are points which have received particular attention. The best malleable practice also has been followed in the design of this vise, and we unhesitatingly guarantee it to be strong and heavy.

The base has lugs on both uprights, in order that the latch may hang on either side. The change is made by taking the bolt out of the hinge, turning the yoke around, and then bolting the yoke to the other upright (both uprights have holes for this purpose).

DIAMOND MECHANICS'.

Adjusted for Large Work.

As a Pipe Vise.

No. 14—4 in. steel faced jaws, opens 12 in., one jaw adjustable, ¾ in. steel screw, chilled anvil face, size not including horn 3×7 in., painted green, face, jaws and head polished and lacquered, w't 38 lbs. ..... each $5.00

Well made and has been carefully planned to aid in a wide range of work. It is a first-class pipe vise, and the adjustable jaw enables it to be used for a variety of purposes. The drill attachment is packed separately and is not included with the vise.

Showing Drill Attached to Vise.

No. 15—Drill attachments, polished head, without drills or vise, w't 13 lbs. ..... each $2.70

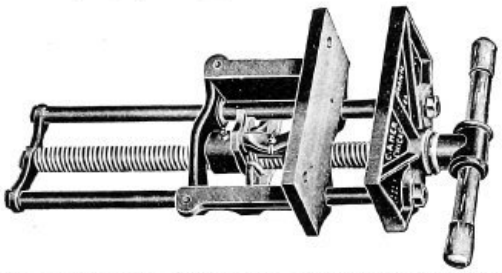
ONE IN A CASE.

VISES AND ANVILS AND VISES.

WOODWORKERS' VISES.

Herriman's, Rapid Acting, Rigid Jaws, Cold Rolled Steel Guides and Screw, Extra Large Nut of Bronze, Castings of Best Gray Iron.

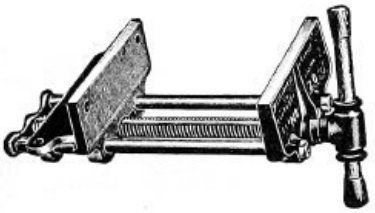
No. 17—4×7 in. jaws, opens 9 in., w't 27 lbs.....each $6.00



Rapid Acting, Rigid Jaws, Cold Rolled Steel Guides and Screw, Extra Large Nut of Bronze, Castings of Best Gray Iron.

No. 10—4×10 in. jaws, opens 12 in., w't 47 lbs.....each $8.00

By turning the handle one-quarter way to left the jaw can be moved forward or backward at will. One important advantage in this vise is that it gives the user continuous use of the entire length of screw if desired.



No. 220—TOLES', rapid acting, flush, 10×4 in. jaws, opens 12 in., 1¼ in. screw, w't 38 lbs.....each $7.50

Jaws	3⅜	3¾	4⅛ in.
Opens	4	5	6 in.
Weight	33	42	56 lbs.
Each	$4.50	5.50	6.50

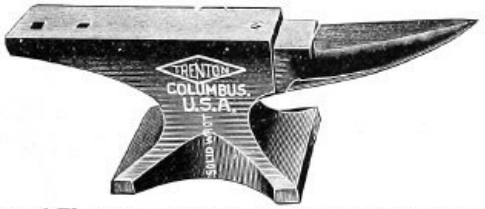
The back jaw of the vise is self-adjusting and in use conforms by automatic action to any angle; and makes firm the object held, whether it be straight, beveled or wedge shaped. ONE IN A CRATE.

ANVILS, BELLOWS, ETC.

TRENTON FORGED ANVILS.

Factory Shipments.

We carry sizes 80 to 150 lbs. in stock, but can furnish larger or smaller sizes from factory when desired, in which case prices will be F. O. B. factory.



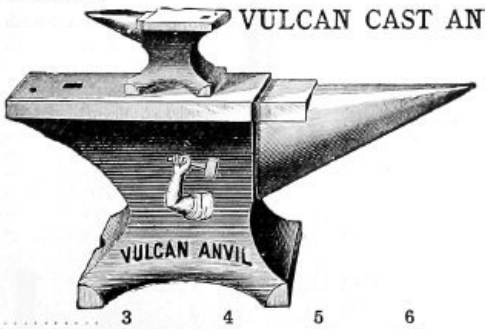
Forged in Two Pieces and Welded at the Waist, Face One Piece of Special Grade Finest Tool Steel, Tempered to Prevent Chipping.

Stock Sizes—80, 85, 90, 95, 100, 110, 115, 120, 125, 135, 140 and 150 lbs. ..... per pound $0.18

Long, perfectly shaped horn and long heel. Base has a long spread, thus preventing "tipping" when heavy work is being done on the point of heel or horn. Does not require "strapping down," will set firmly without shifting or rocking, and combines a most practical and graceful shape with the least amount of weight possible.

GUARANTY— Should this anvil break at the waist or its steel face become loose within a year from date of purchase, it will be replaced without charge. All claims will be referred to the manufacturers. These anvils are tempered in a manner to suit the majority of smiths. No claim for defective temper will be allowed.

VULCAN CAST ANVILS.



Nos.	3	4	5	6	7
Weight (about)	30	40	50	60	70 lbs.
Per pound	$0.15	.13	.12	.11	.10½

Weight (about)	80	90	100	120	150 lbs.
Per pound	$0.10	.10	.10	.10	.10

The face is one solid piece of tool steel perfectly welded to the body by a patent process, and then accurately ground and tempered. The horn is covered with and at its extremity is made entirely of tough, untempered steel; body is made from a superior pig iron. The face and horn are warranted to be thoroughly welded to the body and not to separate.

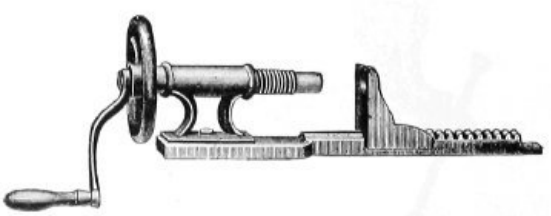
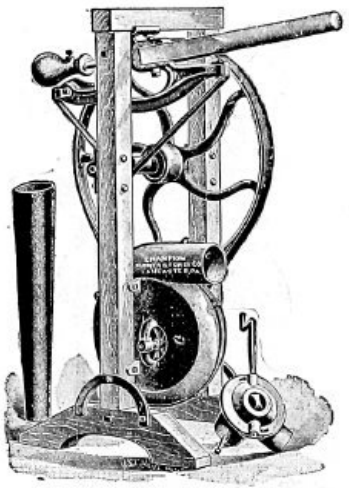
BLACKSMITHS' DRILLS.



No. 012—Japanned, length 30 in., 1½ in. screw, $\frac{5}{16}$ in. square hole in mandril, w't 27 lbs. ..... each $6.00

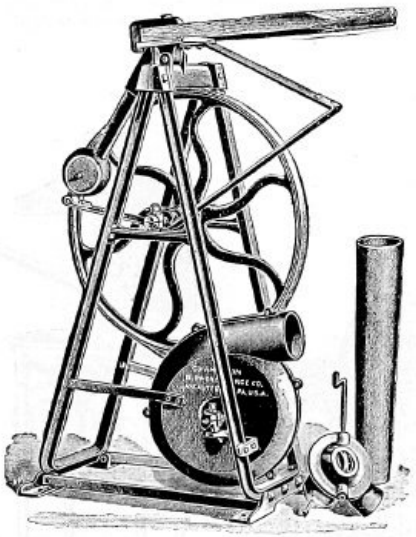
The mandril is fitted to take standard drills.

CHAMPION BLACKSMITHS' BLOWERS.



No. 1894—LEADER, hardwood frame, lever motion, 16 in. fan, 28 in. fly-wheel, capacity of a 50 in. bellows, with patent adjustable nozzle, tuyere iron and piping, w't 125 lbs.....each $12.00

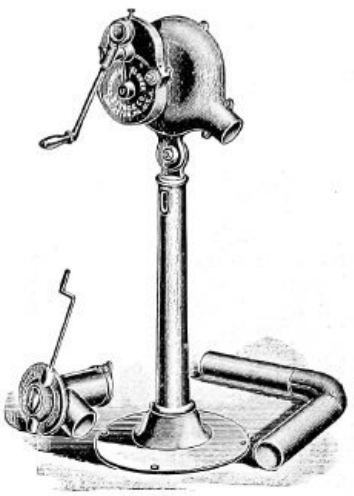
The mechanical self-acting and simple lever motion has nothing to get out of order and is absolutely perfect in construction, durable and light running, with a continuation of momentum between strokes, keeping the blast regular and powerful.



No. 1898—Angle steel frame, lever motion, 16 in. fan, 26½ in. fly wheel, with tuyere iron and piping, ball joint oscillating journal bearings, w't 175 lbs.....each $20.00

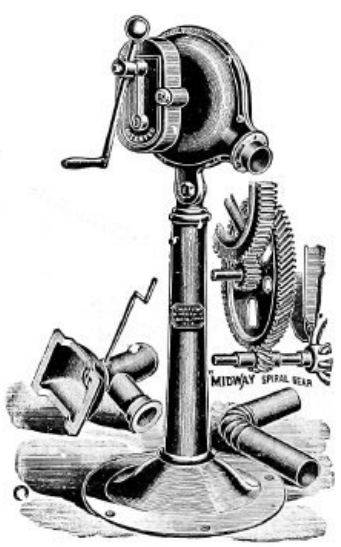
No. 1898½—With lever and crank motion combined, otherwise same as 1898, w't 190 lbs.★.....each 25.00

The lever motion is a very simple self-acting ratchet, no spring or anything to get out of order, having three self-acting pawls made from hardened tool steel and is practical and durable. The angle steel frame is stiff and rigid, the bent part of the steel being at the lower end where the fan is fastened and most stiffness is required. The four ends are brought together at the top, then clamped by bolts and fittings substantially. The Champion patented ball-joint oscillating journal bearings used on this blower require oiling but once in six months. Will produce a welding heat on 3½ to 4 in. iron in ten minutes.



No. 1—LANCASTER, geared, crank motion, 12 in. fan, adjustable nozzle tuyere iron and piping, w't 110 lbs., each..... $20.00

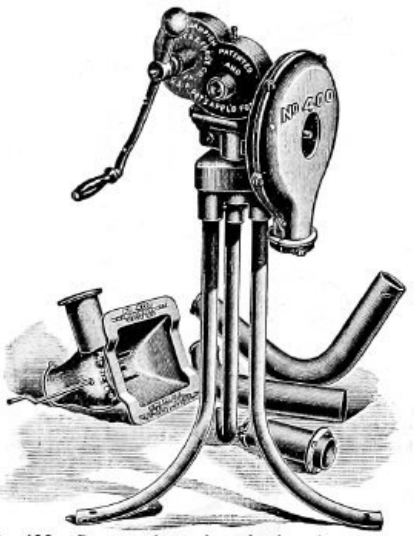
A well built, cheap, direct draft blower, smooth running, crank turns either way to make the blast



No. 70—"MIDWAY" spiral geared, crank motion, 12 in. fan, with 50 lb. center blast, heavy nest ball tuyere iron and piping, w't 175 lbs.....each $30.00

The Champion "Midway" or cross spiral gearing is simple in construction and without small gears or pinions. The gearing runs in oil in a dust-proof casing, the crank turns in either direction to make the blast.

★*FOR FACTORY SHIPMENT ONLY.*



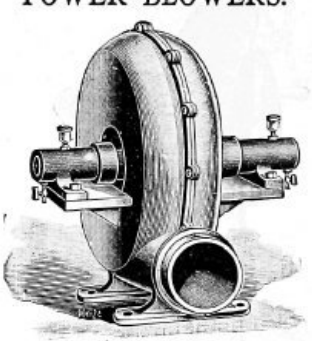
No. 400—Best tool steel and phosphor bronze working parts, highest grade tool steel adjustable ball bearings, lathe turned cups and cones hardened and ground to highest possible finish, 12 in. fan, with "Whirlwind" blast, anti-clinker heavy nest tuyere iron and piping, w't 160 lbs.....each $37.00

The No. 400 gearing is so constructed that it runs the blower at the extreme high speed necessary to produce a white heat blast without early destruction of the gearing. The spiral shaft and spiral gear are the same in size and diameter and have the same sized teeth as are used in shafts and gears running at 20,000 revolutions per minute and carrying a heavy load, while in this blower no load is carried and speed does not exceed 2,000 revolutions per minute, thus making durability a certainty.

Noise and lost motion are impossible as the spiral gear in riding the spiral shaft lengthwise has eight full teeth continuously meshing into eight full teeth of the shaft.

The "Whirlwind" blast anti-clinker heavy nest tuyere iron increases the output of the fire fully two hours per day, with a great saving in coal, by consuming all the heating elements in the coal. It does not blow the heat and hot air up the chimney.

POWER BLOWERS.



No. 0.

Champion.

No. 0—Will blow one fire, height 10 in., w't 15 lbs.....each $ 8.00

No. 00—Will blow two ordinary fires, height 14 in., w't 30 lbs.....each 10.00

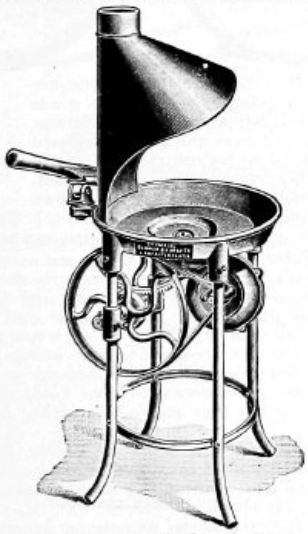
No. 000—Will blow three ordinary fires, height 16½ in., w't 50 lbs.....each 12.00

Arranged for exhaust purposes.....extra 2.00

This blower is intended for blowing fires in portable and small stationary boilers, also for forge fires and various purposes where a small current of air is desired.

PORTABLE FORGES.

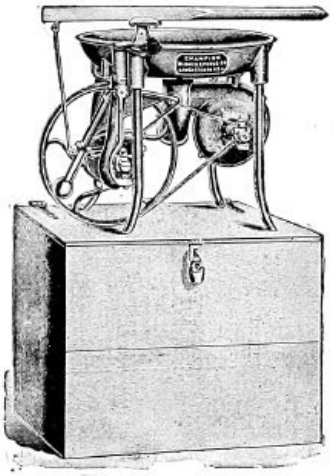
No. 150—CHAMPION, *agricultural*, lever, *with shield*, 18 in. hearth, 8 in. fan, height 30 in., w't 75 lbs.....each $14.00



No. 151—CHAMPION, *agricultural*, lever, *with half hood*, 18 in. hearth, 8 in. fan, height 30 in., w't 80 lbs.....each $16.00
Especially adapted for farmers or where light jobs are to be done.

No. 152.

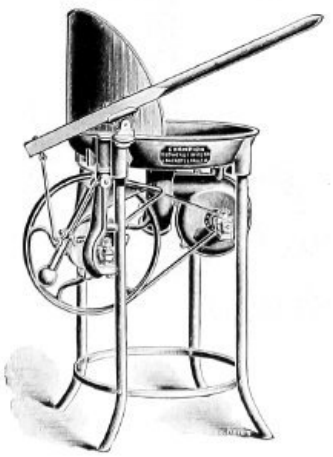
No. 152—CHAMPION, *agricultrual*, crank, *with shield*, 18 in. hearth, 4 in. deep, height 30 in., 8 in. fan, w't 70 lbs. each $14.00
No. 153—CHAMPION, with half hood otherwise same as No. 152, w't 70 lbs. each..... 16.00



No. 8 —CHAMPION, standard *miners' and prospectors'* lever, patented ball joint oscillating bearings, hearth 22 in., 10 in. fan, without case, w't 100 lbs.★ each..... $23.00

No. 8½—*With case*, otherwise same as No. 8, w't 160 lbs.★.....each 26.00

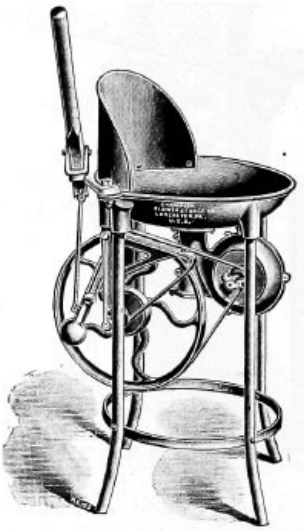
The capacity of this forge is such as to give miner and prospector entire satisfaction. It is made with short legs so that it can be placed in case, making it handy for transportation.



No. 5—CHAMPION STANDARD, lever *rivet, with shield*, patent ball joint oscillating bearings, 22 in. hearth, height 33 in., 10 in. fan, w't 110 lbs.★....each $24.00

Adapted for all kinds of light portable work.

★*FOR FACTORY SHIPMENT ONLY.*



No. 85—CHAMPION IMPERIAL, lever *rivet, with shield*, 22 in. hearth, height 33 in., 9½ in. fan, w't 100 lbs.....each $24.00

No. 87—*With full hood*, otherwise same as No. 85, w't 110 lbs.★.....each 30.00

These are adapted for tempering tools, for tank and bridge builders, miners, boiler repairing, etc. No. 87 is used where combustible material is kept.

No. 05 No. 06

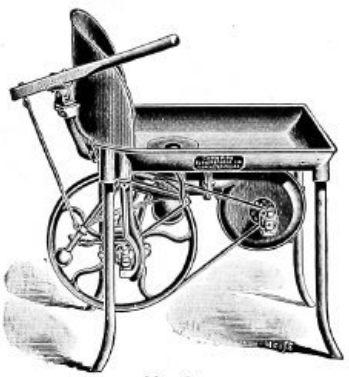
No. 05—AJAX, *rivet* lever, *with shield*, 22 in. hearth, height 33 in., 9½ in. fan, w't 100 lbs.....each $24.00

A strong and light forge adapted for all kinds of light portable work.

No. 06—AJAX, *toolmakers'* lever, *with half hood*, 22 in. hearth, height 33 in., 9½ in. fan, w't 105 lbs.....each $27.00

Adapted for tempering tools, for tank and bridge builders, miners and farmers.

PORTABLE FORGES.



No. 2.

No. 2—CHAMPION, standard *boilermakers'* lever, *with shield*, ball-joint oscillating bearings, full tuyere iron, hearth 23×35 in., height 30 in., 12½ in. fan, w't 200 lbs.....each $36.00

No. 3—*Machinists', with half hood*, otherwise same as No. 2, w't 210 lbs. ★ each 40.00

No. 4—*Machinists', with full hood*, having two doors, one in front and one in rear, preventing escape of fumes, sparks and smoke, otherwise same as No. 2, w't 220 lbs.★.....each 42.00

These forges will produce a welding heat on 3 in. iron in five minutes.

Nos. 2 and 3 are adapted for boilermakers, tank makers, iron bridge and ship builders, plumbers, millers, manufacturers, etc., while No. 4 with full hood is used in furniture factories, saw and planing mills, oil refineries, varnish works or any place where escape of sparks, fumes, or smoke might do damage.

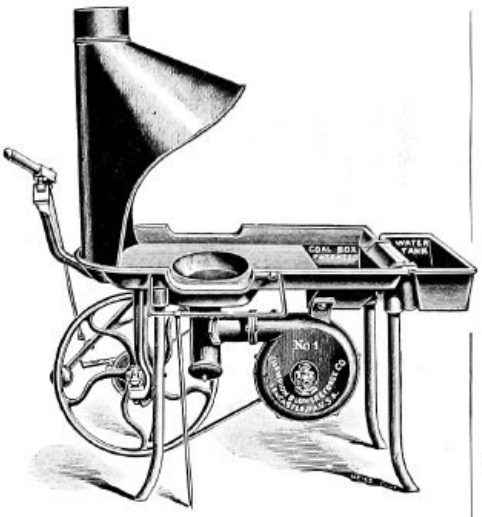
No. 83.

No. 82—CHAMPION IMPERIAL, *boilermakers'* lever, *with shield*, hearth 23×35in., height 30 in., 12½ in. fan, w't 160 lbs.★ each..... $36.00

No. 83—CHAMPION IMPERIAL, *machinists'* lever, *with half hood*, otherwise same as No. 82, w't 170 lbs.....each 40.00

The Imperial Lever Motion is a very simple device. It is a self-acting ratchet. The three ratchet dogs are made of hardened tool steel and will stand years of hard work.

No. 82 is used by boilermakers, iron bridge and ship builders, railroad contractors, etc., and No. 83 by machinists, plumbers, millers, locksmiths, planters, and in railroad repair shops.

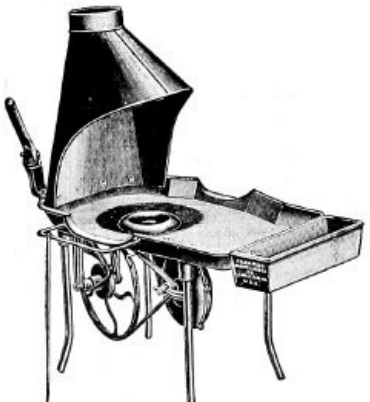


No. 1.

No. 1 —CHAMPION, new standard, improved, *blacksmiths'* lever, *with half hood*, patented ball joint oscillating journal bearings, slope bottom coal box, hearth 32×45 in., height 30 in., 16 in. fan, without water tank, w't 360 lbs.★.....each $50.00

No. 1½—*With water tank*, otherwise same as No. 1, w't 375 lbs.★.....each 55.00

The oil chambers hold oil for lubricating the bearings automatically six months. The sloped bottom coal box enables operator to keep the coal in a vroper degree of dampness to suit all work.

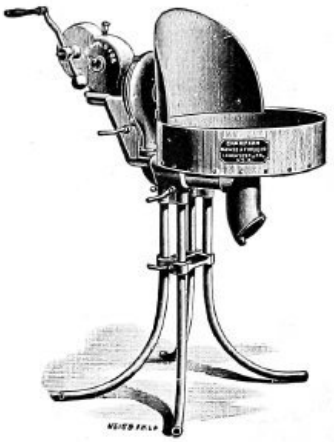


No. 81.

No. 81 —CHAMPION IMPERIAL, *blacksmiths'* lever, with *half hood*, hardened tool steel self-acting pawls, oil caps in all bearings, hearth 32×45 in., height 30 in., 14½ in. fan, without water tank, w't 250 lbs.....each $50.00

No. 81½—*With water tank*, otherwise same as No. 81, w't 275 lbs.★....each 55.00

The fan has a direct blast into the fire and will produce a large and steady blast for heavy and all kinds of blacksmith work.



No. 401—CHAMPION, steel, *rivet, with shield*, made of structural steel, adjustable ball bearings, patented high speed spiral gearings, 18 in. hearth, height 30 in., 9 in. fan, w't 115 lbs., each..... $35.00

Used by railroads, bridge builders, boiler and structural iron workers.

A strong, positive blast is produced by practically one-fourth the work required to produce less blast in other forges. The crank turns either way to produce blast.

Can be taken apart for transportation and set up in a few minutes.

No. 408.

No. 408—CHAMPION, steel *horseshoers, with half hood*, heavy structural steel, working parts of highest grade tool steel and phosphor bronze, hearth 30×36×6 in., 12 in. fan, adjustable ball bearings, with "Whirlwind" blast anti-clinker heavy nest tuyere iron, w't 295 lbs., without water tank★.....each $65.00

No. 408½—*With water tank*, otherwise same as No. 408, w't 325 lbs.★...each 70.00

No. 409 —*Hearth 30×40×6 in.*, otherwise same as No. 408, w't 300 lbs.★ each..... 70.00

No. 409½—*Hearth 30×40×6 in., with water tank*, otherwise same as No. 408, w't 350 lbs.★.....each 75.00

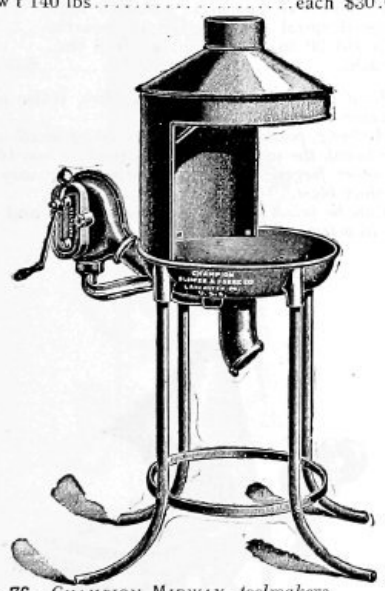
This is virtually the No. 400 Blower converted into a forge. It will make a white heat blast equal to the best power blower blast. Crank turns in either direction; it runs noiseless, smooth, easy and pleasant to the hand. It is adapted for carriage and heavy wagon work, railroad shops as well as general blacksmithing.

★*FOR FACTORY SHIPMENT ONLY.*

PORTABLE FORGES, TIRE BENDERS AND SHRINKERS.

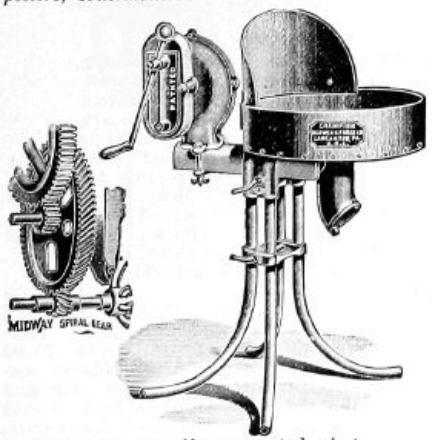
PORTABLE FORGES.

No. 75—CHAMPION MIDWAY, *rivet, with shield,* cross spiral geared, 22 in. cast iron hearth, height 33 in., 10 in. fan, w't 140 lbs.....each $30.00



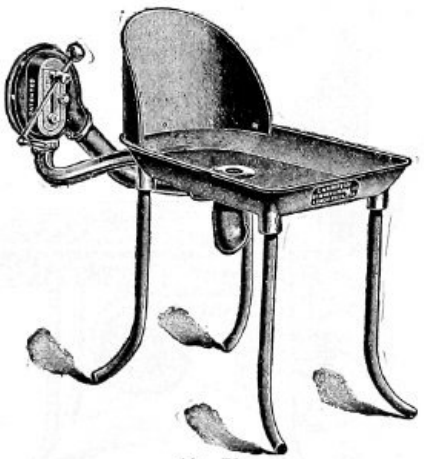
o. 76—CHAMPION MIDWAY, *toolmakers, with half hood,* cross spiral geared, 22 in. cast iron hearth, height 33 in., 10 in. fan, w't 145 lbs.....each $33.00

A strong and durable forge, adapted for jewelers, bicycle repairers, tempering tools, miners, prospectors, boilermakers.



No. 78—CHAMPION MIDWAY, *steel rivet, with shield,* cross-spiral geared, 18 in. hearth, height 30 in., 10 in. fan, w't 135 lbs.....each $30.00

PORTABLE FORGES.

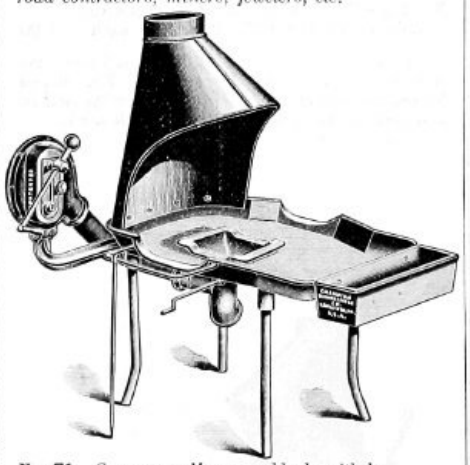


No. 72.

No. 72—CHAMPION MIDWAY, *boilermakers', with shield,* cross spiral gearing in dust proof casing, cast iron hearth 23×35 in., height 30 in., 10 in. fan, w't 185 lbs.....each $36.00

No. 73—*Machinists', with half hood,* otherwise same as No. 72, w't 190 lbs., each..... 40.00

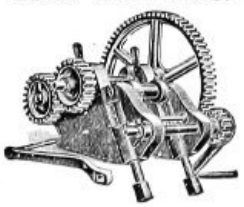
Suitable for boilermakers, bridge builders, railroad contractors, miners, jewelers, etc.



No. 71—CHAMPION MIDWAY, *blacksmiths', with half hood,* cross spiral gearing in dust proof casing, cast iron hearth 32×45 in., and heavy nest tuyere, iron, height 30 in., 12 in. fan, w't 300 lbs.....each $50.00

The gearing used for producing the blast is simple in construction and without small gears or pinions. The cranks turn either direction to make blast.

TIRE BENDERS.



No. 1—NEW STYLE EUREKA, bends 4×1 in. tire, w't 190 lbs.....each $18.00

A strong and powerful tool, built with all the latest improvements. It is double back geared and worked with two cranks which are furnished with each bender; also two speeds, one for light and fast work and the other for heavy work.

★*FOR FACTORY SHIPMENT ONLY.*

BENCH FORGES.

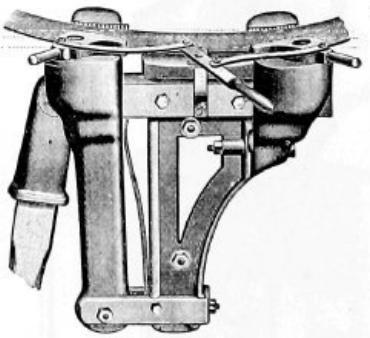
Champion, Crank, 14×17 Inch Hearth, 7 Inch Fan.

	EACH
No. 21—*With shield,* w't 45 lbs.....	$16.00
No. 22—*With half hood,* w't 55 lbs.★..	18.00
No. 23—*With full hood,* w't 65 lbs.★....	20.00

These are especially intended for light work, being very compact and easily moved, having short legs, so when used should be set on a box or bench. Will produce a welding heat on 1 in. iron in ten minutes. It is a very convenient forge for prospectors.

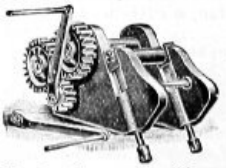
TIRE SHRINKERS.

No. 11—CHAMPION, floor space 18×10 in., shrinks tires 4×1 in., w't 140 lbs.....each $12.00



No. 12—LANCASTER, jaws and cams drop forged from solid tool steel, hardened and tempered, will shrink all size tires up to a full 4×1 in., and axle up to 1½ in., w't 200 lbs....each $20.00

Constructed in the most mechanical manner and from the highest grade material. It is set on a post, making it as solid and strong as an anvil for hammering down kinks in the tire, and taking up but little space.



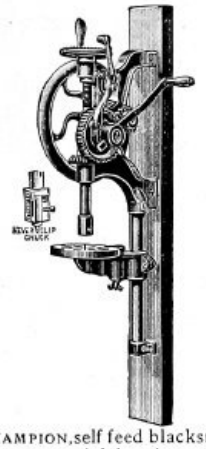
TIRE BENDERS.

No. 2—CHAMPION NEW STYLE, bends any size tire up to 3×¾ in., w't 115 lbs.....each $11.00

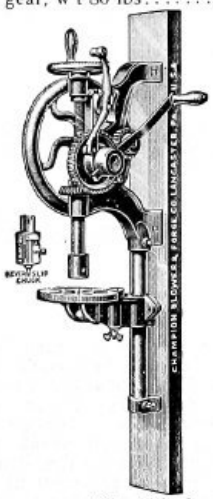
The frame is cast strong and substantial, with double back gear, and worked with two cranks and two speeds.

POST DRILLS.

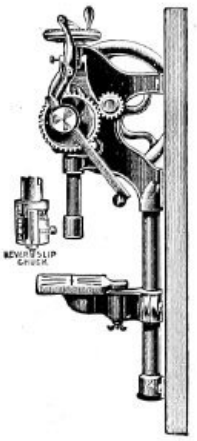
No. 92—CHAMPION, hand feed, made of best material, bearings ground out of solid metal, ⅞ in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 12 in. circle, holes from $\frac{1}{64}$ to ¾ in., w't 65 lbs.. ....each $6.00



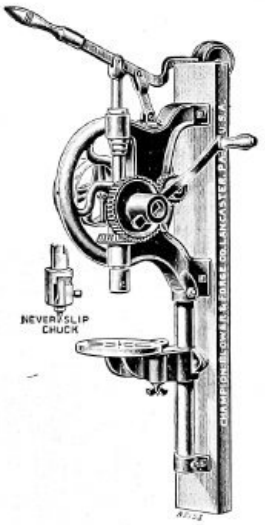
No. 101—CHAMPION, self feed blacksmiths' made of best material, bearings ground from solid metal, ⅞ in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 12 in. circle, holes from $\frac{1}{64}$ to ¾ in., single speed, with back gear, w't 80 lbs.....each $7.00



No. 98—CHAMPION, self feed blacksmiths', made of best material, bearings ground from solid metal, 1 in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 14 in. circle, holes from $\frac{1}{64}$ to 1 in., single speed, with back gear, w't 95 lbs.. .....each $8.00
Extra, for power★..... " 3.00



No. 93½—CHAMPION, self feed blacksmiths', made of best material, bearings ground out of solid metal, 1⅛ in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 15 in. circle, holes from $\frac{1}{64}$ to 1¼ in., 2 speeds, full back gear, w't 115 lbs., ...each $9.50
Extra, for power★..... " 3.00

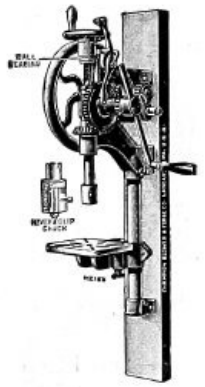


No. 100—CHAMPION, lever feed blacksmiths', made of best material, bearings ground out of solid metal, steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 5½ in. up-and-down run, drills to center of 14 in. circle, holes from 0 to ¾ in., with back gear, w't 100 lbs.★.....each $10.00
Extra, for power★..... " 3.00

This tool is designed for light and quick work, where tire drilling and counter-sinking is an object.

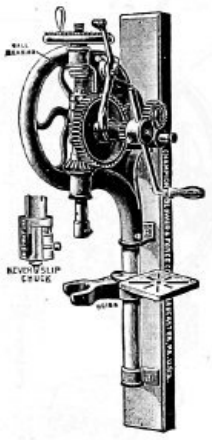
Our stock on above drills have spindles bored to take ½ in. straight shank drill bits. If specially ordered from factory, will be bored to take ⅝ or $\frac{43}{64}$ in.

★*FOR FACTORY SHIPMENT ONLY*



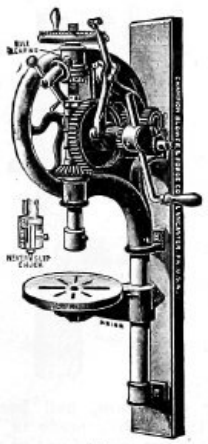
No. 95—NEW CHAMPION, ball bearing self feed blacksmiths', made of best material, bearings ground out of solid metal, tempered die steel cup and cone, 1¼ in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3½ in. up-and-down run, drills to center of 16 in. circle, holes from $\frac{1}{64}$ to 1¼ in., back geared, w't 130 lbs., each..... $12.50
Extra, for power★.....each 3.00

The running of the drill is greatly improved with the ball bearing. It is back geared, with the improved third gear principle, which gives the second speed the same crank motion as on the first speed. The third gear being part of the handle hub, it is therefore disengaged when using first speed, saving the continuous labor of pulling along an intermediate gear while using the first speed; has double journal bearings to all working parts.



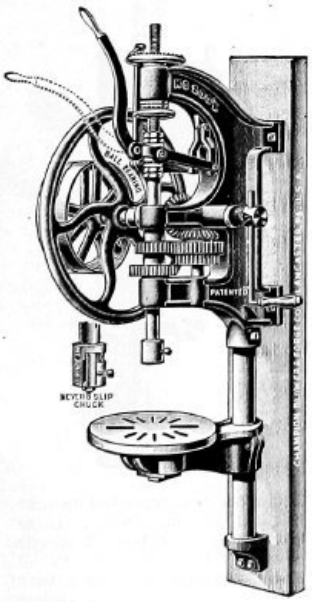
No. 4—CHAMPION, new improved upright blacksmiths', 18 in. swing, three geared, automatic self feed, 2 speeds with double journal bearings to all working parts, full back geared, with improved third gear principle (which gives the second speed the same crank motion as on the first speed), bearings all ground and polished out of solid metal, 1¼ in. steel spindle bored like "Never-Slip" chuck for ½ in. straight shank drill bits, 5 in. up-and-down run, drills to center of 18 in. circle, holes from $\frac{1}{64}$ to 1½ in., without ball bearings, w't 200 lbs..... ...each $17.50
No. 4—CHAMPION, *ball bearing*, otherwise same as No. 4★.....each 20.00
Extra, for power★..... ..... " 3.00

POST DRILLS.

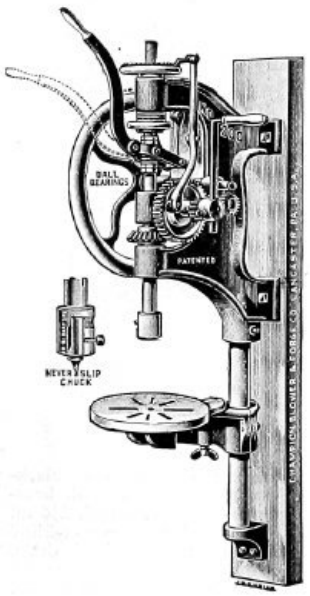


No. 5—CHAMPION, upright blacksmiths', 20 in. swing, three geared, ball bearing, automatic self feed, quick return and hand-feed handle, 2 speeds with double journal bearings to all working parts, full back geared, with improved third gear principle, bearings all ground and polished out of solid metal, 1¼ in. steel spindle bored like "Never-Slip" chuck for ½ in. straight shank drill bit, 5 in. up-and-down run, drills to center of 20 in. circle, holes from $\frac{3}{64}$ to 1½ in., w't 240 lbs.★.....each $25.00
Extra, for power★ ..... „ 4.00

The Champion No. 5 has a quick-return handle, enables the mechanic to get the bit out of the work quicker and far more easily than by the use of the top or ratchet wheel. It is also very useful to feed by hand for holes up to ½ in., especially if the drill is run by power.

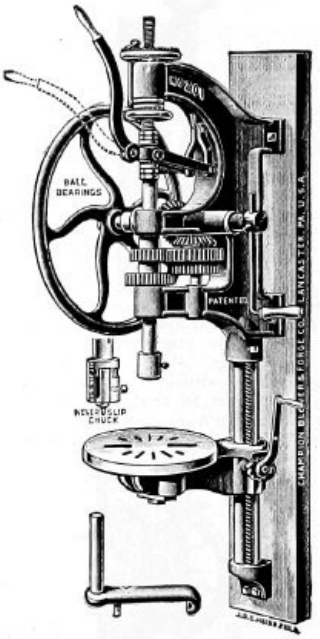


No. 200½—CHAMPION, combination automatic self and lever feed, for light and medium work, hand power, ball bearings, 1¼ in. steel spindle, bored like "Never-Slip" chuck for ½ in. straight shank drill bit, 4 in. up-and-down run, double back gear, drills from 0 to 1½ in. holes, drills to center of 18 in. circle, w't 225 lbs.★ ....each $30.00
Tight and Loose Pulleys, for No. 200½ can be furnished, entire shipment from factory, extra★.....each 4.00



No. 200—CHAMPION, combination automatic self and lever feed, hand power, ball bearings, 1¼ in. steel spindle, bored like "Never-Slip" chuck for ½ in. straight shank drill bit, 4 in. up-and-down run, drills to center of 16 in. circle, two speeds, drills from 0 to 1¼ in. holes, w't 160 lbs.★ .....each $25.00

Tight and Loose Pulleys, for No. 200, can be furnished, entire shipment from factory, extra★.....each 3.00

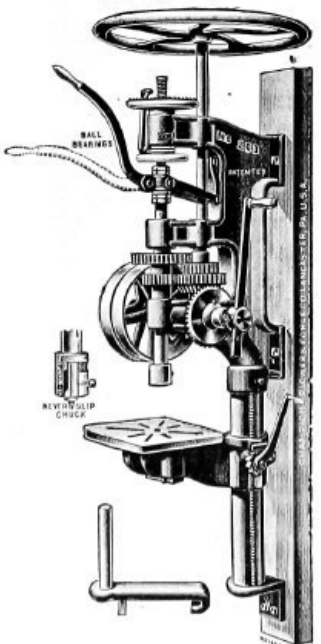


No. 201—CHAMPION combination automatic self and lever feed, for light and heavy work, hand power, ball bearings, 1¼ in. steel spindle, bored like "Never-Slip" chuck for ½ in. straight shank drill bit, 5½ in. up-and-down run, double back, cut geared, drills to center of 21 in. circle, adjustable table rack, two speeds, drills from 0 to 1½ in. holes, w't 325 lbs.★ .....each $40.00
Tight and Loose Pulleys, for No. 201, can be furnished, entire shipment from factory, extra★ .....each 4.00

Nos. 200 to 201 are high grade drills, particularly adapted for machine, blacksmith and carriage shops. The special feature of these drills is that they have the combination automatic self and lever feed. They are independent of each other and can be changed from one to the other in a fraction of a second. This improvement means a saving of time and labor at least 95 per cent by the quick return of the drill out of the work and replacing for drilling the next hole, as it obviates the necessity of turning feed screw back to get bit out of the work.

They have been especially designed to meet every requirement of strictly first-class up-to-date power and hand drill. The two powers are combined and either power is always ready for operation without interfering with the other and without the slightest change of the drill. The lever feed makes them a capital wood boring machine.

Our stock on above drills have spindles bored to take ½ in. straight shank drill bits. If specially ordered from factory, will be bored to take ⅝ or $\frac{11}{64}$ in.



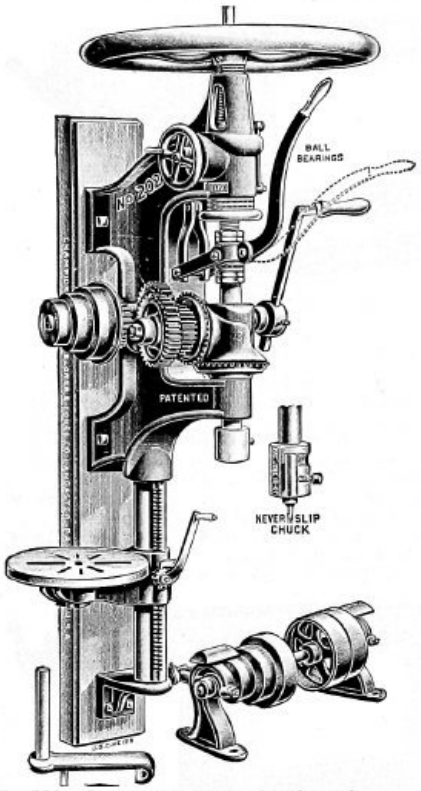
No. 203

No. 203—CHAMPION, post, hand and power, combination, automatic self and lever feed, for light or heavy work, cut gears, ball bearings, 1¼ in. steel spindle, bored like "Never-Slip" chuck for $\frac{11}{64}$ in. straight shank drill bit, 5½ in. up-and-down run, double back gear, drills to center of 21 in. circle, adjustable table rack, two speeds, drills from 0 to 1½ in. holes, with 10×2½ in. tight and loose pulleys for power and hand combined, w't 340 lbs.★ .....each $54 00

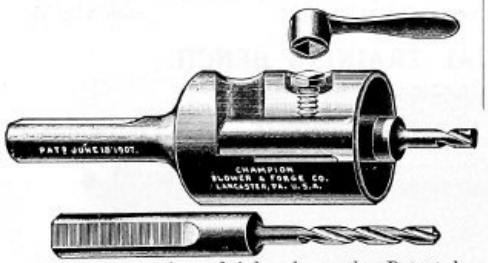
Cone Pulley and Counter Shaft, for No. 203, three speeds, can be furnished entire shipment from factory, extra★ each 11.00

★*FOR FACTORY SHIPMENT ONLY.*

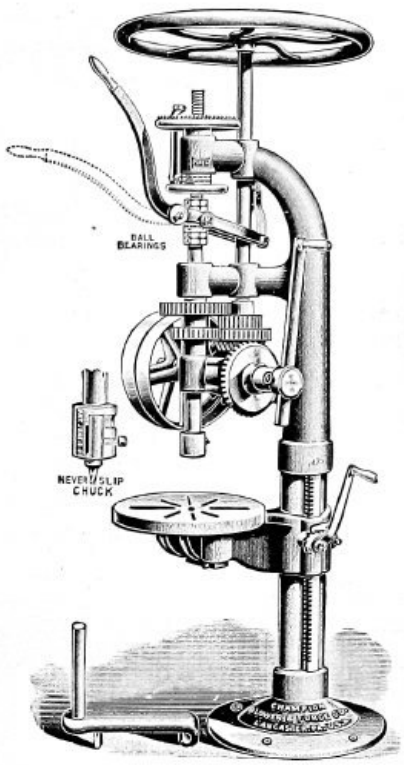
POST DRILLS.



No. 202—CHAMPION, post, hand and power, combination automatic self and lever feed, for lightest and heaviest work, cut gears, ball bearings, 1¼ in. steel spindle, bored like" Never-Slip" chuck for 4/4 in. straight shank drill bit, 6 in. up-and-down run, double back gear, drills to center of 22 in. circle, adjustable table rack, three speeds, drills from 0 to 1½ in. holes, with cone pulley and counter shaft, w't 440 lbs.★.....each $75.00



This illustration plainly shows the Patented Champion Never Slip Drill Chuck now furnished on all Champion drills without additional charge. The invention is a square shoulder in the chuck which permanently meets the flat side milled on drill bits now regularly manufactured by drill bit manufacturers. This square shoulder takes all the strain from the set screw, as the square shoulder in the chuck in connection with the flat side of the drill bit holds the bit as firm as the combined strength of the solid metal of both the bit and chuck, and always continues to do so; in fact, makes the holding of the drill bit the strongest part of the entire drill.

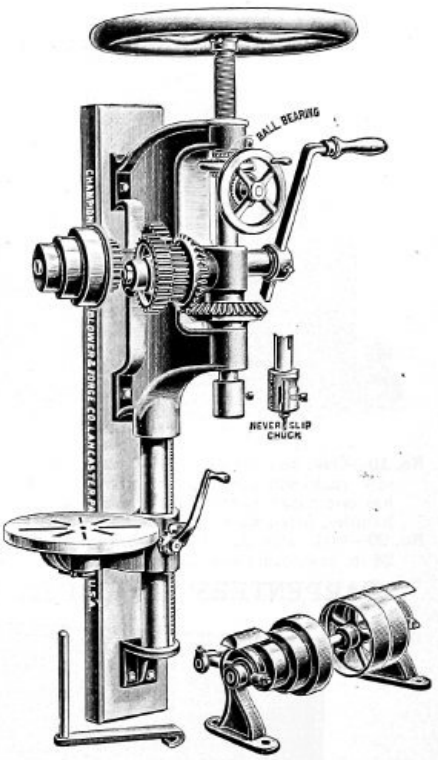


No. 203½—CHAMPION, hand and power, upright, combination automatic self and lever feed, for light and heavy work, cut gears, ball bearings, 1¼ in. steel spindle, bored like "Neve"-Slip" chuck for 4/4 in. straight shank drill bit, 5½ in. up-and-down run, double back gears, drills to the center of 21 in. circle, adjustable table rack, two speeds, drills from 0 to 1½ in. holes, tight and loose pulleys for power and hand combined, w't 550 lbs.★ ... each $85.00

Cone Pulley and Counter Shaft, for No. 203½, three speeds, can be furnished, entire shipment from factory, extra★ each..... 15.00

The CHAMPION "Patented" Never-Slip Drill Chuck, as well as the chucks on all CHAMPION Drill Spindles, comply with all the liability laws, as their is no protrusion on the outside of the Chuck to injure the operator. This has been overcome by counter-sinking the head of the set screw which is only required to keep the drill bit from dropping or pulling out while drawing the bit out of the bored hole. The set screw has absolutely nothing to do except to keep the bit from dropping or pulling out.

The Never Slip Chuck enables the drill to do truer work, it gives practically double life to the drill bit, it entirely eliminates the universal trouble known to all users of drills in holding the drill bit, and as this great invention has been placed an all Champion drills free of charge, it is worth the attention of every man who is interested in blacksmith drills.



No. 25—CHAMPION, new back-geared and cut-geared, automatic self feed, ball bearing, drills to center of 22 in. circle, with three-step cone pulley and countershaft, complete for power and hand, spindle bored like "Never-Slip" chuck for 4/4 in. straight shank drill bits, 6¼ in. up-and-down run, w't 440 lbs.★ each..... $55.00

No. 25—CHAMPION, with tight and loose pulleys, complete for power and hand, w't 350 lbs.★.....each 44.00

No. 25—CHAMPION, for hand only, w't 325 lbs.★.....each 40.00

The independent countershaft, with three-step cone pulley to give the drill different speeds, is a feature of great importance and advantage for a power drill. It is made with cut gears and with ball bearings only. The rack for raising or lowering the table is very convenient, very quick in action and very easy to work. The table always remains where it is stopped. It will not stick and throw the drill and table out of line. The table can be turned from under the drill spindle and out o the road precisely the same as if no rack was there. It has a large, round lathe-turned and slotted table making it very convenient for bolting the work on.

The Champion No. 25 new back-geared automatic self-feed post drill is a perfect single or double-back-geared drill, which can be changed from one to the other in an instant by the slightest movement of the hand. The back-geared principle on this drill is very powerful. The gears turn or revolve in the same direction that the crank is turned. The transmission of the power by the bevel gears direct to the drill spindle is as close to the drill as it can be built, which is a great feature in a drill to make it run light and give power, as transmitting the power too far from the drill bit acts precisely like hitching a horse too far from the buggy.

These are high grade drills, particularly adapted for blacksmith, carriage and machine shops. The special feature of these drills is that they have the combination automatic self and lever feed. They are independent of each other, and can be changed from one to the other in a fraction of a second. This improvement means a saving of time and labor at least 95 per cent, by the quick return of the drill out of the work and replacing for drilling the next hole, as it obviates the necessity of turning feed screw back to get the drill bit out of the work.

They have been especially designed to meet every requirement of strictly first-class up-to-date power and hand drill. The two powers are combined and either power is always ready for operation without interfering with the other, and without the slightest change of the drill. The lever feed makes them a capital wood-boring machine,.

Our stock on above drills have spindles bored to take 4/4 in. straight shank drill bits. If specially ordered from factory will be bored to take ½ in. and ⅝ in.

WOOD-WORKING MACHINERY.

SCROLL SAWS.

No. 1—NEW ROGERS, japanned iron frame, striped in red and gold, japanned tilting-table, selected ash arms and pitman, steel arbors, carefully fitted to bearings, 4½ in. iron balance wheel, with drilling attachment, improved saw clamps, height of table 32 in. The swing around the table under the arm is 34 in., complete with 1 dozen saw blades, wrench, sheet of designs and drill points, w't 25 lbs., boxed for shipment 42 lbs.....each $5.00

ONE IN A BOX. SHIPPED KNOCKED DOWN.

No. 7—Cast iron frame, hard maple table and arms, balance wheel runs on steel arbor, 7 in. blade, complete with 1 dozen saw blades, w't 55 lbs.; boxed for shipment, 80 lbs★.....each $15.00

For carpenters and builders, cabinet makers and other wood-workers. Will saw pine 2 in. thick, 1 ft. per minute; 1 in. thick, 4 ft. per minute. Ordinary rate of speed when sawing, from 800 to 1,200 strokes per minute. Leaves the work as smooth as is possible for any saw to do, and can be taken out and replaced in an instant for inside work. The swing around the blade under the arm is 24 in.

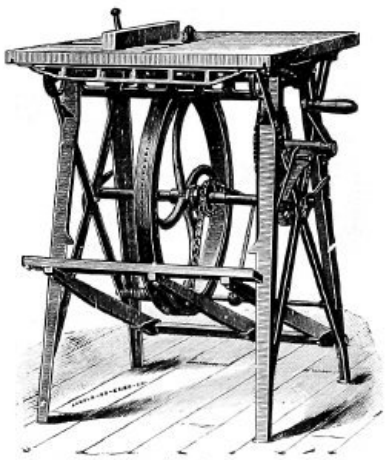
VELOCIPEDE SCROLL SAWS.

No. 2 —Cast iron frame, hard maple table and arms, balance and drive wheels run on steel arbors, 7 in. blade, with 1 dozen blades (without attachment) w't 90 lbs., boxed for shipment, 130 lbs★.....each $18.00

No. 2B—With boring attachment, including one $\frac{3}{16}$ in. bit.★.....each 20.00

The swing around the blade under the arm is 24 in. The boring attachment can be furnished at any future time, if not desired when ordering the machine. We can furnish extra bits at the following prices, each: $\frac{1}{16}$, 15c; $\frac{3}{32}$, 15c; $\frac{1}{8}$, 20c; $\frac{5}{32}$, 20c; $\frac{3}{16}$, 25c; $\frac{7}{32}$, 30c; $\frac{1}{4}$, 35c.

COMBINED CIRCULAR AND SCROLL SAWS.



Showing circular saw only.

No. 25—Circular saw only (with two 6 in. saws), without attachments★....each $35.00

No. 26—Scroll saw attachment (1 dozen saws),★ extra.....each 5.00

No. 27—Boring attachment, with drill chuck,★ extra.....each 10.00

No. 28—Combined machine, complete with attachments★.....each 50.00

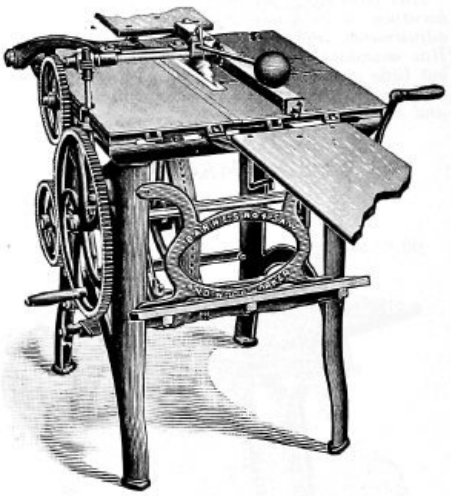
Neither the circular nor the scroll saw interferes in the slightest degree with the successful operation of the other. The capacity of the scroll saw is the same as that of No. 7. The table can be handily adjusted up or down by a cam, to allow any desired depth of cut being made by the saws or cutter tools. The circular saws are 6 in. in diameter, and reach 1⅝ in. above the table. Weight boxed for shipment, 350 lbs.

HAND CIRCULAR RIP SAWS.

No. 14—Cast iron frame, w't 190 lbs., boxed 200 lbs., complete with two 10 in. saws★.....each $40.00

Will rip boards or planks of either soft or hard wood, of any thickness up to 3¾ in., and of any width up to 19 in. The rollers are self-adjusting to thick, thin, or uneven lumber. The saw can be instantly set to or from the gauge to any width desired. Rabbets, bevels, tenons, etc., can be cut to advantage, and by using two saws side by side, grooving for windows and door steps, etc., can be done. (An extra saw is furnished for this purpose.)

CIRCULAR SAWS.



No. 4—Iron and steel frame, 30×30 in. iron table, complete with self-feed, two 10 in. circular saws (1 each rip and cross-cut), w't 400 lbs., crated 480 lbs.★ each.....each $60.00

No. 5—With countershafts, for steam instead of foot power, otherwise same as No. 4★.....each 65.00

No. 6—Boring attachments★..... " 10.00

No. 7—Countershaft and belt pulleys★ each..... 10.00

No. 8—Universal mitre gauges★....each 10.00

Hand and foot power for hard or soft, thick or thin lumber. Can be used as a cross-cut saw. Self-feed mechanism can be instantly thrown back to rear of machine, also rip gauge, leaving table perfectly clear for cut-off work. Can be used for rabbeting and grooving. The self-feed can be used for grooving and rabbeting as well as when the machine is used for ripping. Cutter heads are also used for gaining and dadoing, and with knives of suitable width for joining. Can be provided with boring attachment, which is the same as used on the combined machine.

★*FOR FACTORY SHIPMENT ONLY.*

WOOD-WORKING MACHINERY.

FOOT POWER MORTISERS.

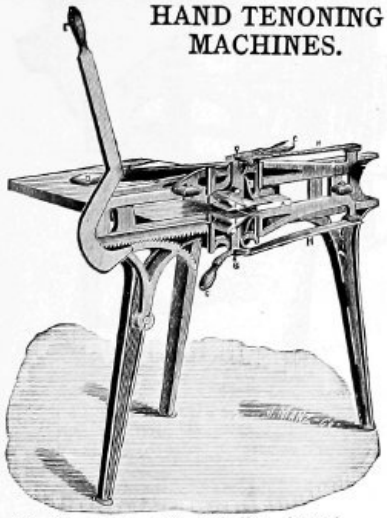
No. 9—Foot power mortisers, without chisels, w't 135 lbs, boxed 170 lbs.★ each.. $20.00

No. 10—Self-cleaning mortising chisels, sizes 1/4, 5/16, 3/8, 7/16, 1/2, 9/16, 5/8, 3/4, 7/8 and 1 in.★.....each 1.00

No. 11—Blind slat chisels, with 3 set bits★.....each 5.00

Has great range for work, power on the chisel, accuracy in its action, and has all the required adjustments, which are easily and quickly made. Has abundant strength, is durable, and occupies but little space. Except the supplementary table and treadle, the machine is made entirely of iron and steel.

HAND TENONING MACHINES.



No. 16—Complete, w't 100 lbs., boxed 140 lbs.★.....each $25.00

Will cut tenons of any length up to 3 in. By repeating the cut any desired length can be made. Will work on stuff of any size up to 2×12 in., and can be adjusted to gauge the length, thickness and shoulders of a tenon. Will not cope a shoulder, but will cut one shoulder further back than the other to accommodate stuff having a rabbeted edge, and will cut one shoulder deeper than the other, or both alike, as desired. Both sides of the tenon are cut at once, or one side only can be cut. Each thrust of the lever cuts a shaving similar to that of a rabbet plane; the rapidity of the thrusts and set of knives (as with a plane) govern the speed of the work. The machine cuts true, smooth, square shoulders, and can be set to cut tenons of uniform thickness or distance between the shoulders.

FORMERS.

Barnes.

No. 21—Foot power formers, without knives, w't 80 lbs., boxed 110 lbs.★ each.. $20.00

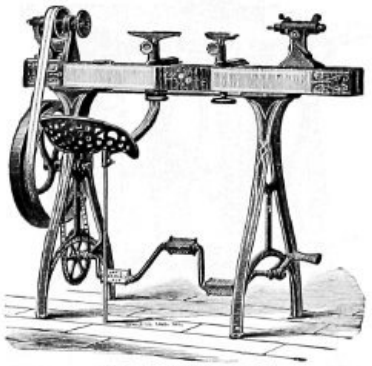
No. 22—Former knives, Nos. 1 to 20★ each.. 1.00

No. 23—Former knives, A to M★..each .50

No. 24—Fluting attachments★ extra, each.. 3.00

For moulding edges of brackets, scroll work, panel work, regular and irregular mouldings of all styles up to 7/8 in. The speed of the knives is from 2,000 to 2,500 revolutions per minute, insuring rapid and smooth work. The knives can be instantly made to rotate in either direction that the grain of the wood may require. The spindle and its bearings are of steel, with adjustments to take up the wear. The parts to set the machine for the use of different knives and work are convenient, and all substantial and durable. The table can be lowered 2 1/4 in. below the lower cutting edge of the knife.

LATHES.



Barnes, Foot Power.

No. 3C—Complete, with 3 centers (1 a spur), 2 tool rests and sockets, and 1 turned face plate, w't 230 lbs., boxed 320 lbs.★.....each $40.00

No. 3W—Without lower portion, but with short bench legs★.....each 25.00

Designed for wood turning. Will take wood 12 in. in diameter and 3 ft. long. Has velocipede foot power and improved seat. Speed can be varied from 1,000 to 2,000 revolutions per minute, and the motion can be started, stopped or reversed instantly. Adjustable sliding seat can be readily moved along to any part of the bed that the work requires. This lathe is made entirely of iron and steel, except the bed, which is of wood. The spindle is of steel, fitted up in the best manner. All the bearings are of steel, making them strong, durable and light-running. The centers are accurately fitted to taper holes. No wrench is required to adjust tail-stock or tool rests and sockets, hand wheels being used instead.

★*FOR FACTORY SHIPMENT ONLY.*

LATHES.

No. 4—BARNES, all iron and steel, velocipede foot power, complete as described below, w't 210 lbs., boxed 265 lbs.★ each.. $50.00

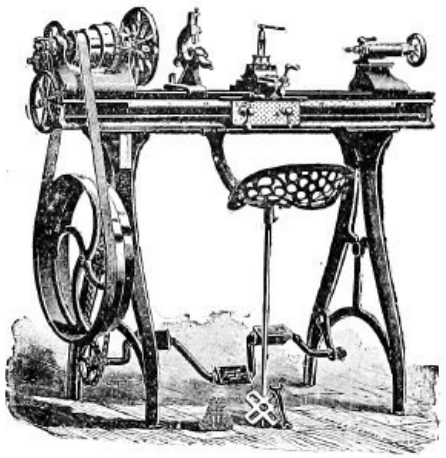
For turning both wood and iron, and for boring, drilling, polishing, etc. Swings 7 in. and takes 20 in. between centers. Speed can be varied from 1,000 to 2,000 revolutions per minute. Solid bed with V-shaped projections, over which the head, tail-stocks and hand and slide rests are fitted. Lead screw for the carriage is operated by hand; carriage can be traveled 20 in., the entire distance between the centers, and can be engaged or disengaged instantly from the lead screw. The upper or cross-feed way on which the tool post moves can be set at any desired angle, and tapers can be turned and taper holes can be bored to the extent of its travel. Tail-stock can be moved and set at any point desired, by the simple turning of a hand wheel, or taken off entirely, leaving bed free for face plate or chuck work. Head-stock spindle has taper bearings, and is capable of very nice adjustment. Tail-stock center is self-discharging. The lathe includes face plate, two pointed centers and one spur center, hand rest, wrenches and necessary belting.

No. 4 1/2—BARNES, all iron and steel, velocipede foot power, complete as described below, w't 270 lbs., boxed 340 lbs.★.....each $75.00

It is a back-geared screw-cutting lathe. Feeds right or left, and cuts screws right or left without change of gearing. Adjustable carriage for taper boring. Thoroughly gibbed for taking up wear. Tail-stock has side movement to adjust centers for turning tapers. Head-stock has hollow spindle for rods up to 3/8 in. It swings 9 in. on the face plate and 4 3/4 in. over tool carriage, and takes 25 in. between centers, has three speeds, and is suitably arranged for heavy or light work in turning or polishing. With face plate, two pointed centers and one spur center, wrenches and necessary belting.

LATHES AND EMERY GRINDERS.

LATHES.



Cut showing portion of Nos. 5 and 5½ Screw Cutting Engine Lathes.

Barnes all Iron and Steel, Velocipede Foot Power.

No. 5—Lathe, complete as described★ each..... $100.00

No. 5—With extra long bed, 40 in. between centers★.....each 105.00

Swings 11 in. on the face plate, 6½ in. over the tool carriage, and is 34 in. between centers. Back-gearing and cone pulleys give great range of speed. Head stock has a steel spindle with ½ in. hole through its entire length. Tail stock can be readily set at any desired point, and can be taken off altogether, leaving it free for face plate or chuck work. It can also be set over for turning tapers. Spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. The tool can be set to the work at any position or angle desired; also to bore a taper hole. All the works are securely protected from chips and dirt. As a right or left screw cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearing to be. Weight 385 lbs.; boxed ready for shipment 500 lbs.

Barnes All Iron and Steel, Velocipede Foot Power.

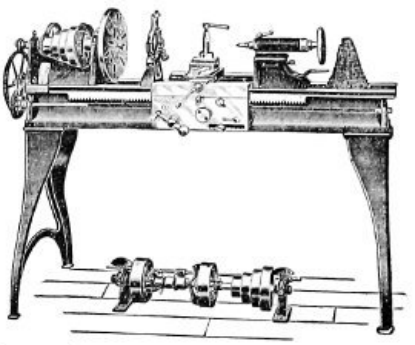
No. 5½	10	93	950	1150	★ 185.00

If countershaft is taken instead of foot power. advance list $5.00.

Designed to do as heavy work as is practical by the use of foot power. It is a strong, thoroughly well made tool in every particular. No. 5½ has patent twin screw feed and screw cutting combination, which makes change of feed in the tool carriage instead of in the head stock. This greatly simplifies and reduces the number of parts commonly used for these purposes. Tail stock has side movement to adjust centers for turning tapers. Head stock has hollow spindle for rods up to ½ in. All the gearing is cut from solid metal. The boxes are accurately fitted to the spindle, with provision to keep them true and take up wear. Steel spindles for both head and tail stocks. Tail stocks can readily be set at any desired point, or be taken off altogether. Swings on face plate, 13 in.; over tool carriage, 8 in. All the works are securely protected from chips and dirt, insuring long wear and durability to the most costly and vital parts of the lathe.

LATHES.



Barnes Automatic Cross-Feed and Compound Rest.

	DISTANCE LGTH. OF BED, FEET.	BETWEEN CENT. INCH.	W'T OF LATHE LBS.	W'T BOXED, LBS.	EACH.
No. 13	5	33	640	775	★$162.00
No. 13	6	45	690	850	★ 172.00
No. 13	7	57	740	890	★ 182.00
No. 13	8	69	790	950	★ 192.00
No. 13	10	93	850	1050	★212.00

If countershaft is taken instead of foot power, advance list $5.00.

With the patent velocipede foot power, motion can be started, stopped or reversed instantly, and greater power can be applied on the work than with any old-style foot power, and with greater ease. Head stock has a hollow steel spindle that will take a ½ in. rod through its entire length. Boxes are accurately fitted to the spindle, with provisions to keep them true and take up wear. Tail stock can be readily set at any desired point, or taken altogether from the lathe bed, without removing nuts or bolts. It can also be set over for turning tapers. Spindles for both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. All the works are securely protected from chips and dirt, insuring long wear and durability to the most costly and vital parts of the lathe. It is indexed for threads 4 to 32 and the change gears furnished can be combined for many other threads. Swings 13 in. on face plate; over tool carriage, 8 in. Has a splined screw, giving rod feed for turning, reserving the screw for thread cutting only. By a lever in the apron of the tool carriage, the feed can be graduated instantly from coarse to fine, and vice versa.

GRINDING AND POLISHING MACHINES.

Designed for light work, carrying emery and buffing wheels up to 6 in. diameter by 1 in. face.

Used by jewelers, dentists, glass workers and for light grinding on razors, skates, cutlery, etc.

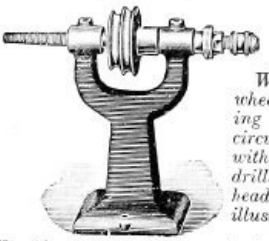
The head has a cone screw on one side, and a nut and collar on the other side for emery wheels etc.

Weight 85 lbs.; boxed for shipment, 115 lbs.

No. 100—Complete, without emery wheel or buffer,★..... each$18.00

★*FOR FACTORY SHIPMENT ONLY.*

POLISHING HEADS.



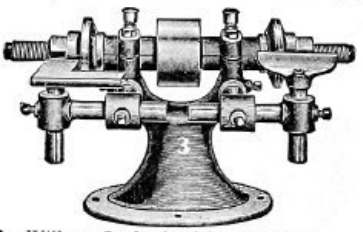
Will run emery wheels, buffers, polishing wheels and small circular saws, also fitted with chuck for holding drills. We furnish head only as shown in illustration.

No. 10—6 in. high, for wheels not larger than 6×½ in., 9 in. spindle, ⅜ in. diameter between flanges, one end 2 in. taper screw, other end fitted to hold emery wheels, etc., 2 speed pulleys for ¼ in. round belting, w't 3½ lbs., each..... $2.00

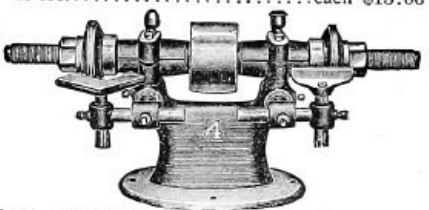
EMERY GRINDERS.

No. 1—For jewelers, dentists, etc., will run 2 wheels 6 in. diameter and 1 in. thick, ⅝ in. steel spindle, ½ in. diameter between flanges, 10 in. long, pulley 2 in. diameter, 1½ in. face, w't complete, 9 lbs. .....each $5.00

No. 2—Will run 2 wheels 10 in. diameter, 1½ in. thick, 13 in. steel spindles ⅞ in. diameter in bearings, ¾ in. diam. between flanges, bearings adjustable, 2 in. long, with brass oil cups, pulley 2⅜ in. diameter, 1⅞ in. face, w't complete, 20 lbs.....each $10.00



No. 3—Will run 2 wheels 12 in. diameter, 2 in. thick, 18 in. steel spindle 1⅛ in. diameter in bearings, 1 in. diam. between flanges, babbitted bearings 2⅞ in. long, same style as engine lathe bearings, self oiling, pulley 3½ in. diameter, 2¼ in. face, w't complete, 40 lbs.....each $15.00



No. 4—Will run 2 wheels 16 in. diameter, 2½ in. thick, 26 in. steel spindle 1⅛ in. diameter in bearings, 1¼ in. between flanges, babbitted bearings 4¾ in. long, same style as engine lathe bearings, self oiling, pulley 5 in. diameter, 4 in. face, w't complete, 65 lbs.. .....each $20.00

CORUNDUM AND EMERY WHEELS, EMERY FLOUR, ETC.

EAGLE CORUNDUM AND EMERY WHEELS.

Eagle Corundum Wheels are made from best quality Canadian Corundum from the Craig Mine.

Eagle Emery Wheels are made from high grade Turkish Emery.

The same lists apply to both Corundum and Emery Wheels.

3 stones from 5 to 6 in. long, retail value .25
3 stones from 4 to 5 in. long, retail value .15

Hindostan, although usually called an oil stone, can be used with water with equally good results. It is a very fine grained sand stone and is undoubtedly the best low priced sharpening stone for mechanics' tools.

The Arkansas oil stone is found in two grades, known as hard and soft. The hard grade is especially adapted to sharpening highly tempered tools, requiring very keen, smooth edges, also pointed tools, such as are used by engravers, watchmakers, diesinkers, wood and ivory carvers, surgeons, etc. The soft Arkansas is better adapted for carpenters, machinists, cutters and others who require a stone for putting on a fine finishing edge.

The Washita stone is more generally used by carpenters and joiners than any other. This stone is obtained in several grades, of which the Lily White brand is conceded to be the best general purpose stone yet discovered, it being capable of cutting away very rapidly and leaving a fine, smooth, lasting edge. Other grades of the Washita stone do very fair work but are not generally as satisfactory as the Lily White.

OIL STONES.

OIL STONES AND SLIPS AND FAMILY GRINDSTONES.

RUBY OIL STONES.

"OUR VERY BEST."

Finest Ruby Corundum, One Coarse Side and One Fine Side.

No. 3½ GVB—4×1½×½ in., w't per doz. 5½ lbs ..... per dozen $ 4.00

No. 3 GVB—6×2×¾ in., w't per doz. 15 lbs..... per dozen 7.00

No. 02 GVB—7×2×1 in., w't per doz. 16 lbs ..... per dozen 9.00

No. 22 GVB—7×2½×¾ in., w't per doz. 20 lbs..... per dozen 10.00

No. 21 GVB—8×2×1 in., w't per doz. 19 lbs ..... per dozen 10.00

Made of ground corundum, held together by special bond. One side is coarse for quick cutting on a very dull tool, and the opposite side is very fine for finishing. Not affected by moisture. The bond is of such a peculiarly tough nature that the stone is not easily broken. It may be dropped from quite a height without damage. This does away with the necessity of having each mounted in a wooden case.

IN HANDSOME PASTEBOARD CASE. HALF DOZEN IN A BOX.

RUBY OIL SLIPS.

"OUR VERY BEST".

No. 118—8×2×1 in., w't per doz. 21 lbs..... per dozen 15.00

India oil stone has been on the market but a few years, yet its reputation has become world-wide. For rapid cutting it has no equal, and it leaves a remarkably smooth, lasting edge on the tool. It is made in coarse and medium grits. The coarse grit is used only where very rapid work is desired; The medium grit being used mostly by carpenters, joiners and others wanting a stone for general use.

The India is also made with the coarse grit on one side and medium on the other. This stone is very popular, as it saves many the necessity of buying two stones.

ONE IN A BOX.

EMERY OIL STONES.

No. 30—7×2×1 in., "Black-garnet" single grit, coarse, w't per doz. 11 lbs., per dozen..... $9.00

This is a coarse stone and is intended for tools that are very thick and dull.

HALF DOZEN IN A BOX.

EMERY OIL STONES.

Carpenters', One Side Coarse, the Other Side Fine.

No. 2—6×2 ×¾ in., w't per doz. 15 lbs..... per dozen $ 7.00
No. 1—7×2 ×1 in., w't per doz. 11 lbs..... per dozen 9.00
No. 01—8×2 ×1 in., w't per doz. 12 lbs..... per dozen 10.00
No. 001—8×2¼×1 in., w't per doz. 14 lbs..... per dozen 12.00

Made of emery and silicates, for use with oil only.

HALF DOZEN IN A BOX.

HIB-SPE-BAR OIL STONES.

This stone is made by a scientific process and is guaranteed to give a fine and durable edge.

EMERY OIL SLIPS.

No. 4.

No. 4—Oil Slip, 5×2×½ to ⅛ in., w't per doz. 10 lbs..... per dozen $4.00
No. 07—Pocket, 3½×¾×⅜ in., with sheath, w't per doz. 1⅝ lbs.. per dozen 4.00

Made of emery and silicates, for use with oil only.

ONE DOZEN IN A BOX.

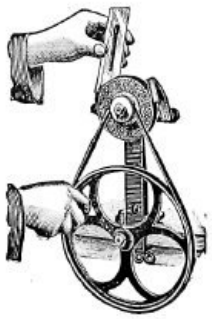
FAMILY GRINDSTONES.

Stained Wood Base, Japanned Iron Frame, Handle and Clamp.

Diameter of Stone..	7	8	9 in.
W't per doz.	96	120	138 lbs.
Per dozen	$12.00	14.00	16.00

TOOL GRINDERS AND ATTACHMENTS.

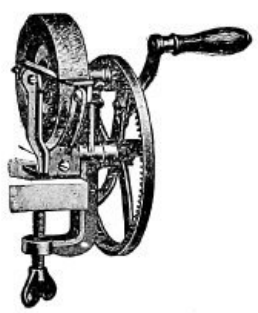
TOOL GRINDERS.



No. 14—ACME, cast iron frame, height 10 in., 10½ in. drive wheel, 4×¾ in. emery wheel, round leather belt, malleable screw bench clamp, speed 1,200 revolutions, w't 8 lbs.....each $2.50

This grinder is especially adapted for sharpening knives and small tools.

ONE IN A CASE.

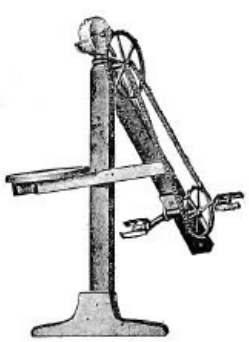


No. 11—PERFECTION, 4½ in. bylundum wheel, adjustable gauges, clamp, cog and handle, w't 4 lbs.....each $2.50

No. 12—PERFECTION, 5 in. bylundum wheel, otherwise same as No. 11, w't 4½ lbs.....each 3.00

This handy wheel is just the article for mechanics, butchers, farmers and household purposes. The gauge can be made to fit the angle of any tool and it is the only wheel that can be run with low speed and not glaze.

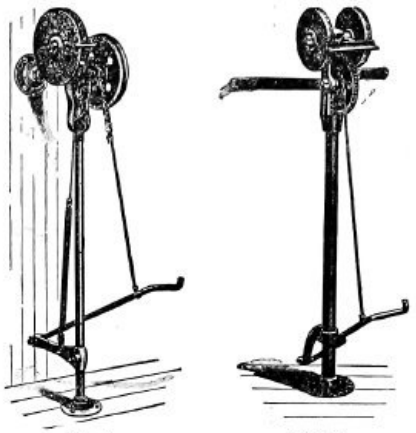
ONE IN A NICELY STENCILED BOX.



No. 7—GEM, bi-pedal tool, selected maple frame, strongly braced, babbitted box, adjustable seat, 1 coarse and 1 fine emery wheel 5×1½ in., 1 detachable buffing wheel, speed 4,000 revolutions, w't 40 lbs.....each $9.00

ONE IN A CRATE.

TOOL GRINDERS.



No. 6. No. 16.

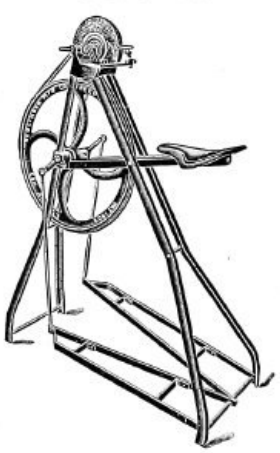
No. 6—Iron frame with floor and wall supports, adjustable foot lever, 6×¾ in. emery wheel, ⅝ in. steel shaft, new positive ball clutch, cone bearings, height 42 in., w't 25 lbs.....each $8.00

The No. 6 is designed for bicycle and repair shops, hardware, stove, plumbing, carpenter shops, etc., where light grinding is required. Buffing can also be done, as a speed of 2,000 revolutions and upwards is attained.

No. 16—UNION, iron frame, with floor and wall supports, adjustable foot lever, machine cut gears, driving parts inside shaft, height 42 in., complete with two 6×¾ in. emery wheels, and skate attachment, w't 30 lbs....each $11.00

Runs like a watch and requires only a few inches of floor space.

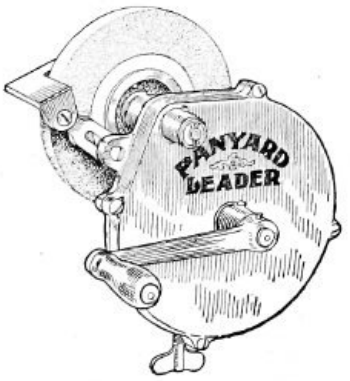
ONE IN A CASE.



No. 36—SCHOFIELD'S "NEW CLIMAX," bi-treadle, rigid angle steel frame, strongly braced, height 3½ ft., 19 in. drive wheel, 8×¾ in. emery wheel, adjustable seat, speed 1,800 revolutions, complete with tool and skate grinding rests, w't 50 lbs.....each $12.50

The legs are connected and held solid by shouldered cross rods which are riveted in. The pedals are braced by two angle irons of machine steel. The spindle at the head is a machine turned piece of machine steel. This spindle is threaded at one side for the emery wheel and threaded on the opposite side for a polisher. The polisher is not regular equipment, but will be furnished when ordered. The bearings are babbitted, which gives the grinder that nice, easy running quality. It folds up like a jack-knife, thereby allowing one quickly to set it back in a small corner when not in use.

TOOL GRINDERS.



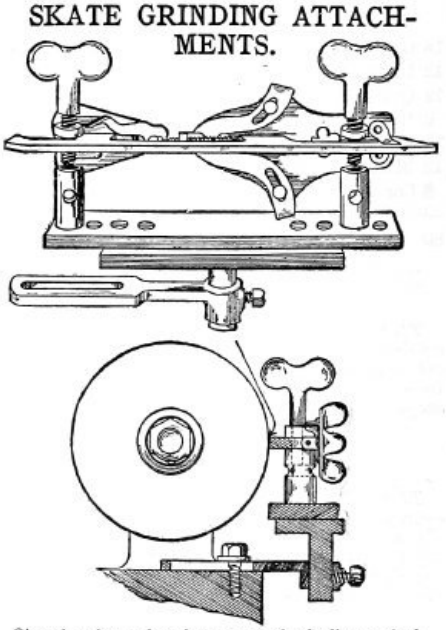
No. 18—PANYARD I-AM-IT, 5×1 in., pure corundum wheel, height 9 in., frame of gray iron, w't 6¾ lbs...each $ 6.00

No. 30—PANYARD LEADER, 7×1 in. pure corundum wheel, height 11 in., frame of gray iron, w't 18 lbs.....each 10.00

Made entirely by mechanics, wheel of pure corundum, working parts protected. By using cut spur gears a high cutting speed for the grinding wheel is obtained and the power applied to the handle is transmitted to the grinding wheel with the least possible amount of friction. The spindle and pinion are one piece of steel, turned and milled, and runs in renewable bronze bearings. The large gear is also turned and milled to give the best results. The case has ground joints, so that it can be partly filled with oil or grease for lubrication. The grinding wheel is cupped on one side, and it is held by a flange and three screws, so that it can be run in either direction without danger of coming off. The iron center is also cupped, to protect the spindle bearing from the dust, and to keep the weight of the grinding wheel over the bearing. The tool rest is strong, simple and practical and can be adjusted to any desired position or angle.

ONE IN A BOX; ONE DOZEN IN A CASE.

SKATE GRINDING ATTACHMENTS.



Showing how the skate gets the hollow grind.

No. 5—Attachment for sharpening skates can be used on any foot or power grinder that has an adjustable tool rest...each $3.00

Adjustable for different size skates. Is practical and is designed especially for the repair man who sharpens skates.

SCYTHE STONES AND SICKLE GRINDERS.

SCYTHE STONE ASSORTMENTS.

"OUR VERY BEST."

No. A GVB Assortment—Consisting of 80 scythe stones as below, put up in a finished 12×11½×10½ in. case, w't complete for shipment 80 lbs., per assortment..... $4.75

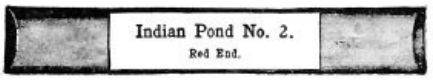
18 Green Mountain.....	each	$0.05	$0.90
12 Indian Pond, No. 1. ..	"	.10	1.20
12 Quickcut.....	"	.10	1.20
6 Mowing Machine.....	"	.10	.60
12 White Mountain.....	"	.15	1.80
12 Black Diamond.....	"	.15	1.80
8 Corundum.....	"	.15	1.20
80	Total.....		$8.70

THE OLD WAY:—Scythe Stones kept in original rough boxes, behind the counter or in some out-of-the-way place where they could not possibly induce sales from their display, or be in attractive shape to offer to a customer for his selection.

THE NEW WAY:—Scythe Stone Assortmen—an assortment of scythe stones attractively displayed in a tasteful box, that looks well on a counter; with a quantity of scythe stone circulars for free distribution giving the merits of the various kinds of stone, and with each kind of stone plainly marked with the selling price.

Each case contains seven varieties of our best selling brands, thus enabling the merchant to offer to his customer, in a well displayed compact form, a large assortment. Every stone is labeled with the retailing price as per list above.

SCYTHE STONES.

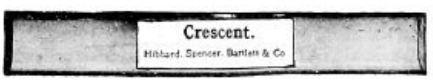


No. 60—INDIAN POND, No. 2, red end, clear grit, length 10 in., w't per gro. 104 lbs.....per gross $5.00

No. 66—PIKE'S GENUINE INDIAN POND, No. 1, oval, red end, very sharp grit, length 10 in., w't per gro. 108 lbs., per gross..... $7.50

These stones will not glaze and they require no water. No. 66 is a nicely finished stone while No. 60 is of same stone but not so well finished.

ONE-QUARTER GROSS IN A BOX.



No. 62—CRESCENT, oval, coarse, grindstone grit, length 10 in., w't per gro. 96 lbs.....per gross $7.00

This stone gives a quick, coarse edge.

No. 64—GREEN MOUNTAIN, flat oval, Vermont grit, sharp, length 10 in., w't per gro. 112 lbs.....per gross $7.00

No. 76—LAMOILLE, round oval, extra quality Vermont grit, very sharp, length 10 in., w't per gro. 124 lbs., per gross..... $11.00

The Green Mountain and Lamoille are taken from the same quarry. The Lamoille is better finished and gives a finer edge.

No. 68—WILLOUGHBY LAKE, round oval, bluish gray, fine sharp grit, length 10 in., w't per gro. 112 lbs....per gross $9.00

From the Willoughby Lake quarry. A sharp gritted stone which gives a fine edge.

No. 72—WHITE MOUNTAIN, oval, square edges, best New Hampshire grit, medium fine, length 10 in., w't per gro. 148 lbs.....per gross $9.50

A nicely finished stone, especially selected from the choicest New Hampshire grit.

SCYTHE STONES.

No. 78—BLACK DIAMOND, flat octagon, best Vermont grit, very fine, length 10 in., w't per gro. 116 lbs...per gross $12.00

A fine gritted stone and at the same time very sharp and fast cutting. It gives a fine lasting edge.

No. 95 REVONOC—Oval, terra cotta, corundum, medium grit, length 10 in., w't per gro. 96 lbs.....per gross $24.00

Made entirely of pure ground corundum, with a steel rod extending the entire length through the center to prevent breaking. With proper use will not glaze and will preserve cutting qualities until worn out.

"OUR VERY BEST."

GVB—Oval, terra cotta, corundum, length 10 in., fine, w't per gro. 95 lbs., per gross..... $30.00

Made of pure corundum, that is, they represent between 95 and 100 per cent of pure cutting material; therefore are the fastest cutting stone on the market.

After the stones are moulded, they are cleansed from all obstructive material, through the "vitrifying" process. In other words, they are passed through a very high heat, burning out all the impurities and leaving them porous, thus insuring free and rapid cutting without glazing.

ONE-QUARTER GROSS IN A BOX.

SICKLE GRINDERS.

"REV-O-NOC."

No. 8 REVONOC—Extra heavy cast frame, height 10 in., length 15 in., width 10 in., oscillating or stationary grinder, adjustable knife holder, 2 emery wheels, 3½×3 in. beveled face for mower knives, and 4×2 in. for tools, w't 19 lbs.....each $5.00
Extra tool and barrel-shaped wheels " 1.00

Can be shifted from the oscillating movement to the stationary, or vice versa, instantly, by merely lowering or raising a lever; geared so that one revolution of the hand wheel gives twenty-two revolutions of the emery wheel; preserves original bevel of mower knives, giving a sharp, perfectly true edge from heel to toe. Emery wheel is of highest quality and can be changed to either sickle or tool grinding in thirty seconds. Will grind a set of mower knives in ten minutes.

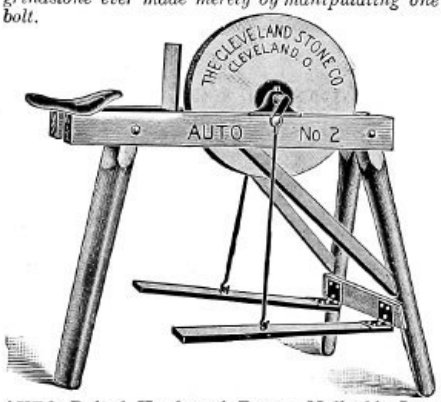
GRINDSTONES AND FIXTURES.

MOUNTED GRINDSTONES.

"REV-O-NOC".

REVONOC—Tubular steel frame, with seat, painted blue, water guard, drip cup, ball-bearing, high grade Huron stone, stone 19 to 22 in. in diameter and 1¾ to 2¼ in. thick, w't complete 90 lbs.....each $6.00

The frame being made of heavy steel tubing, it is the most rigid stone on the market. Can be set up in less time and with less labor than any other grindstone ever made merely by manipulating one bolt.



AUTO, Bolted Hardwood Frame, Malleable Iron Fixtures, Ball Bearings, Painted, Length 44 Inches.

Bearings for No. 21 Gem	"	.60
Bearings for No. 26 Gem.....	"	.40

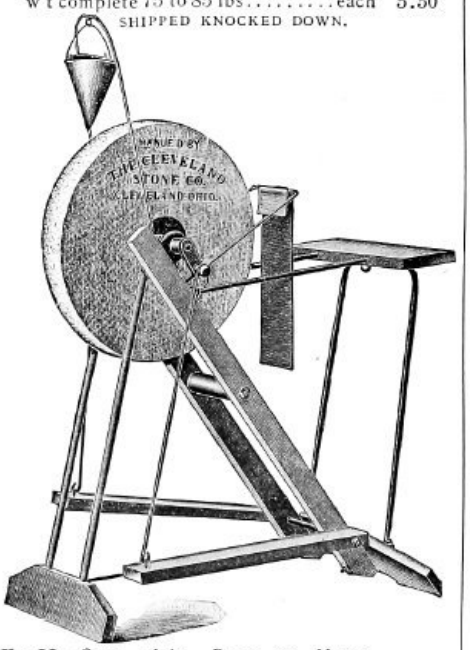
MOUNTED GRINDSTONES.

Malleable Iron Fixtures.

No. 5—SCHOFIELD'S, wrought steel frame and seat, double treadle, front shield, length 30 in., w't of stone 50 to 60 lbs., w't complete 77 to 87 lbs.....each $5.00

No. 05—SCHOFIELD'S, steel frame, ball bearing, double treadle, front shield, length 30 in., w't of stone 50 to 60 lbs., w't complete 75 to 85 lbs.....each 5.50

SHIPPED KNOCKED DOWN.



No. 26—GEM, plain, Berea or Huron stone, malleable iron fixtures, 40 to 50 lb. stone, w't complete 65 to 75 lbs ...each $3.80

No. 23—GEM, size 2, otherwise same as No. 26, w't complete 85 lbs.....each 4.20

No. 24—GEM, size 1, otherwise same as No. 26, w't complete 100 lbs....each 4.60

No. 21—GEM, ball bearings, Berea or Huron stone, malleable iron fixtures, 40 to 50 lb. stone, w't complete 65 to 75 lbs.....each 4.20

No. 25—GEM, size 2, otherwise same as No. 21, w't complete 85 lbs.....each 4.60

No. 19—GEM, size 1, otherwise same as No. 21, w't complete 100 lbs.....each 5.00

The power applied with the legs, by means of the duplex treadles, is nearly double that obtained with a crank, enabling the operator to run the stone at much greater speed, and perform faster and better work than the ordinary grindstone.

MOUNTED GRINDSTONES.

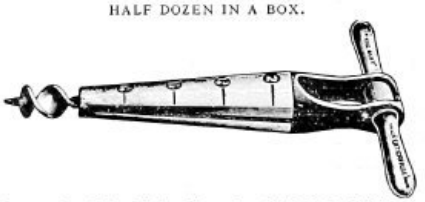
BUNG BORERS.

Cast Steel, Polished Blade, Half Round, Hickory Handle.

No. 12—Inches....	1½	1¾	2
W't per doz.....	12	14	16 lbs.
Per dozen.....	$7.50	8.50	10.00

HALF DOZEN IN A BOX.



Enterprise Mfg. Co's, Cast Steel, Polished Blade with Auger Point, Hickory Handle.

No. 1—Bores from ⅝ to 1½ in., w't per doz. 12 lbs.....per dozen $18.00

No. 2—Bores from 1⅛ to 2 in., w't per doz. 26 lbs.....per dozen 24.00

HALF DOZEN IN A BOX.

CARPENTERS' APRONS.

No. 1. Nos. 2 and 3.

No. 1—Short pattern, good quality heavy white duck, web neck and waist bands, two nail pockets and one combination rule and nail pocket, double stitched, well made and finished 21 in. long, 30 in. wide, w't per doz. 3¾ lbs., per dozen..... $4.50

No. 3—Long pattern to reach below knees, fine quality heavy tan duck, divided so as not to interfere with walking, two nail or tool pockets, one combination rule and pencil pocket, adjustable web neck band, web waist and leg bands riveted at all points of strain, well sewed and finished, 36 in. long, 30 in. wide, w't per doz. 5¼ lbs., per dozen..... 6.00

No. 2—Long pattern to reach below knees, fine quality *white* duck, otherwise the same as No. 3, w't per doz. 7⅛ lbs., per dozen..... 8.50

We can furnish No. 1 aprons stenciled with customer's advertisement.

CEMENT TOOLS.

TUCK POINTERS.

Polished Steel, Wood Handles.

Nos	1	2	3
Size	¼×5	⅜×5	½×5 in.
W't per doz.	9	12	15 lbs.
Per dozen	$10.80	12.00	13.20

These tools are of steel; grooves accurately milled, extending across the ends, a feature essential to a good cement tool.

SIDEWALK JOINTERS.

Bronzed, with Tool Steel Adjustable Blade, Convex Face.

No. 125—Size 2½×3 in., w't per doz. 7½ lbs. ..... per dozen $21.00

GROOVERS.

No. 10—Sidewalk, 5½×2¾ in., steel, nickel plated and polished, w't per doz. 15 lbs. ..... per dozen $ 9.60

No. 13—Carriageway, 5½×2¾ in., steel, nickel plated and polished, curved at both ends, w't per doz. 12 lbs. ..... per dozen 12.00

No. 130—Carriageway, 5½×2¾ in., bronze, curved ends, w't per doz. 12 lbs. ..... per dozen 21.00

No. 110—Sidewalk, 5½×2¾ in., bronze, w't per doz. 15 lbs. ..... per dozen 18.00

No. 17—Driveway, 6½×3¼ in., steel, nickel plated and polished, curved ends, w't per doz. 24 lbs. ... per dozen 15.00

No. 170—Driveway, 6½×3¼ in., bronze, curved ends, w't per doz. 24 lbs., per dozen 24.00

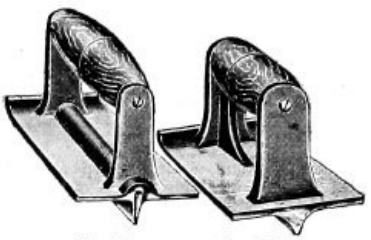
The end curves are sufficiently short to carry groove into rounded edge and still be drawn both ways in the process of making the groove.

No. 12—Sidewalk, 5½×2¾ in., steel, nickel plated and polished, w't per doz. 12 lbs. ..... per dozen $ 9.60

No. 120—Sidewalk, 5½×2¾ in., bronze, w't per doz. 12 lbs. ..... per dozen 18.00

These groovers are square at one end; desirable where groove is to be carried into sharp corners.

GROOVERS.



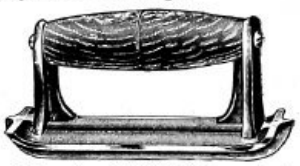
No. 16. No. 14.

No. 16—Sidewalk, 5½×2¾ in., steel, nickel plated and polished, w't per doz. 15 lbs. ..... per dozen $15.00

This groover is square at one end and has inserted steel cutting center.

No. 14—Carriageway, 5¼×2¾ in., steel, nickel plated, polished, curved at one end, w't per doz. 12 lbs. ..... per dozen $12.00

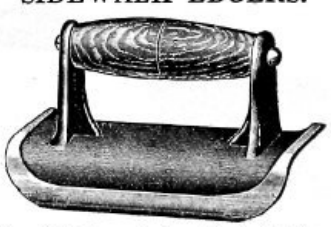
This groover makes wide, rounded grooves that offer a perfect hold for horse shoes and still do not clip or become rough.



No. 15—Sidewalk, 5½×2¾ in., steel, nickel plated and polished, w't per doz. 15 lbs. ..... per dozen $15.00

Most perfect groover offered to the trade; cutting edge composed of steel, accurately cast into the face of tool; carefully shaped and curved at both ends.

SIDEWALK EDGERS.



No. 01—6×3 in., steel, nickel plated and polished, curve of ⅜ in. radius, w't per doz. 12 lbs. ..... per dozen $ 9.60

No. 02—6×3 in., nickel plated and polished, curve of ¾ in. radius, w't per doz. 15 lbs. ..... per dozen 10.80

No. 010—6×3 in., bronze, curve of ⅜ in. radius, w't per doz. 12 lbs. . per dozen 18.00

No. 020—6×3 in., bronze, curve of ¾ in. radius, w't per doz. 15 lbs. . per dozen 21.00

These edgers are carefully ground to produce a perfectly rounded corner, carrying curve to extreme edge.

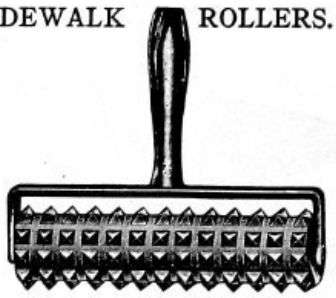
BEADING TOOLS.

Nos	11	12
Size	⅜ & ½	5/16 & ⅜ in.
W't per doz.	4½	3 lbs.
Per dozen	$12.00	11.50
Nos	13	14
Size	¼ & 5/16	3/16 & ¼ in.
W't per doz.	2⅝	2¼ lbs.
Per dozen	$11.00	10.50

Made from cold drawn steel, milled true to gauge. Each tool makes two sizes of beads.

ONE DOZEN IN A BOX.

SIDEWALK ROLLERS.

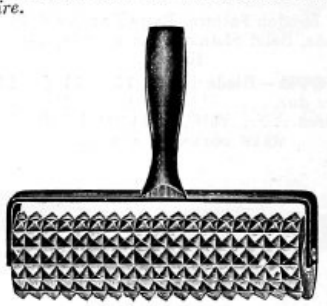


No. 6—Cast bronze roller, japanned iron handle, steel bearings, accurately machined and highly polished, diameter 3½ in., length 6 in., w't per doz. 96 lbs. ..... per dozen $144.00

No. 7—Length 9 in., w't per doz. 120 lbs., otherwise same as No. 6, per dozen. 160.00

No. 27 *Iron roller, japanned iron handles,* diameter 3½ in., length 9 in., w't per doz. 110 lbs. ..... per dozen 72.00

All of our Sidewalk Rollers have a hollow handle so that an extension handle may be inserted if desire.



No. 107—9 in., solid imprint cast bronze roller, diameter 3½ in., japanned iron handle, w't per doz. 132 lbs., per dozen.. ..... $168.00

CEMENT TAMPERS.

No. 30—6×6 in., cast iron, one piece, 3 ft. 7 in. hardwood handle attached, w't per doz. 96 lbs. ..... per dozen $ 9.00

No. 40—8×8 in., w't per doz. 168 lbs., otherwise same as No. 30 . . . per dozen 12.00

No. 4—8×8 in., steel plate, malleable iron flange, 3 ft. 7 in. oiled hardwood handle, w't per doz. 168 lbs. per dozen 15.00

No. 5—10×10 in., steel plate, w't per doz. 216 lbs., otherwise same as No. 4, per dozen. 18.00

BRICK SETS.

No. 55—4 in., hand forged brick sets, w't per doz. 16 lbs. ..... per dozen $10.80

No. 65—4½ in., otherwise same as No. 55. ..... per dozen 12.00

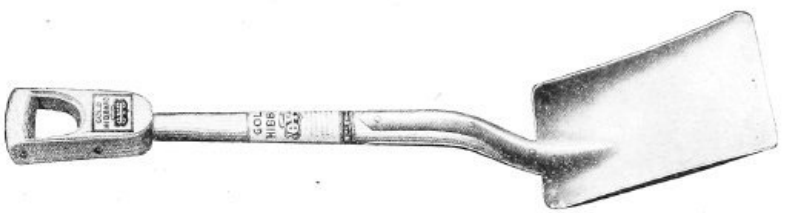
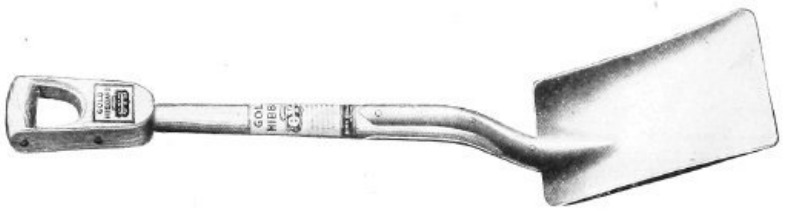
AGRICULTURAL AND CONSTRUCTION TOOLS



HIBBARD, SPENCER, BARTLETT & CO.

CHICAGO

GOLD HIBBARD "O. V. B." SHOVELS AND SPADES.



Gold Hibbard "O. V. B." Shovels and Spades are made of the finest steel put into a shovel. The thickness of the blade is graduated so as to secure the greatest efficiency. They are well balanced and perfect in detail. The handles are thoroughly seasoned, well finished, and securely riveted. Gold Hibbard "O. V. B." Shovels and Spades are largely used by railroads and contractors and give the best of satisfaction. We unhesitatingly recommend them to all those who desire the most efficient tools.

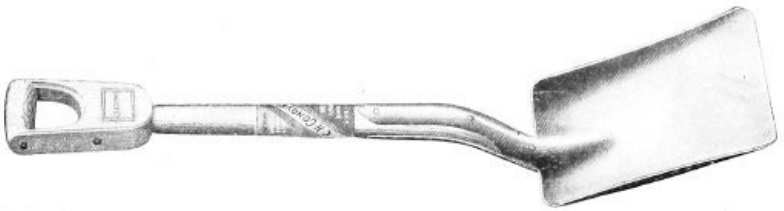
SHOVELS AND SPADES.



C. H. Conover's Shovels and Spades are familiar to every locality. They have acquired a reputation for quality by long years of service. As good "as a Conover" has become the greatest praise for imitations. They are well made, carefully finished and the handles are extra quality. Every C. H. Conover Shovel and Spade is ready for the severest test of actual service.

HALF DOZEN IN A BUNDLE.

SHOVELS AND SPADES.

The lightest shovel ever made of this pattern. After years of experimenting our factory has succeeded in making Emperor Shovels and Spades of *high carbon* steel, enabling them to considerably reduce the weight without loss in strength. These goods are finely finished and very attractive in appearance.

CHISHOLM PATTERN SHOVELS.

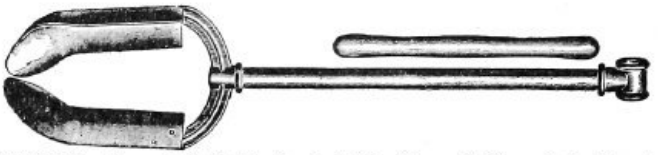
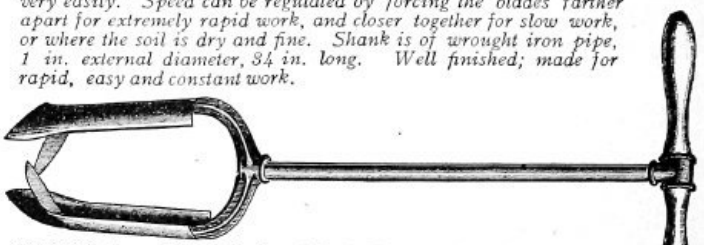
POST HOLE AUGERS.



DIGWELL, Forged Steel Blades, 1 Inch Wrought Iron Tube Shank Malleable Iron Castings, Wood Handle.

Nos.	56	57	58	59	
Size	6	7	8	9	in.
W't per doz	100	108	115	120	lbs.
Per dozen	$28.00	28.00	30.00	32.00	

Will dig in wet clay, loam, gravelly soil, or any kind of ground. Goes down perfectly straight to the center, with no side motion. Frees very easily. Speed can be regulated by forcing the blades farther apart for extremely rapid work, and closer together for slow work, or where the soil is dry and fine. Shank is of wrought iron pipe, 1 in. external diameter, 34 in. long. Well finished; made for rapid, easy and constant work.



IWAN'S, Forged Steel Blades, 1 Inch Wrought Iron Tube Shank, Malleable Iron Castings, Wood Handle.

Nos.	61	62	63	64	65	
Size	6	7	8	9	10	in.

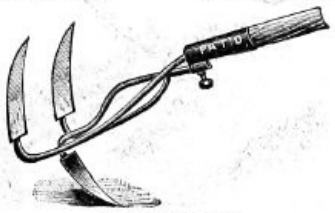
GARDEN TOOLS.

CULTIVATOR HOES.

Fender in Use.

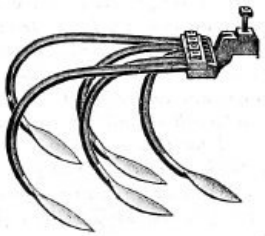
As a Cultivator.



As a Seed Drill.

No. 136—OSBORNE, 3 steel blades and fender, center blade adjustable and removable, 4½ ft. handle, w't per doz. 48 lbs.....per dozen $20.00

HALF DOZEN IN A BUNDLE.



No. 137—NORCROSS, spring steel prongs, malleable iron socket and clamp plates, best quality 4 ft. white ash handle, shovels forged from the steel prongs, prongs clamped firmly by 4 strong bolts, w't per doz. 40 lbs.....per dozen $20.00

No thumb-screws are used. Every part is detachable. Works between rows, or center shovel can be removed and the row straddled. It pulls weeds, pulverizes the soil thoroughly, giving level cultivation. No walking over cultivated surface nor trampling the small weeds back to take root and grow again, (as in pushing a wheel plow). This tool can be used where a wheel plow is not practical and sells at a much lower cost.

HALF DOZEN IN A BUNDLE.

GARDEN FORKS.

No. 10—Malleable iron, brass ferrule, polished hardwood handle, length 9 in., w't per doz. 4½ lbs.....per dozen $1.50

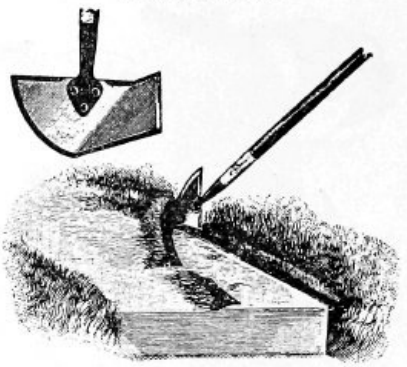
TURF EDGERS.

No. 95—9×5 in., cast steel, polished blade, gold bronzed ferrule, 4 ft. handle, w't per doz. 25 lbs., per dozen $11.50

ONE DOZEN IN A BUNDLE.

COMBINED HOE AND EDGE TRIMMERS.



No. 1—HOUGH patent, five keen cutting edges, no lost motion, works going and coming, w't per doz. 36 lbs., per dozen..... $13.00

The invention is an improved form of hoe, and provides a simple inexpensive tool which may be conveniently used for trimming the edges of lawns, walks and flower beds. This hoe can be used where any other hoe is used and is an excellent hoe to dig weeds with. To use this hoe you "push or pull" or dig same as with a spade, and for that reason can be used advantageously in places close to fences, around flower-beds, walks, etc. Many of these hoes are used in truck gardens, berry patches, flower beds and gardens.

ONE DOZEN IN A BUNDLE.

LAWN SHOVELS.

Finch, Good quality steel, can be filed sharp as desired, 1¼ in. handle, 42 in. long.....per dozen $16.00

The most perfect implement devised for cutting a beveled trench along the edge of sidewalks and driveways, and has no equal as a dandelion and weed extractor. It is very useful in edging and trimming around flower beds, also in the garden, always warranting an even depth.

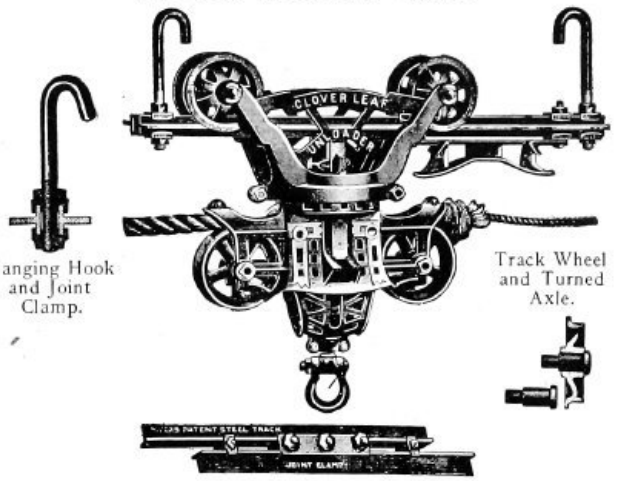
HAY CARRIERS.

MYERS' CLOVER LEAF.



Double Steel Track with Splicing Clamp.

No. 1031—Hay Carriers, for double steel track, malleable iron, aluminum finish, 7/8 in. turned steel axles, swivel and reversible, w't 27 lbs.....each $7.00
No. 1032—Hay Carriers, adapted for wood track, otherwise same as No. 1031, w't 32 lbs.....each 7.00
No. 644—Double Steel Track, with splicing clamps, in lengths of 6 or 12 ft., w't per foot 2 lbs.....per foot .20
No. 302—Hanging Hooks, 6 in. (measured after bending), with clamp, w't per doz. 8 lbs.....per dozen 1.40
No. 824—Extra Splicing Clamps, w't per doz. 14 lbs.... " 2.50

This combination machine (both swivel and reversible) can be reversed by drawing the rope through from end to end or by turning the swivel.

It is constructed with flanged wheels revolving on 7/8-inch turned steel bearings. The lock is composed of three parts and has no springs. The carrier has a large, flaring mouth to receive the fork pulley. The fork pulley can swing backward or forward without becoming detached. This swinging fork pulley is a decided advantage when used for filling a mow above the beams, as it relieves all side strain from the car.

AN AVERAGE OUTFIT CONSISTS OF ONE CARRIER, 50 FT. OF TRACK WITH JOINT CLAMPS, TWENTY-FIVE HANGING HOOKS, TWENTY-FIVE RAFTER BRACKETS, FIVE "PASS KNOT" PULLEYS AND TWO FLOOR HOOKS. ADAPTED FOR 3/4 TO 7/8 IN. ROPE, WHICH IS NOT FURNISHED WITH THE CARRIER.

Double Steel Track, Put Together Before Shipping.

All Double Steel Track is put together as shown in illustration before shipping. The advantage of this plan is that in erecting the only thing necessary is to attach the splice clamps. Instead of old method of breaking joints in center of rail, a long, heavy clamp is used. This plan is recommended, as it adds all the advantages of the single rail, and makes the double rail more desirable for dealers to handle.

How Track Should be Placed.

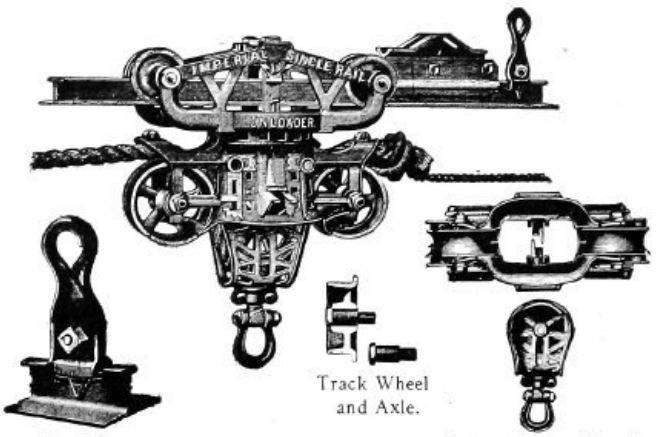
Showing how track should be put up and how rope is tied from one rafter to the other close under the track to make stop for carrier at end of barn. Also shows how rafter brackets are placed, and how pulley should be fastened.

Directions for Erecting Myers' Patent Steel Track.

Scaffold, by placing rope from rafter to rafter, say 6 ft. from ridge pole or peak and about 10 ft. apart. Then place extension ladder across the ropes with board to stand on. Now nail one rafter bracket at each end of barn and draw a line from one end to the other and stretch tight. Then nail all rafter brackets even with this line. You are now ready to put up the track, which can be done either in sections or by clamping the entire length togetner. Hoist near to rafter brackets by ropes. Then place hanging hook over rafter bracket and finish by putting in bolt.

MATERIAL REQUIRED:—One reversible carrier; track the required length of barn; one hanging-hook and rafter bracket for each rafter; five malleable knot passing pulleys; one fork; two floor hooks; one rope hitch; enough 3/4 or 7/8 in. rope to operate the carrier (usually takes from 125 to 160 ft., but depends upon length of barn); 3/8 in. reverse rope the length of track; trip rope required length.

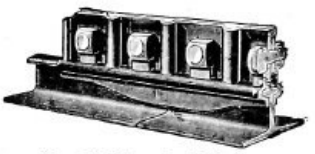
MYERS' IMPERIAL, STEEL TRACK.



No. 519.

Track Wheel and Axle.

Bottom View of Carrier.



No. 518 Showing Splicing Block.

Rope Sheave and Bushing.

No. 301.

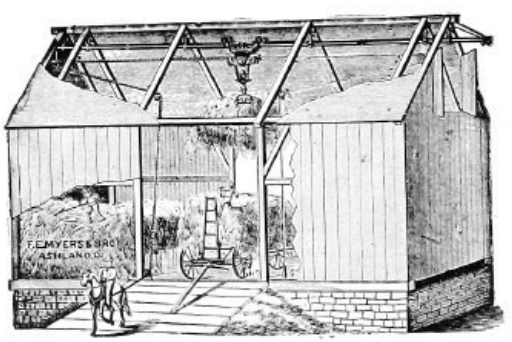
No. 1038—Hay Carriers, for single steel track, malleable iron, aluminum finish, 7/8 in. turned steel axles, swivel and reversible, w't 32 lbs.....each $7.00
No. 518—Steel Track, with splicing blocks, lengths of 6 or 12 ft., w't per foot 2 lbs.....per foot .20
No. 517—Extra Splicing Clamps, w't per doz. 16 lbs....per dozen 2.50
No. 519—Hanging Hooks, two pieces bolted, easily removed, w't per doz. 5 lbs.....per dozen 1.40
No. 301—Malleable Rafter Brackets, w't per doz. 3 lbs.. " .60

The Imperial Single Rail Carrier is heavy and substantially built. Has wide mouth to receive the fork pulley when approaching from any direction. The track wheels revolve on seven-eighths inch steel axle. The rope sheaves have extra long hub. The locking device is composed of three pieces, and is so arranged as to grasp the fork pulley on both sides of the frame.

The track is an eye beam 1 1/4 inch deep with 2 1/16 inch flange at bottom, which forms the tread for the carrier. The knocker or stop block and hanging hooks are each composed of two pieces, held by bolts which form friction clamp, and are adjustable to any point desired.

AN AVERAGE OUTFIT CONSISTS OF ONE CARRIER, 50 FT. OF TRACK WITH JOINT CLAMPS, TWENTY-FIVE HANGING HOOKS, TWENTY-FIVE RAFTER BRACKETS, FIVE "PASS KNOT" PULLEYS AND TWO FLOOR HOOKS. ADAPTED FOR 3/4 TO 7/8 IN. ROPE, WHICH IS NOT FURNISHED WITH THE CARRIER.

Each carrier is supplied with end stops to prevent carrier from running off track.



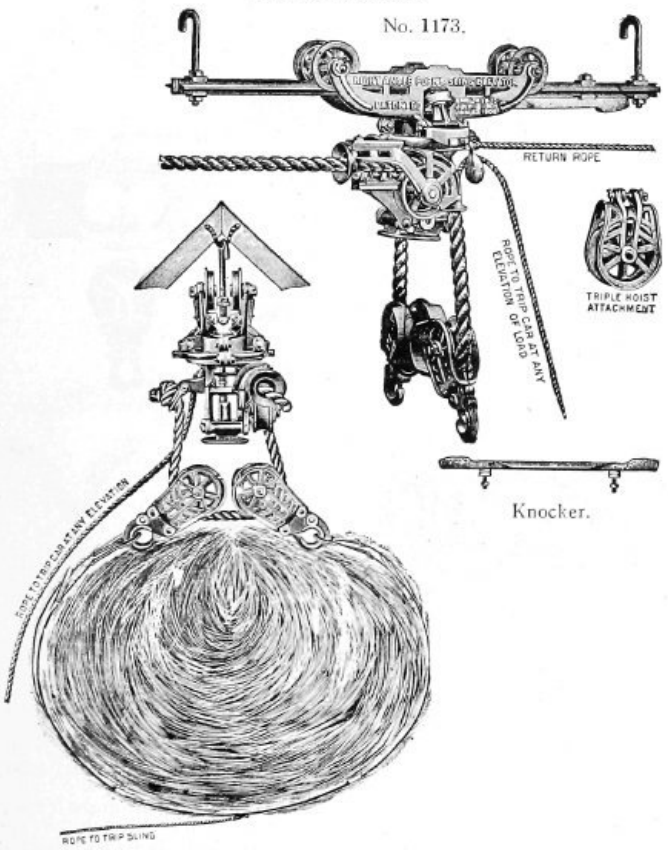
Directions for Reversing Carrier.

Set fork in hay. Tie ends of rope together, to which horse and weight are attached. Pull on small rope until knot comes to the floor, then untie ropes. Fasten weight on small rope, change pulley to floor hook. This reverses carrier for opposite direction without leaving the floor or climbing up. Use all knot passing pulleys. For taking in hay at end of barn use V-shaped brace for track support, as shown in cut.

HAY CARRIERS.

MYERS' RIGHT ANGLE FORK AND SLING ELEVATORS.

No. 1173.



Knocker.

In Operation.

With Two Sure Grip Pulley Blocks, ⅞ in. Turned Steel Bearing, Double or Triple Hoist.

No. 1173—Sling Carriers, for double steel track, annealed malleable iron, improved rope lock and locking device, w't 52 lbs., each $12.00

No. 1175—Sling Carriers, for wood track, otherwise same as No. 1173, w't 55 lbs. ..... each 12.00

No. 644—Double Steel Track, with joint clamps, in lengths of 6 or 12 ft., w't per foot 2½ lbs. ..... per foot .20

No. 824—Extra Joint Clamps, w't per doz. 14 lbs. ..... " 2.50

The Myers right angle fork and sling elevator, made entirely of malleable iron, with a truck operating on an 18 inch wheel base, is very heavy and of sufficient strength to withstand the ordinary usage to which such machines are subjected. The machine is so arranged that IT ELEVATES THE LOAD AT RIGHT ANGLES WITH THE TRACK, WITH THE RESULT THAT WHEN THE LOAD IS DISCHARGED IN THE MOW, IT LIES PARALLEL WITH THE LOAD ON THE WAGON, a feature not accomplished by sling carriers, unless they use special right angle pulleys which add at least one half horse power to the draft.

The ordinary sling carrier is constructed to hold a certain weight of load. If, by chance, the operator overloads the carrier, the result is that the rope slips through the lock, causing it to wear. This has been entirely overcome on the right angle fork and sling elevator, as it is so arranged that the tension of the rope lock IS REGULATED ENTIRELY BY THE WEIGHT OF THE LOAD. In other words, the heavier the load, the greater the tension on the rope lock. The result is that it is impossible for the rope to slip through the lock; hence NO CHAFING OF THE ROPE. THE LOCK ADJUSTS ITSELF TO ANY SIZED ROPE, ¾ TO 1 INCH.

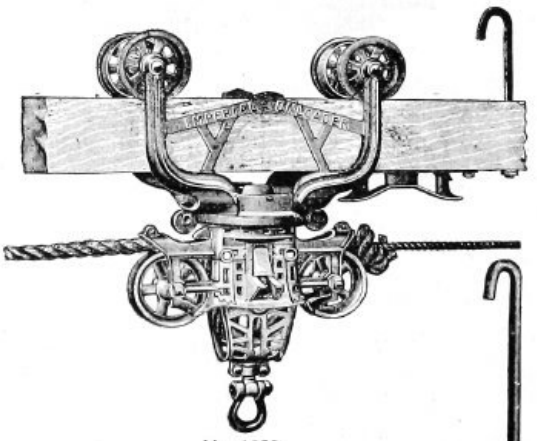
The right angle fork and sling elevator operates automatically, and is tripped by the sling pulley striking a plate immediately under the carrier. IT IS ALSO ARRANGED WITH A SEPARATE TRIP ROPE, BY THE USE OF WHICH THE LOAD MAY BE CARRIED INTO THE MOW AT ANY ELEVATION DESIRED WITHOUT DRAWING ENTIRELY TO THE TOP OF THE BARN.

This is a great advantage when used in modern barns, without cross beams, as the load need only be elevated to the height necessary to pass in to the mow, and not to the top of the barn.

The right angle fork and sling elevator is adapted to be used in connection with slings, or with one or two ordinary hay forks as desired. Many farmers prefer to use two forks, one attached to each pulley. This arrangement enables them to take at least twice the load that could possibly be taken by an ordinary fork carrier.

MYERS' RIGHT ANGLE FORK AND SLING ELEVATORS—Continued.

MYERS' IMPERIAL—WOOD TRACK.



No. 1039.

No. 301.

No. 267.

No. 1039—Hay Carriers, for single *wood* track, malleable iron, aluminum finish, ⅞ in. turned steel axles, swivel and reversible, w't 25 lbs. ..... each $7.00

No. 267—Hanging Hooks, ½×10 in. (measured after bending), w't per doz. 9 lbs. ..... per dozen 1.00

No. 268—Hanging Hooks, ½×14 in. (measured after bending), w't per doz. 12 lbs. ..... per dozen 1.20

No. 301—Malleable Rafter Brackets, w't per doz. 3 lbs. .. " .60

This carrier is identical in construction throughout with the steel track carrier, with the exception of the size of track. It is adapted for 4×4 in. wood track.

AN AVERAGE OUTFIT CONSISTS OF ONE CARRIER, TWELVE HANGING HOOKS, TWELVE RAFTER BRACKETS, FIVE PASS KNOT PULLEYS AND TWO FLOOR HOOKS.

Directions for Making Wood Track.

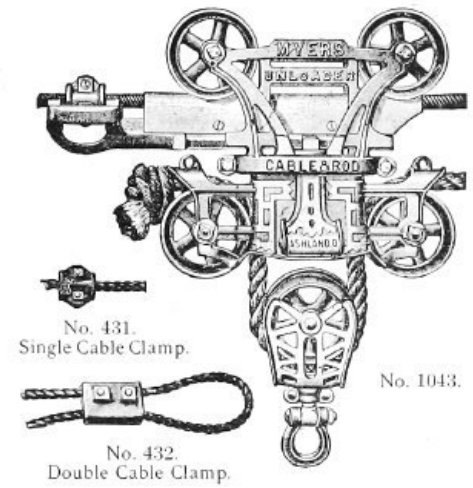
The track may be hardwood or pine scantling, 4×4, dressed to about 3¾ in. width. If not convenient to get this size for the full length, 4×2 or 4×3 may be used by nailing a piece on where the stop is placed, so as to fit the carrier and operate the lock properly. The pulley used to pull the carrier back in mow should be directly under and in line with the track. Always put an extra hook over the load near the stop.

All Myers' hay carriers are made of malleable iron throughout. They are constructed with flanged wheels revolving on ⅞ inch turned steel bearings. The carriers have a large flaring mouth to receive the fork pulley when approaching from any direction. The swinging fork pulley is a decided advantage in drawing hay into a well filled mow or over a beam.

The locking device is composed of three pieces and is so arranged as to grasp the fork on both sides of the frame.

HAY CARRIERS AND PULLEYS.

MYERS' CABLE OR ROD HAY CARRIERS.



Showing an Enlarged View of the Swinging Knocker or Stop Block as Used on the Cable Carrier.

No. 1043—Hay carriers, for cable or rod track, malleable iron, aluminum finish, with ⅞ in. turned steel axles, w't 31 lbs.....each $7.00

No. 431—Single cable clamps, 2 pieces, bolted, easily removed, w't per doz. 9 lbs.....per dozen 2.75

No. 432—Double cable clamps, 2 pieces, bolted, w't per doz. 15 lbs.....per dozen 3.75

The knocker is one of the special features of this machine. It is so arranged that it swings loose on the track, and stands immediately under the cable, under any and all circumstances. It is held to the cable by means of a steel sleeve through which the cable passes. The sleeve is attached to the knocker by means of two bolts, and can be removed at any time without taking down the cable. The knocker is located at any desired point on the cable by means of an ordinary cable clamp.

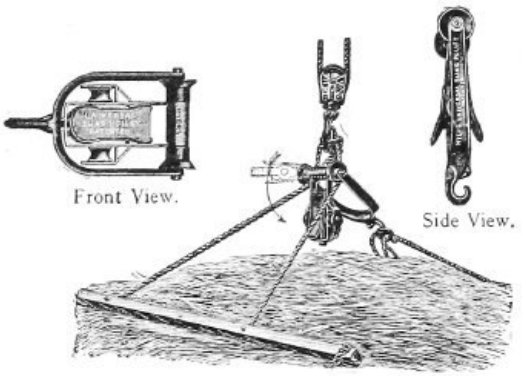
AN AVERAGE OUTFIT CONSISTS OF ONE CABLE CARRIER, ONE HAY FORK, 150 FT. ½ IN. GALVANIZED CABLE, TWO SINGLE CABLE CLAMPS, TWO DOUBLE CABLE CLAMPS, TWO ⅝×10 IN. CARRIAGE BOLTS FOR SECURING POLES TOGETHER, 130 FT. ¾ IN. MANILA ROPE, TWO PULLEYS AND FOUR POLES 4×4 IN. ×30 FT. LONG.

Cable.

Cable, ½ in. 7 strand, galvanized, w't per ft. ½ lb.....per foot $0.05

SLING PULLEYS.

Showing Pulley with Fork Approaching.



Showing Pulley after Load Has Been Compressed.

No. 1052—MYER'S UNIVERSAL, malleable iron, reversible, w't 10 lbs.....each $3.00

Can be used with any make of hay carrier without a change of fork pulley or using a registering head. It is so arranged that it cannot be misplaced on the load as it can be used either side up and in connection with any shape or style of fork pulley.

With this sling attachment the hay is deposited in the mow in the same relative position as on the wagon, and not crosswise as on many sling carriers.

No. 806. Sling Pulley, Locked Together.

No. 806. Sling Pulley, Spread Apart.

No. 806—MYERS', malleable iron, self-locking, with registering head for any make carrier (in ordering give number of registering head), w't 10 lbs.....each $3.00

Registering Heads.

RH1. RH3. RH6. RH10. RH14. RH16. RH19. RH276.

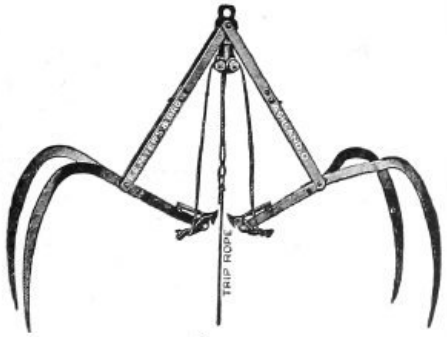
Registering heads, No. 1 for Louden hay carrier, No. 3 for Star hay carrier, No. 6 for Porter hay carrier, No. 10 for Nye and Superior hay carrier, No. 14 for Myers' O. K. hay carrier, No. 16 for Myers' combination hay carrier, and No. 19 for Haymaker, Imperial, and Myers' single rail hay carriers, No. 276 for Myers' new style hay carriers.

HAYING TOOLS.

HAY FORKS.

Nos. 1 and 2. No. 3.

No. 1—Harpoon, double point, *25 in.* spring steel tines, w't 16½ lbs....each $1.60
No. 2—Harpoon, double point, *31 in.* spring steel tines, w't 18½ lbs...each 2.00
No. 3—Nellis, harpoon, single point, spring steel, w't 11 lbs.....each 3.00

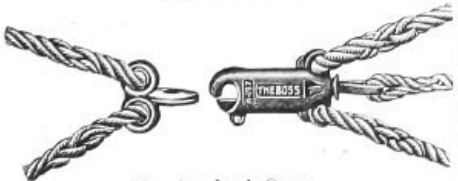


Open.

No. 617—Myers', automatic grapple, tines and arms of high carbon spring steel, locks of best annealed malleable iron, 4 tines, double grapple, spreads 68 in., w't 34 lbs.....each $7.00
No. 619—6 tines, triple grapple, w't 51 lbs., otherwise same as No. 617...each 8.50

CENTER TRIP SPRING LOCKS.

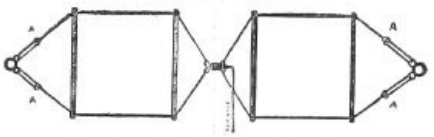
Showing Lock Closed.



Showing Lock Open.

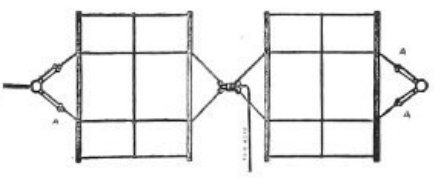
No. 622—Myers', malleable iron, 3 pieces, w't 1½ lbs.....each $1.00
This lock is simple and strong, trips easily under all circumstances, and is absolutely impossible to misplace.

CENTER TRIP ADJUSTABLE SLINGS.



Showing No. 620 Sling Complete.

No. 620—Myers' Pattern, 4 ft. seasoned ash cross bars, malleable iron center trip spring lock, ½ in. loose twist ropes, adjustable from 17 to 20 ft., w't 20 lbs., each..... $3.20
No. 625—5 ft. cross bars, otherwise same as No. 620, w't 23 lbs.....each 3.80

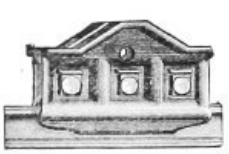


Showing No. 621 Sling Complete.

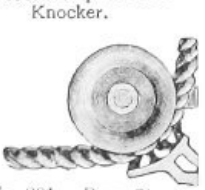
No. 621—Utah Pattern, 6 ft. seasoned ash cross bars, Myers' center trip spring lock, ½ in. ropes, *extra end and center ropes*, adjustable from 17 to 20 ft., w't 26½ lbs.....each $5.00
The ropes are fitted with adjustable take-ups at either end, allowing the length of the sling to be varied from 17 to 20 feet. Any number of slings can be used on a load, depending on the size and number of bundles to the load.

HAY CARRIER EXTRAS.

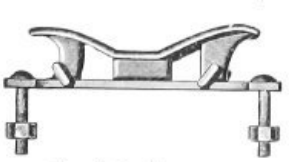
No. H50. Fork Pulley, Complete.



No. 103. Stop Block or Knocker.



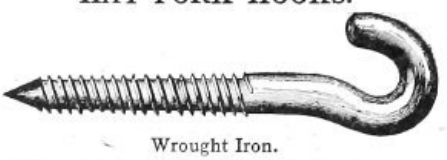
No. 201. Rope Sheave.



No. 104. Knocker.

No. H50—Fork Pulleys, complete, for Myers' old style hay carriers, w't 3¼ lbs., each..... $1.00
No. 103—Stop Blocks or Knockers, for Myers' single steel track hay carriers, each..... .50
No. 104—Extra Knockers or Trip Blocks, for Myers' Clover Leaf steel or wood track and Imperial hay carriers.....each .50
No. 201—Rope Sheaves, with bushings for Myers' old style hay carriers...each .40
No. H258—Rope Sheaves, for Myers' new style hay carriers.....each .40

HAY FORK HOOKS.



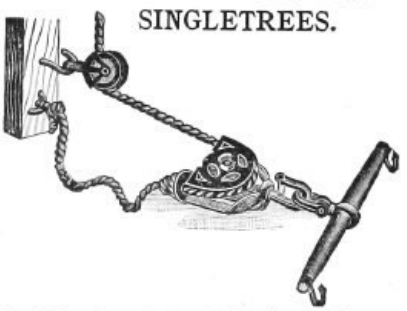
Wrought Iron.

No. 50—⅝×7 in., w't per doz. 8 lbs., per dozen..... $1.20
No. 60—¾×8 in., w't per doz. 16 lbs., per dozen..... 1.40

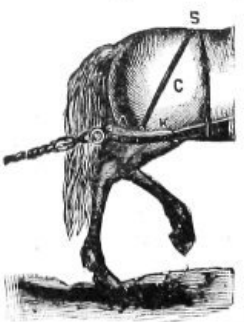
MYER'S ROPE HITCHES.

No. 376—Malleable iron, swivel hook, w't per doz. 15 lbs.....per dozen $3.20
The rope can be released from whiffletree instantly with this hitch. The hitch can be shortened to any desired length by drawing on the end of the rope. A twist in rope is removed by means of swivel, instead of going to the end to affect the working of the carrier.

SNATCH BLOCKS AND SINGLETREES.



No. 628—Myers' Snatch Blocks, malleable iron, w't per doz. 48 lbs., per dozen..... $11.00
This device shortens the distance the horse travels, without reducing the elevating power.



No. 472—Myers' Hoisting Singletrees, wood, with malleable iron attachment, w't 6½ lbs.....per dozen $19.20
A very convenient article. It prevents the whiffletree from dragging on the horse's heels.

HAY FORK PULLEYS.

No. 36—6 in. maple wheel dipped in hot oil, 1 in. loose pin, heavily ribbed cast iron frame, "pass knot," swivel, w't per doz. 48 lbs.....per dozen $4.00
Extra Wood Wheels.... " 1.50

Nc 15—5½ in iron wheel, ¾ in. bearing swivel frame reinforced with heavy ribs on edge and center, w't per doz. 43 lbs., per dozen..... $3.20

No. 26—6 in. maple wheel, 1⅛ in. loose pin, cast iron frame, swivel, w't per doz. 36 lbs.,per dozen $3.20
Extra Wood Wheels..... " 1.50

No. 046—Reed's pattern, 4½ in. wood wheel, hollow axle, wrought iron strap, forged steel hook, riveted hardwood shell, swivel, self-lubricating, w't per doz. 35 lbs.....per dozen $4.00
ONE DOZEN IN A BUNDLE.

No. 1133—"O.K.," plain, 6 in. maple wheel dipped in hot oil, heavily ribbed cast iron frame, 1⅛ in. loose pin, swivel, w't per doz. 42 lbs.....per dozen $4.00

No. 1120—"O.K.," pass knot, 6 in. maple wheel dipped in hot oil, heavily ribbed cast iron frame, 1 in. loose pin, swivel, w't per doz. 56 lbs.....per dozen $5.00

The sheaves in Nos. 1133 and 1120 are made of hard maple dipped in oil. The frames are heavy ribbed, made in two separate halves riveted together at the swivel eye. The frame follows the rim of the sheave to a point nearly opposite the axle and is flanged out from the edge of the pulley so as to form an easy approach for the rope. This not only gives great strength to the pulley, but prevents the wearing of the rope in drawing over the side of the frame.

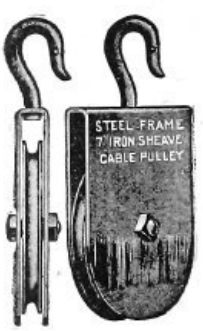
No. 189—Derrick, 1½ in. hard maple frame, wood wheel, steel yoke and hook, w't per doz. 56 lbs.....per dozen $8.00

The frame of this pulley is wider than the sheave, so as to allow two pulleys to be used together, the one sheave not interfering with the other. This is an extra heavy pulley intended for heavy work.

For Myers' New Style Hay Carriers.

No. H254—4¼ in. wheel, malleable iron frame extending around entire surface of sheave, malleable iron clevis, steel bolt, swivel, w't per doz. 43½ lbs...per dozen $12.00

This pulley is especially designed for rough usage. The frame is made in two pieces riveted together at swivel eye. The frame extending entirely around the sheave is a great protection to the rope.



No. 1062—For ⅜ or ½ in. wire cable, 7 in. iron wheel, high carbon steel frame, steel bushing, w't per doz. 80 lbs., per dozen..... $14.20

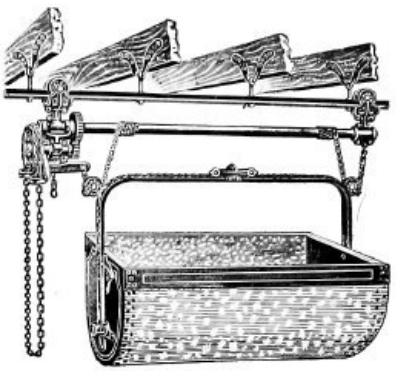
The iron sheave revolves on a steel bushing and a heavy machine bolt passes through the bushing, making it very strong and durable.

LITTER CARRIERS AND PARTS.*

This carrier is practical and convenient and will do a great amount of work.

Construct cn. The carrier is of heavy malleable iron a d the tub of galvanized iron, with double thick cross grained wood ends. The trucks have two tracker wheels each which give the carrier a double thread on the track and are run on hardened steel axles. The revolving shaft on which the supporting chains wind is supported at four points, being a very important feature, as other makes of litter carriers are supported at only two points. The span of each swivel truck is 11 in. and the entire length of the shaft is 60 in. The construction of the tub makes it possible to carry a larger load than a square or any other shaped tub, and it is self-cleaning when dumped.

The tub is supported by a frame of 1½ in. heavy channel steel, and is neatly painted and decorated.



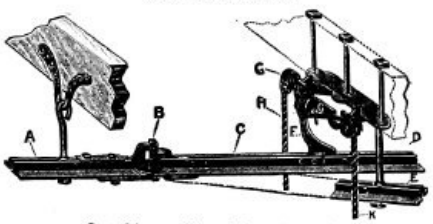
Operation. An endless chain which runs over the main drive wheel at the end of the carrier is the means of raising the tub, and it is lowered by pulling the trip chain, which releases the ratchet allowing the tub to freely descend to any desired point. The tub will descend of its own weight. Additional pressure on the trip chain acts as a brake on the shaft, giving the operator complete control of the speed.

A removable section, which allows the door of the barn to be closed, where the double angle track is used, is a necessity and must be used in order to close the barn door.

Feed Tub. A Litter Carrier can instantly be converted into a Feed Carrier, by removing the Litter Tub and supplementing a Feed Tub, which is fully described below.

No. 390—Litter Carrier, complete with No. 2 tub, 26 in. wide, 41 in. long and 14 in. deep, w't 90 lbs.★.....each $32.00
No. 391—Litter Carrier, complete with No. 4 tub, 26 in. wide, 41 in. long and 17 in. deep, w't 95 lbs.★..... " 34.00
No. 392—Litter Carrier, complete with No. 6 tub, 26 in. wide, 41 in. long and 19 in. deep, w't 100 lbs.★..... " 36.00
No. 400—Feed Carrier, same as the No. 390 Litter Carrier except that the Feed Tub is used instead of the Litter Tub, size of Feed Tub, 67 in. long, 22 in. high and 25 in. wide, capacity 10 bushels, w't 110 lbs.....each 38.00

SWITCHES.

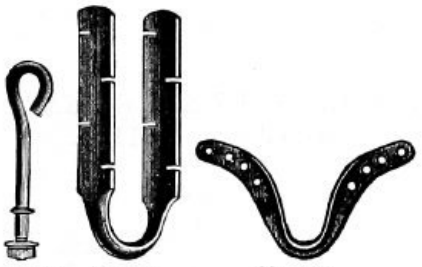


Cut Shows Two-Way Switch.

No. 501—Two-way switch, w't complete 7 lbs.★.....each $3.00
No. 502—Three-way switch, w't complete 8 lbs.★.....each 4.00

The switch piece "C" is hinged to the main track "A," and by pulling on the cords "H" and "K" the switch can be transferred over the switch plate "G" and the Carrier run onto track "E" or "D" as required. The switch is locked in place on the track by the latch "F." It can be operated from below, no matter how high the track may be hung. The operation of the three-way switch is the same as the two-way except that the hinged portion "C" connects with three different sections of track so that the carrier may be run in three different directions from the main line "A."

HANGERS AND BRACKETS.



No. 503. No. 504. No. 505.

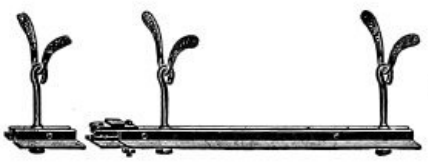
No. 503 Hanger, Used to Support Track to Joist Bracket.

Sizes	6★	11★	13★	15★ in.
W't per doz...	4¼	7	8	9 lbs.
Per dozen $1.50	2.50	2.70	2.90	

No. 504—Ridge pole hanger, used on 2 in. joist or ridge pole, by driving a nail in each slot it is secure enough to support any track, w't per doz. 5½ lbs.,★ per dozen..... $0.70

No. 505—Joist bracket, for supporting track to joist, w't per doz. 4½ lbs.,★ per dozen..... .70

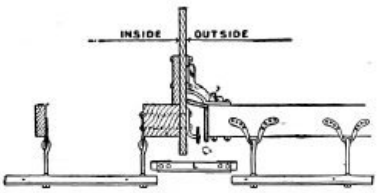
DOUBLE ANGLE TRACK.



No. 499—Made of two pieces of ⅞ in. angle steel, riveted together, supported by steel hangers which can be placed to accommodate the joists, w't per ft. 1½ lbs. ★.....per foot $0.18

Hangers and brackets, shown in cut, are not furnished with the track.

REMOVABLE SECTIONS.



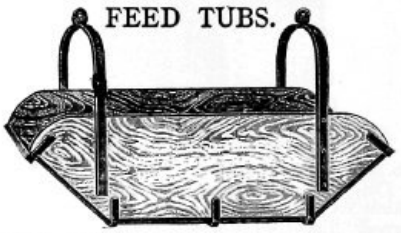
Piece marked L, illustrates the removable section.

No. 506—Used on double angle track, is very simple and the only means of closing the barn door, can be removed or replaced instantly, w't 2½ lbs.★ each $0.80

WALL BRACKETS.

No. 507 — Used to secure ridge pole to the barn, is shaped so as to allow the door to close without striking, w't 6 lbs.★.....each $1.20

FEED TUBS.

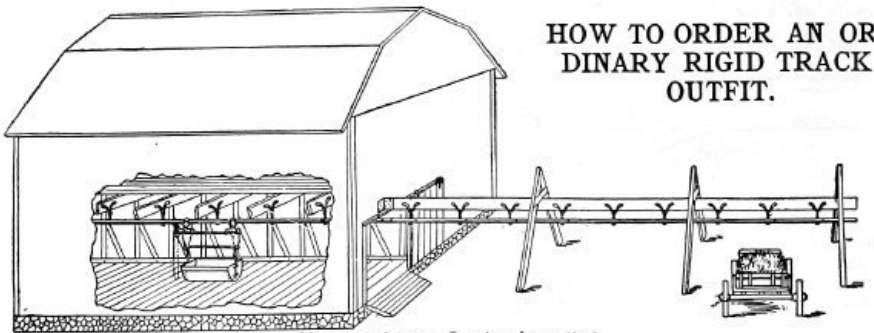


No. 508—W't 50 lbs.★.....each $19 00

This tub is furnished with the No. 400 Feed Carrier. It is made of hard wood and bound with heavy galvanized iron bands. The length over all is 67 in., width 25 in., height 22 in. with a capacity of 10 bushels.

The ends and bottom are of galvanized iron, making it easy to shovel and to dump. The bail is so constructed as to permit the greatest freedom in shoveling, being oval at the top.

HOW TO ORDER AN ORDINARY RIGID TRACK OUTFIT.



Showing Litter Carrier Installed.

1 only No. 390 Litter Carrier, 100 ft. No. 499 D. A. Track, 67 only No. 505 Joist Brackets, 67 only No. 503 Hangers, 1 only No. 507 Wall Bracket, 1 only No. 506 Removable section, if a two-way switch is required, order 1 only No. 501 Switch, if a three-way, 1 only No. 502 Switch.

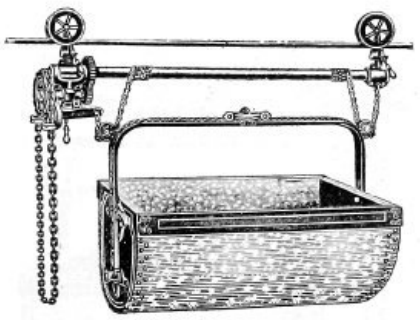
★*FOR FACTORY SHIPMENT ONLY.*

LITTER CARRIERS AND PARTS.*

We illustrate here another style of Litter Carrier, run on rod track instead of double angle track. The construction of the carrier is the same as the one shown on the previous page, except that the swivel trucks have a 6 in. tracker wheel each, while the double angle track carriers have two wheels to each truck.

Automatic spring keepers, which prevent the carrier from jumping the track are fitted to the trucks, which also takes care of the carriers at the switches and curves.

A very important feature of this style of Litter Carrier is the **Automatic tripping and returning device.** It is very simple in construction and absolutely positive in action, only being necessary for the operator to give the carrier a good steady shove which will send it out into the yard a hundred feet or more. When it reaches the tripping device (which can be arranged at any desired point) it dumps the tub and automatically returns it to the barn. Furnished free with every Rod Track outfit, it cannot get out of position, and never fails to work.



The Rod Track is of special drawn wire of the No. 0000 size, which is especially adapted to meet the requirements for Litter Carrier outfits.

The Litter Tub is the same in construction as the one shown on the previous page. The Feed Tub (as furnished with the No. 400 Feed Carrier can also be used on this style of carrier.

No stockman or farmer should be without one of either of these carriers installed in his barn. As a labor saving device they are incomparable and many steps are saved by their use.

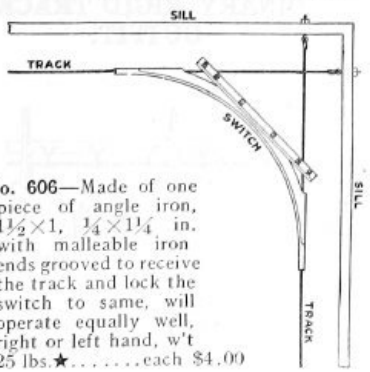
No. 490—Litter Carrier, complete with No. 2 tub, 26 in. wide, 41 in. long and 14 in. deep, w't 90 lbs.★.....each $34.00
No. 500—Feed Carrier, complete with feed tub shown on previous page, w't 110 lbs.★..... " 38.00

TRIPPING AND RETURNING DEVICES.

No. 600—W't 4 lbs.★.....each $4.00

The above illustration shows the manner in which the tubs are dumped and the carrier returned. When the Carrier reaches the trip, the tripping jaws "B" engage the chain above the trip casting "A" and at the same time the chain is drawn over the truck frame under the wheel which raises the trip casting, which in turn raises the trip jaws "B" which operate the trip latch "C" and dump the Tub. It will also be seen that the momentum of the Carrier will compress the spring "D," below the trip casting, thus checking the Carrier and automatically starting it back to the barn without any danger of its leaving the track. The trip casting "A" can be adjusted to any height on the chain which supports it.

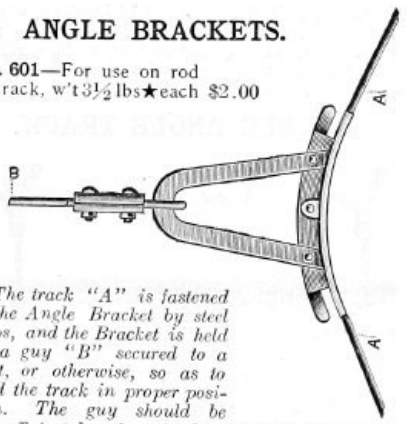
ROD TRACK SWITCHES.



No. 606—Made of one piece of angle iron, 1½×1, ¾×1¼ in. with malleable iron ends grooved to receive the track and lock the switch to same, will operate equally well, right or left hand, w't 25 lbs.★.....each $4.00

ANGLE BRACKETS.

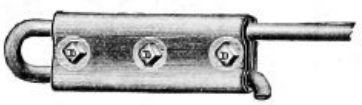
No. 601—For use on rod track, w't 3½ lbs★each $2.00



The track "A" is fastened to the Angle Bracket by steel clips, and the Bracket is held by a guy "B" secured to a post, or otherwise, so as to hold the track in proper position. The guy should be of sufficient length to freely raise and lower with the track. A certain amount of guy rod "B" will be required, depending on the distance to the support by which the Bracket is held. A tension bolt should be also used on the end of the guy rod. Neither the tension bolt nor guy rod are included in the price of the Bracket. (See below.)

No. 602—⅞ in. tension bolt★.....each $1.00
No. 603—Guy rod★.....per foot .10

LOOP CLAMPS.

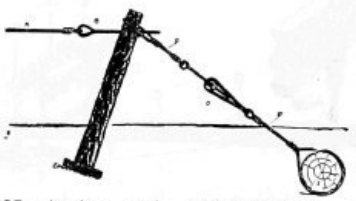


No. 608—Used to form a loop in the end of rod track, w't 1¾ lbs★.....each $1.00

ROD TRACK.

No. 607—Size 0000, w't per 100 ft. 42 lbs.,★ per hundred feet..... $5.50

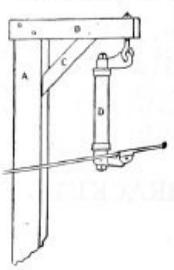
ANCHOR RODS AND TURNBUCKLES.



No. 605—Anchor rod and turnbuckle complete, w't 15 lbs.★.....each $4.00

It is very important for the successful working of a rod track outfit that the ends of the track be properly secured. By the use of this device the track will not sag or get out of shape.

SPRING TRACK SUPPORTS.

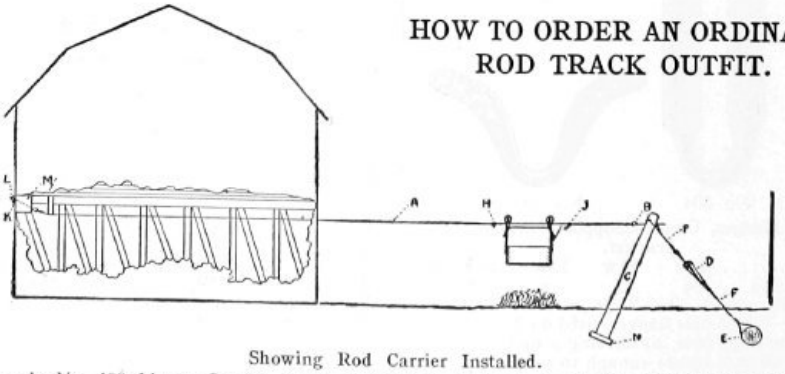


For Outside of Barn.

No. 604—Should be used when track runs more than 100 ft. at a distance of every 50 ft. of track. w't 8¼ lbs★ each $3.00

The arm "B" should be 2 ft. long between the post "A" and the bolt for suspending track support. The post "A" must be well anchored.

HOW TO ORDER AN ORDINARY ROD TRACK OUTFIT.



Showing Rod Carrier Installed.

1 only No. 490 Litter Carrier, 100 ft. No. 607 Rod Track, 2 only No. 602 Tension Bolts, 1 only No. 605 Anchor Rod and Turnbuckle, 1 only No. 604 Spring Track Support, (when more than 100 ft. of track is used, order one support for each additional 50 ft.), where it is necessary to run track to one side of a direct line, specify 1 only No. 601 Angle Bracket, 1 only No. 606 Rod Track Switch (when necessary).

ONE DOZEN IN A CARTON. TEN DOZEN IN A CASE.

"CRUSO."

Next in rank to the "Il-A-Noy." Good strong hickory, but largely red wood. All right for ordinary use and a splendid value at the price.

These are not the lowest grade on the market, as we do not carry the "culls," or unserviceable handles offered by some makers.

SINGLE BITTED AXE.

CRUSO, Hickory.

No. C340—Oval, regular, 36 in., w't per doz. 22 lbs.....per dozen $3.70

Hardwood Frame and Box, Nicely Painted and Varnished, Removable End Boards, Braced Steel Leg.

No. 24—BOX 32×20×9 in., 30 in. steel wheels, 3 in. tire, ⅞ in. steel axle, w't 80 lbs.....each $9.00

No. 25—BOX 40×24×10 in., 36 in. steel wheels, 1½ in. tire, ⅞ in. steel axle, w't 90 lbs.....each 10.50

No. 24 cart is fitted with steel wheels having a three-inch tread, which permits it to run over soft ground easily and prevents cutting up lawns.

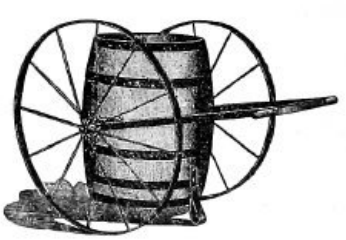
BARREL CARTS.

No. 129—DUPLEX, pick-up, steel frame, painted black, cast flange securely riveted to frame, wood handle, 36 in. wheels with 2 in. oval rim, twelve ⅜ in. spokes, without barrel, w't 75 lbs.....each $10.00

These carts carry the barrel directly on the axle and may be easily loaded and unloaded. It has a device at the bottom which with the hook at the top will hold the barrel firmly in place so as to admit the contents of the barrel being emptied when handle is raised. The frame work is not dependent on the barrel for its support.

No. 27—DAISY, bent hardwood frame, with steel combined drop axle and barrel support, braced steel leg, size of rig over all: width 42 in., length 58 in., height 20 in., steel wheels, 36 in. in diam., 1¾×1¼ in. tire, w't 70 lbs..each $8.50

Can be used with any barrel without extra attachments. We do not supply barrel.



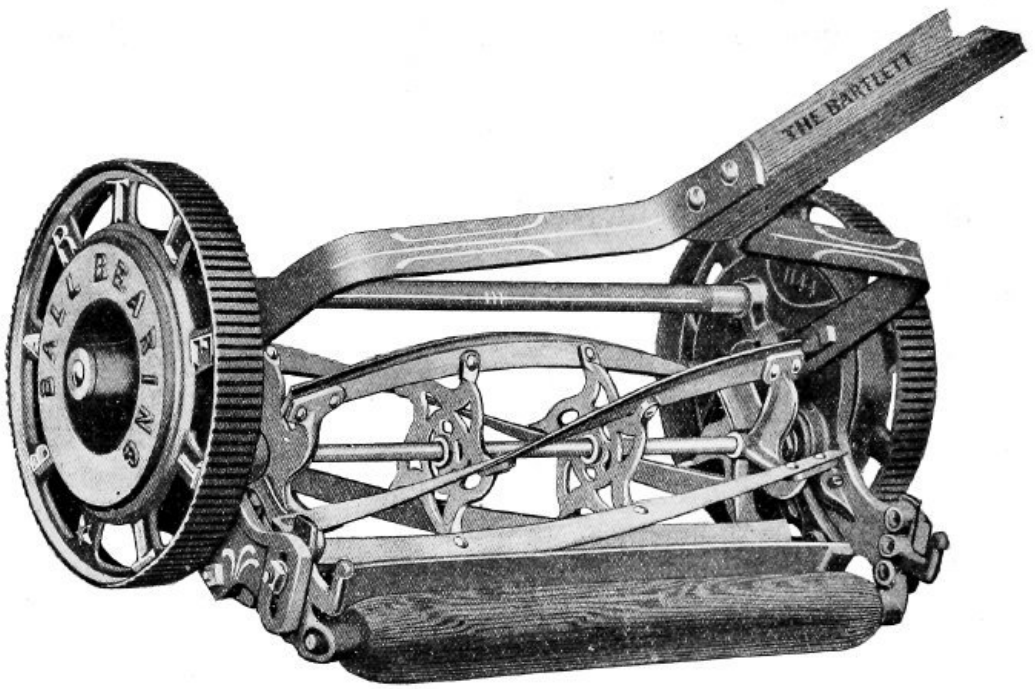
No. 126—ECLIPSE, steel frame, painted black, cast flanges to be bolted to barrel, wood handles, 36 in. wheel with 2 in. oval rim, twelve ⅜ in. spokes, without barrel, w't 56 lbs.....each $7.50

ONE IN A PACKAGE.

H. S. B. & CO.'S LAWN MOWERS.

On this and the following pages we illustrate a line of Mowers which answers all the requirements of any dealer or locality. The several patterns are adapted to the demand as to the size, variety and quality, and at the same time embrace a wide variation in price. Special attention is called to the detailed description printed under each mower. These mowers are made by the best factories in the United States and will prove satisfactory in every particular. They represent the greatest value procurable for the money invested.

THE BARTLETT, BALL BEARING.



10 Inch Driving Wheels, 6 Inch Reel, Five Highest Grade Crucible Steel Revolving Knives, Upturned Dead Knife Ground on Both Edges, Three Reel Braces, 9-16 Inch Reel Axle with Bicycle Ball Bearings, 5-8 Inch Front Cross Rod, Hooks for Attaching Grass Catcher, Hardwood Roller and Handle.

Cut	15	17	19	21 in.
Weight	61	64	68	72 lbs.
Each	$25.00	28.00	31.00	34.00

The Bartlett was made first and the cost figured afterwards. It is the most successful mower that we have ever known.

Every blade is made of crucible steel in the old fashioned way, hardened and tempered in oil, notwithstanding the fact that it involves six to ten times as much expense as if made of Bessemer or open hearth steel. Other manufacturers who harden and temper the revolving blades use open hearth steel and simply heat it enough to give it the necessary curve, allowing it to air harden. This simply puts a surface hardening on it, but does not affect the blade throughout.

We know of numerous instances where this machine has been running for many years without requiring regrinding or any other sharpening than that which can be done by use of a screw driver, in adjusting the under knife so that it is kept in contact with the revolving blades. This feature alone is worth the full retail price of the mower, because it will save the user the expense of sharpening.

The dust proof ball bearing equipment of this machine is equal to that of the finest bicycle or automobile. It costs three times as much to make these parts as it does in the usual style.

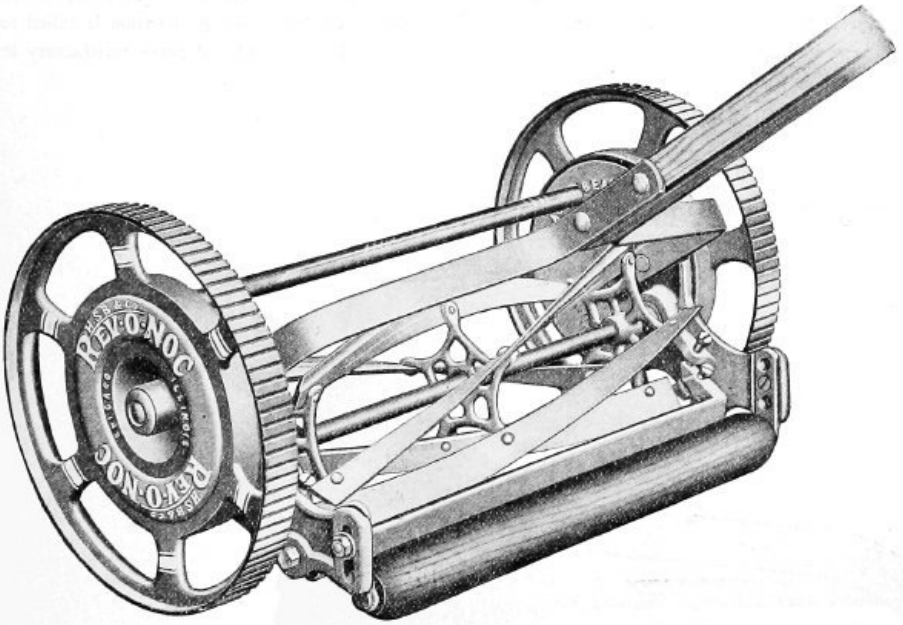
The reels are perfectly adjusted when at the factory and it is rarely that adjustment is necessary. The wheel axles are of extra large size and length, and made of cold drawn steel shafting. The entire machine is made in jigs on an interchangeable plan, so that if by accident a part is broken or worn out, a duplicate which will work properly can be secured at a small expense. This care in manufacturing produces a perfect working of all parts; a smooth running and noiseless machine that will wear a life-time if given ordinary care.

Decoration—Beautifully finished in gold, maroon and blue, striped to enhance color effect.

ONE IN A CASE.

H. S. B. & CO.'S LAWN MOWERS.

THE "REV-O-NOC," BALL BEARING.



The "Rev-o-noc" is a high grade ball bearing mower. The reels are made with blades of concave steel edges, which allow the user to always maintain a perfect cutting edge as the machine is reground and sharpened.

The bed of the cutter bar is accurately ground to a flat surface for receiving the steel cutting knife, which is attached with rivets headed-up by a new spinning device which draws the blade much closer to the cast bar than the old style of heading-up the rivet.

This machine has a case-hardened cone especially tempered under a secret process, whereby the surface of the cone is so hard that it will never show any signs of wear. Unless the frame construction is intentionally changed, the cone will never require adjustment.

11 Inch Driving Wheels, 6 Inch Reel, Five Highest Grade Crucible Steel Revolving Blades, Ball Bearing, Malleable Iron Reel Spiders, 5-8 Inch Cross Rod, Solid Steel Adjusted Cutter Bar, Parts Ground and Fitted.

Cut	14	16	18	20 in.
Weight	47	49	51	53 lbs.
Each	$22.00	23.00	24.00	25.00

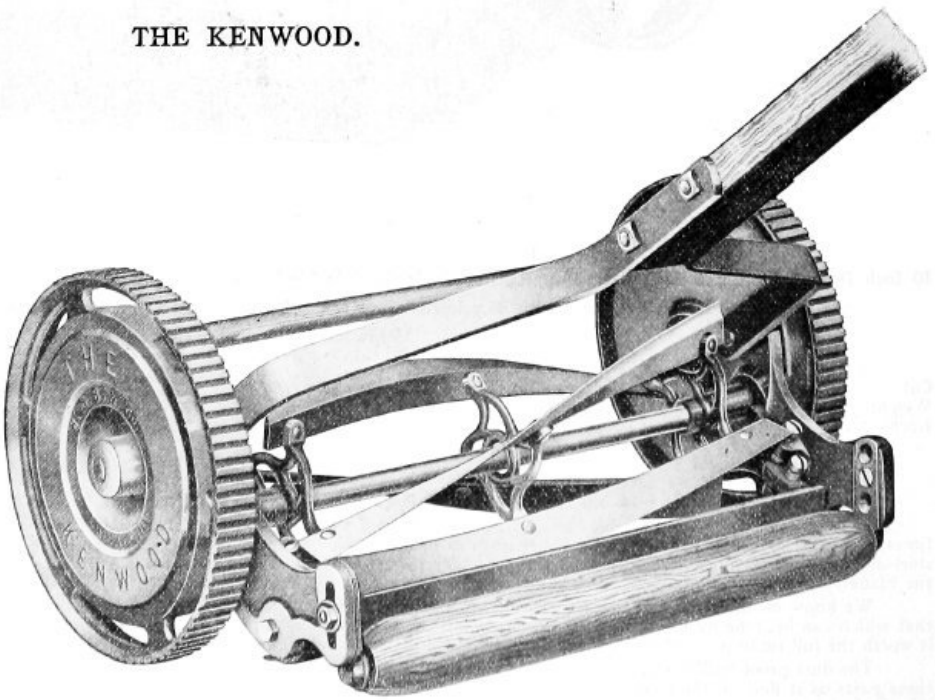
ONE IN A CASE.

THE KENWOOD.

The Kenwood is a carefully made machine with parts accurately fitted.

The reel spiders are malleable iron, consequently can never break. They are rigidly attached to the steel shaft by drilling a hole through each hub and shafting and firmly riveting it in place, eliminating the possibility of working loose and getting out of position.

The blades are made with concave edges which allow the user to always keep a perfect cutting edge as the machine is reground and sharpened.



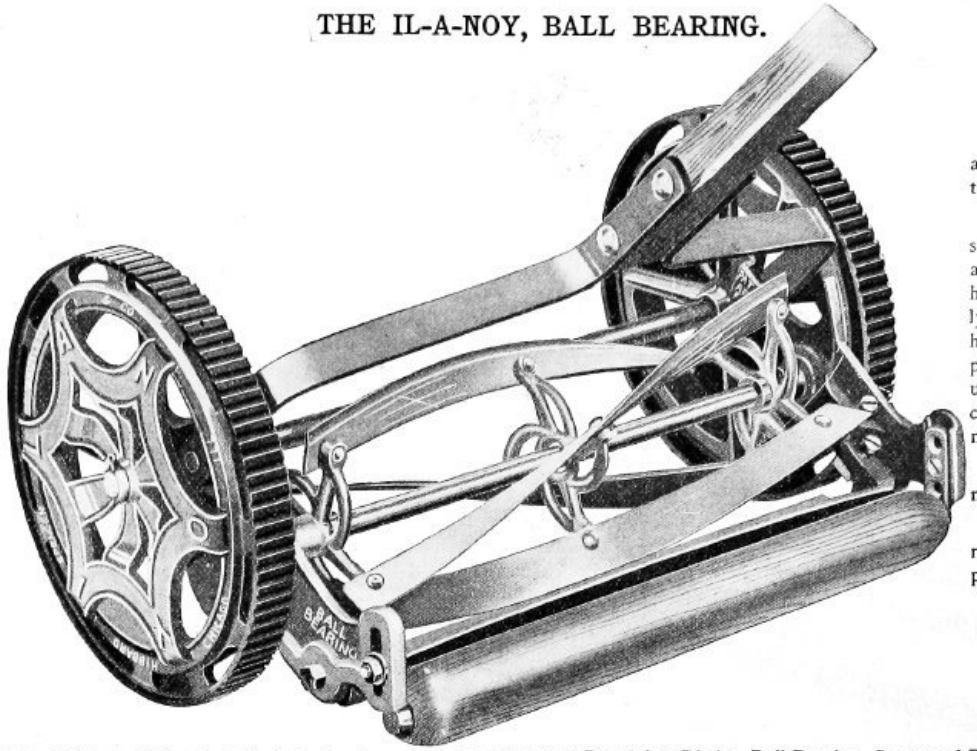
9 Inch Driving Wheels, 6 Inch Reel, Four Steel Revolving Blades, Plain Bearings, Reel Box Fitted with Brass Adjustment, Cutter Bar Screw Adjusted.

Cut	14	16	18 in.
Weight	41	43	45 lbs.
Each	$14.00	15.00	16.00

ONE IN A CASE.

H. S. B. & CO.'S LAWN MOWERS.

THE IL-A-NOY, BALL BEARING.



In the manufacture of the Ilanoy particular attention has been given to the quality of materials which compose its various parts.

The blades are made of a high quality of steel. The reel spiders are of malleable iron and attached to the steel shaft by drilling a hole through each hub and shafting and firmly riveting it in place. The cones are case-hardened and specially tempered by a secret process producing such a hard surface that unless the frame construction is intentionally changed the cone will never require adjustment.

It runs with perfect ease and is almost noiseless.

Decoration.—Wheels red and gold, gold reel and bar, green sides, striped in appropriate colors.

10 Inch Driving Wheels, 6 Inch Reels, Four High Quality Steel Revolving Blades, Ball Bearing, Cones and Ball Cases Case Hardened and Ground, Malleable Iron Reel Spiders, Screw Adjusted Cutter Bar, 5/8 in. Cross Rod, Hardwood Roller and Handle.

Cut	14	16	18	20 in.
Weight	47	49	51	53 lbs.
Each	$18.00	19.00	20.00	21.00

ONE IN A CASE

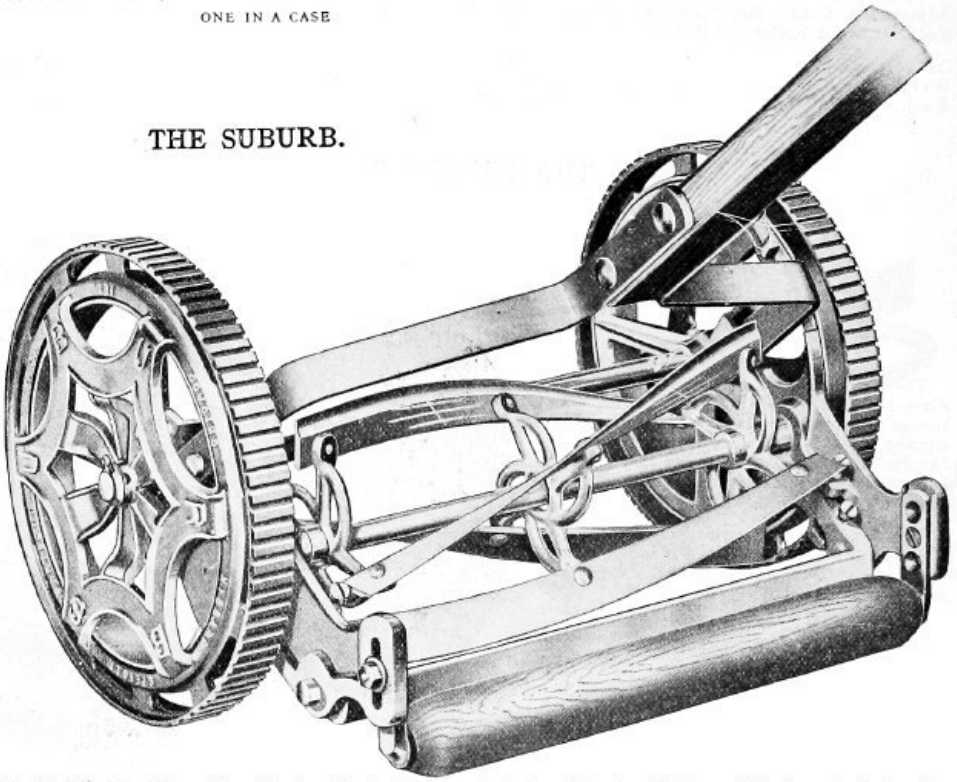
THE SUBURB.

The Suburb though not a ball bearing machine is a well made mower in every particular. All parts are accurately fitted and adjusted.

The blades are of high quality steel with concave edges which allow the user to preserve a perfect cutting edge if the mower is reground or sharpened.

The reel spiders and roller brackets are made of malleable iron, preventing the possibility of breakage. The roller is made with a gudgeon entering the roller 2½ in. instead of an iron pin driven into the roller. This prevents splitting of the roller and runs without noise.

Decoration—Gold wheels, aluminum frame and reel.



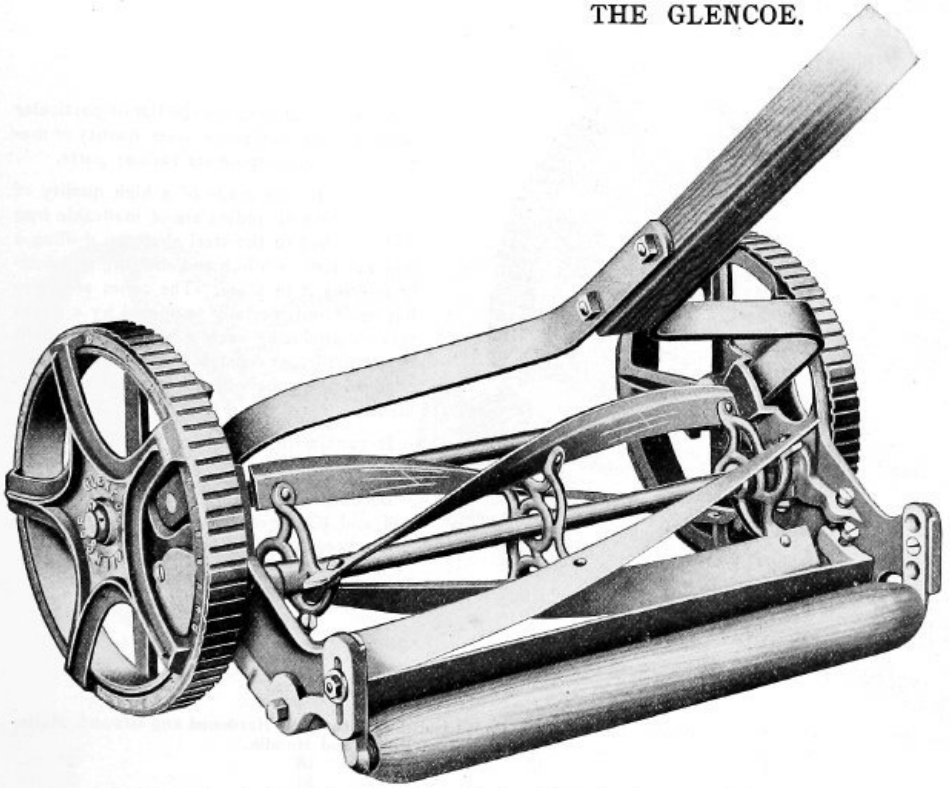
10 Inch Driving Wheels, 6 Inch Reels, Four High Quality Steel Revolving Blades, Plain Bearing, Reel Box Fitted with Brass Adjustment, Cutter Bar Screw Adjustment, 5/8 Inch Cross Rod, Hardwood Roller and Handle.

Cut	14	16	18 in.
Weight	47	49	54 lbs.
Each	$16.00	17.00	18.00

ONE IN A CASE.

H. S. B. & CO.'S LAWN MOWERS.

THE GLENCOE.



The Glencoe is a carefully constructed mower in every way. The blades are made of a high grade steel. The reel spiders and roller brackets are made of malleable iron which eliminates the possibility of breakage at these points.

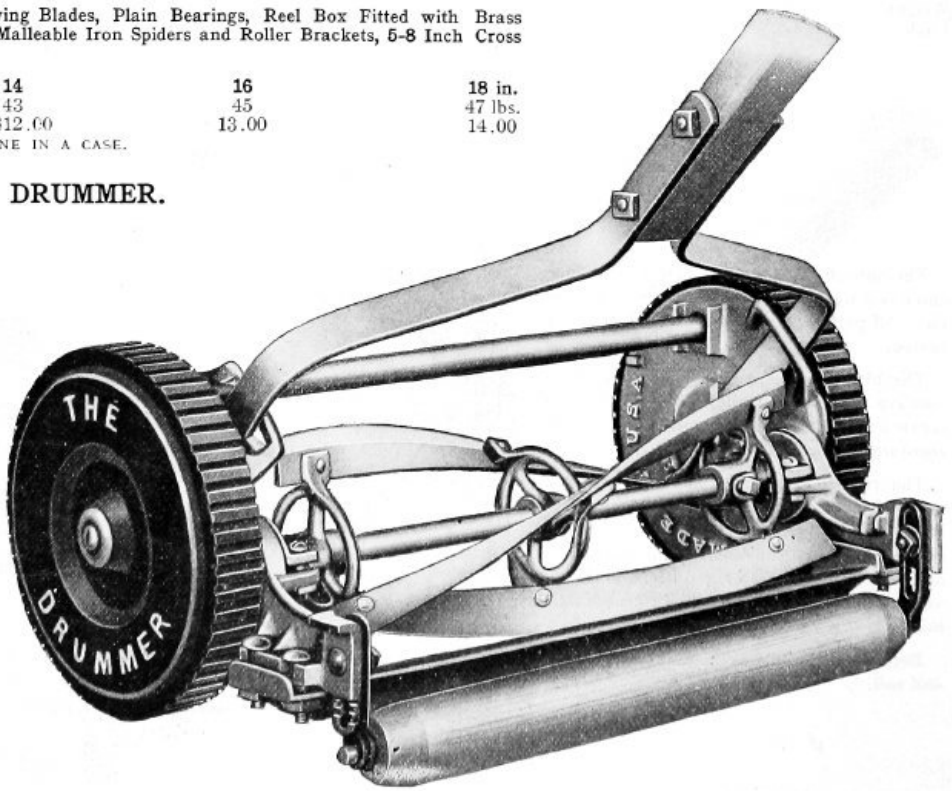
The adjusting screws are operated from the top and against a finger extending from the main body of the bar, thus making it impossible to spring the bar in the operation of adjusting and makes it unnecessary to turn the mower upside down.

9 Inch Driving Wheels, Four Steel Revolving Blades, Plain Bearings, Reel Box Fitted with Brass Adjustment, Cutter Bar Screw Adjustment, Malleable Iron Spiders and Roller Brackets, 5-8 Inch Cross Rod, Hardwood Roller and Handle.

Cut	14	16	18 in.
Weight	43	45	47 lbs.
Each	$12.00	13.00	14.00

ONE IN A CASE.

THE DRUMMER.



The cross rod in the Drummer is 5/8 in. in diameter, cold rolled shafting, with the ends turned down to 1/2 in., with a square shoulder coming against a machined surface or boss on the disc. This cross rod is threaded on each end so that the discs are held rigidly in position with a nut on each end.

The roller is made with a gudgeon entering the roller 2 1/4 in. instead of an iron pin driven in. This prevents the danger of splitting the roller.

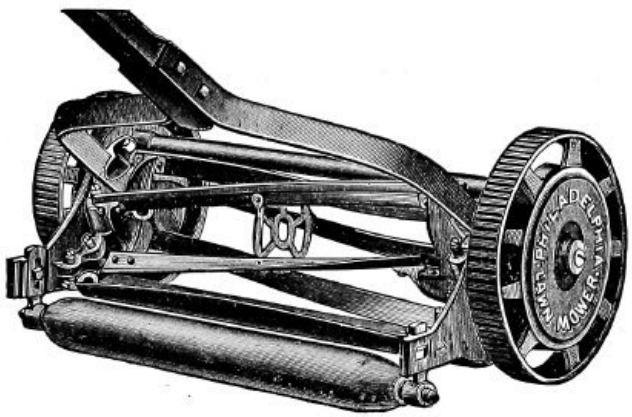
9 Inch Driving Wheels, Three Steel Revolving Blades, Adjustable Cap on Reel Shaft for Taking Up Wear, Malleable Iron Spiders and Roller Brackets, 5-8 Inch Cross Rod, Hardwood Roller and Handle.

Cut	12	14	16	18 in
Weight	40	42	44	46 lbs.
Each	$10.00	10.25	10.50	11.00

ONE IN A CASE.

LAWN MOWERS.

PHILADELPHIA STYLE "K," HIGH WHEEL.

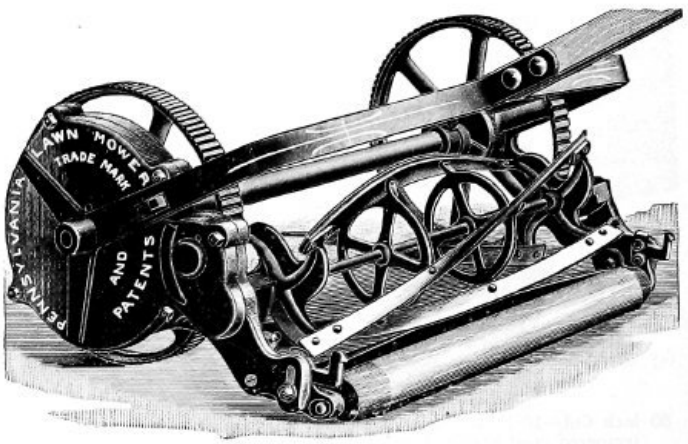


10-Inch Driving Wheels, Five Blades, Open Cylinder, Hardwood Roller and Handle.

Cut	14	16	18 in.
Weight	65	68	73 lbs.
Each	$20.00	22.00	24.00

ONE IN A CASE.

PENNSYLVANIA HIGH WHEEL.

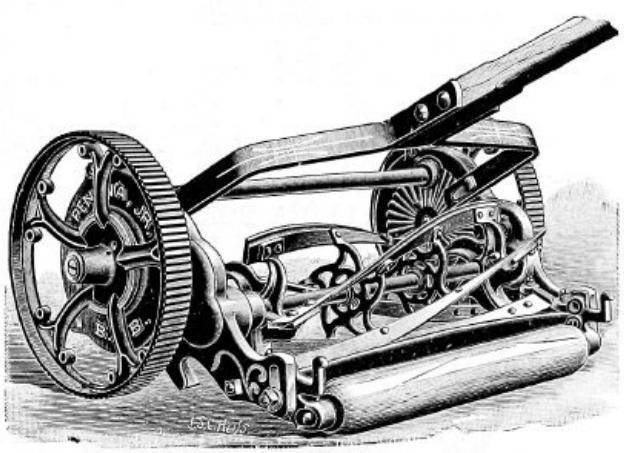


10-Inch Driving Wheels, Four Cast Steel Cutting Blades, 6½-Inch Reel, Hardwood Roller and Handle.

Cut	15	17	19	21 in.
Weight	75	77	81	92 lbs
Each	$25.00	28.00	31.00	34.00

ONE IN A CASE.

PENNSYLVANIA JUNIOR BALL BEARING.



10-Inch Driving Wheels, Five Tempered Crucible Steel Blades, Self-Sharpening Dead Knife, Ball Bearing, Cylinder Journals, 6-Inch Cylinder, Train of Gears each Side, Hardwood Roller and Handle.

Cut	15	17	19	21 in.
Weight	71	74	77	80 lbs.
Each	$25.00	28.00	31.00	34.00

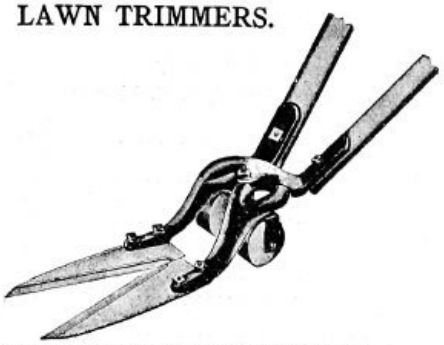
LAWN TRIMMERS, GRASS COLLECTORS, ETC.

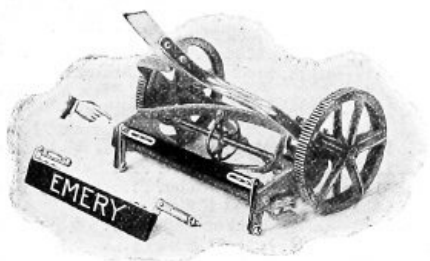
LAWN TRIMMERS.



No. 2—PIERCE IMPROVED, malleable iron castings, shears of best quality steel, ball bearing, w't per doz. 75 lbs., per dozen..... $30.00

ONE-QUARTER DOZEN IN A BOX.

LAWN MOWER SHARPENERS.

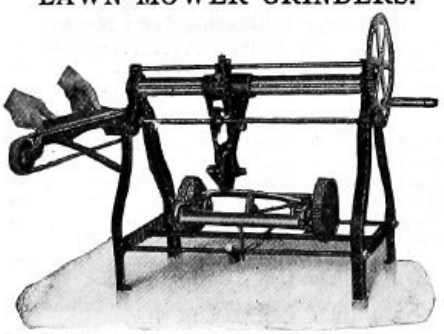


No. 16—SCIENTIFIC, hardwood body coated with emery, with two braces or arms to attach to machine; in 14, 16 and 18 in. lengths, average w't per doz. 10½ lbs., ... per dozen $10.00

These sharpeners represent a scientific sharpening of lawn mower knives, inasmuch as the sharpening bar makes it impossible to grind the knives anyway but squarely and of the absolutely correct bevel. Can be used on any make of lawn mowers.

HALF DOZEN IN A BOX.

LAWN MOWER GRINDERS.

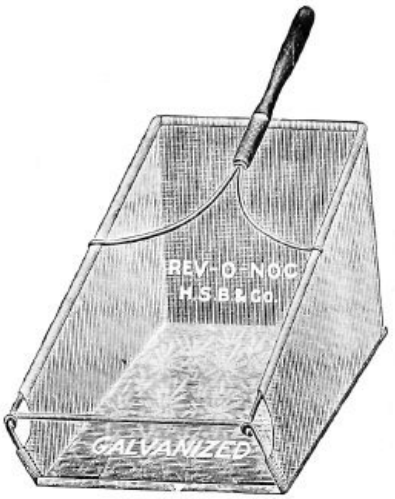


No. 5—JACKSON, black japanned cast iron frame, height 27 in., length 39 in., width 17 in., grinding wheel support is carried on a machined iron shaft of 2½ in. diam., grinder carriage very wide, adjustable bearings, moving belt is furnished heavily coated with carborundum grains which is used to sharpen the bottom plate, w't 100 lbs....each $40.00

The grinding wheel support is five times the size used by other makes. No vibrating or bending of shaft. Therefore there is no wavy or irregular ground reel.

The Jackson sharpens the bottom plate perfectly true. The cut indicates how this work is done. A moving belt being coated with carborundum grains quickly takes out all unevenness in the plate. If only the reel of a lawn mower is sharpened, the mower is only half sharpened. This grinder sharpens all hand lawn mower reels either right or left hand clear to the end. Other makes you must finish the end with a file.

GRASS COLLECTORS.

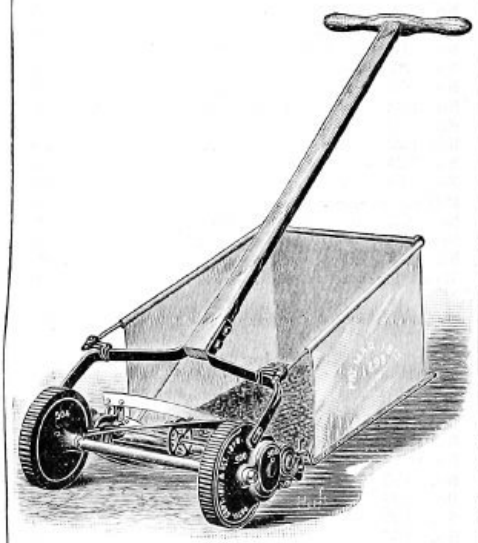


REVONOC Galvanized Iron Bottom, Flexible Canvas Sides, Supported in Hook from Handle, for any Mower.

No. 8 REVONOC—12 to 16 in., w't 5½ lbs., per dozen..... $20.00

No. 10 REVONOC—16 to 21 in., w't 6½ lbs., per dozen..... 24.00

The handle is hung in a screw hook fastened in the handle of the mower. The bottom is hung on two hooks attached to the mower, thereby making it possible to detach the catcher without any trouble by simply lifting it from the hooks. The handle being fastened this way makes it impossible to drag on the ground when filled. It needs no adjustment.



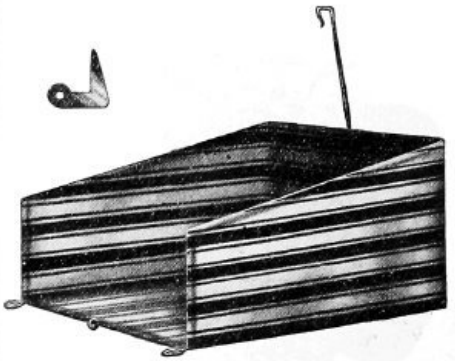
Braun's, Galvanized Iron Bottom, Flexible Canvas Sides, Supported on Truss Rods, for High Wheel Mowers.

Width....	15	17	19	21 in.
Weight...	6	6½	7	7 lbs.
Per dozen.	$22.80	24.00	25.00	27.00

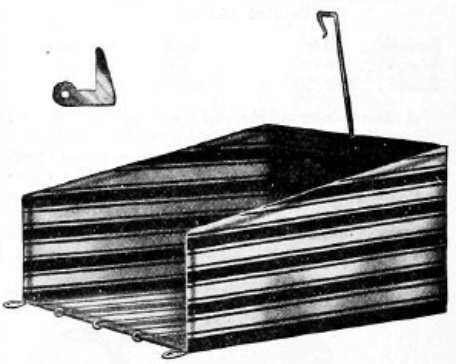
This catcher is supported on truss rods which give strength and firmness, and permit its being folded flat; can be attached or detached in a moment with one motion; can be dumped forward without detaching. The bottom will not sag nor drag on the ground when filled.

HALF DOZEN IN A CRATE.

GRASS COLLECTORS.

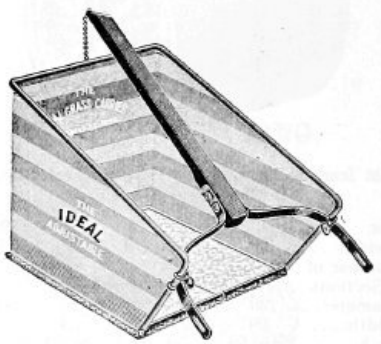


No. 3—MARICOPA, height in front 5 in., in back 9 in., width 18 in., adjustable for 12 to 16 in. mowers, heavy wire frame with one stay wire on under side, blue and white canvas bag, w't per doz. 14 lbs..... per dozen $9.00



No. 1 REVONOC—Height in front 8 in., in back 13 in., width 18 in., adjustable for 12 to 16 in. mowers, heavy wire frame with three stay wires on under side, blue and white canvas bag, w't per doz. 18½ lbs..... per dozen $10.00

No. 2 REVONOC—Height in front 8½ in., in back 13 in., width 23½ in., adjustable for 18 to 21 in. mowers, otherwise same as No. 1, w't per doz. 21½ lbs..... per dozen 12.00



Ideal, Galvanized Iron Bottom, Canvas Bag, Two Malleable Iron Clamps.

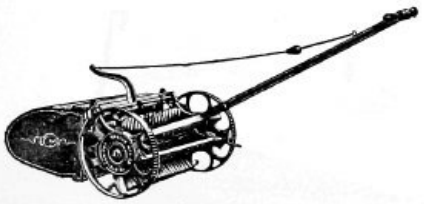
No. 4—Adjustable for 14 to 18 in. mowers, length 20 in., w't per doz. 48 lbs., per dozen..... $18.00

No. 5—Adjustable for 18 to 21 in. mowers, length 25 in., w't per doz. 57 lbs., per dozen..... 20.00

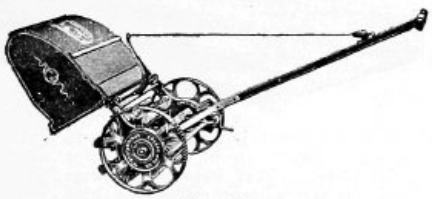
Extra Clamps, for Nos. 4 and 5, w't per doz. 1⅔ lbs..... per dozen 2.50

GRASS SWEEPERS, AND LAWN MOWER PARTS.

GRASS SWEEPERS.



Sweeping.



Dumping.

Apollo, 15 Inch Malleable Iron Driving Wheels, Enameled Aluminum Bronze, Grass Pan Painted Vermilion.

Sweeps...	20★	24★	28★ in.
Weight..	65	70	75 lbs.
Each....	$12.50	13.75	15.00

A small lever at the right side of the machine allows the brush-reel to be adjusted to any desired height and takes up wear. The reel is hung on links in such a manner that it may rise automatically to pass over a large stone or obstruction without injury. The brush-heads will wear for years and are easily and cheaply replaced if worn out or broken.

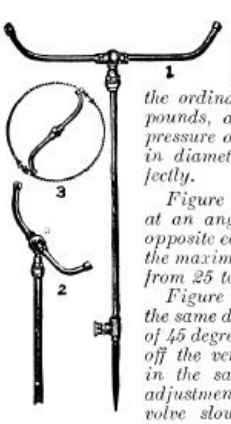
No. 22.

No. 21—COLUMBIA, polished brass head and arms, ground bearings, japanned frame, for ¾ in. hose, w't per doz. 35 lbs.....per dozen $20.00

No. 22—CYCLONE, with sled, otherwise same as No. 21 Columbia, w't per doz. 47 lbs.....per dozen 20.00

Adapted to any pressure and will throw a fine misty spray which will not injure the most delicate flowers.
ONE IN A CARTON, ONE DOZEN IN A CASE.



The sprinkler arms can be adjusted to cover a space from 6 feet to 50 feet in diameter with the ordinary city pressure of 30 pounds, and with the minimum pressure of 15 pounds, thirty feet in diameter can be covered perfectly.

Figure 1 shows the arms set at an angle of about 45 degrees opposite each other, which gives it the maximum speed and will cover from 25 to 30 feet in diameter.

Figure 2 shows the arms set in the same direction, one at an angle of 45 degrees, and the other slightly off the vertical position pointing in the same direction. In this adjustment the sprinkler will revolve slowly but will cover the maximum amount of space.

Figure 3 shows the direction in which the sprinkler should be operated.

No. 234—FISHER, nickel plated brass arms and head, steel tube or shank painted black, height from ground 23 in., length over all 29 in., w't per doz. 36 lbs..... per dozen $42.00
LOOSE.

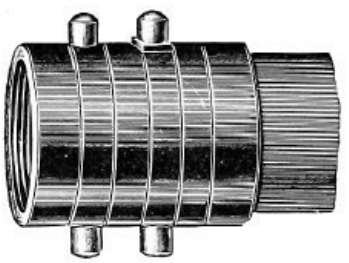
AUTOMATIC COUPLINGS.



For Coupling Mill Hose With Automatic Couplings.

Inches.....	**1¼**	**1½**	**2**	**2½**
Extra per 50 ft. length	$2.00	2.75	3.25	3.50

These couplings are a trifle lighter than the regular fire hose couplings but for mill and kindred uses give entire satisfaction.

In ordering hose pipe couplings unless for iron pipe or hose pipe thread, exact measurements and thread must be furnished. It is always better to send sample of hose as different makes of hose vary a great deal.

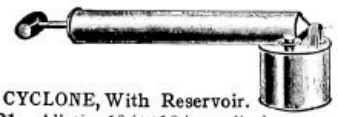
SPRAYERS AND DRY POWDER DUSTERS.

SPRAY PUMPS.



CYCLONE, With Reservoir.

No. 21—All tin, 1¾×18 in. cylinder, capacity of tank 1 qt., w't per doz. 21 lbs., per dozen..... $ 7.00

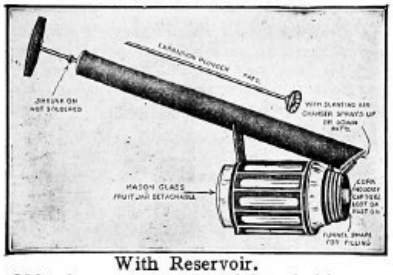
No. 04—All brass, otherwise same as No. 1, w't per doz. 24 lbs.....per dozen 14.00

ONE DOZEN IN A CRATE.

With Reservoir.

No. 02—LIGHTNING, heavy tin, beveled air chamber 2×15 in., throwing spray at an angle, capacity about 1 qt., w't per doz. 20 lbs.....per dozen $7.50

ONE DOZEN IN A CRATE.



With Reservoir.

No. 020—LIGHTNING, encased detachable glass reservoir (Mason fruit jar pattern), air chamber 2⅛×14½ in., painted red, w't per doz. 38 lbs., per dozen..... $11.50

This sprayer is provided with a beveled air chamber which throws the spray at an angle, making it useful for spraying downward or upward, by simply turning the sprayer over. It also has a patent spring expander which keeps the leather open and prevents it from drying up. It is useful for spraying plants and trees and keeping flies from horses and cattle.

ONE DOZEN IN A CRATE.

This sprayer gives a continuously uniform pressure. One stroke of the pump for each 15 or 20 hills of potatoes. The tank can be filled to its full capacity yet the pressure is uniform. The nozzle throws a solid cone spray which covers the whole plant instantly.

With Brass Air Reservoir.

No. 201—NEW BRANT, 3 gal. heavily galvanized sheet steel tank with concave body rest and wide web shoulder strap, double coated IX tin pump with check valve, complete with single nozzle and funnel, w't per doz. 122 lbs., per dozen..... $92.00

No. 202—With shut-off nozzle, otherwise same as No. 201.....per dozen 100.00

No 203—Brass tank, shut-off nozzle, otherwise same as No. 201.per dozen 123.00

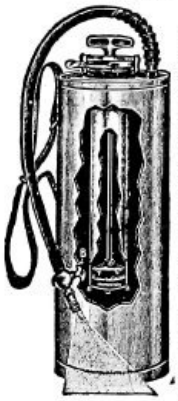
Extra Parts for the Above.

Double Nozzles.....per dozen		$30.00
Tree Nozzles.....	"	30.00
No. 2 Caps.....	"	6.00

The tubes for hose are secured with an extra brace and solid brass filling plug. With the double nozzle two rows can be sprayed at once, the variation in width being regulated by raising or lowering the pump. The tree nozzle is designed especially for high spraying, while the No. 2 caps are made for bordeaux mixture and whitewash.

HALF DOZEN IN A CRATE.

SPRAY PUMPS.



The "Auto-Spray" has a self-contained or inside brass air pump. By this arrangement the pump cannot be damaged. In this way, also, the air check valve is exposed and may be instantly removed or cleaned. The pump cylinder is extra heavy brass, and all parts of the sprayer are equally strong. The plunger rod is ⅜-in. steel, strong enough to stand all strain without bending. All cast parts are malleable.

This sprayer has ½-in. three-ply hose of extra quality and permits large discharge ports, obviating back pressure and giving full force to the spray. The pump is fastened to the tank by a cam which gives direct and equalized pressure upon a heavy pure rubber gasket, making the joint absolutely air tight and one which will never leak, even under pressure.

The "Auto Pop" instantly and effectively controls the spray and automatically cleans the nozzle. The lever control permits use without fatigue.

"Auto-Pop."

"AUTO-SPRAY" With Reservoir.

No. 1A—Brass, equipped with stop cock device for regulating spray, w't per doz. 168 lbs.....per dozen $90.00

No. 1B—Equipped with "Auto-Pop," otherwise same as No. 1C, w't per doz. 186 lbs.....per dozen 102.00

No. 1C—Galvanized, with stop cock device for regulating spray, w't per doz. 180 lbs.....per dozen 60.00

No. 1D—Equipped with "Auto-Pop," otherwise same as No. 1C, w't per doz. 192 lbs.....per dozen 72.00

Extra Parts for the Above.

Brass extension pipe, 2 ft.....each		$0.75
Brass elbows.....	"	.75
Strainers.....	"	2.00

For Bucket.

No. 100—DAISY, lacquered tin, wood handle, flexible spout, with detachable sprayer, height 36 in., 2 in. cylinder, 10 in. stroke, w't per doz. 18 lbs., per dozen..... $12.00

TWO DOZEN IN A CASE.

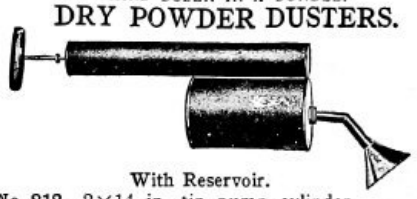
SPRAY PUMPS.

For Bucket.

No. 327½—LITTLE GIANT, 2 brass cylinders 1⅛ in. in diameter, 18 in. stroke, cast brass base, malleable foot rest, complete with hose and combination fine, course spray and solid stream nozzle. Large air chamber, continuous stream, pumps on downward stroke. 50 to 100 lbs. pressure, has agitator for mixing spraying solution, w't per doz. 72 lbs.....per dozen $66.00

ONE-THIRD DOZEN IN A BUNDLE.

DRY POWDER DUSTERS.

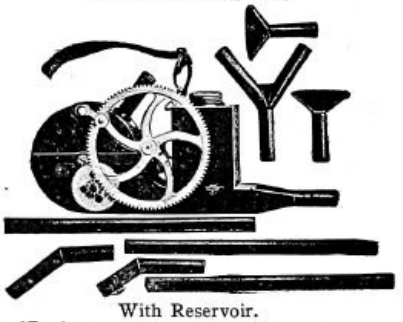


With Reservoir.

No. 212—2×14 in. tin pump cylinder, 6¾×4 in. tin tank, length over all 23¼ in., wood grip on piston rod, spout is of the screw-off pattern, all parts painted red, w't per doz. 25 lbs., per dozen..... $12.00

These dusters are adapted for killing insects, etc., on plants and animals, and can be used in either a vertical or horizontal position.

ONE DOZEN IN A BOX.



With Reservoir.

No. 17—LIGHTNING, consists of one 1 qt. reservoir, three 16 in. tubes, two 4 in. nozzles, one 8×6¼ in. Y connection, two 7¼ in. elbows, and one carrying strap with a snap at each end, w't per doz. complete, 120 lbs..per dozen $144.00

The "Lightning" duster is far advanced over the old style cylinder pump arrangement. The gears are machine cut. It is made with gear wheels and no belt, and will spray anything in dry powder form.

The reservoir holds 1 quart of powder or 4 pounds of paris green. Provided with an agitator which produces a constant flow of powder which is blown out by the fan, also a gauge for regulating the amount of powder to be used. The duster will cover two rows at a time and may be adjusted for any width of row. Tubes may be connected for spraying trees, etc. Will kill insects, etc., not affected by a liquid spray.

ONE IN A CASE.

SEED SOWERS, CORN DRYERS AND SHELLERS.

SEED SOWERS.

"REV-O-NOC."

No. 14 REVONOC—heavy duck hopper, ball bearing, 27 gauge iron fan wings riveted to solid cast base, malleable iron fly wheel and crank, w't per doz. 65 lbs.....per dozen $24.00

Will sow wheat, rye, oats, rice, flax, millet, turnip seed, clover seed, grass seed, in fact all kinds of seed, broadcast, also plaster, fertilizer, salt, ashes, etc.

ONE IN BOX, ONE DOZEN IN A CRATE.

No. 12—LITTLE WONDER, heavy duck hopper, capacity half bushel, heavy sheet steel feed plate and agitating device, with spring steel adjustments, w't per doz. 50 lbs.....per dozen $20.00

Simple, strong and practical. Especially recommended for grass seed.

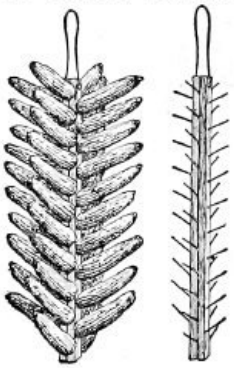
No. 10—LIGHTNING, large canvas bag, with straps to go over shoulders, tin tube in three sections, of a graduating diam., length 22 in., the larger end fits into a stub joint which is securely fastened to the bag and in which is a gauge to regulate the quantity of seed sown to a certain area, w't per doz. 9 lbs.....per dozen $16.00

Will sow sixty acres of clover, timothy, millet, etc. per day, spreading the seed evenly from 30 to 40 feet. The wind has no chance to blow seed into bunches before it strikes the ground.

FODDER SQUEEZERS.

No. 4—BLAIR'S, malleable iron frame and pin, with gray iron wheel, w't per doz. 7 lbs.....per dozen $4.50

SEED CORN DRYERS.



Loaded. Unloaded.

No. 25—WENZELMAN'S, 3 ft. wood upright with wire hanger and stiff but light galvanized steel wire pegs for holding 44 ears of corn; in set of 14 uprights for holding seed to cover 40 acres, w't per doz. sets 16 lbs.,★ per dozen sets.....$28.00

The pegs are far enough apart so that the ears do not touch, thus assuring perfect air circulation.

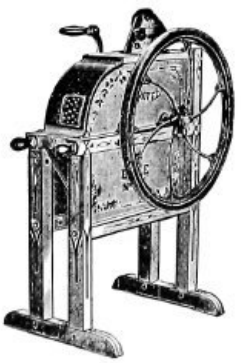
★*For factory shipment only.*

ROPE CLAMPS.

No. 1—WERUM'S, malleable iron, japanned, w't per doz. 2½ lbs. per dozen $1.40

ONE DOZEN IN A BOX.

CORN SHELLERS.



EAGLE, Hardwood Frame, Painted, Striped and Varnished, Heavy Wrought Spoke Balance Wheel, Light Running Inside Gearing, and Adjustable Spring to Receive and Shell any Size Ear of Corn, Height 3½ ft., Length 2½ ft., Width 1 ft. 7 in., 26 in. Fly Wheel.

No. 3 —*Without* fan or feed-table, w't each 131 lbs .....per dozen $132.00

No. 3T —*Without* fan, *with* feed table, w't each 139 lbs.....per dozen 138.00

No. 3F —*With* fan, *without* feed table, w't each 138 lbs..... per dozen 138.00

No. 3FT—*With* fan and feed table, w't each 166 lbs. .....per dozen 144.00

ONE IN A CRATE. PART K. D.

CORN SHELLERS.

No. 10—PLYMOUTH ROCK, 10 in. sheller disc or wheel with projecting teeth, spring hopper, adjustable for different sizes of ears, malleable iron frame, disc, crank, etc., heavy steel hopper spring, long axle bearing and hook, 7 in. crank with wood grip, complete with popcorn attachment, w't per doz. 150 lbs.....per dozen $16.00

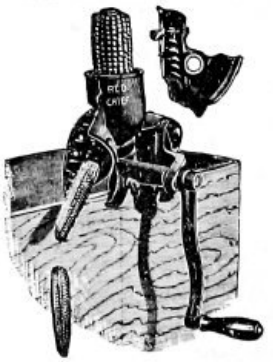
The tension of the hopper spring allows the hopper to expand and contract according to the size of the ear. At the outlet of the hopper a flange holds the ear close to the shelling disc or wheel, thus assuring a thorough shelling of the ear.

HALF DOZEN IN A CRATE.

No. 1903—BLACKHAWK, 8¼ in. sheller wheel or disc, with spur teeth, long chilled iron bearings, adjustable hopper spring, sure regulating device, will shell all sizes of ears, fastens to side of box or bin by means of two clamps with winged nuts, w't per doz. 228 lbs.,★.....per dozen $40.00

★*Factory shipment only.*

HALF DOZEN IN A BARREL.

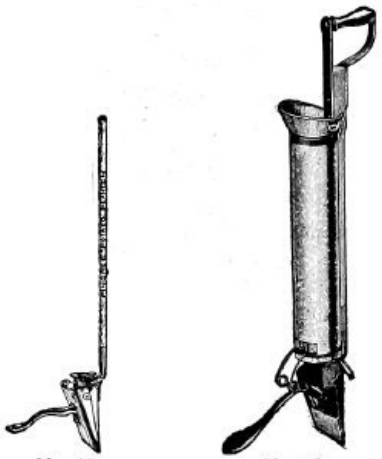


No. 12—RED CHIEF, 7¼ in. sheller wheel or disc, with projecting teeth, malleable iron frame and hopper, 9½ in. crank, with wood grip, cold rolled steel axle with long bearing, hopper is adjustable to any size ear, fastens to side of box or bin by means of two clamps, w't per doz. 138 lbs.....per dozen $40.00

HALF DOZEN IN A CRATE.

POTATO PLANTERS AND BONE CUTTERS.

POTATO PLANTERS.



No. 16. No. 18.

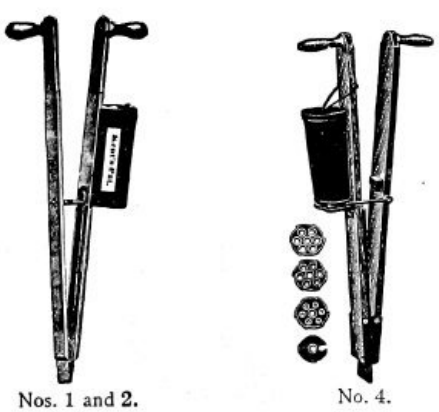
No. 16—PINGREE, spring steel self-locking jaws, adjustable malleable iron depth gauge and socket, hard maple handle, height 42 in., w't per doz. 36 lbs.....per dozen $10.50

No. 18—ACME TUBULAR, spring steel self-locking jaws, with foot rest on both sides, comfortable wood hand hold, galvanized steel conveying tube fastened to the stick handle, which is of hard wood, height 36 in., w't per doz. 72 lbs.....per dozen 18.00

The jaws lock automatically when planter is raised, unlocking again the instant they touch the ground.

NO. 16, ONE DOZEN; NO. 18, HALF DOZEN IN A CRATE.

CORN PLANTERS.



Nos. 1 and 2. No. 4.

No. 1—TRIUMPH, wood frame, steel jaws, heavy tin hopper and conveying tube, wood grips securely bolted, height 34 in., w't per doz. 63 lbs., per dozen..... $12.00

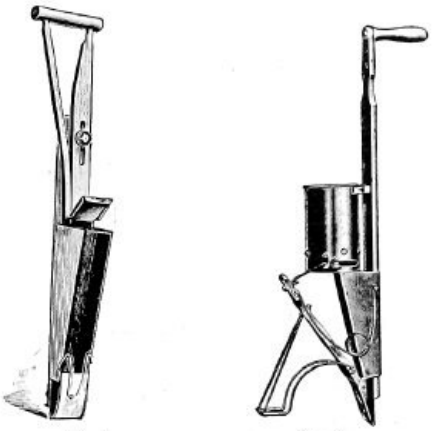
No. 4—IMPROVED ECLIPSE, hardwood frame, varnished, heavy steel jaws, securely riveted to frame, 4 iron discs, for different feeds, one for broom corn and the others for corn, with perforations in each to drop 1, 2 and 3 grains each according to the number of holes, sheet steel hopper, height 34 in., w't per doz. 72 lbs..per dozen 16.00

HALF DOZEN IN A CRATE.

CORN PLANTERS.



No. 6. No. 3.

No. 6—MONITOR, heavy wood frame, sheet steel hopper, with heavy iron plunger tongue, adjustable for all sizes of corn or beans, plunger parts of heavy iron, height 30 in., w't per doz. 60 lbs.....per dozen $16.00

No. 3—AMERICAN STANDARD, automatic, hardwood frame, heavy steel jaws, large sheet steel hopper, adjustable drop disc, brass spring cut-off, height 32 in., w't per doz. 80 lbs..per dozen 40.00

Any number and all sizes of kernels can be used with the No. 3 planter.

HALF DOZEN IN A CRATE.

GREEN BONE CUTTERS.

General Description.

The New Mann green bone cutters are made with a clear knowledge of their requirements, and every possible care is exercised in their manufacture, to produce bone cutters that will withstand hard usage and give entire satisfaction.

Cast iron frame, cylinder and balance or fly wheel painted black; automatic feed controlled by regulating screw; heavy crucible steel blades fitted to cutter by set screws, and can easily be removed for regrinding; fitted with knife holder and gauge for use in sharpening knives.

The above description applies to all bone cutters herein listed; the difference in each model being the size of the cylinder, the number of knives, whether with or without balance wheel and the bases or supports. All other differences are fully described under their respective illustrations.

No. 5C—MANN'S, cylinder 6 in. in diam., 4 in. deep, 13½ in. crank, cutter head 7½ in. in diam., four knives, height from table 18 in., screw to table, for flocks of 15 to 25 hens, w't 35 lbs. each $ 7.50

No. 5B—MANN'S, with balance wheel, otherwise same as No. 5C, w't 60 lbs., each..... 10.00

GREEN BONE CUTTERS.

No. 5BM—MANN'S, cylinder 6 in. in diam., 4 in. deep, with stand and balance wheel, four knives, cutter head 7½ in. in diam., w't 85 lbs.....each $15.00

This model is intended for flock of 15 to 25 hens, and will do excellent work.

No. 7—MANN'S, cylinder 7¼ in. in diam., 5¼ in. deep, strong iron stand with large table for box or pan, large open-hinged cylinder, heavy balance wheel with wood hand grip, gear guard, anti-clog device, 6 knives, w't 107 lbs.....each $25.50

Intended for flocks of 40 to 100 hens, can also be used for flocks up to 200 hens, but we recommend No. 9, for flocks of more than 100.

No. 9—Cylinder 9 in. in diam., 6 in. deep, square topped iron stand for box or pan, cross braced with two rods, open-hinged cylinder, heavy balance wheel with wood hand grip, gear guard, anti-clog device, 6 knives, w't 170 lbs. each $27.60

The No. 9 is adapted to flocks of 100 to 300 hens, the cylinder being larger gives greater holding capacity

CIDER MILLS, BONE CUTTERS, ETC.

DRY BONE, SHELL AND CORN MILLS.

No. 750—Height 17¼ in., base 6½×7½ in., diam. of hopper 3½ in., diam. of wheel 19 in., capacity 1½ bu. per hr., w't 60 lbs.....each $8.50

Malleable iron frame, hopper and fly wheel, base screws to table or platform. A good general mill for farmers and poultrymen. Especially adapted for grinding bones. WHEN DRY ONLY, oyster and other shells, corn, roots, bark, grain, chicken feed, salt, etc.

This machine is not intended for grinding green bones, as they have to be shaved and require a special machine.

ONE IN A CRATE.

GRIST MILLS.

No. 1—BAYLEY, height 8 in., heavy 18 in. balance or fly wheel, with wood grip, 5½×7¼ in. hopper, cast iron, base is made with holes to bolt or screw to table, machined bearings, cold drawn steel shaft, adjustable for grinding coarse or pulverizing corn, capacity 15 lbs. per hr. of fine, and 40 lbs. coarse meal, w't 22½ lbs.....each $4.00

No. 10—BLACK HAWK, 11 in. malleable iron crank, chilled bearings, hardened metal grinding burrs, all parts interchangeable 5×6½ in. hopper, base bolts to table or bench, w't 17 lbs. each $5.00

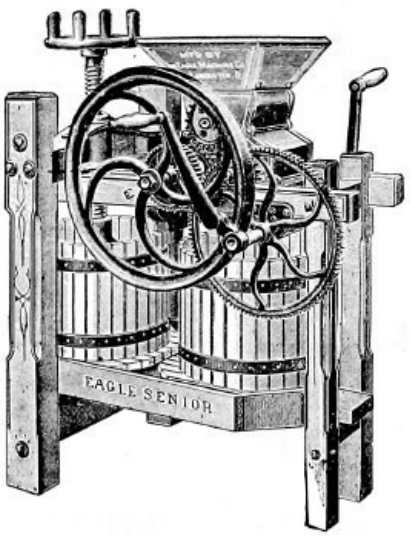
Will grind corn, wheat, rye, rice and other small grain. Easily adjusted for fine or coarse grinding.

ONE IN A CASE.

CIDER MILLS.

General Description.

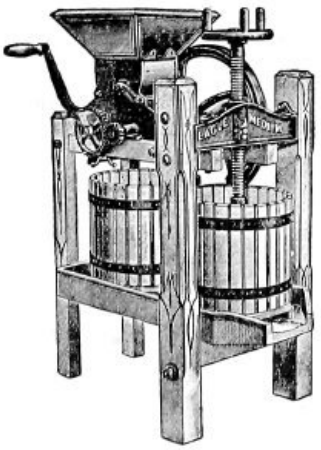
Varnished hardwood frame, securely bolted; removable hopper and lever; cast iron yoke, balance wheel and journals; steel press screw with cast iron socket and top wheel with hand grips; steel shaft; cast iron roll casing with one plain and two corrugated adjustable rolls; triple geared; cast iron crank with wood grip; two plain hardwood tubs with heavy staves riveted to wrought iron bands; hardwood trough, neatly painted, striped and varnished.



Capacity Six to Ten Barrels of Cider Per Day.

No. 3—SENIOR, 48 in. high, 19½×40¼ in. trough, 15½ in. tubs, 2×22 in. press screw, 40 in. lever, 13×15 in. hopper, floor space required 29×45 in., w't 420 lbs.....each $30.00

See general description at top of column.



Capacity, Three to Six Barrels of Cider Per Day.

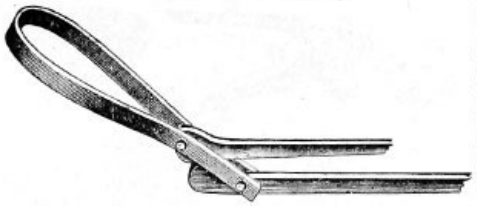
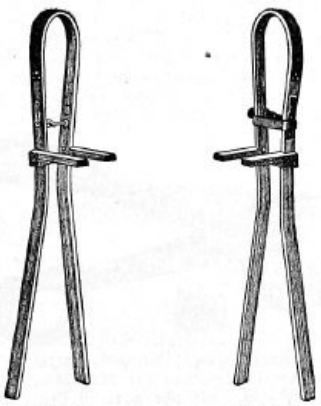
ANIMAL POKES, PICKET PINS, ETC.

ANIMAL POKES.



No. 7—Success, wood bow, varnished, w't per doz. 42 lbs.....per dozen $5.75



No. 41. No. 42.

SUNBURY, Ash or White Oak, Steel Band Over Top.

No. 41—With snap, w't per doz. 45 lbs. per dozen $9 00

No. 42—With strap, w't per doz. 48 lbs. per dozen 9.50

The steel band over the top prevents the wood from breaking or slivering at that point.

ACME, Heavy Steel Wire.

Nos	20	30
Size	8×16	9½×16 in.
W't per doz	25	32 lbs.
Per dozen	$9.00	9.00

Nos	40	50
Size	9¾×16	10¾×16½ in.
W't per doz.	33	35 lbs.
Per dozen	$9.00	12.00

The Acme animal poke, made of heavy steel wire, is a most effective and durable poke for breechy cattle. It fits the animal's neck and head perfectly, weighs less than 3 lbs. Made in four sizes: No. 20 for yearlings, No. 30 for medium, No. 40 for large cows, and No. 50 for bulls.

HALF DOZEN IN A BUNDLE.

ANIMAL POKES.

3-16 Inch Flat Steel, Riveted, Adjustable.

Nos	31	32	33
Size	9 to 12	13 to 16	17 to 20 in.
W't per doz..	26	28	36 lbs.
Per dozen...	$10.50	12.50	16.00

No inconvenience to any animal in normal position, but when an attempt is made to go through the fence it becomes particularly severe; as soon as the animal backs up, the resistance of the neck, like a spring, throws the poke back to its normal position. Can be used with equal success on mules and colts.

HALF DOZEN IN A BUNDLE.

No. 132—Cow Boy, 13 to 16 in., flat steel, riveted, adjustable, japanned, w't per doz. 34 lbs.....per dozen $11.00

The punishment consists of a malleable iron spur or rowel wheel which pricks the animal in the neck when attempting to go through or over the fence. It is constructed and shaped in such a manner that it does not interfere with the animal while feeding, drinking or lying down.

HOG TAMERS AND MARKERS.

Short's, malleable iron, japanned, reversible steel blade, 2 adjustable cutters, also circular knife, steel spring, length 10 in., w't per doz. 13 lbs....per dozen $15.00
Furnished with two blades: "T" blade for snout, and circular blade for ears and snout. The circular blade cuts across tip of nose with curve at each side and severing same in the middle, making two projections (about where two rings would be placed) heavy on the tips, their weight causing them to drop apart and heal quickly in that position, and leaving no loop to be torn off or hang over the nostrils. A great many marks can be made. HALF DOZEN IN A BOX

Miller's, malleable iron, japanned, 2 steel nose cutter blades, (no ear markers,) length 10½ in., w't per doz. 19 lbs., per dozen..... $15.00
This instrument not only cuts the hog's snout so as to deprive it of muscular side motion as well as the front root, but severs the cartilages and cuts the extremity of the snout, and as the snout heals, after the circular cutting of the muscles of the nose in such a manner that they curl outwardly on each side of the nose and form into lumps, and by so doing, prevent the animal from rooting to side or front. Any size hog can be operated upon with this instrument.
HALF DOZEN IN A BOX.

Ear Markers for Use in Connection with Miller's Hog Tamers.

ONE IN A BOX.

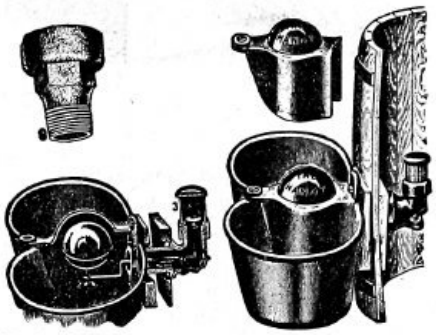
PIG AND LAMB FORCEPS.

Whisson's, improved, malleable iron, tinned, length 18 in., w't per doz. 20 lbs .....per dozen $12.00

ONE IN A BOX.

STOCK FOUNTAINS.



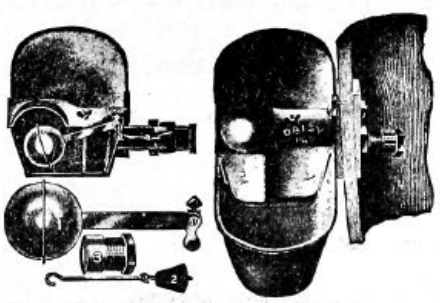
No. 8—HANDY, cast iron, japanned, w't 10½ lbs.....per dozen $28.00

Has a soft rubber button valve and a brass valve-seat that will not corrode or get rough. It has an extra long lever. The brass ball float can be screwed up or down to regulate the flow of water into the pan by simply taking off the cover of center division. The distance from the bottom of pipe hole where water enters pan to bottom of the pan is over 2 in.; this is where the mud settles; none can ever get back into the valve chamber. It is held to barrel or tank by 1 in. pipe nipple, equal to 1 in. bolt.

The construction of the Handy does away with the old method, clamping a thin piece of rubber for the valve-seat between two iron plates which squeeze the hole out of round so that the valve does not fit the hole.

HALF DOZEN IN A CRATE.

HOG WATERERS.

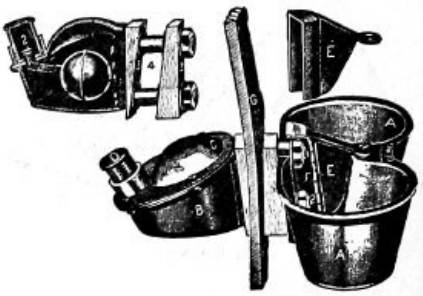


No. 5—DAISY, cast iron, japanned, working parts of brass, w't 12 lbs. per dozen $28.00

The Daisy is very easily attached, having but one ¾ in. pipe to be inserted into tank or barrel. The float chamber is a continuation of the cups and having a raised bottom it throws all mud, etc., into the cups. The cover is secured by a thumb nut and can be removed easily. The valve is a tapering, vulcanized rubber cork and can be adjusted, thus regulating the depth of water in the cups. The valve-seat is made of anti-rust babbitt metal which is forced into the end of the ¾ in. pipe, and then reamed out perfectly smooth so the rubber cork fits exactly. It is impossible for this valve to leak. All working parts are made of brass, and with the exception of the valve, are outside the tank or barrel. Can be attached to a pipe as well as a tank by using a ¾ in. coupling.

HALF DOZEN IN A CRATE.

STOCK FOUNTAINS.



AA—double drinking cup; B—valve and float chamber; C—top of chamber; D—screen cap; E—division or shield; F1—air inlet; F2—water outlet; G—represents barrel stave.
1—brass float; 2—valve; 3-3—wedges used in attaching to barrel; for tank use small wedge only and reverse ends; 4—barrel or tank space.

No. 4—IMPROVED DEWEY, cast iron, japanned, w't 20 lbs.....per dozen $28.00

The valve is on the inside of tank or barrel in the water and governed by water closet brass float which cannot rust, leak, freeze or allow mud to collect under it. It can be set for two pens. Will water from 150 to 300 hogs a day, also sheep, calves, and poultry.

No equipoise valve governed by weight of water in cup that a little mud will overbalance. No drinking cup swinging on a pivot to be rooted up and down by a "wise hog," making it necessary to fence in. No float or valve in drinking cup to freeze with first frost and pack with mud. No rubber hose to break and leak in a short time, no braces, no untried or impracticable principles.

HALF DOZEN IN A CRATE.

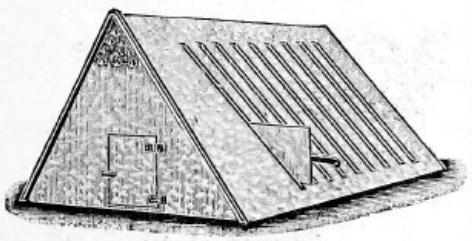
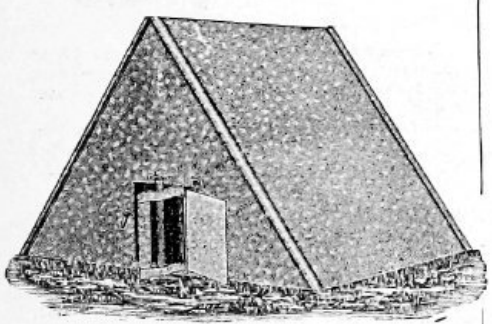
ONE IN A BOX.

BROOD COOPS, POULTRY FOUNTAINS, ETC.

BROOD COOPS.



With Runway.



Without Runway.

No. 4—HEN'S DELIGHT, length 3 ft., width 2 ft. 8 in., height 18 in., galvanized, removable bottom, with 18x28 in. runway, two front doors, a ½ in. mesh door and a storm door, w't per doz. 280 lbs. ★.....per dozen $36.00

No. 5—HEN'S DELIGHT, without runway otherwise same as No. 4, w't per doz. 180 lbs. ★.....per dozen 24.00

This coop is so built that it can be taken apart or set up in a few minutes, and can then be stored in shed or barn, using a minimum of space, a very desirable feature as there is no unsightly barnyard six months in a year. With reasonable care they should last for many years.

The brood division is 18x28 inches and has a galvanized bottom which can be taken out without taking coop apart. It has a door at the back where a person can take care of brood and otherwise clean nest, etc. At the front it has two doors, one a ½-inch mesh door for warm nights, the other a storm door to be used on cold or stormy nights. They are both raised or lowered by a simple device.

It is well ventilated at top with ventilating holes.

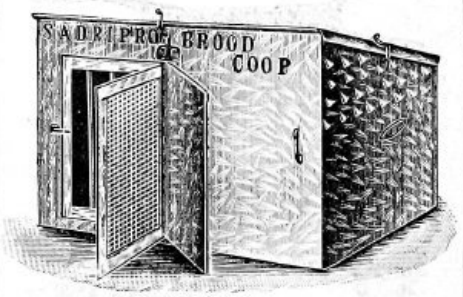
The RUNWAY is 18x28 inches and has no bottom except the earth, which gives the brood a chance for exercise and scratching. The slats are pressed out of the sheet in a U shape which makes them rigid and strong. To the front of the runway there is a slotted door by which means a person can let the chicks out and keep the hen in. There is also a provision made for the hen to leave with brood.

The hen can be set and left in coop until chicks are large enough to take care of themselves. It is absolutely rat, mink, weasel and vermin proof and is perfectly satisfactory in every respect.

HALF DOZEN IN A CRATE.

★*FOR FACTORY SHIPMENT ONLY.*

BROOD COOPS.



No. 6—SA-DRI-PRO, length 23 in., width 17½ in., height in front 16 in., height in back 12 in., galvanized iron, w't per doz. 180 lbs.....per dozen $24.00

The Sa-Dri-Pro Brood Coop will save the chicks you are losing every year by being kept in damp, unhealthy coops which are infected with disease germs, mites and lice, that are destroyed by rain, exposure, rats, weasels, minks and skunks. Your chicks are safe.

Fitted with three swinging doors, first door fitted with steel bars, retaining the hen and allowing chicks to pass in and out, second door is fitted with close-mesh galvanized netting and is used on hot nights to ventilate, at the same time making coop positively rat, weasel, mink and skunk proof; third door is solid galvanized steel and is used in cold or stormy weather. Ventilators are provided which admit fresh air at all times. Doors are held firmly in position by patent automatic spring latch.

Can be set up or knocked down in 15 seconds and easily moved from one place to another.

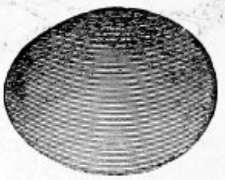
The sections are held together by sliding lock seams.

ONE DOZEN IN A CRATE.

HENS' NESTS.

No. 45—Steel wire, japanned, diameter 13 in., mesh 1½ in., w't per doz. 4 lbs.....per dozen $1.35

NEST EGGS.



No. 1—Opal glass, w't per doz. 10 oz., per dozen.....$0.50

POULTRY FOUNTAINS.

HENFRIEND, Best Galvanized Iron.

No. 3—4x4x6 in., for chicks, capacity ⅓ gal., w't per doz. 30 lbs..per dozen $ 5.00

No. 2—6x6x9 in., capacity 1¼ gals., w't per doz. 25 lbs.....per dozen 7.00

No. 1—8x8x12 in., capacity 2½ gals., w't per doz. 40 lbs.....per dozen 10.00

The Henfriend provides a shallow drinking trough with a reserve supply of water that comes down automatically as the fowls drink it out.

Cheap, practical and durable. The edges project beyond the flat surface of the body forming guards of three thicknesses of metal to take the wear all on the edges. They also hold the tank up from the ground to permit the circulation of air underneath which prevents it from rusting on the bottom.

A good many complaints of poultry can be cured by administering the medicine in their drinking water. The Henfriend is especially adapted for this, as by the action of the air in entering the top part of the fountain, it agitates the water and keeps the medicine mixed thoroughly with the water.

Will not drown chicks, is easy to fill and easy to clean. Keeps the water cool in summer and if filled with hot water in the morning it will not freeze during the day in cold weather.

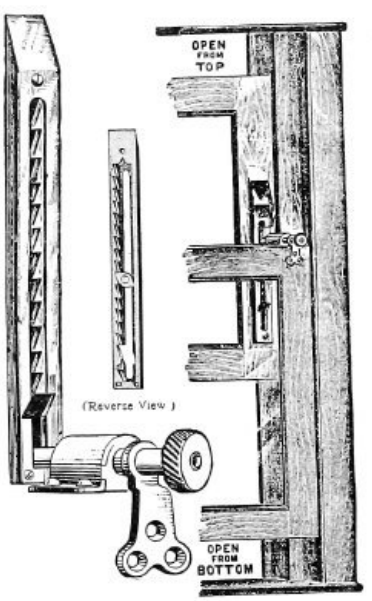
CLIMAX VENTILATING.



Cold Rolled Steel, Spring of Best Music Wire.

No. P111—Plain bronze plated, per dozen..... $6.00
No. OC111—Polished old copper plated, per dozen..... 6.00
No. DB111—Dull brass or lemon brass plated.....per dozen 6.00

The window can be opened from top or bottom or both by simply turning the knob to the right, at the same time being securely locked, though open. To close it, just shut down the sash; the lock does the rest. All rattling is prevented by turning the knob to the right as far as it will go, thus drawing both sashes tightly together.

The Climax requires no cutting of sashes and cannot be picked from the outside.

ONE DOZEN IN A CARTON. WEIGHT 4¾ LBS PER DOZEN.

SASH TRIMMING.

SASH WEIGHTS.

Iron sash weights, round, regular stock, 3 to 20 lbs.....per pound $0.03
Iron check weights, round, w't ½ lb., for increasing regular weights, per pound..... .06

ONE DOZEN IN A BOX, WITH SCREWS. AVERAGE WEIGHT 3 LBS. PER DOZEN.

PAYSON'S "SOLID GRIP" TRANSOM LIFTERS.

Center Hung.
(Pull down to open.)

Center Hung.
(Push up to open.)

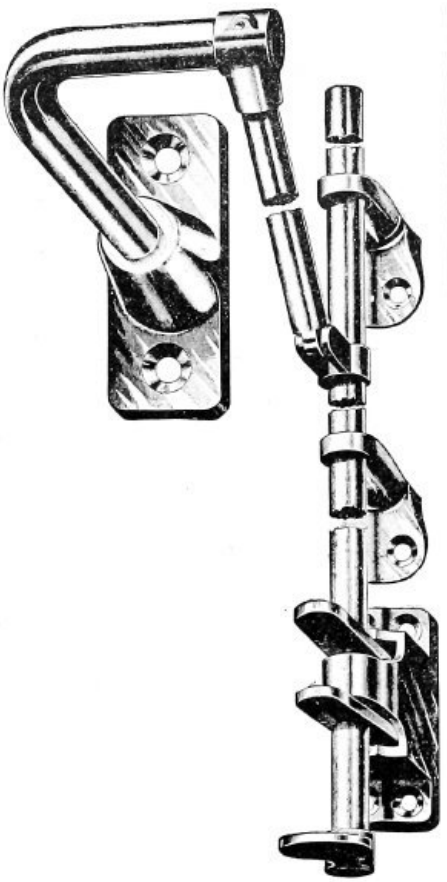
Top Hung.
(Push up to open.)

Special Class 4, Bottom Hung.
(Pull down to open.)

The above cuts show the four different positions in which transoms may be hung.

The "Solid Grip" lifter will lock instantly at any point, and is adapted for either top, bottom, or center hung transoms, but all bottom hung transoms should be hung with special class 4 lifters, and must be so hung when there is but small space above the transom. Transoms hinged at the bottom afford better protection against rain, draughts, storms and intruders. They can be screened easier and can be guarded with transom chains.

The Special Class 4 must be used for bottom hung transoms, where space overhead will not admit the using of regular lifter.



Bronzed Iron.

Nos.	303	304	314

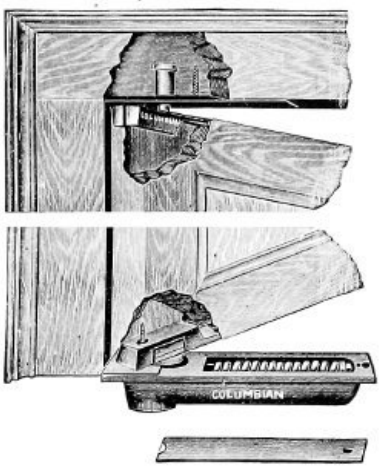
Nos.	352	354
Door, thickness	7/8 to 1 1/2	1 3/8 to 2 in.
W't per set	6 1/2	8 3/4 lbs.
Per set	$4.00	4.35

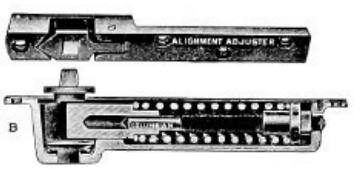
The tension is easily adjusted while hinge is in place. Raised ball bearings are near floor, giving easy movement, great durability and balanced power. Being elevated on center post and covered by hollow spindle, the ball bearing is protected from water, dirt and grit. Has broad top bearing plate, giving screws a good hold on flooring.

ONE SET IN A BOX WITH SCREWS AND WRENCH.

COLUMBIAN, BALL BEARING.



Showing Hinge Attached to Door.



Showing Floor Box.

Japanned.

Nos.	01	02
Door, thickness	7/8 to 1 1/2	1 3/8 to 2 in.

Nos.	2211	2212
Door, thickness	7/8 to 1 1/2	1 3/8 to 2 in.
W't per set	4 3/4	5 1/4 lbs.
Per set	$5.10	6.25

The Columbian Floor Spring Hinge will HOLD BACK AT AN ANGLE OF 90 DEGREES. To remove door swing open until th slot of top part is exposed as shown, then by inserting a knife blade, the loose top pivot may be raised and the door removed without taking off any part of the hinge or disturbing its tension.

The Floor Box is only 1 3/4 inches deep so that it may be set over an I beam or over a joist without cutting into it. To adjust tension of hinge for an unusually heavy or light door, remove top plate, turn the ratchet and the desired tension may be secured without removing door or hinge.

There are no side plates to disfigure the door and all parts which set in the door are invisible. The floor box is just the width of a strip of hardwood flooring and is covered when the door is closed.

Door, thickness	1 1/8 to 1 1/2	1 3/4 to 2 in.
W't per set	4 1/4	6 lbs.
Per set	$3.75	4.55

All the working parts of this hinge are set in the door. This is done by sawing out a square cut at bottom corner of door, no mortising required. When the hinge is in place, the door is then placed in upright position with its opposite edge placed to center of jamb or opposite door (where double doors are used) thus getting the door in line before the base plate is screwed fast to floor. As only the plate rests on the surface, all possibility of injury to the mechanism is eliminated. The Shelby Hinge is also adapted for use on marble, tile, cement or concrete floors or where steel beams are in the way, no metal box being required.

The tension of the spring can be regulated at any time after the door has been hung.

ONE SET IN A BOX, WITH SCREWS.

SCREEN DOOR HINGES.

No. 7—CLOVER LEAF, 3x2½ in., japanned, single action, hold back, w't per doz. prs. 10 lbs., per dozen pairs..... $1.50

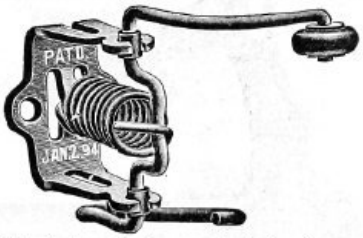
DOOR CATCHES, SPRINGS AND BRACES.

SCREEN DOOR CATCHES.

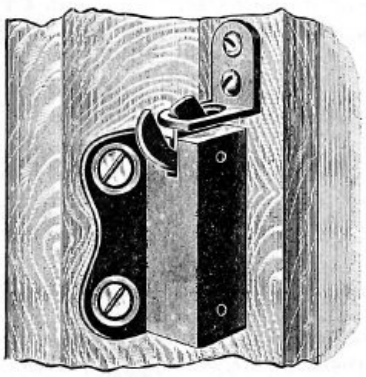


No. 00—Automatic, japanned steel, rubber roller, with door plate, w't per doz. 1¾ lbs. .....per dozen $3.50

Applied on the door casing at the opening side of the door and can be placed anywhere along on the casing where it is necessary to bring a pressure on the door to force it closed. Remains open until the lower projection is struck by the door, releasing the spring and throwing the rubber roller against the outside of the door. Does not hinder the opening of door, and is reversible.

ONE DOZEN IN A BOX.

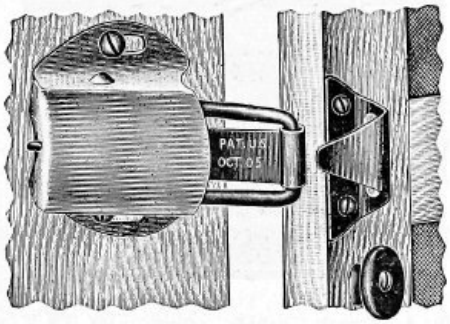
AUTOMATIC DOOR CATCHES.



No. 50—Watrous, japanned steel with coil spring, w't per doz. 1¾ lbs., per dozen..... $1.75

For storm doors, screen doors, office gates, cupboard doors. etc. Holds the door tight shut and prevents standing ajar or sagging open at the top. It does not show from the outside.

ONE DOZEN IN A BOX.



No. 60—Best, 2 in., steel, japanned, w't 1¾ lbs. .....per dozen $2.50

No. 70—Old copper finish, otherwise same as No. 60, w't per doz. 1¾ lbs., per dozen..... 3.00

For screen, storm, store, closet or pantry doors, whether light or heavy.

Has nearly 2 in. positive pull. Works directly, smoothly and evenly, and can be attached either outside or inside the door. Holds door securely against drafts. Prevents warping and rebounding.

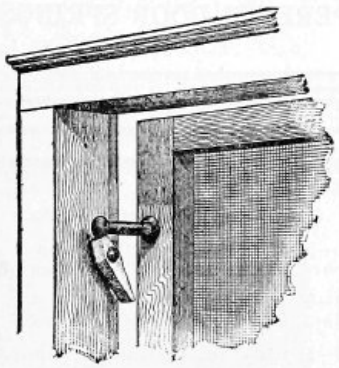
ONE DOZEN IN A BOX, WITH SCREWS.

DOOR CHECKS.

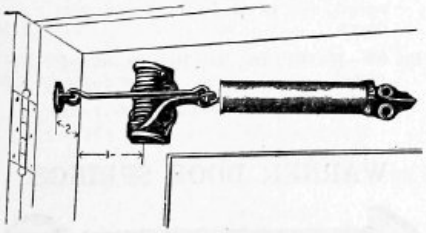


For Screen Doors Only.

No. 10—2¼ in. enameled screw knob, 2¼ in. soft rubber stop, 1¾ in. round head blued screw, w't per doz. 2 lbs.....per dozen $1.50

When the door is closed it throws the rubber against the door and then drops to a perpendicular position. Complete directions and diagram are packed with each check.

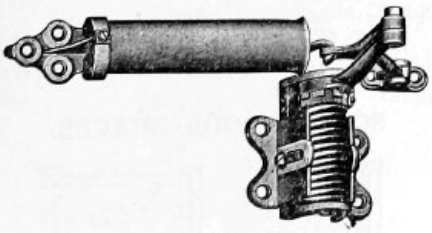
ONE DOZEN IN A BOX.



No. L0—LARIMER, oxidized copper, unpolished, for either right or left hand screen or light inside doors not over 2 ft. 8 in., and ½ in. thick, w't 2 lbs., each..... $1.25

This check is adapted for the jamb side of door only. All parts are reversible. The valve principle and plunger head is so simple in construction that there is nothing about it that can get out of order. If desirous of releasing the door from the action of the spring, all that is necessary is to lift the hook out of the eye. It is easily applied and perfectly adjustable.

ONE IN A BOX.



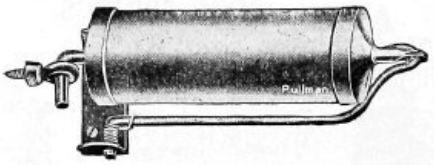
LARIMER, Oxidized Copper, Unpolished, for Either Right or Left Hand Doors.

No. L1—For heaviest inside doors not over 2 ft. 8 in. wide, w't 4¼ lbs..each $2.50

No. L2—For heaviest outside doors, w't 6¾ lbs.....each 3.50

These checks and springs apply to hinge side of door only. All parts are reversible excepting coil spring, which is made right and left, one each of which is furnished with each check.

ONE IN A BOX.



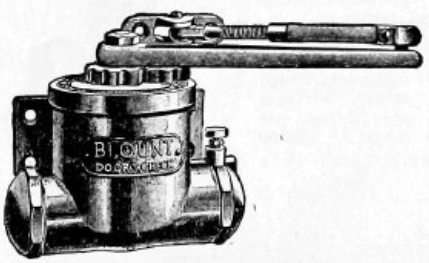
PULLMAN, Pneumatic For Screen Doors Only.

No. 15—Wrought steel, 3¾x1¼ in. brass cylinder, w't per doz. 6 lbs., per dozen $9.00

This is a door check, not a door closer, nor a door spring. Can be used with any kind of screen door spring or spring hinge with perfect satisfaction. It is easily applied, does not require any mortise. Can be placed on either right or left hand screen door without any changing of parts.

Each check is thoroughly tested before packing, and packed with screws and directions.

ONE IN A BOX, WITH SCREWS.



BLOUNT, Liquid, Gold Bronzed.

No. 1—For screen or other light doors not over 2 ft. 6 in. wide by 1¼ in. thick, w't 5 lbs.....each $3.25

No. 2—For outside doors not over 3 ft. wide by 1½ in. thick, w't 7½ lbs. each 4.25

No. 3—For vestibule and light outside doors not over 2 ft. 6 in. wide by 2 in thick, w't 9 lbs.....each 5.00

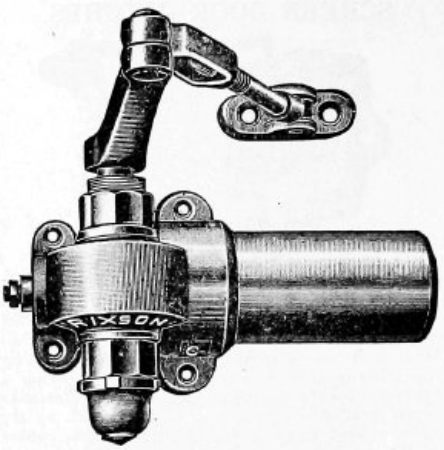
No. 4—For outside doors not over 3 ft. wide by 2½ in. thick, w't 12 lbs..each 6.00

No. 5—For doors not over 4 ft. wide by 2½ in. thick, w't 16 lbs.....each 8.00

No. 6—For extra heavy doors, requiring great power, w't 19 lbs.....each 10.00

While these door checks are reversible, they should be ordered for right or left hand doors as wanted. Compact, and of exceedingly neat appearance, simple in construction, and therefore never out of order, absolutely self-lubricating, reducing friction to a minimum, quickly and easily attached by any one. Adjustable to right and left hand doors with flush or projecting trim. Checking power perfectly adjustable by simple regulator; impossible for it to bind, owing to ball and socket joint of extension arms.

ONE IN A WOODEN BOX.



RIXSON, Liquid, Gold Bronzed, for Either Right or Left Hand Doors.

No. A—For inside doors not over 2 ft. 8 in. x7 ft., w't 8 lbs.....each $4.25

No. B—For vestibule and light outside doors not over 2 ft. 6 in. x7 ft., w't 9 lbs.....each 5.00

No. C—For outside doors not over 3x 7 ft. 6 in., w't 10 lbs.....each 6.00

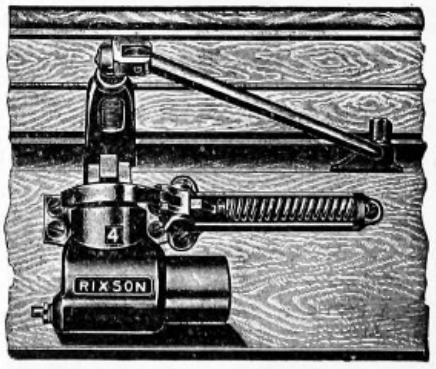
No. D—For doors not over 4x7 ft. 6 in., w't 11½ lbs.....each 8.00

No. E—For extra heavy doors, w't 12½ lbs.....each 10.00

It is adapted to right or left-hand doors without any change in the mechanism.

The spring may be broken in several parts, yet remain effective, an important feature.

ONE IN A BOX.

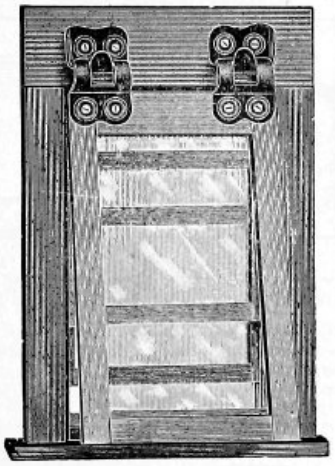


No. 4—RIXSON, double acting, gold bronzed steel, drop forged spindle, seamless pressed steel tube, for double acting doors not over 4x7 ft. 6 in. wide, w't 8¼ lbs.....each $8.50

This check has no spring and is to be used only on double acting doors, equipped with spring hinges. It stops the door absolutely at the center and stops all swinging which in double acting doors is so annoying and dangerous.

ONE IN A BOX.

STORM SASH AND WINDOW SCREEN HANGERS.

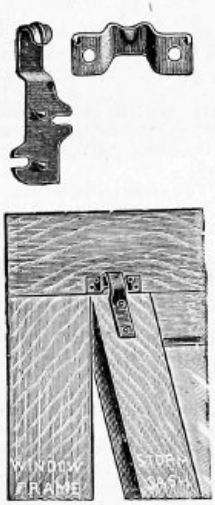


Gossett, wrought steel, japanned, w't per doz. prs. 2½ lbs., per dozen pairs $1.50

Gossett Lower Sections, for hinge, to make screen and storm sash interchangeable, w't per doz. prs. 1½ lbs., per dozen pairs ..... .80

These hangers have guide flange, a feature which no other hanger has, which brings the screen or storm sash into proper place and makes it possible to hang them from within the building. Being fastened to the top of the screen, they admit of no sagging, as when hinged on the side.

ONE DOZEN PAIRS IN BOX, WITH SCREWS.

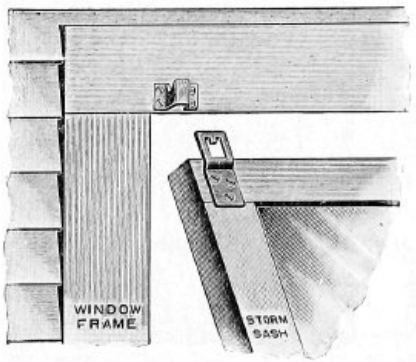


No. 019—SENSIBLE, malleable iron, japanned, w't per doz. sets 2¾ lbs., per dozen sets..... $2.00

Extra Hooks, for attaching to screens, to interchange with storm sash, w't per doz. prs. 1¾ lbs., per dozen pairs 1.00

The storm sash or screen can be hung easily from the inside of the house. The peculiar construction forms an absolute lock and prevents the window from being blown off. A set does not include fasteners.

ONE DOZEN SETS IN A BOX.

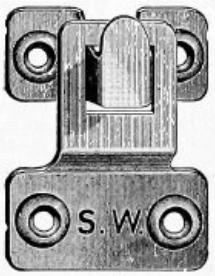


No. 1717—SCHROEDER'S NEW PEERLESS, japanned, packed complete with screws, four pieces to a set, w't per doz. sets 3¾ lbs.....per dozen sets $1.50

Lower Sections, for hinges to make screen and storm sash interchangeable, w't per doz. 2 lbs.....per dozen pairs .80

Not only the strongest, but also the smallest device owing to the extra depth of the hook. Easiest to hang on, because of extra large eyes. Always automatically locked until you release fastener yourself; hence, the safest hanger ever invented. No rattling because of its peculiar construction. Neatest hanger, because of its simple appearance. Also most effective.

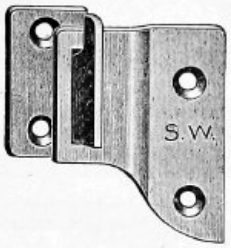
ONE DOZEN SETS IN A BOX.



No. 1724—SCHROEDER'S PEERLESS, steel, japanned, w't per doz. sets 2 lbs., per dozen sets..... $1.50

Easily hung and especially adapted for full size screens.

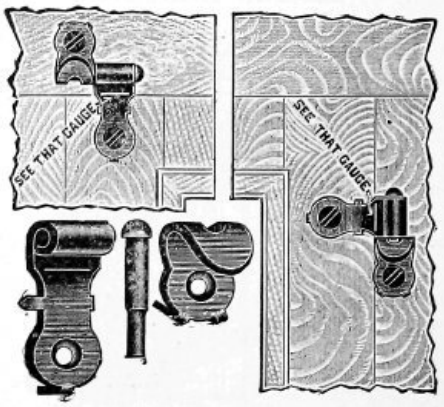
ONE DOZEN SETS IN A BOX.



No. 1725—SCHROEDER'S PEERLESS, steel, japanned, w't per doz. sets 1 lb., per dozen sets..... $1.50

For half screens, can be put up and taken down easily. They swing, no sliding or sticking.

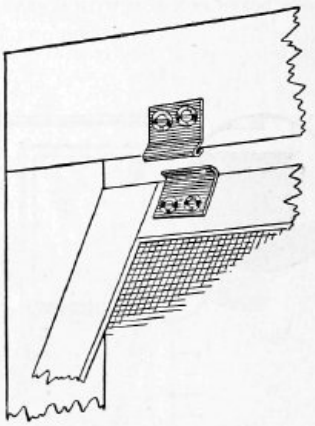
ONE DOZEN IN A BOX.



No. 11—WATROUS, japanned, packed complete with screws, four pieces to a set, w't per doz. sets 2½ lbs., per dozen sets..... $1.50

A hanger that will hang either a full sized sash or screen or a half screen. Will hang from either top or side casing.

The points afford a much stiffer and more rigid grip on the wood than screws.



No. 37—HALL'S, pressed steel, japanned, w't per doz. sets 1¼ lbs..per dozen sets $1.50

Lower Sections, to make storm sash and screen interchangeable, w't per doz. prs. ¾ lbs.....per dozen pairs .70

Neat, simple, strong and absolutely anti-rattling.

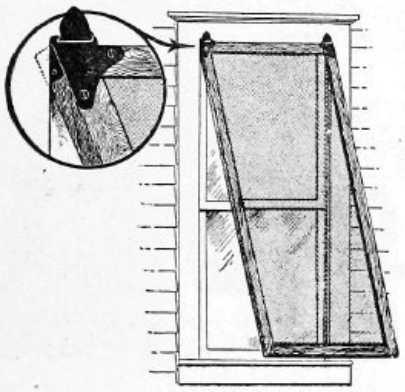
In hooking, the spray of the metal serves to hold the sash firmly against the frame, preventing all possibility of rattling.

Can be hung from the inside of window, doing away with the use of ladders.

THREE DOZEN PAIRS IN A BOX, WITH SCREWS.

SASH AND SCREEN HANGERS, CATCHES AND FASTENERS.

STORM SASH AND WINDOW SCREEN HANGERS.



For Storm Sash or Full Length Screens.

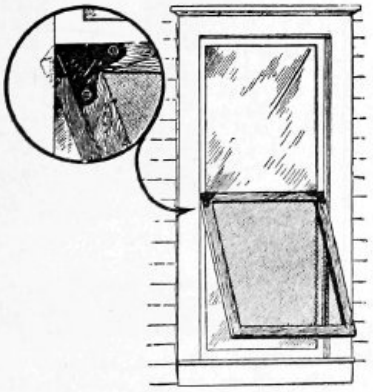
No. 42—PERFECT, steel, japanned, with side brace, w't per doz. sets 4 lbs., per dozen sets..... $1.50

Well made, simple and practical.

These hangers are also corner braces in that they firmly unite the top and side strips of the screen, strengthening the frame at a weak point. The brace also locks the hanger securely to the wood and braces sash or screen, preventing its rattling or being blown off by the wind.

Hooks and eyes to hold screen shut at bottom are furnished with each hanger.

ONE DOZEN IN A BOX, WITH SCREWS.



For Half Screens.

No. 46—PERFECT, steel, japanned, w't per doz. sets 2¾ lbs.....per dozen sets $1.50

The screen swings on dowel pins which are driven into the window frame and fit into groove hanger holding screen firmly. Screen can be taken off and replaced with absolutely no difficulty.

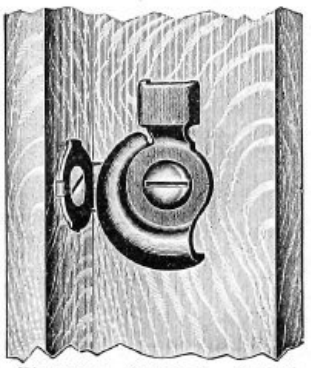
These hangers are also corner braces in that they firmly unite the top and side strips of the screen, strengthening the frame at a weak point. The brace also locks the hanger securely to the wood and braces sash or screen, preventing its rattling or being blown off by the wind.

This hanger can be used for all grooved screens.

Hooks and eyes to hold screen shut at bottom and dowel pins are furnished with each hanger. One set complete, packed in a paper bag.

ONE DOZEN IN A BOX, WITH SCREWS.

WINDOW SCREEN CATCHES.

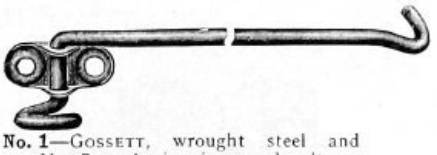


No. 35—WATROUS, japanned, packed complete with screws, w't per doz. 1 lb.....per dozen $0.75

The co-operating flanges on catch and strike make a double lock, and when fastened the sash can neither be pulled out nor pulled up from casing. Locks any screen tight and fast, whether swung from hinges, hung from hinges or sliding in channels.

Light, neat and strong, takes up little space and does not interfere with the working of the window. THREE DOZEN IN A BOX.

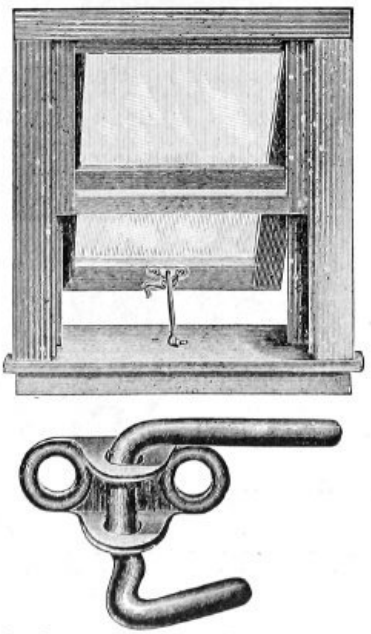
WINDOW SCREEN FASTENERS.



No. 1—GOSSETT, wrought steel and No. 7 steel wire, japanned, w't per doz. 1 lb.....per dozen $0.60

An inside lock for screens, stronger and more secure than the ordinary screw hook and eye.

STORM SASH FASTENERS.

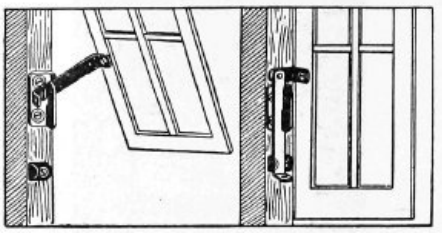


No. 2—GOSSETT, 8 in. wrought steel and No. 7 steel wire, japanned, w't per doz. 1 lb.....per dozen $0.80

Holds storm sash open for ventilation and locks it securely when closed. Does not interfere with raising or lowering of windows.

ONE DOZEN IN A BOX WITH SCREWS.

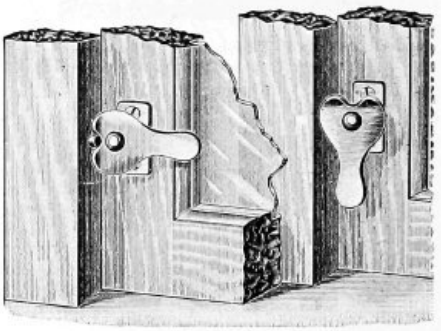
STORM SASH FASTENERS.



No. 9—HALL'S, 6½ in. japanned, steel, w't per doz. 1 lb.....per dozen $1.20

Holds sash open for ventilation and locks automatically, holds sash firm and prevents rattling.

ONE DOZEN IN A BOX.



No. 1726—SCHROEDER'S PEERLESS, rotary, steel, japanned, w't per doz. 1¼ lbs., per dozen..... $1.50

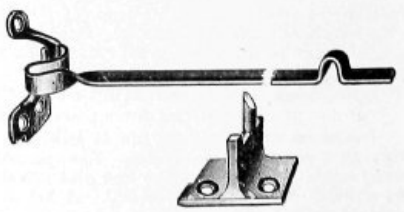
For stationary outside windows, window screens, shutters, cellar window screens, storm sash, swinging casement sash, etc. Quickly and firmly locked.

ONE DOZEN IN A BOX.

No. 1719—PEERLESS, 10 in., japanned, malleable iron, w't per doz. 4½ lbs., per dozen..... $2.00

This fastener will hold the storm sash open for ventilation. When storm sash is closed the fastener automatically locks itself.

ONE DOZEN IN A BOX.



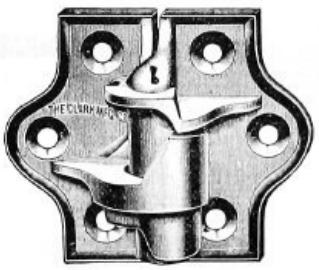
No. 20—SENSIBLE, 10 in., malleable iron, japanned, w't per doz. 3¾ lbs., per dozen..... $2.50

Holds storm sash open for ventilation. When sash is closed fastener swings around locking itself. Does not interfere with raising or lowering of window.

ONE DOZEN IN A BOX.

BLIND HINGES, GATE HINGES AND LATCHES.

BLIND HINGES.



Clark's, Cast Iron.

GATE HINGES AND LATCHES.

Upper hinge.

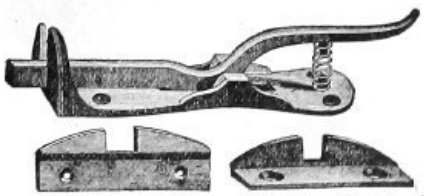
Lower hinge.

Latch.

No. 4—LEEDS, cast iron, japanned, to swing both ways, w't per doz. sets 36 lbs.....per dozen sets $13.50
ONE SET IN A BOX.

GATE LATCHES.

No. 10—ST. LOUIS, cast iron, natural finish, for right or left hand gates, w't per doz. 6½ lbs.....per dozen $0.55
HALF DOZEN IN A BOX.

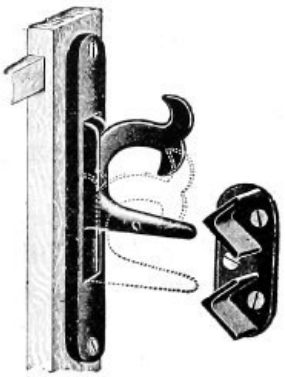


No. 14. Side Catch. **No. 16.** Top Catch.

Top, for Gates to Swing Both Ways.

No. 14—Japanned, cast iron, catch to screw on side, length 8 in., w't per doz. 12 lbs.....per dozen $2.00
No. 16—Japanned, cast iron, catch to to screw on top, length 8 in., w't per doz. 12 lbs.....per dozen 2.00
HALF DOZEN IN A BOX.

GATE LATCHES.

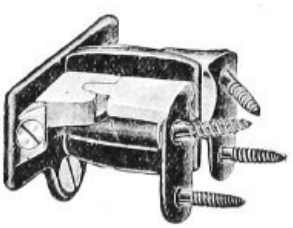


No. 6—"G. P." cast iron, japanned, self-adjusting, for right or left hand gates, w't per doz. 14 lbs.....per dozen $3.00

The "G. P." latch is attached to a sliding carriage which adjusts itself by means of the projection shown in the illustration. As this point comes in contact with the strike, it is raised or lowered by the angle of the strike, so that any change of position due to the weather or general sag of the gate will not affect the closing of the gate. Sliding the latch up and down in the frame will not interfere with its proper action. It is absolutely hog proof.

HALF DOZEN IN A BOX.

GATE HINGES.



No. 2750—SUPERIOR, malleable iron, japanned, concealed compound steel springs, double action, w't per doz. prs. 48 lbs.....per dozen pairs $24.00

Will not raise the gate as ordinary hinges do, but open level. Self-shutting, and always stops at the center. No parts to get loose or out of place. Easily applied and cannot get out of order. Tire bolts or wood screws may be used for both post and gate. The plate which attaches to the post is 4 in. wide and 3 in. wide where it attaches to the gate. The space between gate and post is 2¾ in. Any latch can be used with these hinges; none, however, is necessary.

ONE-QUARTER DOZEN PAIRS IN A BOX.

BUTCHERS' BLOCK SCRAPERS.

No. 315—Handle 16 in. long, heavy malleable japanned socket, 5 in. cast steel blade, w't per doz. 14 lbs. per dozen $7.00
ONE DOZEN IN A BOX.

HALF GROSS IN A BOX.

Wrought Iron, Tinned, for Bar.

No. 22—7/16 in., for 2 in. bar, w't per gro. 84 lbs.....per gross $50.00
ONE DOZEN IN A BOX.

WROUGHT GOODS.

HASP LOCKS.

No. 7—PROUTY, straight, 7¾ in., polished steel case, ½×2½ in. spring shackle, with two flat steel keys, 100 changes, w't per doz. 7¼ lbs..per dozen $6.00

No. 8—PROUTY, double hinged, to protect the strap end, 7¾ in., polished steel case, ½×2½ in. spring shackle, with two flat steel keys, 100 changes, to use on corners, w't per doz. 7¼ lbs. per dozen $9.60

The locking bar which corresponds to the shackle on an ordinary padlock, in the Prouty hasp lock is contained entirely within the lock. This renders it impossible to secure any hold or leverage whereby the lock could be forced, and to break open, the entire case must be destroyed. The fact that this locking bar cannot be used as a feeler makes it almost impossible to file a duplicate key. The push button on lower right hand rim of lock, when pushed clear in will spring the locking mechanism. On the face of the lock a temporary catch is used to act the same as the latch on an ordinary hasp.

No. 810—Half set for single door, w't per set 15½ lbs., " 2.50

Extra Track, w't per ft. 1 lb., - - - per foot .09

Each wheel is fitted with roller bearings running on a hard steel bushing, making it anti-friction and never requiring oil; adapted to any length of run. Each wheel has a vulcanized fiber filling, rendering it noiseless in action. The adjustment is a novel feature, and may be accomplished from either above or below the base plate, as desired.

A set consists of four hangers, 14 ft. of track, gravity stops, striking plates and floor plates. Half set has 8 ft. of track.

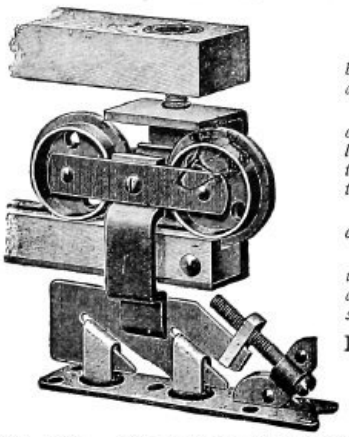
No. 300.

See description to the right of page.

LEROY NOISELESS.



Hanger is carefully made, has ball bearing journals with case-hardened cup and cones, easily adjusted.

Track is made of steel and maple, has adjustment whereby it may easily be leveled, is easy to put up and the maple track provides an absolutely noiseless tread.

The LeRoy has all the best features desired in a parlor door hanger.

A set consists of two pieces of track with wood headers, one stop, four pendants and wheels, four plates, four set screws, and two floor guides.

Made of the very best malleable iron, will not injure the floor or tear the carpet, as the end that strikes the floor is covered with pure rubber, which increases the holding power. Easily adjusted by any one, being fastened to the door by two wood screws. Being attached to the door only, there is no obstruction on the floor to catch ladies' dresses or for persons to stumble over. It is not necessary to stoop to work them—use foot.

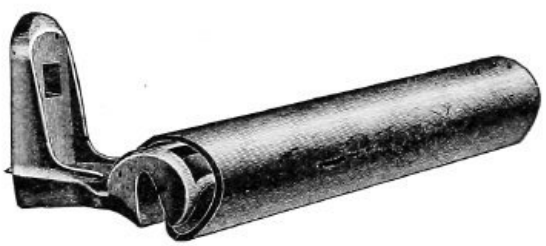
BARN DOOR HANGERS.

WORLD'S BEST.

The manufacturer of this hanger claims for it many points of superiority. While not belonging to the hinge or flexible family, it possesses some of their good points. Will permit doors to swing out at bottom sufficiently to pass any obstructions that may be in the way, and has the positive "stayon" feature. The large roller bearings dispense with all friction and make it easy to operate. Can be applied quickly, requiring no cutting or mortising; has turned wheel. The guide underneath the rail will prevent derailment. This hanger is made with a view of meeting the constantly growing demand for a hanger of superior strength, and is fully guaranteed to give general satisfaction.



This track is made of high grade open hearth stock, which is pickled and limed, insuring a perfectly smooth surface. A sufficient number of brackets are included with track.

Intermediate brackets for rail are made of heavy malleable iron, 1½ in. wide, and furnish a coupling for the ends of the section of rails, and are used ordinarily 22 in. apart. Two malleable end brackets go with each pair of hangers, and are packed with hangers.

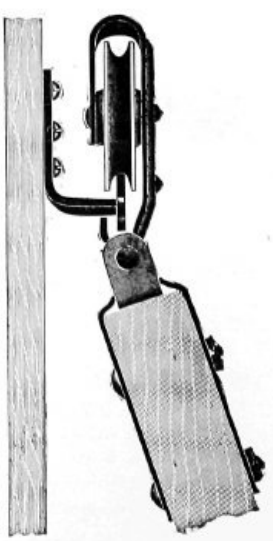
ONE PAIR IN A BOX, ONE DOZEN PAIRS IN A CASE.



BARN DOOR HANGERS.

O.V.B. TROLLEY.

Showing sectional view of track and hanger.

The Hanger is constructed entirely of steel except the wheels which are made of the best cast iron, turned smooth. The axles pass through steel tubes fitted with roller bearings which distribute the weight evenly on all parts of the truck and makes it entirely anti-friction. A heavy bolt is used to connect the drop strap with the truck, thus allowing the door to be adjusted close to the building, and holding it rigidly in its place.

The Drop Strap is made in two parts with a rolled hinge joint, and connected with a ⅜ inch steel pin which can be drawn out, saving labor in hanging a door, and also allows the door to swing out at right angles.

The Track is rolled on special machinery so that every foot is precisely the same, absolutely true and straight. The wheels run freely and easily in the rounded grooves of the track as the OFFSET prevents any sticking, binding or scraping. *Birds cannot nest in the track, nor can it be clogged by sleet or snow.* Track can be furnished in 4, 6, 8 and 10 foot lengths.

The Finish and Workmanship is of the best as every hanger is carefully inspected before being packed for shipment. All exposed parts are japanned with high grade black baking japan.

No. 8 O.V.B.—Trolley Barn Door Hangers, complete with screws, bolts, and three brackets (two end and one center), w't per doz. p'rs. 144 lbs.....per dozen pairs $30.00

No. 8B O.V.B.—Brackets, w't 1¼ lbs.....each $0.20

Three brackets, two end and one center are furnished with each pair of hangers. For each ADDITIONAL length of 6 ft. track one EXTRA bracket is required, 8 ft. two and 10 ft. three.

REVONOC

Sectional view of the Track and Hanger.

Illustrating the Hanger and track.

The Hanger consists of a malleable iron truss frame which supports the double door straps. The stirrup from which the door strap is hung, is secured to the track by means of a steel axle. The door straps, which are double, have holes for two bolts on each strap so that the bolt can be run through the door and thus assure double strength.

The Truck has two solid ball wheels, or rollers, which have a very wide thread in the track, and are run on roller bearings. The side plates are shaped so as to allow the truck to run smoothly and evenly and without scraping the sides of the track. They are light running, frictionless, flexible and noiseless.

The Track is made of No. 14 gauge steel specially formed and slotted, ¼ in. on the under side to take the hanger frame. It is 2¼ in. in diameter (inside measurement) and furnished in 3 foot lengths. The sections are rigidly joined together by No. 12 gauge steel splices, 2½ in. wide, within which the sections meet at the center of the splice and lock. *Birds cannot nest in the track, nor can snow or sleet clog it.* The track is secured to the barn by means of heavy brackets.

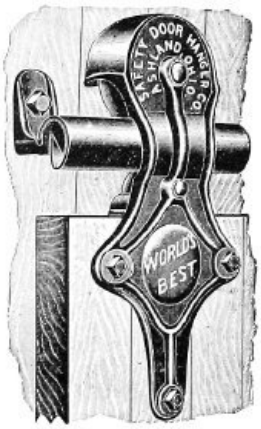
Two end CAPS are furnished with each pair of hangers. As brackets are NOT furnished with the hangers it is necessary to have two brackets to hang the first length of track, and one EXTRA for each ADDITIONAL length.

WORLD'S BEST.



This cut illustrates the Hanger on track as it is hung to the barn.

While not belonging to the hinge or flexible family it possesses many of their good points. Will permit door to swing out at the bottom sufficiently to pass any obstruction that may be in its way.

The large roller bearings dispense with all friction and make it easy to operate. The lower wheel underneath the rail prevents derailment.

The track is of steel, with a perfectly smooth surface thus assuring easy running. A sufficient number of brackets are included with each length of track, to hang securely.

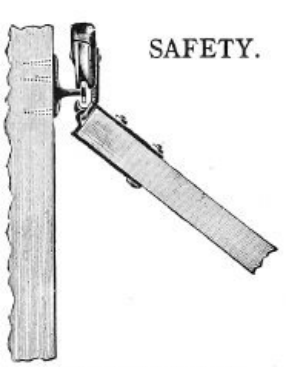
SAFETY.



Showing sectional view.

The Hanger.

In the Safety Barn Door Hanger we have as good a flexible, medium priced hanger as can be had. As a swing-hanger it is easily classed with the best. The frame and wheel are of malleable iron, and are very strong. The wheel is 3¼ in. in diameter and has a deep thread or groove, assuring a good grip on the track.

The retaining hook under the track makes it impossible for the hanger to be thrown off the track. The flexible feature allows the door to move easily without binding, and permits it to swing out in case of wind storms or stock pushing against it, without throwing the door off the track or tearing the track loose. Can be hung in about one-fourth the time required for the old style rigid hangers. Adapted to Safety steel rail.

No. 20—Aluminum finished, w't per doz. prs. 80 lbs .....per dozen pairs $16.00

ONE PAIR IN A BOX.

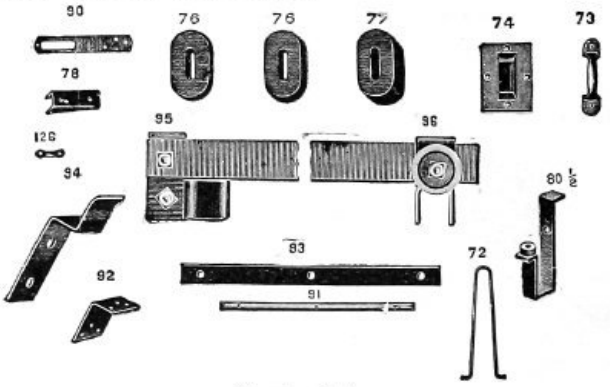
Showing Fixtures Attached.



Showing Parts.

No. 204—National Underwriters' Fixtures (without hangers or track), weight per set 50 lbs., - - - - - - per set $8.00

No. 401—National Hangers only, ⅜×3½×20 in., wrought iron pendant, 4½ in. malleable iron wheel, weight per pair 25 lbs., per pair 4.00

Track, ⅜×3½ in., with bracket, weight 4 lbs., - per foot .40

No. 204 fixtures are made in accordance with specification of National Board of Underwriters, and are accepted in all states and Canada. Fusible link is shown from both sides of opening. Top binder, back stop and rope pulley are attached to track, saving exposure of bolts and drilling wall, requiring track 20 in. longer than double the width of opening. Track is furnished in one piece, heavy enough for large doors. Track should be bolted through wall and placed on an incline of ¾ in. to the foot.

DIRECTIONS FOR ORDERING—State width of opening and thickness of doors, and if doors are to be used on one or both sides of wall. Doors lap 4 in.; do not say doors when you mean opening. If bolts are wanted give thickness of wall.

PRICE OF FIXTURES DOES NOT INCLUDE COST OF HANGERS AND TRACK, OR BOLTS AND SCREWS FOR ATTACHING EQUIPMENT.

BARN DOOR HANGERS.

9	22 to 23	46	7½	5.00
10	24 to 26	54	10	5.30
11	27 to 29	54	10¼	5.50
12	30 to 32	54	10½	6.00
13	33 to 35	54	14	6.50
14	36 to 38	54	14½	7.00
15	39 to 41	54	15	7.50

One set, as priced above, consists of four balances, sufficient to hang one complete window—two sashes. They are placed in the window frame the same as ordinary pulley, having an automatic adjustment that does not require an adjusting screw or some similar device which makes the tape buckle or break. The Pullman balances are easily placed in position and owing to automatic adjustment can be quickly applied.

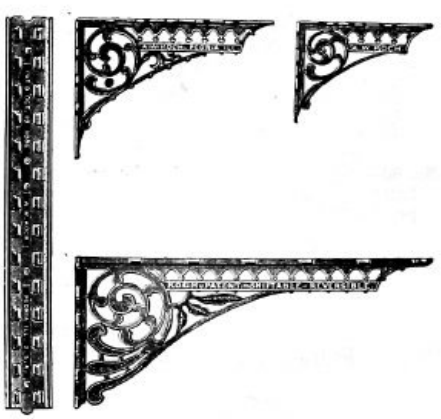
Locks automatically when lifted up, and can be let down entirely out of the way in an instant. Just the thing for kitchen, pantry and dining-room shelves. Invaluable for store show windows.

ONE-SIXTH DOZEN IN A BOX.



KOCH, Adjustable, Cast Iron, Japanned.

No. 101—3½× 4½	in., w't 5½ oz.	★each	$0.12
No. 102—6 × 8	in., w't 1¼ lbs.	★ "	.20
No. 103—8 ×12	in., w't 2 lbs.	★ "	.35
No. 104—8 ×16	in., w't 3 lbs.	★ "	.45
No. 105—9 ×21	in., w't 4 lbs.	★ "	.60
No. 110—Wall plates, 24 in. long (suitable for all sizes of brackets), w't 4 lbs.		each	.50

These brackets are supported by a number of catches on either side, by means of which each is held firmly in place, there being no side-play or liability to slip down accidentally. The wall plates are provided with screw holes for every 6 in. of their length, so they can be fastened securely to the walls. The entire front is open and unobstructed, and the entire top surface of shelf boards is available for goods. The objectionable wood partitions are entirely done away with, allowing the unhindered use of every inch of space. The brackets do not shut out the light nor make dark corners to hide the goods and prevent the easy removal of dust.

A section of shelving may be put up on the Koch reversible brackets, and additions to it made, in length or height, as more room is wanted, without altering or marring the rest, and it will be finished and complete first as last. Shelving may be run in continuous parallel lines; or in long or short sections of various height or width, and shelf room may be increased or diminished at pleasure.

★*FOR FACTORY SHIPMENT ONLY.*

BRACKETS AND PORCH SUPPORTS.

STAIR RAIL BRACKETS.

Lignumvitæ Wheel "	.24	.32	.45

These casters are entirely constructed from the highest grade of basic (or base) steel. The steel balls are 7/32 in. in diameter and are used in all size casters. The "Universal" has the advantage over other disc bearing casters, as the balls will revolve readily in every direction, whereas other discs roll only horizontally, and any little obstruction, such as a small wood splinter, will prevent the disc from performing its functions.

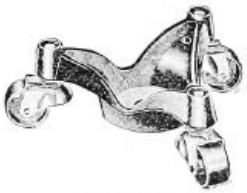
STOVE CASTERS AND STOVE TRUCKS.

STOVE CASTERS.

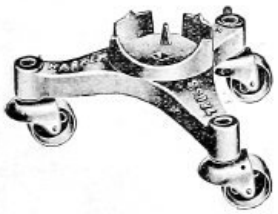


Low Base.

No. 100—HARPER, improved, japanned, with 3 iron swivel wheels, height of center 1½ in., diameter of cup 2½ in., w't per doz. sets 120 lbs., per dozen sets $15.00

The wheels are larger than heretofore used. The caster pins do not project above the arms. There is a screw hole through each arm so they can be fastened to any flat surface.

FOUR CASTERS CONSTITUTE A SET.

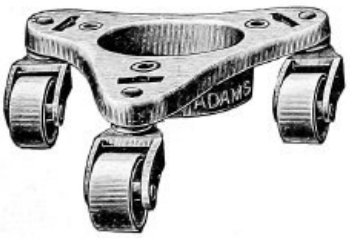


High Base.

No. 105—HARPER, japanned, with 3 iron covered swivel wheels, height of center 3 in., diameter of cup 2½ in., w't per doz. sets 120 lbs.....per dozen sets $20.00

Raises the stove or range 3 in. from the floor. Will pass over rough or uneven surfaces in the floor without becoming displaced. Can be used under a range without feet as well as stoves with feet. It is very strong.

FOUR CASTERS CONSTITUTE A SET.



Adams' Stove—Japanned, with 3 copped swivel wheels, height of center, 1 in., diameter of cup 3¼ in., w't per doz. sets 108 lbs.....per dozen sets $20.40

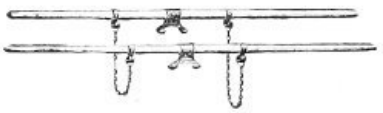
The small casters being swiveled to the main casting by a pivot, they turn from one direction to another with the utmost readiness. Holes are provided for screwing these casters to a box, making a handy box truck.

FOUR CASTERS CONSTITUTE A SET.

Adams' Steel Range Attachment—W't per doz. 6 lbs.....per dozen sets $6.00

To make range casters, insert attachment in foot hole of regular stove caster.

STOVE CARRIERS.



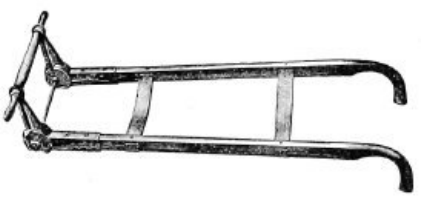
No. 30—EUREKA, with chains, wrought iron clamps, 5 ft. 3 in. hard maple handles, for handling or setting up all kinds of stoves, w't per pair 12 lbs., per pair..... $4.75

ONE PAIR IN A BUNDLE.

STOVE TRUCKS.

No. 25—MARTIN'S, japanned steel frame, adjustable from 18×22 to 24×36 in., 4 swivel casters, w't per doz. 200 lbs. per dozen..... $30.00

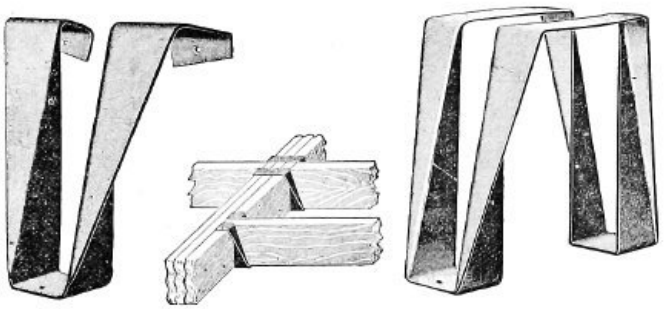
HALF DOZEN IN A CRATE.



No. 10—LEAVENWORTH, stove truck and carrier, length 4 ft., w't 22 lbs., each..... $8.75

No. 20—All steel, length of stove rest 4 ft., wheels 4 in., height raised 7½ in., lowered 5½ in., w't 50 lbs., each..... $17.00

JOIST, TIMBER AND WALL HANGERS.



Single. Showing Single and Double in use. Double.

Forged steel, asphaltum painted. All hangers are made $\frac{1}{4}$ in. scant, to allow for surfacing; for example, hangers for 2×10 in. joists are made $2\times9\frac{3}{4}$ in. Hangers with longer arms than those herein given can be supplied at a small additional charge.

Per 100 .....$9.00	12.00	19.80	

These expansion bolt shields and screw anchors are well made. They are easy to use, and when once in place never loosen. They can, however, be taken out and put back in the same hole any number of times without marking the wall in the least. They are in general use by plumbers and have always given satisfaction.

The screw anchor is made in one piece of soft metal and permits the screw to cut its own thread, will fit any size and style of wood, machine or special screw. When it is up it never loosens until taken out.

The expansion shield is made of cast iron, in two parts, and is extremely simple. It is very strong, and will resist the greatest strain or most severe vibration. Can be used with any lag screw, no special cut or length of thread required.

SIZE.	LENGTH.	NO. TO KEG.	
3d	1¼ in.	53,200	per keg....$

Cement nails are sold at so much per keg, but the kegs weigh less than 100 lbs., as the nails are made of lighter wire than the Standard Nails. They are put up the same number of nails per keg as in the Standard Nails, but on account of the lighter gauge wire used they weigh less.

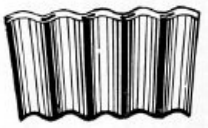
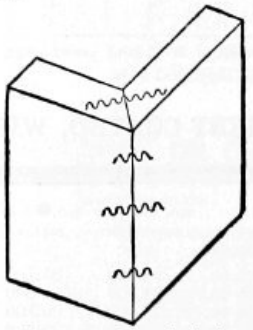
ONE THOUSAND IN A PACKAGE.

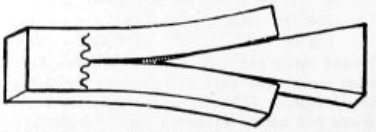


These fasteners are slightly divergent having the effect of drawing the work together and making a tight joint.



Showing use to which they can be put.

These fasteners can be used for an endless variety of purposes and are simple, effective and easily applied. They make a perfect secure joint. They are made of smooth steel sharpened on one edge and are as easy to drive as nails and are far more effective for many purposes. The number of corrugations determines the length.



Showing strengthing effect of Corrugated Fasteners.

THE END OF THIS DIVISION

In order to allow for future additions to this line, we have omitted pages 529 to 600 inclusive.

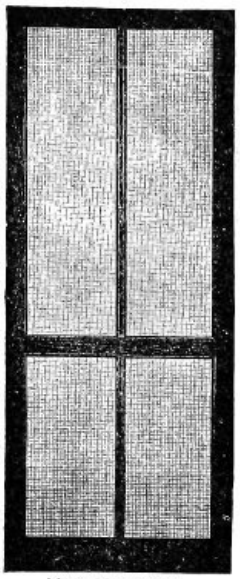
Please note that each succeeding division of this catalogue begins with the first number of the following hundred pages.

THE WEIGHTS GIVEN IN THIS CATALOGUE

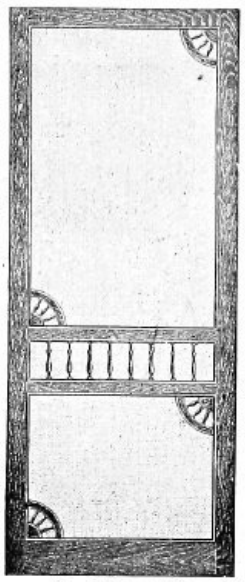
Are supplied solely as an aid in figuring freights, and are approximately accurate. As changes are constantly being made in the manner of packing goods, and on account of variations in some lines, it is impossible to give figures that will always be exact in every case. Where possible we have given weights of factory packages as ordinarily sold; on all other goods weights are net and do not include cases.

SCREEN DOORS AND WINDOW SCREENS.

SCREEN DOORS.



Nos. 80 to 100.



Nos. 120 to 130.

Four Panel, Painted Green (Not Dipped), with a Pure Linseed Oil Paint, Black Wire Cloth, 12 Mesh, Stock Sizes.

Galvanized " "	.12	.12	.12	.12	.12	.12	.15	.15	.18	.18

When ordering, be particular to state length, mesh, width and size of wire wanted. The mesh means the number of openings or holes to the inch, measured from the center of the wires; in other words, counting the number of openings in an inch, taking the center of a given wire for a starting point. The size of the openings in a mesh depends on the size of the wire used. The heavier the wire, the smaller the opening. We catalogue only the size usually furnished when size of wire is not specified. Where a special size is wanted be particular to send sample. Wire cloth is sold in full rolls of 100 running ft.; the standard widths are 24, 30 and 36 in., but many other widths from 12 to 48 in., inclusive, can be usually furnished. When less than a full roll is ordered, an extra charge is made; when less than 50 running feet., a further advance is made. CUT PIECES OF WIRE CLOTH CANNOT BE RETURNED.

Per rod	$0.80	.90	1.01

The above fencing is adapted for field fence.

34 in. high, 8 bars, distance between stays 8 in., adapted for hog and sheep fence, w't per rod 7 lbs. . . . . per rod $0.78

The horizontal wires of Wolverine fencing have a spring which give the fence great elasticity, thereby withstanding the shocks it may receive from unruly animals.

Wolverine is built to stand any test to which a fence can be put.

IN TWENTY AND FORTY ROD ROLLS.

"REV-O-NOC" WOVEN WIRE FENCING.

REV-O-NOC woven wire fencing is made of the best quality of hard-drawn steel wire. This wire is heavily galvanized making it weather proof; all the wire used must withstand a rigid acid test. Skilled workmen, who are familiar with all the conditions, examine carefully every wire used. We have combined in our fence durability and extreme quality. You cannot find a fence anywhere combining as many good features as the REV-O-NOC. It is built to stand any test to which a fence can ordinarily be put.

The Lock or tie is very strong, having five points of bearing; it holds wires firmly, nonslipable, but permitting enough play so that fence will go up on hilly ground, letting cross-bars stand perpendicular without kinking line wires. Our lock is not driven down on wires at the point of crossing, but is driven at an angle, and therefore not a wire in the fence is injured.

The Type belongs to the kind known as the stiff-stay type, the stay being made from one continuous piece of hard steel wire. Any fence lacking in this very essential feature, cannot long retain a presentable appearance, nor give the best of service. It will not sag in summer's heat or break in cold weather.

Spacing. All styles of field fences illustrated on this and the following page have the three bottom line wires spaced three inches apart, so that small pigs cannot squeeze through.

Length. In poultry fence, ten rod rolls will be supplied where wanted. Regular size rolls, however, of both poultry and field fence are either 20, 30 or 40 rods in length

WIRE TRELLIS AND CORN CRIBS.

The folding wire supports, borders and trellis illustrated below are carefully made by machinery which locks the wires to upright rods on one end, providing also a hinge joint for the other end which gives freedom of movement, but does not allow the cross wire to slide up or down. They are erected by thrusting into the ground.

FOLDING WIRE SUPPORTS.

Galvanized, with Hooks.

No. 3A—Height 30 in., length 40 in., forms 10 in square, uprights ¼ in. steel rods, horizontals Nos. 8 wire, 6 in. apart, folds to 10 in. wide, 1⅛ in. thick, w't per doz. 45 lbs..... per dozen $6.00

Very useful for supporting small plants bearing heavy fruit, such as tomatoes, and for flowering plants liable to be beaten down by wind or rain. When used extended, it forms a high and cheap border, suitable for beds of rhododendrons and hardy azaleas.

ONE DOZEN IN A CRATE.

FOLDING WIRE BORDER.

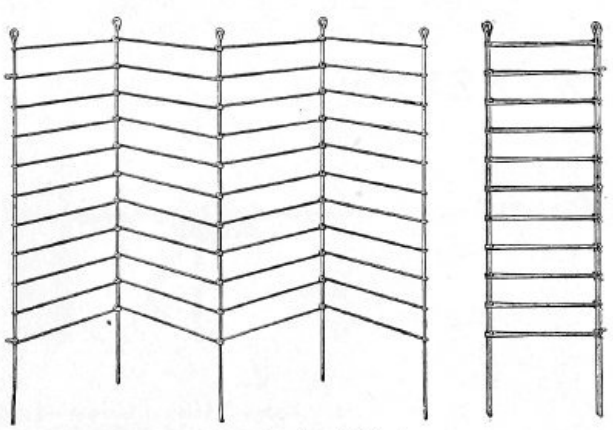
Galvanized, with Hooks.

No. 2A—Height 18 in., length 5 ft., uprights ¼ in. steel rods 10 in. apart, horizontals No. 8 steel wire, 3 in. apart, folds to 10 in. wide, 1½ in. thick, w't per doz. 50 lbs..... per dozen $10.00

Ornamental as a border for garden walks and useful to keep children and dogs from running across flower beds. Supplied in 5 ft. sections so that any multiple of 5 ft. can be procured. Equipped with hooks, so that two or more sections may be fastened together. Will form any geometrical figure.

ONE DOZEN IN A CRATE.

FOLDING WIRE TRELLIS.



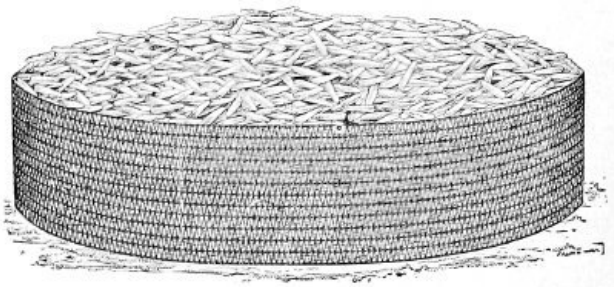
Galvanized, with Hooks.

No. 1A—Height 4½ ft., length 5 ft., uprights ¼ in. steel rods 15 in. apart, horizontals No. 8 steel wire, 4 in. apart, folds to 15 in. wide, 1⅛ in. thick, w't per doz. 120 lbs. ..... per dozen $20.00

For all climbing plants, particularly sweet peas and nasturtiums. Each trellis equipped with hooks so that two or more sections may be fastened together, or that one section may be fastened around a tree. Wires so large that the vine swaying in the wind, is not cut off, as is often the case when poultry-netting is used.

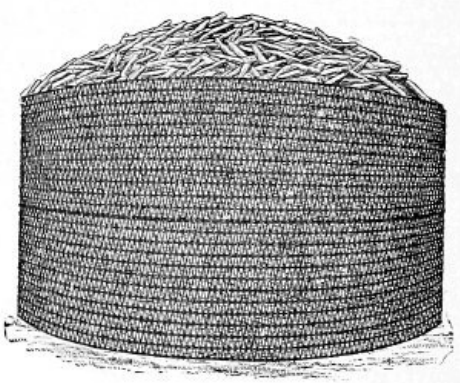
HALF DOZEN IN A CRATE.

STEEL CORN CRIBS.



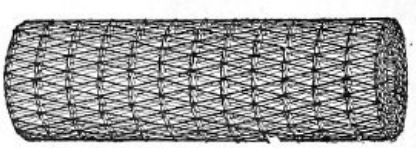
No. 50—2 in. mesh, galvanized steel wire, one section, height 50 in., diameter 15½ ft., capacity 400 bu. in ear, w't about 77 lbs. .each $9.00

By using two cribs one above the other a capacity of 800 bu. can be secured.



No. 75—2 in. mesh, galvanized steel wire, two sections, height 100 in., diameter of crib 11⅔ ft., capacity 400 bu. in ear, w't about 117 lbs. .....each $13.40

These cribs are durable, thoroughly ventilated, vermin and fireproof, stronger and cheaper than wood. They are inexpensive, easy to build or move and can be used as a chicken or yard fence.



No. 50 is put up in one piece or section in a roll as shown above. No. 75 is put up in two pieces or sections of equal length, but packed together in a single roll.

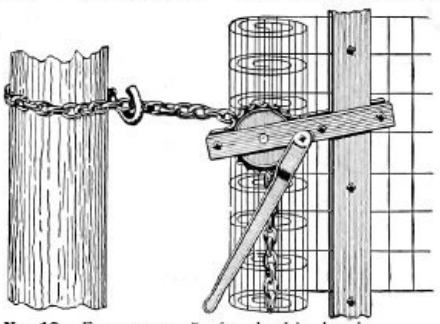
WOVEN WIRE STRETCHERS.

No. 6—SMITH, malleable iron, double cog wheel with 36 in. special wrought steel short link chain, two extra quality eccentrics, steel wire tie chain, 6 in. crank, wood handle, w't per doz. 66 lbs. ..... per dozen $24.00

Especially adapted to stretching long runs of poultry netting, barb, telephone and plain wire and short runs of woven wire fencing. Very powerful and works with little friction. One turn of the crank takes up one inch of the chain. Provided with an eccentric to take up slack when necessary.

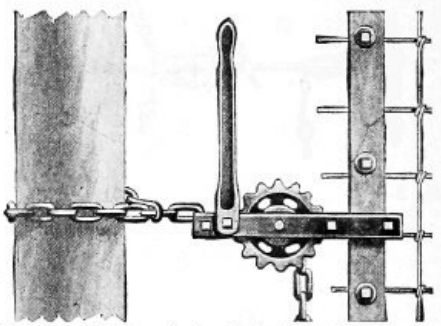
ONE DOZEN IN A BUNDLE.



No. 12—FRANKLIN, 5 ft. double hardwood clamps, with 6 bolts, $\frac{3}{8}\times 2$ in. wrought steel bolted frame, two cast iron cog wheels, 18 in. heavy malleable iron handle, 8 ft. $\frac{5}{16}$ in. wrought steel cable chain with wrought hook, w't per doz. 480 lbs. ..... per dozen $90.00

This stretcher is designed for the heaviest work. It is provided with strong wood clamps that can be bolted to a fence of any height. The chain is long enough to take up six feet of slack at one time. Pulls direct from the center, the two wheels preventing side draft. All parts are made for service.

ONE DOZEN IN A BUNDLE.



No. 07—GIANT, chain fastening, with lever, length 20 in., complete with two 5 ft. maple clamps and all bolts and washers necessary, w't per doz. 624 lbs. ..... per dozen $66.00

Especially adapted for woven fences and is equally useful for smooth or barbed wire. Is self locking, but having no dogs or ratchets. This feature is of great value, furnishing a perfect lock and not depending on friction. It is entirely constructed of malleable iron and steel.

ONE IN A CASE.

WIRE STRETCHERS AND FENCE RATCHETS.

WIRE STRETCHERS.

No. 1—"O. S." ELWOOD'S, flat steel bar double acting, chain fastening, length 30 in., w't per doz. 60 lbs., per dozen..... $10.50

TWO AND THREE DOZEN IN A CASE.

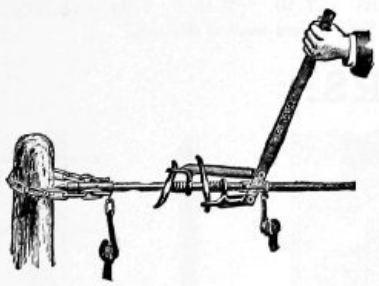
Eccentrics, complete for No. 1 Elwood's, per dozen..... $2.00

No. 2—"N. S." ELWOOD'S, flat steel bar, with self supporting device, extra strong eccentric, chain fastening, length 30 in., w't per doz. 54 lbs., per dozen..... $10.00

TWO AND THREE DOZEN IN A CASE.

Eccentrics, complete for No. 2 Elwood's, per dozen..... $2.00

The "N. S." Elwood's wire stretcher is self-supporting and will stand out from the post in a horizontal position ready for use. It can be placed on the post so that it is always in line with the wire to be stretched. With this self-supporting device one man can handle the stretcher and wire at the same time, while it requires two men to do the same work with stretchers that are not self-supporting. Also please notice that the ¼-in. round rod in the old stretcher has been done away with and a simple slide is substituted which allows the wire to be stretched 3 ft. nearer the post. The wire grips are very strong and durable. The notches on the bar are cut on both edges at the same time, all being exactly alike and in proper position.



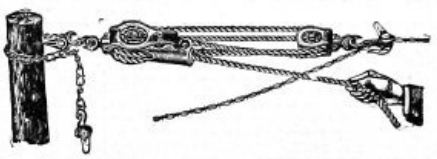
No. 3—STAR, lever, round steel bar, double acting, chain fastening, w't per doz. 54 lbs.....per dozen $13.00

ONE DOZEN IN A BUNDLE.

No. 5—LITTLE GIANT, chain fastening, ⅜ in. jute rope, length 3 ft., w't per dozen 48 lbs.....per dozen $10.00

ONE DOZEN IN A BUNDLE.

WIRE STRETCHERS.



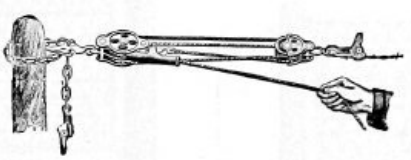
No. 24—STAR STEEL TACKLE BLOCK, steel frame, aluminum painted, malleable iron wheel castings, with swiveling hook, positive rope grip, self-supporting at post, eccentric on rear block is constructed with a hook so that stretcher can be used for hoist purposes, locks and unlocks equally well in any position, furnished with 16 ft. of ⅜ in. rope strung through pulleys ready for use, w't per doz. 48 lbs.....per dozen $14.50

Each block has a removable ⅜ in. steel pin, held with cotter so that a sheave can be replaced when necessary. The side plates have flanged edges so as not to cut rope.

It is locked or unlocked by simply moving the hand to the right or left.

It is a complete hoist of 1,000 lbs. capacity with which one man can raise 500 lbs.

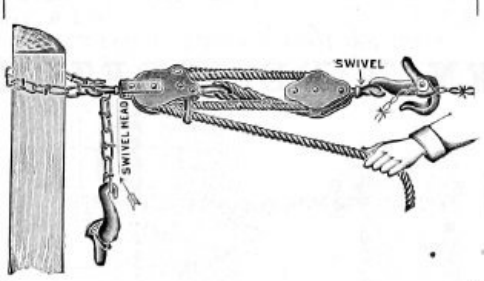
ONE DOZEN IN A BUNDLE.



No. 4—STAR TACKLE BLOCK, malleable iron, chain fastening, four 1⅞ in. pulleys with swivel in each block, japanned. ⅜ in. sisal rope, w't per doz. 54 lbs.....per dozen. $18.00

This is practically the same as No. 24, but is malleable iron instead of steel.

ONE DOZEN IN A BUNDLE.



No. 10—OHIO STEEL TACKLE block, painted red, chain fastening, w't per doz. 54 lbs.....per dozen $14.50

The bearings are large, compact and substantial, and equal to any demand made by the stretcher.

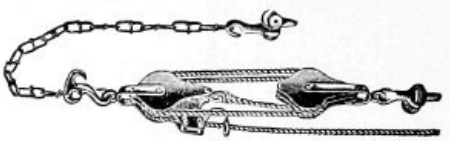
Exceptionally strong and full length chain. Reeved with best quality ⅝ inch rope.

Note carefully the locking device which is extremely simple, automatic, and direct acting. It locks in any position, and is absolutely positive.

The "swiveling" feature of the Stretcher is a decided improvement, enabling the operator to work in corners, etc., to better advantage. It also allows the stretcher to adjust itself to all conditions of the wire.

Can also be used as a Hoist without making any changes.

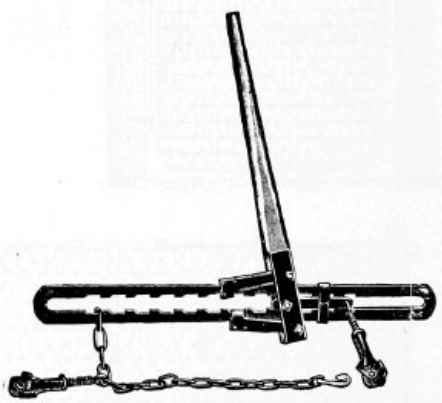
WIRE STRETCHERS.



No. 8—BENEDICT, best steel, light and strong, adjustable lock shoe for 3/16, ¼, 5/16, ⅜ or 7/16 in. rope, with perfect unyielding lock, roped ready for use, w't per doz. 60 lbs....per dozen $18.00

Built on the same principles of the highest priced tackle blocks, to stand hard and continued usage. Acknowledged by telephone and telegraph construction companies to be the very best wire stretchers manufactured.

ONE DOZEN IN A BUNDLE.



No. 14—RUGGLES' PERFECTION, fine planished steel, with straight grain hard maple handle 28 in. long, w't per doz. 120 lbs.....per dozen $60.00

Made for constant use and guaranteed to be satisfactory in every respect. Extra strong and practical and has greater leverage than any other stretcher.

The clamps or grips are wrought steel, having a spring for holding wire. Can never slip, but can be instantly released.

A continuous stretcher, as slack wire can be taken up as often as desired.

It is useful for many purposes about a farm, such as: lifting a hay rack from a wagon, lifting a sick horse, etc.

"Steel" (or homogeneous metal) is more expressly designed for short-line telephone service, where a measure of conductivity can be exchanged for tensile strength in a light wire. Weight per mile ohm, 6,000 to 7,000 pounds.

"B. B." (Best Best) wire is less uniform and tough. It stands a good mechanical test. Weight per mile ohm, 5,500 to 5,800 pounds. It is largely used by some telegraph companies and in railway telegraph service.

"E. B. B." (Extra Best Best) wire is made by improved continuous process from the very best iron. It stands highest of any telegraph wire in conductivity, with a weight per mile ohm of from 4,600 to 5,100 pounds. Very uniform in quality, pure, tough and pliable.

★*FOR MILL SHIPMENT, F. O. B. WAUKEGAN, ILL.*

SINGLE LOOP BALE TIES, STOCK SIZES, F. O. B. CHICAGO.

No. 15 Wire, Size	8½	**9 ft.**
W't per bundle	31	32 lbs.
Per bundle, 250 ties	$4.92	5.18
No. 14 Wire, Size	8½	**9 ft.**
W't per bundle	38	40 lbs.
Per bundle, 250 ties	$5.69	5.97

We give above the average weight of single loop bale ties as furnished by the factory. These weights are not guaranteed, as it is impossible to draw wire so close to gauge that every bundle will weigh exactly alike.

Cross head bale ties are heavier than single loop, varying from 2½ to 5 pounds more than the weight given above, according to length and gauge.

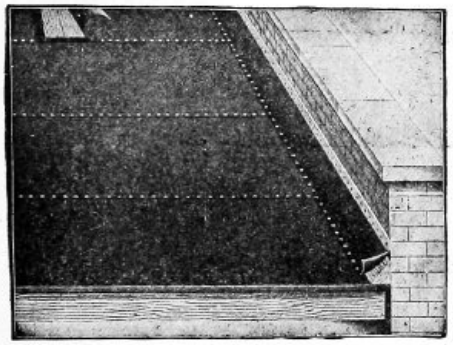
Bale ties of every kind of fastening are sold from the same list. Single loop bale ties are sold at a greater discount than other patterns.

To ascertain the length of tie required, add 3 in. to the measure around the bale when under pressure.

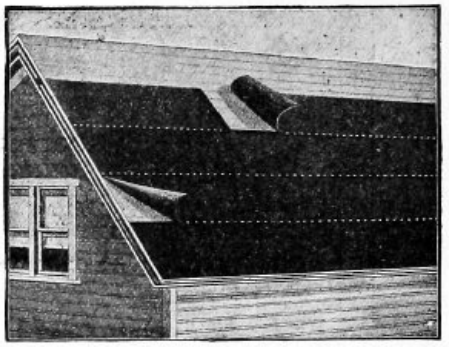
Cost of bale ties is from 40 to 50 cents per ton of hay. For 17×22 perpetual presses, use ties 8, 8½ or 9 feet long; No. 14 wire for heavy work. No. 15 for light work. For 14×18 perpetual presses, use ties 8, 8¼ or 8½ feet long; No. 14 wire for extra or extremely heavy work, and No. 15 for heavy or medium work, and No. 16 for light work. For 12×15 perpetual presses, use ties 7½, 7¾ or 8 feet long; No. 15 wire for heavy work, and No. 16 for medium or light work. For upright hand presses, use No. 14 and No. 15 wire. For upright light horse presses, use No. 14 wire. For upright heavy portable or light stationary horse presses, use No. 13 wire. For upright heavy stationary and beater presses, use No. 12, No. 11 and No. 10 wire, according to the size of bale and number of ties used. It has been repeatedly proved that the use of these ties is more economical to the pressman than the use of wire from the coil. Only the best material is used in their manufacture, and all ties are carefully tested before leaving the factory, thus securing reliability and uniformity.

PREPARED ROOFING.

REV-O-NOC



Applied to Flat Roof.



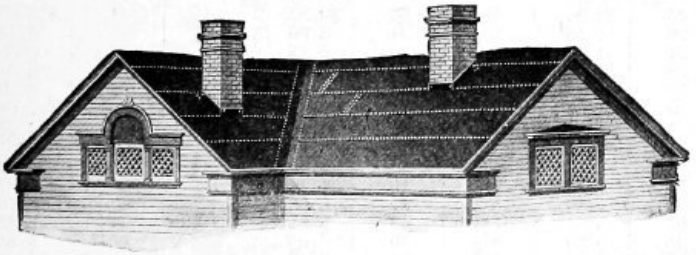
Applied to Gabled Roof.

The Rev-o-noc Rubber Roofing is suitable for all kinds of roofs under any conditions and in any climate. It is impervious to water and is pliable and elastic. It has as a base the best wool fiber felt thoroughly saturated and coated on both sides with a composition of the highest grade materials selected for preservative and weather resisting qualities. It is odorless and will not taint the rain water where used for domestic purposes. Contains no volatile oils or tar to melt in the heat and crack in the cold. Each roll contains one square complete with nails and cement, with directions for applying.

No. 11—1 ply, w't per roll about 35 lbs., - - - - - - - - - - - - - - - per square $2.25
No. 12—2 ply, w't per roll about 45 lbs., - - - - - - - - - - - - - - - " 3.25
No. 13—3 ply, w't per roll about 55 lbs., - - - - - - - - - - - - - - - " 4.00

One roll, which contains 108 sq. ft., will cover 100 sq. ft. of roof.

CRUSO.



Two-ply consists of two sheets (aa) of the best quality of tarred felt, with a layer of waterproof composition (b).

Three-ply consists of three sheets (aaa) of the best quality of tarred felt, with two layers of waterproof composition (bb).

Cruso Roofing consists of two or three sheets of thoroughly saturated all wool felt, interlaid with an insoluble waterproof pitch, this composition being forced between heavy, hot rollers, making a solid, flexible sheet. It is put up in measured rolls containing 108 square feet, or enough to lay one square and allow for the necessary two-inch lap. The Cruso Roofing will stand any climate, is wind and water proof, and on account of its composition is practically fireproof. It will not rust or corrode, and is impervious to steam, acids, vapor and gas.

No. 22—Two-ply felt, w't per square about 45 lbs., per square $1.60
No. 23—Three-ply felt, w't per square about 70 lbs., " 2.10

ABOVE PRICES ARE FOR FELT ONLY.

It requires 1½ lbs. tin caps and 1 lb. roofing nails per square. We recommend the use of 2 gal. coating per square. The better the roof is coated the longer it will last.

CRUSO ROOF COATING.

5 gal. packages, - - per gal. $0.60
10 gal. packages, - - " .40
Half barrels (20 to 30 gals.), " .30
Barrels (40 to 50 gals.), " .25

W'T ABOUT 12 LBS. PER GALLON.

This coating is ready for immediate use, and is particularly desirable for all paper, felt and composition roofings. It protects new roofs and prolongs the life of old roofs.

AMATITE.

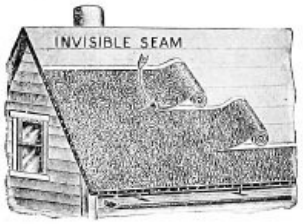
Enlarged Sectional Diagram.

Consists of two sheets of wool felt evenly saturated with pure refined tar and bonded together with a layer of coal tar pitch. It is mineral surfaced when manufactured and requires no coating when laid; simply cement between laps, nail and your roof is finished. Amatite roofing is put up in measured rolls containing 110 square feet, or enough to lay 100 square feet and allow for three-inch lap. Directions for laying, which are very simple, will be found inside each roll.

No. 41—Amatite roofing, including large head nails and cement for laps, complete weight per square about 100 lbs., per square, - - - - $3.25

ROOFING, ASBESTOS, WRAPPING PAPER, ETC.

ASPHALT ROOFING.

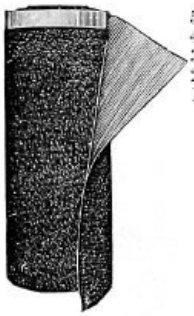


As Applied to Frame House.

3—Screened gravel.
2—Trinidad asphalt.
1—Felt.

"Tiger Brand," in rolls 32 in. wide, by 40 ft. long, containing 100 sq. ft., w't per roll 80 lbs ..... per roll $4.50

The three layers, felt, asphalt and screened gravel, make as good an inexpensive roofing as it is possible to produce. Contains no tar, always tough, flexible and durable. Suitable for either flat or steep roofs. Never rusts or decays and needs no paint or coating. Easily laid by any one. Shipped in rolls complete with trimmings as follows: ½ gal. liquid asphalt, extra large head nails, packed in core of roll.



5—Screened Gravel.
4—Trinidad Asphalt.
3—Burlap.
2—Trinidad Asphalt.
1—15 lb. Asphalt Felt.

"Ready Rock," in rolls 32 in. wide by 40 ft. long containing 100 sq. ft., w't per roll 150 lbs★..... per roll $5.00

The five layers of felt, asphalt, burlap, asphalt and gravel constitute a combination of strength, durability and absolute security against leakage. Does not contract and expand with varying temperatures, or dry out and crack. No coal tar used in construction, and does not run or evaporate. Will not make the water taste. Seams are invisible and waterproof. The gravel is screened very fine and pressed into the asphalt by rollers. Will not become detached by the wind and weather.

It is easily and quickly laid, and requires no expert knowledge. Two inch space is prepared for the lap (making the net width 30 in.). Half gallon of asphalt and ¾ pound of nails are included with each roll of roofing. A knife and brush (for applying the cement) are furnished free of charge with each shipment.

SHEATHING PAPER.

Tarred, 32 in. wide, (16 lbs. per 100 sq. ft.), per 100 pounds..... $2.00
ABOUT 450 SQUARE FEET IN A ROLL.

TRIPLE, Steel Straps, Pins and Rivets, Gray Iron Sheaves and Steel Shells.

Size (length of block)	6	8	10	12	in.
Sheave	3¼×1	5×1¼	6¼×1⅜	7½×1½	in.
For rope	¾	1	1⅛	1¼	in.
Weight	8	18	32	48	lbs.
Each	$3.25	4.75	7.00	11.75	

The steel straps of these blocks extend below the pin and support the entire strain. The sheaves are accurately turned and are interchangeable. The shells are superior to soft steel and provide secure fastening for pins.

We ship all single blocks, one-half of the double and one-third of the triple with beckets. If a greater proportion are ordered with beckets, we make a small additional charge.

SNATCH BLOCKS.

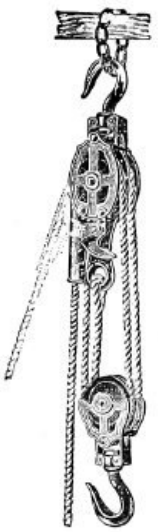
Each	$4.75	5.75	8.50	10.00	

SAFETY HOIST BLOCKS.

MALLEABLE IRON.



This hoist elevates, lowers, locks and unlocks with one rope only. The operator has only to move his hand to the right or left and elevate or lower the load at will. The heavier the load, the better it holds. It can be used in any position, perpendicular, horizontal or at any angle. It is used in factories, foundries, machine shops, mills, warehouses and quarries; also by carpenters, painters, masons and mechanics generally. It is indispensable on the farm, for erecting wind mills, taking out and putting down wood and iron pumps and other general work.

ALL HOISTS SHIPPED WITHOUT ROPE.

Steel Pins, Two Sheaves to Upper and Two Sheaves to Lower Block, without Rope.

Nos.	16	14	13
For rope	3/8	3/8 & 1/2	1/2 & 5/8 in.

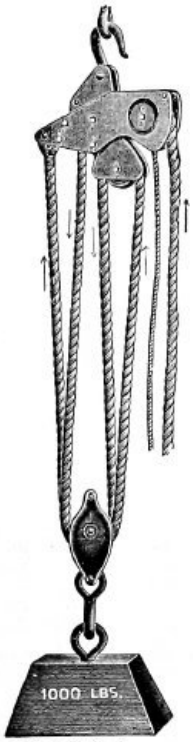
Per set	$1.00	1.50	2.00	1.50	2.50

Nos.	B6	B7	B8	B9
For rope	3/8 to 3/4	1/2 to 1 1/8	1/2 to 1 1/8	1/2 to 1 1/8 in.
Number of sheaves	3	1	2	3
One man can hoist	900	300	600	900 lbs.
Capacity	4,000	3,500	7,000	9,500 lbs.
Weight per set	9	18	30	43 lbs.
Per set	$4.00	8.00	12.00	16.00

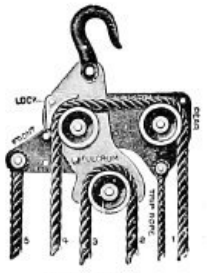
A prominent feature of these blocks is that they can be adapted to any size rope for the reason that the shoe is adjustable. The bolts which hold the shoe in place pass through slots in the plate, so that the adjustment can be easily and quickly made.

These hoist blocks are neat, strong and reliable. The plates and pins are steel. The body is strapped to withstand hard and constant use. The hoops are steel forged. With the use of the brake the load can be held at any position desired. The brake is absolutely safe; the heavier the load, the better the grip. It is easily worked—a slight movement of the hand to the right or left engages or disengages the brake. It elevates, lowers, locks and unlocks with one rope only.

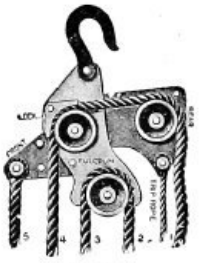
BURR'S STEEL, WITHOUT ROPE.



Nos. 3 to 6.



Unlocked.



Locked.

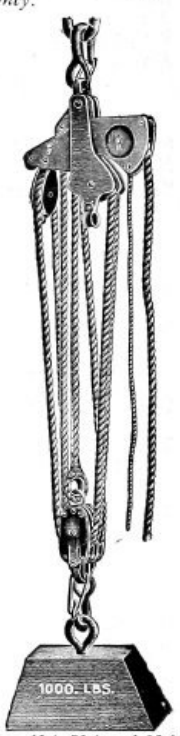
With Three Sheaves to Upper and Two Sheaves to Lower Block.

Nos.	3	4	5	6
For rope	3/8	1/2	5/8	3/4 in.
One man can hoist	300	350	400	450 lbs.
Capacity	800	1,500	2,000	2,500 lbs.
Weight per set	4	8	12	16 lbs.
Per set	$3.00	5.50	7.00	8.50

With Five Sheaves to Upper and Three Sheaves to Lower Block.

Nos.	4 1/2	5 1/2	6 1/2
For rope	1/2	5/8	3/4 in.
One man can hoist	600	700	850 lbs.
Capacity	3,000	3,500	5,000 lbs.
Weight per set	7	16	20 lbs.
Per set	$10.00	12.00	14.00

In the Burr Safety Lift the locking is done by the positive action of the load on a lever, the most powerful and unfailing of the elementary mechanical principles; will do the same work as the differential chain block. Sustains the load at any point without fastening the rope. Will lock securely on wet or greasy rope. Never cuts or wears the rope. Never hard to unlock. The heavier the load, the more secure the hold. Never fails to lock.



Nos. 4 1/2, 5 1/2 and 6 1/2.

ROPE.

MANILA BRANDS.

Rev-o-noc Manila is made of the purest and finest grade of Manila hemp, absolutely pure in every particular.

Rev-o-noc Manila is carried in 3 strand, with the exception of ¾, 13/16 and ⅞ inch, *which we can supply in both 3 and 4 strand.* Please state which is wanted.

Sulu Manila, guaranteed to be *pure Manila.* The fibre in its manufacture is not of as good color or length as in Rev-o-noc. This is the same Manila we have sold for years, but to distinguish it, are now branding it "Sulu."

Sulu Manila is carried in 3 strand with the exception of ¾, 13/16 and ⅞ inch, which is 4 strand.

SISAL BRANDS.

Rev-o-noc Sisal is made of the purest and finest grade of sisal hemp, absolutely pure in every particular.

Eagle Sisal is a first-class commercial Sisal Rope, with a mixture of Istle in it. We have sold it for several years and it has given good satisfaction.

Sisal Rope is made in *three strand only.*

In ordering always state the brand of Manila or Sisal desired.
